Fellow hams, it is now 1753 UTC, Dec,3,1999 and Tom Steckbauer,KE9RY and I just finished a lengthy phone conversation which I inititiated after having rudely hung up on him previously. He is convinced that I never said anything derogatory about the memory of his late daughter and in turn I want to publicly apologize to him for anything I posted which may have hurt or antagonized him. I now believe that Mr. Steckbauer realizes he was being used by infamous scoundrels who lie in wait on a frequency in order to get decent hams in trouble as well as one who reports ham radio matters to Rabbis as well as to family members in the most sneaky underhanded way conceivable. Although I have not replied to Riley which will result in the revocation of my license, nonetheless I now look forward to the rest of my days on ham radio as one in peace and harmony with a fine gentleman from Eagle, Wisconsin. I also spoke to his lovely wife Barbara, now recuperating from a hospital stay, in order to wish her a speedy recovery and a Merry Christmas. All animosity between Tom and me is OVER which will irritate the hell out of troublemakers and instigators but will please all those who are eager for peace on 14.313, AF2Y included.

Hello All:

Well, I don't typically respond to these types of "discussions", however, since I seem to be involved, somewhat, in the topic "oh well".

I do not care what you do, how you do it, or where you do it just as long as I don't have to deal with it.

Do you go to a restaurant and not get asked "Smoking" or "Non-smoking"? How about a hotel? Better yet how would feel about buying food from a restaurant where the cooks/chef is smoking while preparing YOUR food?

Well, in a "nutshell" it comes down to this, choice. Isn't it nice that we have a choice?

So, with that said,

Thank you to all who replied (about the items for sale), the DX-70TH is still open, as is the IC-2710H, and the DTR-1200L.

Cheers to all,

Cliff Owen

Sweetie, you need to take a remedial reading course!

The ARRL comments on the FCC restructuring proposal include
a request that the current (no-code) Technicians be grandfathered
onto all the same frequencies now available to General licencees
for radiotelegraph operation.

I find it totally amazing that someone born in the United States, could have such a problem with the English language. Not that I'm any kind of scholar, mind you, I'm referring of course to my ex-good friend, Tom (KE9RY). After inviting himself to visit the elite east coast home of Doc (AF2Y) and having the Moron, Lenny, tag along, I am now hearing Tom, Lenny, and others fabricating stories of how poorly Doc, treated the afore mentioned people. As the story goes, Tom's daughter met an untimely death, and Doc welcomed him and his wife into his home, and did all he could to console the couple. Although, I did not hear the conversation on Amateur radio, between Doc and Tom, I did hear a tape of said conversation between Doc and Tom, where Doc stated "I was very busy, at the time, and I made time for Tom and Barbara in their time of need, to have them to my home, and we all went out to lunch together". Somebody please tell me, how this can be misconstrued as anything but total compassion, from a very caring and decent person. This is my own opinion, I believe we are dealing with some very sick individuals, that will play on the death of a young woman in this fashion. Tom, I'm sorry for the loss of your loved one, but letting these sick people use the memory of your daughter, can't be good for you or Barbara. As I stated before, I heard a tape being played 2 weeks ago on Saturday, of the above transmissions between Doc (AF2Y) and Tom (KE9RY)

Source record: 126006

Why didn't "Boombox Jimmy Dale get popped for being part of the qrming team "INTER" and "FERE" You know them, AF2Y and KE4TEW, KE4TEW is on probation for one year. but do you know what he was been doing since then, he has been assisting AF2Y qrm qsos just one kc from 14313, looks like "Boom Box Jimmy should have been popped along with AF2Y. We know Jimmy whined to Hollingsworth about his sick wife and he needed ham radio sob, sob, Riley being the kindhearted gentleman he is relented and let Jimmy back on the bands if he would straighten up his act. And, if he got no letters of complaint about "BOOMBOX"!!! Let me tell you forum, he did get letters about "BOOMBOX and his qrming. Riley will just have to learn the hard way, you can not trust those "GOODFELLOW" members!!! It just seems there was one less action on the qrm team of AF2y and Ke4tew than there should have been, Lets send BOOMBOX to OTK land Mr R!!! He will never change , it is in his blood to cause trouble.

AF2Y, don't blame other people for your troubles! You were told to shape up and knock the qrming and the other nasty things you have indulged yourself. (God knows Why). Now the chickens have come home to roost. Why did you disregard the warnings? Don't cry and point the finger at other people , point it at yourself. Pay attention to Mr Riley Hollingsworth, Knock it off!!!

Getback.. PS, you can still be a schmuck on this newsgroup, and I am sure you will.

I have gotten a ton of e-mails asking when and how I'll reply to the letter from Riley Hollingsworth. Let me clear the air. I am not responding to him! My rig's as clean as a hound's tooth. I am constantly told that I got into trouble thanks to tapes sent to Riley by K2IVK and e-mails from him, KT4TR, "Queenie," AB4PW, W1ZZE(I get airsick listening to this guy), K2SOP, WA2EXQ and Cheetah, "anyways" from Eagle Wisconsin and a few other simps and simpesses. I call this clique the SAPs(Self appointed policemen) and to think that they could have influenced opinion against me is ghastly. I have no other recourse than to admit defeat(both of them).

>That would be the second century. Right?
>Thus, 2000 is the END of the 20th century.
>And 2001 is the beginning of the 21st? Right?

I suppose there should be a distinction between "The Second Millennium" and "a millennium." If you're a Christian and want to celebrate Jesus' birthday, then do so on 1/1/2001.

By the definitions in arithmetic, a new "decade" begins when the tens column increases by one (and hence, the ones column is zero); a new "century" begins when the hundreds column increases by one (and thus, the ones and tens columns contain zeros); a new "millennium" begins when the thousands column increases by one (and so, the ones, tens, and hundreds columns contain zeros). So, arithmetic tells us that when we increase the "number" (not necessarily "year") 1,999 by one to get 2,000, we've moved into the next decade, century, and millennium.

It's not that one person is wrong and another is correct, it's more a matter that our calendar isn't synchronized with our base-ten counting system.

I say leave them BOTH alone. The truckers are not intentionally causing interference, hell they're mobile. I suggest that Intercon work it out amonst themselves and the truckers. Is this going to be another example of a "net" thinking they have priorities over other amateurs on a given frequency? I hope not.

There was no sarcasm intended I don't do sarcasm it is non productive.
I was try to be a little satirical about hams that twiddle for twiddling sake. It is a compulsive disease with some. I guess as a spotty youth I was tempted to think that I could improve upon the manufaturers alignment and no doubt had I a well equiped bench with all of the neccassary tools and instrumentation I could.
When I got demobed I did a session on final test for VHF sets as used by the home office. I and another of the guys decided to see how many we could do in a day and keep a high standard. I could do 17 transceivers a day including finding all of the production faults and miss wirings and a complete alignment to acheive the specification threshold etc. This was only possible by knowing the sets thoroughly and having the correct method On the IF we used a damp and tweal method which I doubt anyone just twiddling would know about and was certainly something that was not written down anywhere. This method for the IF section consisted of a capacitor and resistor on a pair of croc clips this was place accross the tuned section that was not being tuned so that the section being tuned was clearly visible. With IF

transformers designed to be critically coupled sharp sided and flat topped this was the only way to do it. I'm sure that anyone that has one of these sets to modify for 2m would not be aware of this method and would therefore only degrade the high performance of the set. When it came to the RF section knowing whioch coil to put where how to bend it how to find the correct tap for S/N and threshold plus adjacent channel rejection was also more or less a trade secret. anyone jumping in would only degrade the performance once the coils were adjusted they were glued to their formers. Any twiddler could only degrade performance. Tuning to favour a spot frequency could only produce an unstable set which would not perform well over the band.
These limitations are something which are generally applicable to any set and the adjustments for any particular design to make it perform to ALL of its spec are quite critical you will not come upon them by accident.

Now what happens to these perfectly good sets that someone with good intentions has been around with a twiddling stick. For instance how many hams have a little plastic tool with a bit of brass in one end and a ferrite in the other?
Who knows what it is used for?

>Indeed, the
> FT101 can be adjusted for max smoke with or without the aid of a power
> meter; taking care not to overdrive the finals and to check
> neutralisation (all in the manual).

And what garauntees do you have that once you are on air that there are no spurious emmissions or that the carrier is clean and that the modulation is clear and readable. plus 101 other problems. Some sets need to be flat tuned to keep them on the ground tuning for maximum smoke is not an ideal method for producing a stable well behaved set. The manufacturer faces all of these problems in the design stage and after extensive testing comes up with a spec for the production model and a method of ensuring that his product meets the published spec. Those specs are in competition with othe manufacturers and merely to attrct orders the manufacturer wants to claim the best possible spec for his product. However the wise manufacturer does not claim more than he can acheive. Tye methods that he uses are trade secrets you will not hit upon a better method by accident no matter how knowledgable you are.

> You will note from my comments above that the FT101 series is over 25
> years old. Modern it is not!

Any set designed and built in the 70s was using modern types of components Good commercial compomponents had started to evolve from the experience that manufacturers had gained from supplying the military market. They understodd the use of good practices in manufacture and there was little point in falling far below those profitable methods with the commercial product. Good methods mean optimised profits and sales they don't move away from them lightly. An FT101 is a modern set despite its 25 years.

I would be very cautious about buy a S/H set because of the eagerness of Hams to improve on what the manufacturer has worked hard and long into the

night upon.

Gary7SLL, Motto don't twiddle unless you have a properly equipped bench and you have the service manual for the kit. If you are pathologically inclined to twiddle then build a kit but don't spend a grand on a bit of kit and immediately turn it into something worth a tenner for scrap.

Lloyd, if your comment, "As usual, can't make a complete sentence," is aimed at my writing, let me enlighten.

In the middle of this century when I grew up, complete sentences were indeed a requirement of good writing. From there things changed fast: The incomplete sentence became fashionable in the writer's art form. After all, it mirrored how we talk, so proponents argued, writing should resemble real life.

And so the incomplete sentence became the hallmark of many great writers. Let me give you an example: If I were to expand on my praise of the ham on this NG who advocates our participation in building the Mars probe, I might quote his beautiful prose, following it with a pithy "Impressive" -- a one word incomplete sentence. Like the proverbial picture, it tells a thousand words.

Thus, respected Lloyd, my writing of incomplete sentences is intentional. If you have a better technique that doesn't call for a return to our stilted past, I welcome it.

Bob Sherin, W4ASX
Miami, Florida

4515. CONFIRMED! IT IS AF2Y!

Please check out the NEW Riley's R.A.I.N. Report and Hollingsworth's comments. It seems there is much more there than a little airing of disputes on the airwaves by Doc. It seems Charles has some SERIOUS technical questions to answer!

Has anyone heard the demented dentist from Clifton on 14313????

Now it seems like amateur radio is alive and well without the two biggest trouble makers on the band. AF2Y, and KE4TEW were causing all kind of problems with their operating practices and now Riley has kicked both of their butts. Thanks to Riley for taking care of these two misfits. I will bet that AF2Y does respond to the FCC complaint letter, are there any takers for this bet?????

Paging micks are usualy balanced but are easly wired for unballanced
use. Pro units (shure, EV, etc) are usualy 200 ohms most of the import
units are 600 ohms. A transformer is not nessary though you may have to
tweek the mic gain pot. I recomend that you remove the XLR and use an
original radio plug as this will make for simpeler wiring. If the mike
is wired for ballanced operation, the wiring should be as follows: pin

1 gnd, pin 2 high, pin 3 low. Most of these mics have 4 wires and a shield, the extra 2 wires being for the PTT and usualy nether is grounded. You should be able to easly wire it for your use, keep in mind that extra funtions like channel control will be right out.

You can bet the farm that AF2Y, known amateur radio qrmer will pull out the "Jew" card in his latest "Tiff" with the FCC. He has never failed to do so yet, Maybe Riley Hollingsworth will not be intimated this time,,But you never can tell. His boss might tell him,"We must be politically Correct, we must permit this latter day Moses to interfere with impunity". Stay tuned and see if he will bow under pressure. Wonder why Phil didn't pull the "Black" Card ala O. J. Simpson.

It looks like The recently caught by the FCC, Clifton QRMER, AF2Y , is now sucking up to KE9R. What gives? Could it be that Dr Hate wants to use Tom to mediate his qrming letter with Riley H. Maybe have Tom tell MR Riley what a nice religious minority representitive Dr Hate is. (ETC)

You can bet that the Sneaky ,evil, AF2Y is planning to use Tom to his advantage. As usual , AF2Y is up to no good. Enjoy being used Tom, you are not the first. You will not be the last either.

>"last of this millenium"... heck, we still have over a year left.)

In terms of just arithmetic, to go from the number 1,999 to 2,000,
the tens (decades), hundreds (centuries), and thousands (millenniums)
columns all increase by one, and thus entered into the next decade,
century, and millennium. The present ambiguity resides with the fact
that our calendar is not synchronized with our base-ten counting
system. If you understand arithmetic, you'll be more sympathetic
to the difference of opinions.

KT4TR used to have a nasty habit of prying into the private lives of 14.313
inhabitants. As one example, W4JYZ had gotten in trouble with the law and had
to report to a probation officer. Donald readily admitted his wrongdoing and
has changed remarkably for the better. KT4TR used to call his probo officer in
order to get him tossed off ham radio. How's that grab you for sneaky actions?
TR used to read private credit reports as well as police reports and mortgage
foreclosures also. Riley stopped him in his tracks and now he's become a
"model" ham as is his sidekick "Queenie",K3QAM,who's heard regularly on .313
cackling and laying eggs. K3CQR claims that somewhere in print is an article
about KT4TR's being hit with a $2,500 fine for insulting the decency of ham
radio.I'm looking for the so-called HARD COPY.

>being tuned so that the section being tuned was clearly visible.

See alignment instructions in handbook for KW2000b
>how many
>hams have a little plastic tool with a bit of brass in one end and a ferrite
>in the other?

Not me. I'd forgotten all about these useful little aids. Haven't seen
one since Grace Archer died.

<snip everything else. All agreed with>

Now my problem. I have a 101ZD MkIII, which suffers from intractable RF
feedback on all bands above 40 Mtrs.

I have removed all ancillary kit (Homebrew keyer, Datong FL1, Vogad
amplified Mic., etc.) I use a link-coupled ATU with current-sensing in
each leg of open-wire feeder, allowing precise balance of feeder
currents.
I have decoupled/ferrite-beaded/rf-choked everything in sight, but the
problem persists. Any ideas, is this a 'known' fault?

I've had two suggestions so far.
1. Phone patch socket.
2. 7Mc trap on trimmer board.

1. has been removed and decoupled.
2. not yet investigated.

All ideas, thoughts, definite whizz-bang 100% solutions welcome.

Ay thengyew.

I think you just hit the nail on the head. In our society today, we are so used to counting in a base zero system. At the meridian of time when we went to our calendaring system, they had no concept of zero. But, it doesn't change the fact that the millennium actually starts on 1/1/2001.

I think advertisers and promoters would be better off pushing the end of the 1900's or the beginning of the 2000's. Oh, well...

Polly, you're a sinister anti-semitic old man. Maybe you have conned K2IVX into believing that you're no anti-Semite, but not me and your bringing up Jewishness as my escape mechanism is more proof of it. I deserve no special consideration whatsoever and if I ever write to Riley, I'll admit my guilt. If any ham's signal is too wide, then he has a right to be sanctioned and I was indeed wide. If ever I answer him I shall not employ the old excuse "But you never did anything to so and so for his wide signal." I don't play games with authority and I'm sure that Riley will take the same appropriate measures with them as he did me. My argument has nothing to do with his displeasure at my wide signal but rather the feeling, but I cannot prove it, that I was set up, tricked and reported by you and your revengeful friends and all because I never bought KV4FZ's merchandise. Furthermore I was warned this was going to happen by Don Anderson, W4JYZ, who repeatedly told me on the air, "Watch out Doc. There's a lynch mob out there and they're gonna get you." I scoffed at the warning but Don was right, or so it seems.All you and your friends are doing by hammering away at my misfortune is rubbing it in which I cannot control. As I posted previously, at times evil prevails over good and it's happened to me. And I'm angry enough over it to never respond to Mr.Hollingsworth which will make you and your pals exceedingly happy because you all know that by not replying, my license will be revoked. Oddly enough, the one man who should be gloating and rubbing it in is KV4FZ and I have yet to read a single post from him to that effect. Perhaps Herbie does have a good side which heretofore has been dormant? I guess you'll get a bigger kick which I get the cease and desist for not answering and finally go off the air. I tried my best but lost. You won. Congratulations.

Source record: 125889

I can't write individual replies to all, friends and foes, who've e-mailed me about the Web Extra posting, so allow me to explain a few things.
First of all, I don't know where the "mobile"mention came from because I haven't run anything from a car since 1980. I used to use a Swan Cygnet 270 for mobile operations but it got to be a hassle taking it out, putting it back, taking off the Hustler resonators,putting them back on, so I sold everything. Also I tried 2 meters for a while but found it boring.
Yes, I had been previously warned by Riley via e-mail regarding on the air conflicts. I took it seriously and immediately became a pacifist because the e-mail plainly stated that if I continued to air personal conflicts, my license would be revoked.
Even though the end of the posting mentioned about warning me for intentionally interfering and slander, never in 30 years on the air did I ever receive an ONV or NAL for jamming and have never been to any court for slander. And yes, that particular piece did shock me but a sign of maturity is to accept authority which I'm doing.
NO, I BEAR NO MALICE against Riley. He's doing his job and I was wrong. The malice I do bear however is against the JACKALS on 14.313 who planned and carried out an e-mail campaign of anti-AF2Y propaganda, flooding Riley day and night. They,not I, are the scourage of this hobby and apparently their conniving and on- the- air instigation is going unnoticed.

it depends on where you live.

some countries such as Australia (2000 olympic) takes 2000 as a 21st century to take the advantage of wording by saying it is the first olympic of the century..... Japan is also the same... last time when I was there everyone said the end of 20th century is right there... they don't even have the term "millenium" because they use the beginning and end of the centuries to describe 1999/2000.
in Canada and U.S., I think most people take 2001 as a start of 21st century.

Yes and then next to the "posted by" information "highlight" the "white area" to see your IP address and that of others. Nice touch they added to the board. I just wonder why they made the lettering in white with a white background? I would imagine it's because they didn't want you to know about it. Boy has it been helpful. It's visible when hightlighted. Anonymity somewhat "disappears" when posting to that "So called" net's message board. This information is presented as an Amateur Radio Public Service message from a friend of mine at MIB headquarters.

For all matters relating to time, the official legal reference in the US
(by act of Congress) is the US Naval Observatory.

See http://aa.usno.navy.mil/AA/faq/docs/millennium.html for the official
word on when the 20th century ends and when the new millennium begins.
Hint: It is Jan 1, 2001.

Less legally authoritative, but nonetheless respected, references are the
World Book Encyclopedia entry for century, and the late Issac Asimov
(biochemist, mathematician, biblical scholar, and prolific science fact
and fiction author) who devoted a chapter in one of his books to the subject
of the Common Era calendar, including the story of Dionysius Exiguus
(complete with primary source references).

They all agree, Jan 1, 2001 is the first day of the 21st century and the first day
of the new millennium for the Common Era calendar. (Of course there are other
calendars where the millennium has already come and gone. Calendars are
after all arbitrary methods of reckoning the passage of time.)

[...]

You are quite right that 2000 (twenty-hundred -- get it?) is the last year of the 20th century and the last year of the second millennium. January 1st, 2001 is the beginning of the third millennium. The boobs, and the media boobherds, have it wrong as usual.

But you made a slight error about our basic calendar being instituted at the "meridian of time," by which I assume you mean what we now know as the year 1 A.D.

It wasn't instituted until many centuries later, around the time Christianity was made the state religion of what was still called the Roman Empire. The man who came up with this idea was a Christian with the unlikely name of Dionysius Exiguus.

Prior to this time, the Romans had been using a calendar based upon the putative founding date of the city of Rome, and the Greeks had used one based upon the year of the first Olympic Games. The other Aryan peoples had their own systems, or used one of the Classical ones.

Also, it's not entirely correct to say that there is no zero in our present calendar system. In our system, zero is a _point_ of time between the years 1 B.C. and 1 A.D. It is not a year.

And that is quite sensible. When counting things, whether they be people, cars, posts, or years, the first item is always numbered one, not zero. For example, the winner of a race comes in "first," not "zeroth," and, as we all know, "Herbie is number one."

With every good wish,

Kevin, WB4AIO.

Los Angeles is blessed with the biggest, baldest MORON Ham operator.

Yes, it's Jeff 'JERKOFF' Jurenka....KD6GDB.. He tapes conversations on
the 'Bad Boys' 2 meter repeater 147.435 Mhz., and sends them off to
Riley Hollingsworthless...

But he ALSO runs a web site on the very same repeater, trying to
be the good guy..everyones friend and hero....Jeezz....

This guy needs a clue..Oh, and he cannot even spell right.
Obviously did not graduate from high school....The web site
is an embarrassment to all on the repeater!

It's not looking good for Mars Polar Lander.
We can keep our fingers crossed, but the outlook is grim.

Perhaps the general rise of incompetence in U.S. government
agencies has also hobbled NASA and its engineering assets.
Is it time for private concerns to step up to the plate?
Is it time that we went beyond putting repeaters in orbit,
and did something new, exciting and scientifically valuable?

We have the people within the amateur community
with the knowledge needed to create an interplanetary probe-
perhaps even one that could land.
Our community has built many spacecraft.
We have found the funds- done the work.
We have successfully negotiated for space on launch vehicles.
Our community has leaped these high hurdles many times.
Should we set another, higher hurdle
with which to challenge ourselves?

It would not be easy.
Opening new worlds is never easy.
But our community could do it- no question.

Shall we?

That would imply that on the day you were born, you were already
one year old. But of course, you were zero years old, in your first
year of life.

Imagine that -- during your first year of life you were zero years old.
Only after one whole unit (people, cars, posts, or years) has passed,
do we apply a count of one. Prior to that, there are zero whole items.

Now if you want to change the unit of measure to say, months, *during*
your first month of life, you were still zero months old. Weeks?
During your first week of life, you were zero weeks old. Days?
During your first day of life, you were zero days old. Hours?
During your first hour of life, you were zero hours old. Minutes?
During your first minute of life, you were zero minutes old.

Counting *does* begin with zero; it's not until a *whole* unit of measure
has passed to we apply a count of one.

>Be real. One employer out of five thousand may do this

And of course you have statistics to prove that claim. Lloyd claims
to be majoring in computer science at some college. You'd be hard-
pressed to name one computer corporation that doesn't conduct
thorough background investigations on all applicants.

>(and only if they have to much time on there hands).

Hiring a problem employee can bring years of grief and financial
loss, not to mention moral problems, to the company. You'd better
believe savvy employers will conduct complete background checks
utilizing any and every available means, especially those which
are at no cost to the company.

>In any case, at Lloyd's level (future 7-Eleven employee) why would they

Sir:

Your problem is not your inability to send and receive CW. It's the fact that you are neither capable of spelling nor capable of constructing a literate sentence -- your posting quoted below is ample evidence. To send CW, one must spell the words correctly and must construct the sentences so the individual on the receiving end knows what's being said. Unlike the Internet, where the sender can spell-check and edit before hitting the "Send" button, CW is instantaneous. The sender must think and send at the same time -- a skill that befuddles many people.

And please stop advertising the claim that you are a Southerner. I am a Baptist, a Southerner, and a Democrat. I learned to read, even in the impoverished school system of Bolivar County, Mississippi. I married an Alabama girl who can read and write, too.

I have an ICOM-255A mobile transciever, that I was given. It works great on all 2M frequencies, and I can not complain. However, it does have the ability to store 5 freq. in memory, as long as the power is kept on the radio. In other words, if it's plugged into your car socket, the car supplies the memory voltage for the radio, when it is off. Well, it 'does not' work. It looses all memory when turned off, even with power still on it. I have the schematics to trace it down, but wondered if anyone had an idea on what to look for???

Maybe that WAS the problem... they used contractors instead of NASA
engineers.

Hello--

Tobacco smoke isn't as dispersed (diluted) when compared with other environmental smoke. The air doesn't get exchanged very often in most rooms-- and especially so in cold climates.

The worst repair job I ever endured was fixing an RCA tubed color set that resided above the bar in a bar and grille which apparently specialized in fried foods.

The exterior and interior of the set featured an orange/brown coating of dried crud that turned to smelly slime when wiped with ammonia-based cleaner. The crud was also conductive and had caused a problem in the HV power supply due to carbon-trail tracking.

The only similar problem I ever encountered was an ancient black-and-white TV in the living room of a very poor, elderly couple who heated their home by kerosene space heaters. The screen and CRT were coated with black, oily soot. (BTW, the house was threadbare but spotless.)

Any variety of smoke residue around electronics rates as bad news .

73,
Brad AA1IP

Not only does CW hide poor spelling, but it seems to promote it.

Rumour has it that the Fed's super computers do (or can) monitor the newsgroups (e-mail?) looking for key words like 'bomb' (whoops!) so they can do a more detailed study on the poster'. Hope it's not true but they must be really tempted to do it.

>> >And you'd also be in "year one" of life, if counting years.

>> But zero years old.

>No, not zero days, and not zero years: some fraction of a day and
>some fraction of a year old, obviously -- and somewhere within that
>interval we call year one.

So you're now conceding that counting does not have to begin with
one but some fraction thereof? If we take the "year" as our basic
unit of time measure, a newborn infant is zero years old. If you
want to refine that unit of measurement to say, twelfths of a year,
i.e., months) that newborn is zero twelfths of a year old. You'll
have to keep refining your unit of *measure* to eventually get a
count of one.

We can go the other way -- if we were to take the "century" as
a fundamental unit of time measure, my 45 years on this planet would
then be 0.45 or 9/20 of a century. What's a whole number in one
unit of measure, becomes a fraction in another. What we choose
as a fundamental unit is arbitrary.

>> >Not only does that not imply that you're already one year old, it
>> >absolutely excludes it. During year one, you must have an age of
>> >less than one.

>> But you said (above) that counting must begin with one. Glad to
>> see you're retracting that claim!

>I didn't make a retraction, Jeff. Counting begins with one, for good
>reasons. Measurement of sub-year ages, or any exact age, is a
>different process from counting years.

Measurement *is* counting. You choose your fundamental unit of
measure, then *count* the number of those units. For example, 0.25
is not a whole number, but 0.25 or 1/4 of a dollar is a monetary
unit of measure: You can count the number of whole quarters in your
pocket. You're counting by fourths.

>Your first year of life is still year one -- it isn't year zero. And
>that's true even if you have just embarked upon that year.

But in terms of counting the number of whole years that infant has
been alive, he or she is zero years old. You'll have to refine your
unit of measure to reach a count of one.

>When _measuring_ an exact quantity, like time or length, "one" is
>just a point, not an interval. As is 0.0234

Here, if you choose one ten-thousandth as your interval unit of measure,
you'd have a *count* of 243 of those units intervals.

>or 3.14159

Here we could choose a hundred-thousandth as the unit of measure;
then we'd have a *count* of 314,159 of those units.

Once you choose your unit of measure, you then *count* the number
of those units: If we choose our unit of length to be centimeters,
then the measure 0.23 meters becomes a count of 23 of those unit
centimeters.

>But when _counting_ miles or years, a different concept from
>defining a point on a time line or physical line, you are counting
>whole numbers of equal intervals, and both logic and convention lead
>us to call the first such interval "one."

Suppose your choice of a fundamental unit of measure of that interval
is years; if my unit of measure is centuries, then our pest, Lloyd, is
11/50 of a century in age. Your *count* of 22 whole years just became a
point between zero and one in my time *measurement*.

BTW, counting IS done on the number line; remember that the fractions
or rational numbers, {a/b: a,b are elements of the integers with b =/= 0}
also contain the natural and whole numbers: 3 = 3/1 = 6/2 = 12/3 = ...
In my monetary example, we could choose to count by fourths (and if
you spent the two quarters in your pocket on a newspaper, you'd have
a *count* of zero quarters; counting does include zero).

I just picked up a December 1934 copy of Radio magazine at a swapmeet today. The "political editor" reported on the ARRL November 10 Pacific Division Convention. It seems that out of 536 registered amateurs, only 155 were League members. The majority non-members wanted a vote at the convention and it got ugly. Director Culver defused the situation by allowing all registered amateurs, League members and non-members alike, to vote.

Resolution One, passed by the convention, directed Culver to, within 60 days, get a report from the League showing how many licensed amateurs were League members. The Radio magazine editor claims the League is withholding the information and gives "100-to-1" odds that the League will not comply...

Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KF2TI, N2OO, W2FXA, WB2RAJ/ WB2YQH & The 59(9) DXReport, N5VT, AG8L, K8CX, K8YSE, NE8Z, K9NW, KE9KD & DX Central, DJ3IW, ER1DA, F6AJA & LNDX, G3NOM, G3SXW, IN3QBR, JF6OJX, OK1YM, OM3LZ, ON4LCE, PA3GIO, PY1KS, VE1ZL, VE2PJ, VE6VK, VK9NS, VR2XMT and Reinhart Pearson for the following DX information.

5T, MAURITANIA. The International Amateur Radio Volunteers (IARV) will be dispatching an eight member team here between December 13-20th, to build an emergency medical radio network in some remote cities. During their stay there, they will be authorized to operate as 5T5U. They will operate mainly on the WARC bands including 10 MHz, 28 MHz FM (29.260 MHZ) as well as 6 meters band (50.115 MHz - beacon). Please QSL via JA1UT. Your kind support will be much appreciated.

8P9, BARBADOS. Look for Dan, N8DCJ, to sign 8P9CW bewteen December 25th and January 9th. He is an excellent CW operator and this will probably be the main mode he will be using. QSL via homecall.

9G, GHANA. Zdeno, OK2ZW, is planning to stay the next 3 years in Ghana. He is using the callsign 9G5ZW. He was very active in both parts of the 1999 CQWW Contest (on 10 meters, making 4000 QSOs in both parts). His QSL Manager Miro, OM3LZ, informs OPDX that he has begun receiving the first QSLs, mostly from JA and USA. Every direct QSL will be answered, however, Milo will start answering the QSL beginning January 1st, 2000. He is currently waiting for new printed QSL cards.

FT/W, CROZET. Gilles, FT5WH, will leave Crozet on December 7th.

H4, TEMOTU. Bernhard, DL2GAC (alias VU2BMS, H44MS, H40MS) will going on a three month Pacific trip at the end of January 2000. In February 2000, he will stay and operate for about three weeks from Temotu. During this time and specifically for the CQ WPX RTTY Contest in February, he is looking for a RTTY operator to join him on Temotu. A beam and an amplifier

are already on Temotu. The only way to contact him is by his FAX work number: +49 741 15377.

HC, ECUADOR. Doctor Rick, NE8Z, had to change his flight plans to Ecuador due to the volcanic activity in Mt. Pichincha (HC1) and Mt. Tungurahua (HC6). Due to the falling ash in the mountains, the Quito International Airport had to be closed down. Rick arrived in Guayaquil (HC2) on the coast of Ecuador and took a 6 hour bus ride to Tumbaco (HC1, 66km from Mt. Pichincha). He is now active as HC1MD until December 10th. He was spotted on the air on 20/10 meters. Suggested frequencies are: CW - 5 and 24 kHz up, 10113, 18073 and 24903; SSB - mainly 28430 and 50110 kHz. Look for him to be active from the Amazon (signing HC1MD/HC7) between December 10-13th. Rick states daily updates and photographs of the volcanic activity can be seen at:
http://www.elcomercio.com/volcan/volcan.html
QSL direct via K8LJG: John Kroll, 3628 Craig Drive, Flint, MI 48506 USA (k8ljg@tir.com) or via the bureau.

HR, HONDURAS. Look for Gerard, F2JD/HK3JBR, to be active as HR5/F2JD from the middle of December until early January.

KP2, U.S. VIRGIN ISLANDS. Dave/AG8L and Mike/KC8NJA will be active from the Windwood contest station from December 9-15th. Dave will be a Single Op entry in the 10M contest. Mike, a new Tech-Plus, will be active on 10 meters SSB before and after the contest. Due to the recent hurricane, some of the activity may be limited before the contest due to antenna and station setup. QSL routes are: KP2/AG8L via NN6C, KP2/KC8NJA via NN6C, and WP2Z (contest callsign) via KU9C.

NJDXA'S "YEAR 2000" EXECUTIVE BOARD. The "North Jersey DX Aocciation" (NJDXA) has elected the following:
W2UDT - Bill Hudzik - President
NA2R - John Sawina - Vice President
N2BIM - Gene Ingraham - Treasurer
KF2TI - Steve Adell - Secretary
Additionally
K2CO - Ron Levy - W2 Incoming Buro Chief
NA2U - Fred Hoffert - Assistant Buro Chief
For more details, check NJDXA's Web site at: http://www.njdxa.org

OD, LEBANON. Pavel, OK1MU, is active as OD5/OK1MU from Beiruth. Activity is mainly CW but SSB too. Over the past weekend, he was heard on 30/17/12 meters (try between 1330 and 1430z and around 0145z). QSL via OK DX Foundation.
Also, look for Labib, OD5IU, on 10 meters SSB around 28545 kHz between 1400 and 1500z.

PIRATES.......
Activity by a P51BH was keeping many in practice recently. Hopefully, the many who took the time to practice their skills will not QSL.

Dick, K4UTE, states that he is being flooded with E-mail requests wanting to know if he is the QSL Manager for the station sign YA4A during the CQWW CW Contest. The answer is "NO", and he is sure that this station was pirate. However, if you worked him as YA4A in 1963-65, Dick still has the logs and QSLs.

PY, BRAZIL. Alex, PY1KS, and PY1NX, will be active in next week's ARRL 10m Contest as Multi-Operator/Single Tranmitter/Mixed Mode (CW/SSB) entry as PY1NX. QSL via PY1NX direct or bureau.

QSL INFO AND NEWS.....
NEED A QSL MANAGER. Doug, VE1ZL, who used to be a QSL Manager for C6ANU (now deceased), would like to offer his services again to manage one or two DX stations. Contact Doug via E-mail at: wipcitz@hotmail.com

NEW QSL BUREAU MANAGER. Delano Taylor, C6AFV, has assumed duties as Bureau Manager for the "Bahamas Amateur Radio Society. The address is P.O.B F-43563, Freeport, Grand Bahama, Bahamas. Delano currently has thousands of cards for radio amateurs that have operated from C6-land. He has provided the following list: C6AFE, C6AJA, C6AFP, C6AHN, C6AKP, C6AKQ, C6AJT, C6AJZ, C6APK, C6ADR, C6AGT, C6AXP, C6LE, C6ANF, C6LFN, C6MPN, C6AGH, C6AMI, C61D, C6AGH, C6AKA, C6AKW, C6AHR, C6AJU, KR8V/C6A, C6AVW, C6CR, C6AJQ, C6CDQ, C6AKL, C6AHG, C6AHE, C6AHY, C6AHK, C6AGN, C6AKT, C6AJJ, C6AFQ, C6AHX, C6AGP, C6AFZ, C6ASR and C6AER. These cards will be held for a period of 60 days as of December 1st. If there is no response from these stations, the cards will be "DISPOSED OF"....

THE 1999 HILLVIEW GARDENS BORNEO DXPEDITION IS QRT. Bob, N2OO, reports the preliminary QSO totals are as follows:
9M6OO/p Spratly: 21,000
V85OO (plus some QSO's using V85AA, V8USA and V8SEA): 6,000
9M6AAC: 7,000
9M6RIT: 1,000
Total QSOs for the DXpedition was: 35,000. Bob states that these numbers are a ballpark figure for now, as they have a mix of log formats to go through, including some paper... QSL information is as follows:
-- 9M6OO via N2OO -- V85OO via N2OO -- V8USA via N2OO -- V85AA via direct only to: WILLIAM MADDOX, PO Box 1711, Bandar Seri Begawan, Brunei -- V8SEA via JA0AD -- 9M6AAC via N2OO -- 9M6RIT via G4SHF

QSLs for FG5BG in CQWW CW Contest are direct via FG5BG. QSLs for FG/K9NW are via WW9DX: Western Wisconsin DX Association, PO Box 411, La Crosse, Wisconsin 54602

The 1999 9G5AA CQ WW CW Contest operation is QSL via GM4FDM only. There is some confusion. Do not QSL via Roger, G3SXW, who was QSL Manager for the 1994 operation.

VK9RS QSLS. Malcolm, VK6LC, reports that the special direct QSL cards for the Rowley Shoals DXpedition (OC-230) could start to flow around Christmas time, and bureau cards are scheduled for about May 2000. The VK9RS special stamps are not for sale because of limited quantities, and they have been sent to all VK9RS sponsors. The remaining are available

to those that have worked VK9RS and supported a reasonable donation with their direct QSL card to I1HYW. Currently, Mal is in the South China Sea near Vung Tau engaging in Offshore Oil Design Engineering. He does visit during his time off Con Son (Iles de Poulo Condore) and Cu Lao Thu Islands. He will be commuting between Australia and Vietnam over the next 4 months and may have time to operate from these places, but only in his days off. Also, this will not be DXpedition style operating, but more of a social 3W6 contacts only.

Youth Club Station UX2FXX, QSL via P.O. Box 14, Odessa 65076 UKRAINE
Youth Club Station UT9F, QSL via UX2FXX: P.O.Box 14, Odessa 65076 UKRAINE

SPECIAL EVENT STATIONS FOR THE YEAR 2000.....
To celebrate the coming of a New Millenium, look for special event ER2000A to be active starting from December 15th and lasting until January 20, 2000. QSL via ER1DA direct to: Valery Metaxa, P.O. Box 9537, Kishinev, MD-2071, Moldova, Europe (or via the Bureau).

Special event station "Millenium Plus" will use the special one-by-one callsign, N5T, between January 1-15th. Activity will be on on all bands (including the Novice portion, 6m/2m/432) on CW/SSB/RTTY/Packet/PK31. A special QSL card will be available (along with a SASE) from N5VT.

Phil, ON4LCE, will be on the air from Guadeloupe Island (NA-102) with the special callsign TO2OOO from Monday, December 20th, to Monday, January 3rd (2000). Activity will be on 80-10 meters including the WARC bands. His preferred modes are SSB/RTTY and a special effort on PSK31. His operating times will be limited because he is on a family holiday. He may make a trip to Les Saintes Island (NA-114) for a 1 or 2 day operation. QSL via home callsign (only for this operation). All requests are welcome by E-mail: on4lce@arrl.net
Or by packet BBS: on4lce@on0sat.lu.be.eu

Charlie, VR2XMT, informs OPDX that the "Hong Kong Amateur Radio DX Association" (HARDXA) will be active as VR2K for the celebration of the new year 2000. Activity will be on HF-430 MHz (including satellite) from now until January 31st. Activity is also planned for March 1st through March 31st, and from May 1st through July 31st. For the year 2000 QSL send to VR2XRW. Also, check out the Web page:
http://www.qsl.net/vr2dxa

VC2K UPDATE. Terry, VE2PJ, informed OPDX that the reason he is using this callsign (between December 31st and January 31st) is to celebrate the new Millenium. He had asked for the callsign XK2K but was told that XK is not for use in QUEBEC.....

SV, GREECE. Olda, OK1YM, is now active as SV/OK1YM from Athens on CW, SSB and RTTY. He will probably stay for more than 1 year there. QSL cards via OK DX Foundation: OK DX Foundation, P.O.Box 73, Bradlec, 293 06, CZECH REPUBLIC. For more info on the Web, visit:
http://www.qsl.net/ok1ym - or - http://www.okdxf.cz

TY, BENIN. Philippe, TU2FH/FK8VHU, will be here from December 6-28th. He hopes to get a licence, and he will take his TS-680S and vertical with him.

V26, ANTIGUA. Tom Roscoe, K8CX, reports that he will be active from Antigua as V26X from December 7th through December 13th. He will be active on all 9 HF bands. Tom will be an entry in the ARRL 10 Meter Contest on December 11th and 12th. A full color photo QSL card will be available for all completed contacts. QSL via K8CX.

V3, BELIZE (IOTA DXpeditions). Bert, PA3GIO, will be active as V31GI on SouthwestCaye, Glovers Reef (NA-180), from March 19-24th (2000). Also, from March 26-29th he will be on Little Water Caye (NA-180). Activity will be on 80/40/20/17/15/12/10 meters SSB only using 100 watts into a Doublet open feeder line. QSL "PREFERABLE" by the Bureau to PA3GIO. QSL direct to PA3GIO: Bert v.d. Berg, Parklaan 38, NL-3931 KK Woudenberg, The Netherlands, Europe. Visit Bert's Web site with pictures of his 1999 activation at: http://www.xs4all.nl/~pa3gio

VK0, MACQUARIE ISLAND. (Excerpts from a Jim Smith, VK9NS, press release. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.) Alan Cheshire, VK0LD, is now active and is employed as a Senior Communications Engineer for the current Australian Antarctic Research Expedition (ANARE) Base on Macquarie Island until late 2000. He and other members of the ANARE team on the island have extended work loads and operating times will depend on this factor. Alan is primarily a CW operator and it is in this mode that he hopes to make a dent into the pile ups of the needy. He will concentrate mainly on 20 meters or perhaps 15 meters to maximise the chance of the DXers working a new country. He seems to be uninterested in chasing around the bands towards the multi-band QSO routine. His rig is an ICOM 706 MKII. As of this past weekend, Alan's current operating schedule is as follows:
1000-1100z CW - JA/HL/BV/UA0 "ONLY" - North Vee Beam.
1100-1200z CW - Europe "ONLY" - NW Vee Beam Short Path
(includes TF, OX, JW etc. and UA9)
1200-1300z CW - USA/ VE/ S.America/ Africa "ONLY" - Vertical.
There will not be a QSL Manager, so all QSLing will be done after Alan's tour of duty. Alan has a super Web site available for updates, schedule, Web Cam and pictures at: http://www.geocities.com/vk0ld/1.html

VP9, BERMUDA. Gene, W2FXA, will be active as W2FXA/VP from Devonshire Parish, Bermuda, from now through January 4th (2000). Activity will be on 40-10 meters CW and SSB. QSL to home callsign.
Also, "The 59(9) DXReport" is reporting that Mark, AA1AC, will be active from Paget Parish December 16-20th as AA1AC/VP9. He will be active on 40-10 meters CW/SSB. QSL via homecall.

VQ9, CHAGOS. "The 59(9) DXReport" is reporting that Paul, W2JDK, is now active as VQ9PH from Diego Garcia until December 15th. Reportedly. he prefers CW. However, OPDX QSNs show that Paul was active this past weekend on 15 meters SSB (on 21333 kHz between 1545 and 1615z) and on CW, 14004 kHz around 1430z. This is his third trip here. QSL via W2JDK.

XU, CAMBODIA. Mauro, IN3QBR, informs OPDX that he and Fabri/IN3ZNR will operate from here between December 24th and January 3rd (2000). Their callsigns are: XU7AAY (Fabri) and XU7AAZ (Mauro). They plan to operate on CW/SSB and during the ARRL Round-up Contest on RTTY. They will be active on all bands including the WARC bands and hope to do good work on the low bands. QSL cards are via IN3ZNR: Fabrizio Vedovelli, Via Gramsci, 38100 TRENTO Italy.

Tho it might surprise you, Lloyd, a lot of us in the hobby or at least in licensed ranks almost agree with you. I think the Canadian 10 wpm basic license is a good idea. Now when your hostility subsides and you realize that some things come with a price or at least requirements - you need a blood test to marry, for example -- we can get down to how to pass the code test; the Wassermann is your problem.

1. Study at the speed you need and no other.
2. Use random groups to avoid learning frequent characters and getting zapped on numbers and punctuation. The tests will kill you if you do not.

The software to do this is available I am sure (not my thing but others can help) to set your compooter to generating random 15wpm groups. For timing the FCC 'word' for wpm is PARIS which is actually a bit slower than the average English word so don't blame them for your problems. Now that you can generate code you have two choices to get going:

a. Send the characters at 15 wpm and space them to generate fewer than the 75 characters per minute (numbers and punctuation count 2 by the way) and build your speed that way.
b. My preferred method is to group the 41 characters you need, and select four of them (A,W,J,1) to listen for and make an x for every other one you don't know. Then add (N, D, B, 6) etc. Email me and I'll give you the full program: rmccoll@radiks.net. Do it right and take the test before Ground Hog Day (Candlemas).

Tips for avoiding "Morse Dyslexia" , the tendency to invert sequence (F turns into L) or Sense (P turns to X):
This is especially critical if one has an occupation requiring some degree of ambidexterity.

1. Take the hand you do not write with and put it in your pocket, sit on it, or in extreme cases tie it to your belt.
2. Bring the audio into the side you write with.
3. Assume a comfortable position. If you bend over the table in a tense position you will soon learn to associate code with a stiff neck and tension headaches.
4. Use unlined paper and write in arcs or any pattern that fits. Neatness is not a test requirement and examiners will go to any reasonable length to find 65 characters in a row even if you muff the test.

Lloyd, the Boy Scouts require 8 wpm for the Signaling Merit Badge. What you might deign to do is of no interest whatsoever. Pass the exam and you can bury your Morse key with appropriate ceremony; many do.
Pass the exam and you can pontificate at length; opinions tend to be

listened to more when the opiner has earned the right to have one.

Hi Gary, long time no hear(see!)
Lets not get carried away with this business over a couple of very minor
adjustments to the tuned circuits in the latter stages of the tx drive
chain in an FT101. Adjustment of this very simple PA system is well
within most amateurs capabilities AND IS DETAILED IN THE OWNERS
MANUAL!!. As I stated earlier in the thread, I do not advocate
twiddling for its own sake.
For Gary 7SSL, are you saying you have never delved into any of your new
kit! Are all your cover screws virgin? (never been unscrewed!) :))

Trev...-.-

I am well aware of the snobbery attached to bottle and board swappers.
It is more than a little vane to object to a proceedure that produces
results. Your objective no doubt is to have a working set. The fact that you
have some boards left over doesn't mean that they have to be relegated to
the scrap bin. You can havce several known good boardfs as spares or
sufficient to build the second set. If you get one good sert then with part
objective complete you are in a better frame of mind to aproach the next
stage of the project.
I spent quite a bit of time developing ATE (Automatic Test Equipment) for
use by anyone that felt able to use it as a tool. (board kockeys or no).
When one considers the commercial aspects and scientifically analysis the
objectives and the situation that exists constrained by the technical
possibilties the resources and the personelle available one comes to certain
conclusions about the cost of manufacture, the cost of repair and the
feasibilty of both. A repair will always cost several time a replacement
because all of those proceedures employed in manufacture have to be used
additionally fault find diagnostiocs dismantaling correct identification of
any failed component the removal and replacement reassembly testing and
final xcosmetics are just numerically more operations requiring a higher
level of skill so become non competative. If you then design sets to be
thrown away upon failure the design may be greatly simplified and cheapened
you don't need to provide screws for access components may be permanently
solder welded in place as they are not intended to be removed this can be
considerrably cheaper that a design that permits servicing. As a
manufactuirer faced with competition which would you chose to maintain your
market share and keep your customers happy. A customer that gets a faulty
item replaced immediately without question is a much happier chappy than the
pone that takes his kit back to face reppairs of unknown cost and of
duration unspecified and when he gets his kit back there is a high

probability that the fault is not cured or the fault returns shortly after for some unspecified reason. The complexity and package density of modern kit has long since made the repair route if not unattractive but often completely impossible.
Old kit will soon be unable to meet the increaingly tighter specifications and operational requirements. Certainl the dedicated amatuer building from scratch will note aproach any commercial set either on price or technical performance or finish. certainly size and weight will not be approachable by the amature.
Specialist and cutting edge ciruitry is really the areana for the hobbiest of the future.

> I suppose that board-swappers are today's bottle-swappers and probably

I am looking for comments on the Icom IC-706, Yaesu FT-100 and Alinco DX-70TH from owners of these rigs. I want something primarily for CW use. I have heard the Alinco uses a poor audio filter for CW. Have also heard alot of bad things on the IC-706 for CW work. Would just like to hear what everyone has to say on these rigs on cw before I lay out some big bucks. Please email me personally at: tje@usol.com
Thanks in advance.

1) I have the experience to know when to leave well alone, that is the stock in trade of a professional.
2) I have the correct tools such that you would never know that I had been there.
3) I have the knowledge training and experience to know what not to touch and how to test the alignment without actually adjusting anything, (remember that little plastic tool with the bit of brass and the bit of ferrite?)
4) before actually parting with my hard earned dough I make sure that whatever it is that I'm buying is in good nick.
On;ly a twerp would spend good money and then throw it away by ruining the new toy.

If I get something for a fiver at a junk sale that's a different matter.

Where I might be tempted to tamper is with very early kit of unknown history which I want to restore to the condition in which it might have been found shortly after manufacture. A project which I would love to get involved in would be to have examples of every possible old set restore it to it's original condition and then with modern test equipment measure its performance and record the specifications to be published in book form with pictures and as much history as possible. I would like to trace out the history of Radio without the bias of particular companies that exists in most of the stuff which I have so far.
What for instance was the bandwidth and threshold of a coherer or a magnetic band detector. To get an AR88 or HRO back to spec and make some noise figure measurements and check the thing out over the design frequency range.
Just how lucky where the people involved in the first transatlantic communications, what differnce did the Armstrong set make what was its performance like when measured with modern test equipement? was the performance really superior or did those usingit have a better antenna and some good luck. Where their operating methods better? al of these questions have not been answered or documented in a coherent way. soon it will be too late and too distant from the events to be realistic or to be written up with a sense of the acheivement. Who familiar with a mobile phone would see and appreciate the wonder of communication over a few hundred yards by Electromagnetic Radiation.

Gary7SLL, I'd love to make the first voice communication by X-Ray

That sentiment is fostered by some country music, like that of Hank JR's
stupid country boy themes.

4608. Icom- Looking for info on PC to radio cloning cable #OPC-478

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-05 00:00:00 UTC
From: Gary Zabriskie <garyz@cyberhighway.net>
Message-ID: <82eq0eego1@news.cyberhighway.net>
Source record: 125697

I am looking for a schematic or other description of the PC to radio cloning cable used with the Icom IC-2100 2mtr FM mobile rig (and also the Icom 706MkII). Icom's model number for this cable is the OPC-478. What exactly is included with this cable to warrant a $45.95 price (in latest A.E.S. catalog)? I have access to cable crimping for these types of connectors, if someone can give me info on what pin connections and components, if any, are needed.

And what is up with Icom charging $46.95 for a 23 foot length of red and black wire (OPC-347 power cable), $85.95 !!!!! for a microphone extension cable (OPC-440) and (I really am not making this one up) $33.95 !!!!!!!!! for a speaker extension cable (OPC-441). Geez, that last one must have $2.00 worth of wire and two 1/8 inch mono phone plugs on it. Cripes, you could spend 2/3 the price of the radio for a few wires!!

Thanks in advance for info on the PC cloning cable.

The above post is the best argument I've yet seen for keeping the code requirements as they are now. The last thing amateur radio needs is more ignorant, uneducated, potty mouthed rubes like N0VFP on the HF bands.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

Look up some of Lloyd's spam, excuse me, posts of the past six to twelve months and you'll see why he got kicked off of AOL. His use of foul language, multiple screen names (N0VFP, CBRambo1, DX302MAN, etc.) used for posting his spam, and numerous off topic posts certainly gave AOL more than enough incentive to cancel his account. Want to place your bets on how long it will take BellSouth to give Lloyd the boot?

So, should we celebrate His 2000th birthday on 12/25/2000 (one week
before we celebrate the end of Second Millennium) or 12/25/2001
(51 weeks after we celebrate the end Second Millennium)?

4614. Radio wars: Attn. Mr. Hollingsworth

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-05 00:00:00 UTC
From: tlbryant@my-deja.com
Message-ID: <82etam01p5l@enews4.newsguy.com>
Source record: 125703

It was only a matter of time before the parties of 14.313, 3894.5, 3950, etc. brought their bile to the internet. They've polluted this newsgroup for nearly two years. There's a similar story that fits in closely with these happenings.

Back in the early 90s (It seems funny to be saying that) before the internet, people engaged in telecommunications through dial-up BBS systems. Two local systems that were popular at that time appealed to two different types of users. However, one group saw fit to start a war over something petty BBS A had a large user base, chat rooms, 12 lines, hundreds of files available for download, and the most popular door games at the time. BBS B was more message oriented, but had a large user base, as well as many files and a few door games.
As BBS A continued to grow, its sysops made some changes in the way they ran things. This made a few users of BBS B mad. The messages on both BBSs resembled many of the messages of this newsgroup. BBS B became an all-out "war board". (I should point out that BBS B was run by teenagers still in high school) Users of BBS B accused BBS A of being perverts, pedophiles, etc. Despite this, BOTH boards continued to grow!

Then came the internet.

First, AOL offered easy access to the internet, then ISPs started popping up around town. The user base stopped growing for each BBS, but the regulars still called. In April of '94, BBS B was the first one to bite the dust. Mainly because it's sysop was a senior by this time, and needed his computer for college. For awhile, BBS had gone to being an ISP, but couldn't compete with other local ISPs and eventually went offline as well. I talked to the sysop of BBS B a few weeks ago. He said, "we were just a bunch of bored kids looking for a way to express ourselves."

What does this have to do with this newsgroup you ask? Most of the people posting here, and causing the discontent on the airwaves are the same as the kids were at the time. You *enjoy* the fighting. You *enjoy* the conflict. It gives you a rush. It's an addiction.
Maybe it's time for something else to come along and make you all wake up to the fact that your actions really aren't all that important, and you'll use amateur radio as it was intended.
Maybe Mr. Hollingsworth should re-test all of you, or simply not renew your licenses when they expire.

But that's wishful thinking.

Your looking at this all wrong Tom. IF "they" are bitching, pissing
and moaning
on the Internet, instead of the radio, then Riley's job is that much
easier.
Let them use the Net to do what formerly used to be done on several
spots of
the radio dial. Result: Ham radio settles down as the Net warms up.
And it
also costs more $$$ also! Sounds like a win-win situation to me.

I have no desire to change the minds of those amateurs who have a fixed belief in the sanctity of the word of Hartford. Nor have I the slightest hope of it. But I should like to see the intelligent and upright amateurs do their own thinking and an determine for themselves whether it is safe to leave their future wholly in the keeping of men who make deception their continuing business. the most constructive criticism invariably presumes the destruction of the bad in order that the good may be revealed and have opportunity to prevail. I insist now that the ARRL, Inc., CAN be placed on the sound basis of an association owned and managed solely BY amateurs solely FOR amateurs. And I declare now if this is not done the amateurs may as well junk what little remains of their frequencies and rights and count themselves out of the radio picture in America. They must act now if the amateur is to remain a factor in the radio affairs of the nation.

This was copied verbatim, including the capitalized emphasized (shouted) words from part of an article in the December 1934 issue of Radio magazine. The author is Clair Foster W6HM. The more things change the more they stay the same...

Greetings folks..

Llyod, you forgot to show us a picture of your truck with 57 antennas sticking out of it. It's amazing that you still have enough room for rotating beacons on the roof and a magnetic BARF sign for the door. I suppose you've got a uniform too? LOL ! I'm sorry.. folks this is just amazing what's happening to our society these days..

It *does* make me wonder what he's going to do after January 1st with this Web site. If there was *ever* a piece of code that I hoped wasn't Y2K compliant - this now takes the cake.

Cheers,
Gary

The mere fact that he's mentioning the word "Nazi" on "his" Web page:

"For the record, I am not a Nazi, a neo-Nazi, a racist or an anti-Semite..."

shows there was some concern at one time if not now - at least in his mind.

Board swapping is a powerful troubleshooting technique. It allows you
to quickly localize the trouble. Then you can proceed to component level
troubleshooting and repair (if that makes economic sense). Whether
component level repair makes economic sense depends on the particular
piece of equipment. For most consumer electronics, it probably no longer
makes sense. But for more specialized equipment, and for out of production
equipment, it makes very good sense indeed.

In the broadcast business, we like to buy equipment in pairs, partially because
it gives us a ready testbed for board swapping to localize faults. Downtime is
at a premium, but spare boards are so expensive that keeping a stock of them
on hand is prohibitively expensive. With duplicate machines, we have the spares
at hand for testing, but get everyday use out of them as well. We tend to keep
equipment for a very long time (because broadcast equipment is low production
volume and hence extremely expensive). Often we keep it in service past the
date when the manufacturer is no longer in business, so it is important that we
can fix it ourselves.

>I spent quite a bit of time developing ATE (Automatic Test Equipment) for

>additionally fault find diagnostiocs dismantaling correct identification of
>any failed component the removal and replacement reassembly testing and
>final xcosmetics are just numerically more operations requiring a higher
>level of skill so become non competative.

At least in my industry, and to a large extent in amateur radio too, this
is not true. Because of the specialized nature of the equipment, and the
short production runs, replacement boards are very high cost, and have
poor availability. That makes component level repair more economical,
even though it requires people having a higher degree of technical skill.

Equipment with self-diagnostic features is welcome, of course. Anything
that helps us pinpoint a problem quicker and easier is to our benefit. But
board level replacement as a repair technique is still too expensive for
us.

> If you then design sets to be
>thrown away upon failure the design may be greatly simplified and cheapened
>you don't need to provide screws for access components may be permanently
>solder welded in place as they are not intended to be removed this can be
>considerrably cheaper that a design that permits servicing.

That's all very well for a device that costs $19.95, but you don't save much making
an $1800 radio into a throwaway item. The cost of screws and connectors and the
like aren't a significant fraction of the cost of the equipment.

>As a
>manufactuirer faced with competition which would you chose to maintain your
>market share and keep your customers happy. A customer that gets a faulty
>item replaced immediately without question is a much happier chappy than the
>pone that takes his kit back to face reppairs of unknown cost and of
>duration unspecified and when he gets his kit back there is a high
>probability that the fault is not cured or the fault returns shortly after
>for some unspecified reason.

But if it costs $1800 a pop to do that, either the customer or the manufacturer
is going to be very unhappy because one of them is going to have to eat that
cost. There's an economic point where throwaway equipment doesn't make
sense. Automakers could just weld the hood (bonnet) shut and give you a
new car (or force you to buy a new one) when yours needs a repair. But they
don't. It isn't a cost effective strategy. For a $12 toaster it may be an economic
strategy.

>The complexity and package density of modern
>kit has long since made the repair route if not unattractive but often
>completely impossible.

I haven't found that to be the case. Certainly VLSI and surface mount technologies have changed the way we work on equipment, but they haven't made it impossible to do so. In fact I prefer to work on SMD rather than thru-hole equipment. It is easier once you learn the proper techniques.

>Old kit will soon be unable to meet the increaingly tighter specifications
>and operational requirements. Certainl the dedicated amatuer building from
>scratch will note aproach any commercial set either on price or technical
>performance or finish. certainly size and weight will not be approachable by
>the amature.

That's largely true, especially in regard to packaging. Amateurs don't have access to the injection molding equipment which allows the manufacturers to produce compact, lightweight, and attractive equipment. But amateurs can still produce equipment with better performance, at least in particular areas. If we want a +40 dBm 3rd order intercept, we can build a front end to do it. The mass market might not do it for a number of reasons, not the least of which would be the size of the heatsink required, but we can.

>Specialist and cutting edge ciruitry is really the areana for the hobbiest
>of the future.

Certainly, as it has been in the past. One-off construction doesn't lend itself to mass market manufacturing methods. It is, and always has been, the province of the technician or hobbyist working at the prototype bench.

Don't use the Mini-Circuits amps. Been there, done that. They're not designed as low noise. Hamtronics (716-392-9430) has them, or you can pick one up an any store that carries a lot of scanners.

As another Nam Era (1-Y, women and children first) type, first licensed at age 11 I am reluctant to admit how much time I have spent on just the sort of thing you talk about and even more reluctant to admit that you hit it right between the earlobes. Your site is slower than its content deserves but well worth the visit. God I'm glad I gave that up (although I notice we renew our tickets).

Hams get only one form of exercise. At hamfests, when the emcee rises to introduce the ARRL section rep the bodies pouring thru every door and window get a tremendous aerobic workout for the 17 milliseconds it takes to empty the place.

I might say 73 but in this case, QLF or the dreaded ZBM-2 seems more appropriate. Go ye and sin some more!

: Time will, tell.
: If More hams would take further training as suggested above so that the
: standard rises it would go some way to ameliorating the situation where type
: approval was inevitable.

: The introduction of only type approval would be a sad day IMHO, but there
: could be a centre ground where extra qualification brings extra privileges.

Perhaps this could be a way towards a progressive class structure for
licencing - much better than a once tested morse capability IMO - how it
would be tested and administered would be interesting though.

Being an amateur with some technical ability, it alarms me to see the way
that some folk "dive in" with little knowledge. Yes, I have had somebody
bring a (domestic) radio in saying "I tightened all the loose screws" :-)

BTW Gary, two things, I think that you have a lot more faith with the
designers than I do and what do you use your little brass & ferrite ended
gizmo for - other than to find out which way to turn the core? I found it a
lot easier to look at the display from a wobbulator to tell me which way to
go.

Barry In the old days of discrete component sets a dry joint would cause these sorts of problems. with PCB bad through plating or a section of track that has gone HR because the original stock board was not up to spec. Often it is a very small low resistance change in a common mode in the emitters of a transistor pair that are not in parts of the circuit which should be common mode.
Finding the problem could be a bugger. If you have the available boards then substitution of boards should get it down to which board the problem is on. It could be in supply lines a dud through capacitor in the supply lines can reek havoc.
Try reducing the supply voltage and see if the effect gets better or worse.
One method that I have used with success is a transistor radio and head phones. holding the trany over the various parts of the circuit the amount of interference on the tranny can be monitored. I've even used this method on digital circuits with good results. A bit of software not running at speed has a different sound to to the same software running on a good machine. By knowing what it should sound like and jiggling components on the faulty board even as little as bringing the extra capacity of the hands near to the faulty region is sufficient to say start looking for a mechanical fault around those few components.
The problem with any feed back problem is that the fault appears to be in every part of the circuit at once; it is necessary under such conditions to fault find dynamically, make small changes in various parts of the circuit by adding damping etc either with the little plastic tool mentioned above the capacitor and resistor plus crock clips. cold air, a hair dryer.
Definitely board swapping will bring you into the region of the fault the quickest. This is where the manufactures scores because he has spare boards and he has a good set to compare any unusual meter readings under various

operating conditions. The ham on the bench has difficulty competing with these facilities.

Good luck
Gary7SLL

Indeed, but this falls into the ground of experimental work with new designs being synthisised form building blocks of existing equipment. Under those circumstances the old blocks treated in the same old way as at manufacture may be quite inapproptiate. But under these circumstances you are taking the initiative to produce something new. I had in mind smething a little different where a ham acquires a new bit of kit and is unhappy until he's /she's had the top off and had a goog poke at everything with a Woolworths screwdriver. Then disenchanted they try to dump this bit of kit that they have s[poilt upon an unsuspecting twerp at a near new price. I would suggest that if you want to buy a bit of kit that you look very carefully at the trimmers and slugs to see if there is any eveidence of twiddling. Also just look at the screw heads of the securing screws of the case if they show the slightest sign of having been touch with a screw driver immediate knock the price down to under 10% of the as new price.

If you over drive any stage it will run into a non-linear region and spurious will be generated. Look for it with modulation applied.

It would help if the person doing so had a little more knowledge than that
required by the RAE. It would also help if the Ham had a few practical
lessons under supervison of some of the old hands.

Time will, tell.
If More hams would take further training as suggested above so that the
standard rises it would go some way to ameliorating the situation where type
approval was inevitable.

The introduction of only type approval would be a sad day IMHO, but there
could be a centre ground where extra qualification brings extra privileges.

Thanks Gary.

Quite by chance, I have just been given another '101ZD, in excellent nick and known to be good on all bands but with burnt-out mains transformer, so I'm able to do some board swapping.
I must admit that I don't like the idea because when I finished my 5yr apprenticeship and could call myself a time-served, City & Guilds qualified Radio & TV serviceman, 'bottle-swappers' were very much second-class citizens. however that was in the days when TV's were full of EF80's etc. and I immediately left the trade to enter Drama school.

I suppose that board-swappers are today's bottle-swappers and probably call themselves 'electronic' engineers, (rather than 'electronics engineers) as though they need to switch themselves on in the morning. Ho hum. I suppose that the real engineers have become reconciled to referring to themselves as graduate engineers.

None of that has anything to do with solving the problem of course. Thanks again for your ideas and suggestions Gary, time to finish off one of the homebrew projects so that I can at least get on 80 Mtrs with the 101 on the bench.

It means that they would like to check out of the net. A reason that the
NCO might disallow this, would be if the net were expecting traffic for that
station.

I think Radio Shack sells an amp+splitter for TV antennas. 50 - 900
MHz, or something like that. The noise figure is probably higher than
you want, but would probably work fine for scanner needs.

I would just try the straight cheap TV splitter before adding the amp,
though.

Indeed. Relatively modern equipment (that includes stuff built in the 70s)
does not go out of alignment on its own. It almost always has been helped
along by "screwdriver drift". Some amateurs seem to feel the need to
"realign" any piece of equipment that they get. That urge should be forcefully
resisted. They will almost always wind up with something which doesn't
work as well as if it were left with the factory alignment. (Very old radios
may have components which have shifted way out of tolerance. The preferred
approach here is to replace those out of tolerance components rather than
twiddling the alignment in an attempt to compensate for them.)

Note, a stage which has had components replaced may require a slight
realignment, but just that stage, not the entire radio. If extensive modifications
have been done to a radio, or it is being shifted far from its original design
frequencies, some greater amount of realignment may be necessary. Otherwise,
the factory alignment should be left alone. The designers generally knew what
they were doing when they specified how the radio was to be aligned at the
factory. You'll generally just screw things up if you try to twiddle it.

>LOVE YOU .....
>

I don't know, the 11 meter crowd may not want riff-raff like AF2Y in their midst. AF2Y should just go to Israel. As long as you're a Jew, you're welcomed with open arms regardless of your character or criminal record, and you're immune to any prosecution and/or deportion to boot. They always scream about racism, but boy oh boy, their whole damn country is based on the racist theory of Jewish supremacy.

Such a deal!

There is some proof that several Years ago he was indeed a "resident
Ward"
of the mental health system of the great State of Indiana. Locals also
tell
of a curious event a few years ago when after a particularally amusing
evening of the WA9KJI Show of the Air, he was picked up by the
Evansville
P.D. for (brace yourself kids...) walking about NAKED-AS-A-JAYBIRD
between
2:30-3:00 AM down Stringtown Road in Evansville. Word is when he was
picked
up he kep rantig to the police about some "ham radio related argument"
and
his need to get out for an evening stroll on the town, "Au Naturale".

I am only suggesting that most Christians aren't waiting for any
millennium to celebrate the birth of their savior. What? Jesus
doesn't get a birthday every year?

And I don't think anybody is suggesting Jesus was born on 1-1-1. Year
one was retrofitted as the *year* of His birth at a time when His
birthday was celebrated at about the time it is now.

> A man who'll stand up for nothing will sit
> for anything!
> Charles, it seems if you are a little confused about the facts. No private documents were ever read on the air. The documents trhat were read on the air were documents obtained legally, and through the public domain. The documents consisted of arrest records and other public documents that are available to anyone who request such information.

I understand how troubled you must feel since your son has tried to encourage your change in behavior, but you must stick to the facts. I often wondered why Richard never showed up in any court documents regarding litigation, but a life as a collector is nothing to be ashamed of. I have prepared several documents to send to Dana and Richard and I am sure that they will be asking you many questions about why you chose to lie about your education and I am sure that Richard would like to hear about the Medal Of Honor ordeal. I will refer him to Mr. Cottone of the FBI and I am sure he would like to shed a light on the subject. Charles, you should be ashamed of your behavior and the problems that you have caused for many good honest people.

You were zero years old during your entire first year of life. Accept
it.

After you've eaten all the eggs in your basket, the *count* of the
quantity of eggs remaining is zero.

>Consult a mathematician from your own university if you don't believe
>that there is a distinction drawn between countability and measure.

I just did: Me. Conducting a count is just using a discrete measure --
we are measuring utilizing the Natural Number System: {0,1,2,3,4,...}.
When we need to count (measure) portions of an object, we turn to the
Real Number System, which includes the Naturals as a subset.

>Anyway, the poster who put up the URL of the Naval Observatory has
>settled all of this. The next millenium and century don't start until
>2001.

No disagreement there; my comments were meant to point out that
there is a distinction between "The New Millennium" in regard
to celebrating Jesus' birthday, and "a millennium" as defined in
arithmetic: In going from the number 1,999 to 2,000 the tens
(decades), hundreds (centuries), and thousands (millenniums)
columns have all changed.

>But it *will* be highly amusing to watch the masses celebrate the
>"millenium" a year before it begins.

Two n's: "millennium."

New rec.radio.amateur readers would surely come across our specialty
groups, first:
rec.radio.amateur.antenna in which good theoretical debates take
place -- the new reader would be very impressed with amateur radio;
rec.radio.amateur.homebrew where our builders and experimenters
reside -- again, a very good impression would be made.

Alphabetically, rec.radio.amateur.misc is the third from last in the
rra hierarchy; it probably wouldn't be the first rra NG a prospective
ham would see in his news-reader.

>
[...]

No, it wouldn't imply that at all.

Even at the very beginning of the first day of your life, you'd
still be in "day one," if counting days. And you'd also be in "year
one" of life, if counting years.

Not only does that not imply that you're already one year old, it
absolutely excludes it. During year one, you must have an age of
less than one. On your first birthday, you are beginning your second
year.

It is commonplace, for example, among those who are still literate,
to say that a man in his seventies is in "his eighth decade of
life," which is absolutely true and which illuminates the difference
between counting and measurement.

Of course, since all calendar systems are just arbitrary human
constructs designed to help us quantify and deal with objective
reality, the first year in our system could have been called "zero"
instead of "one," just as it could have been called "Fred" -- but
neither would be consonant with the concept of counting as we
practice it in our culture.

But since it was not called "zero" or "Fred" we shall just have to
accept the fact that the third millennium begins in 2001.

With my best,

Kevin, WB4AIO.

If counting must begin with one as you say above, then you're
implying on the day of one's birth, they're one year old. Of
course that's ridiculous, for counting begins with zero.

>Even at the very beginning of the first day of your life, you'd
>still be in "day one,"

But zero days old.

>And you'd also be in "year one" of life, if counting years.

But zero years old.

Don't set on this forum and lie to us, we have a good memory. What about the citation for your "Telephone Test" qrm? You lied out of that one, but it was your same same old AF2Y qrm even that many years ago.

Quit blameing others for your getting caught! You were the first one who started "Cheeseing" like a rat on amateurs, in fact there are a lot of letters floating around that you wrote years ago "snitching" on people.

Take your medicine qrmer,knock it off, you should have received a letter years ago from Mr Hollingsworth. Others did, but you want to think you are "special", and you can go on forevcr interfering with qsos.

No, the FCC will not notify you. You must fill out a 610 form and mail it
to the FCC. Also, there is a TWO YEAR grace period for expired licenses.

The exam may well be similar.

However the Canadian 'Basic' certificate holder can only operate
store bought transmitters, hence the appelation 'Appliance Class'.

All US licensees are authorized (even encouraged) to build their
own transmitters.

Mr Possum Belly:

Your letter is right on target, you know the coniving AF2Y for what he is, a low down snake. All the quotes show the direction he is going. He WILL write a letter to Hollingsworth! It will be a SUCK UP LETTER! He will play the JEW card. everything you predict WILL happen, Thanks for your letter mapping out the path of the qrmer AFG2Y. And what a knife in the back sort of guy he is.

Kevin <xrivaznyl@ubgznvy.pbz> wrote:
>What do you think the US .gov created the Ham Radio Service for?

They didn't; for the first twelve years of "wireless," there were no regulations. Thousands of experimenters on the air and no laws. The government had no choice but to enact regs after the fact to try to clean up the mess. More than likely, it was the ham-caused QRM to the Titanic traffic which caused the Fed to be fed up with the lawlessness of amateurs:

"With the first news of the sinking of the Titanic, every amateur in America camped on his key and added to the bedlam..."

"Thousands of messages piled up at the shore stations. At the solicitation of the American Marconi Company, the government ordered all radio stations north of Hatteras closed down, leaving only those at South Wellfleet, Siasconsett, Sagaponack, and Seagate open; they were to handle Carpathia traffic exclusively. The order was enforceable only on commercial stations; the amateurs blithely continued "on the air." The situation became so desperate that Newport Radio, a naval station, "requested every station in range to keep out" until a list of the survivors could be obtained. Department of Justice men went to work tracing the origin of misleading messages." (Baarslag's Famous Sea Rescues)

If you want to talk on CB freqs, why not use a CB???
They are a hell of a lot cheaper and more plentifull than ham
radios.....I guess a 'one size fits all' HT could be fun to play
with, but the novelty wanes with the RF quality sacrificed
for broadband capabilities.

NEWSLINE 1164

Newsline report number 1164 for release on Friday, December 3rd, 1999 to follow in

5-4-3-2-1.

The following is a Q-S-T. The F-C-C refuses to expand the scope of P-R-B One, enforcement action steps up once again and guess
where most of the hams in the U-S-A live. These stories and more on Newsline report number 1164 coming your way right now!

(Billboard Cart Here)

**

FCC TO ARRL: NO EXPANSION OF PRB-1

If you live in a condominium or other housing with deed restrictions, you will not be getting any assistance from the F-C-C that will let
you put an antenna on the roof. This as the regulatory agency turns down a bid from the American Radio Relay League to expand
the scope of federal preemption over Amateur Radio operations. Newslines David Black, K-B-4-K-C-H, has the details from our South
East bureau:

The FCC hands the A-double-R-L a setback. The League had
wanted the Commission to strengthen PRB-1. That's the federal
pre-emption over state and local ordinances which restricts amateur
radio towers.

The League wanted the FCC to in effect declare any restrictions
Limiting amateur radio antennas to heights below 70 feet as
Unreasonable. The only exceptions would have been if the state
Or local authority could show that the restrictions were necessary
For health, safety or aesthetic reasons.

But the Commission says NO to the League's request, saying its
existing policy with PRB-1 is sound. And, the agency says, it would
be neither prudent nor appropriate to set a height standard
for amateur radio antennas and towers. The FCC also says it does not
want to impose specific rules that local governments must include in
zoning ordinances.

The League had also asked the FCC to clarify that local governments
should accommodate ham antennas, rather than balance local
interests against federal interests involving effective public service
amateur radio communications. And, A-double-R-L wanted the

Commission to pre-empt what it called overly burdensome conditions and high costs that localities might require involving amateur radio antenna installations.

The Commission says its previously set standards have worked relatively well.

>From Birmingham, Alabama, David Black, KB4KCH, for Newsline.

The ARRL Executive Committee was scheduled to review this FCC order at its December 4 th meeting to determine what further action is appropriate. That meeting should be taking place about the time that this newscast goes to air. (From ARRL Bulletin)

**

THE NUMBERS ARE IN

Over one sixth of all United States ham radio operators reside in a single state. According to the latest statistics published by Fred Maia in this W-5-Y-I Report, California now plays host 103,365 of the nations 676,737 licensed radio amateurs.

But that's not all. California is also the home of the largest concentration of code-free Technician class hams to be found anywhere in the continental United States or its possessions. That number is 37,157 with another 20,172 holding the 5 word per minute Technician Plus ticket.

And would you believe that California also has a larger number of Novice class operators than it has Extra class? The number of Novices stands at 10, 019 while the Extra class is only 8,826. 13,649 Advanced class operators round out the states total.

Not surprisingly, the place with the second largest ham radio population is Texas. Some 40,915 people hold licenses in the Lone Star State. And again the most popular license is the code free Technician class with 12,391 holders of that ticket. That's followed by 7790 Technician Plus holders, 6,960 Advanced class, 6,581 Generals, 4,994 Extra's and 2,199 Novice licensees.

Third place goes to Florida with its 39,941 hams, followed by New York with 32,820 license holders and Ohio with 30,063. The lowest ham radio population in the 48 contiguous states turns out to be Delaware with only 1,389 but even that's quite a bit compared with the District of Columbia. There only 414 citizens hold licenses of which 101 are General class.

The smallest ham population in a United States administered territory is the U-S Virgin Islands with a ham radio population of 301.
And for those of you wondering about the far North-West, the state of Alaska is holding its own with 3,169 hams. (W5YI Report)

**

ALASKA RESCUE

And from Alaska, word that three fishermen are alive in part do to ham radio. According to news reports, a Coast Guard helicopter
plucked two brothers and another person from the Gulf of Alaska after their boat sank.

The Coast Guard got its first report of the incident from an unidentified ham radio operator. Soon afterward, the distress beacon from
the fifty-two foot vessel was picked up by the Coast Guard stations at Juneau and Sitka

About 90 minutes later, a helicopter found the three fishermen in the icy water. All were wearing survival suits but were suffering from
mild hypothermia. By that time their vessel had sunk in twenty-five foot high seas in a fishing area about 70 miles southeast of
Yakutat. This is a region known for its fierce winter storms. No other information was given regarding the part played by Amateur
Radio in this rescue at sea. (Published news report)

**

BREAK 1

This is Newsline, heard on bulletin stations around the world, including the W-B-5-R-A-P repeater serving Purcell Oklahoma.

(5 sec pause here)

**

ANOTHER WIDE SIGNAL WARNING ISSUED

For the second time in as many weeks, the F-C-C has told a ham that he is transmtting an excessively wide signal. In a November 2
nd letter to Charles Schwartzbard, A-F-2-Y, of Clifton New Jersey, the F-C-C says its monitoring information indicates that he has
apparently been operating his station in a manner that causes it to emit an unusually wide signal, one that is over-power, or both.

Specifically, the F-C-C alleges that instances of these violation occurred on November 17 and 18 th in the frequency range of 14.315
to 14.318 MHz. The Commission also says that its Information further indicates that Schwartzbard ignored requests from other
licensees operating on adjacent frequencies to correct his transmitter emissions in accordance with good Amateur practice.

The Commission has directed Schwartzbard to answer--- in detail ---several technical questions pertaining to the way he operates his
Amateur station. A-F-2-Y was also cautioned that airing personal conflicts with other licensees on the Amateur bands, or slander or
deliberate interference to other licensees will result in the loss of Schwartzbard's Amateur license. (FCC)

**

HOLLINGSWORTH TO SPEAK IN DAYTON

And while on the subject of Amateur Radio enforcement, the Dayton Amateur Radio Association has announced that the nations top
ham radio rules enforcer will be the featured speaker at Hamvention 2000. According to DARA, F-C-C Special Coulsel for Amateur
Radio Enforcement Riley Hollingsworth, K4ZDH, has accepted an invitation to keynote the combined 2000 Dayton Hamvention and
ARRL National Convention Grand Awards Banquet next May 20th. (DARA)

**

VIRGINIA MAN INDICTED FOR OPERATING AN UNLICENSED FM STATION

A Virginia man has been indicted for running an unlicensed broadcast station. According to Bob Gonsett's C-G-C Communicator
newsletter, The FCC Enforcement Bureau announced that on November 16, a grand jury serving the U.S. District Court in Richmond
had indicted Khalid Kubweza, on four counts of operation of an unlicensed FM broadcast. Kubweza is accused of transmitting on
91.7 MHz from his Richmond home. (CGC Communicator, FCC)

**

RMARC REPEATERS TEMPORARILY DOWN

If you are traveling into the North-East, some repeaters that you may rely on will not be there for a while. This with word that the
Ramapo Mountain Amateur Radio Club's repeaters on 146.49 and 446.175 MHz and the club's A-P-R-S digipeater on 144.39 MHz,
are temporarily off the air.

According to Joseph Jack, WB2WAB, the machines were turned off on November 15th for maintenance and repair. No date has
been announced for when they will be returned to service, but full operation will resume as soon as possible. The packet digipeater
on 145.01 MHz is not affected and will remain in operation. (Hudson Loop)

**

THE LOW COST HAM AID BOX

Repeater owners and trustees might want to take note of a very intriguing article by Bob Bruninga, WB4APR that appears in the Fall
1999 issue of Amateur Television Quarterly magazine. Its called the Ham Aid Box and Bruninga says that it's a way to distribute text
messages using an off the shelf piece of consumer electronic gear..

According to WB4APR, the caller I-D units that many of us have in our homes use the same 1200 baud ASCII and Bell 202
standards as used on packet radio. He goes on to say that a caller I-D unit hooked to the speaker of a mobile or base ham radio
station can display up to four lines of text messaging. Since all caller I-D units have memories, multiple messages can be stored.

The text message would have been generated by any ASCII capable T-N-C connected to the repeater. Bruninga says that this could
make it possible to implement a universal and low cost amateur radio text distribution system -- almost overnight. (WB4APR Internet
Posting)

**

REPEATER SITES: WHAT HAMS ARE DOING

A few weeks ago we told you of the problem of retaining sites for ham radio repeaters in light of consolidations in the tower
management business. As more and more radio sites come under the management of a small number of mega-corporations, free --
or low price radio sites for hams are quickly disappearing. And there have been reports of the mega owners doing all within their
power to keep experimenters like hams off hilltops and roofs that they share with other site administrators. As a result some ham
radio repeater operators have taken the extreme alternative of buying property and putting up their own sites. In part two of our series
on the repeater site crunch, Newsline producer Bill Pasternak had the chance to chat with a ham who has done just that:

I first met Frosty Oden, N6ENV, almost two decades ago. Along with Roy Neal, K6DUE, Frosty and I were the
people who brought you the video about Owen Garriott's first ever ham radio mission into space -- Amateur Radio's
Newest Frontier. By that time, Frosty had his first repeater on the air and he has been involved in V-H-F and U-H
F relay communications ever since. But unlike most other ham radio system owners, Frosty Oden is also the owner
of the site that hosts his systems. We asked him why he decided to make such a large investment for a hobby:

SOT:

In-Q: When you are a tennant...
Out-Q: ... look on their face.

Oden says that these were among the reasons that he decided to cut through the red tape and invest in a
mountaintop home for his repeaters. He also realizes that not every ham can afford the luxiary of site ownership.
His advice: Take a lesson from the professional two-way people and consolidate:

In-Q: If a group of Amateurs...
Out-Q: ... vault space for the Amateurs.

We asked Oden what he sees for ham repeater owners in the future. He admits that he is far from optomistic:

In-Q: The big problem is ...
Out-Q: ... out of luck.

Oden says that the best way for hams to survive the coming repeater site crunch is begin pooling our resources
and learning to share.

> For Newsline, I'm Bill Pasternak, WA6ITF

---
unfortunately, more and more hams are now finding that the same mega-managers that evicted them from where they had been are
also filing in opposition to building permits and even challenging land sales. They don't want hams near their sites for fear of
interference from Amateur Station equipment and the possibility that some ham radio clubs might decide to rent their excess space
to commercial customers. We will deal with this part of the story in a future Newsline report. (Newsline)

**

BREAK 2

Serving you 52 weeks a year since 1977, this is Newsline, with links to the world at www.arnewsline.org.

SOLAR MAXIMUM COULD ZAP POWER GRIDS

Communications satellites and power grids could be disrupted for the next three years because of intense solar activity associated
with the upcoming Solar Maximum. Newsline's Bill Burnett, KT4SB, reports from Miami:

According to a report on the program This Week in Amateur Radio that in tuirn quotes other published news
reports, starting in the year 2000, space storms, radiation showers and their affects on power grids are all
expected during the upcoming maximum, which is expected to last about three years. And, according to
administrators at the National Oceanographic and Atmospheric Administration, the United States is especially
vulnerable because of its increasing dependence on satellites.

National Ocenaographic and Atmospheric Administration officials say that these storms act to alter the Earth's
magnetic field. Because of this, they may send strong enough electrical impulses that could

overwhelm vulnerable power grids.

One of the strongest impacts occurred during the last solar cycle in 1989. Thats when the entire Province of
Quebec in Canada went dark because a geomagnetic storm caused a power grid overload.

To prepare for the possibility of a more widespread problem, NOAA scientists are using state-of-the-art scales
designed to depict the severity and impact of upcoming solar storms on public safety and vital services.

And while amateur radio operators await the solar maximum hoping for improved conditions on all High Frequency
and V-H-F band conditions others are at work in another important area. They are getting their emergency
communications equipmment and back-up power systems ready -- just in case.

>From Miami, I'm Bill Burnett, KT4SB, reporting for Newsline.

By the way -- a quick note concerning the This Week in Amateur Radio program. Word that it is moving to a new C-Band domestic
satellite effective as of Saturday, December 4th. Look for the program on T-V-R-O Net on G-E Americom Spacenet 4, transponder
16 Horizontal. The program audio will be on the satellites 5 point 8 MHz wideband analog subcarrier. (TWIAR, NOAA)

**

ARIANE 5 LAUNCH DATE ANNOUNCED

And with another kind of satellite news, Arianespace has now scheduled the first commercial launch of its new Ariane 5 heavy lifter
for December 10th. According to a report from the Amsat News Service, this Ariane flight will carry a European Space Agency
scientific satellite to orbit. W8GUS says that the rocket has been moved to the launch location and a rehearsal has been completed.
(ANS, W8GUS)

**

SUNSAT AWARD

There is a new worldwide ham radio award for using a satellite that is already in orbit. Jeramy Boot, G-4-N-J-H, reports from
Nottingham in the U-K.

PKG Here

Again that address is the Southern Africa Amsat, Post Office Box 1842, Hillcrest, 3650, South Africa. (G4NJH, S. AFRICA AMSAT)

**

FIRST IRISH ATV REPEATER

The Republic of Ireland has it very first fast scan amateur television repeater and a sightless ham is responsible for making it happen.
Roy Neal, K-6-D-U-E, has more:

The Cork Amateur Television Group has been granted the first Fast Scan TV repeater license in the Republic of
Ireland. The callsign of the new TV Repeater is EI2TVR and it operates in the 23cm band.

What is unique about this project is that it was put together and set up by a blind operator, Aedan O'Meara,
EI3EG. It was only in the last year that Aedan became interested in this mode and set about getting all the
necessary information both from Ireland and the U-K. The transmitter was designed by the West Sussex ATV
group. The frequencies in use are 1250MHz for the input and 1293MHz for the output.The repeater is presently
located on Spur Hill in Cork, which also houses the Cork 70 cm voice repeater.

> Roy Neal, K6DUE.

According to reports, the EI2TVR repeater is fast becoming a popular meeting spot for hams interested in fast scan A-T-V.

**

DX

In D-X, keep an ear open for Malawi as ZS5BBO will arriving on or about December 19 th. He will be there until December 26 th and
plans to be active from the shores of Lake Malawi, signing 7-Q-7B-O. Listen for Edwin on 10, 20, 15 and 6 meters. All QSL cards
must be accompanied by an S-A-S-E Edwin Musto, P.O. Box 211032, Bluff, 4036, South Africa. (OPDX)

And the DX News Letter says that DL7FER, is expected to be in Sri Lanka until Christmas. He will operate CW and SSB on 40
through 10 meters including the W-A-R-C bands. His Q-S-L go direct or via the bureau to DL7FER. (OPDX)

Lastly, Panamanian amateurs will be allowed to use the special prefix 3-F between the 1st of December 1999 and the 5th of January
2000 This, to celebrate the Republic of Panama's acquisition of the Panama Canal. HP1AC will be active on C-W as 3F1AC, and
QSL's should go to P-O Box 0860-00144, Villa Lucre, Panama. (OPDX)

**

THANK YOU CHUCK MARTIN, KD6NUJ

And finally, It is no secret that volunteerism is one activity that binds the Amateur Community together. It's central to Newsline's
existence.

In the more than 20-years Newsline has been on the air, volunteers -- often without our knowledge -- have contributed to our success.
During the first station break in each Newsline report, you hear us acknowledge bulletin stations by name, that feature our Amateur
news service.

This week, as we conclude our 1164th newscast, we want to pause to recognize a Ham: Chuck Martin, KD6NUJ. Chuck is the
individual who recorded and encoded our weekly QSTs in Real Network's streaming audio format. He then posted them on Tucson
Amateur Packet Radio's web site -- each week -- since report #962 on January 21, 1996.

As we approach the new millennium, we would recognize Chuck's contributions
for nearly four years of service. Unfortunately, Chuck's home and Ham Shack suffered severe flood damage last September when
Hurricane Floyd struck the Eastern Seaboard. Although KD6NUJ has attempted to keep his personal commitment to Newsline's
Internet listeners, he comes to the realization that this IS only a hobby and he needs to focus on returning his life and his lifestyle
back to normal.

So we at Newsline want to pause and say thank you Chuck. Thank you for your volunteerism and your dedication, and wish you the
best "73."

TAPR's webmaster Greg Jones, WD5IVD, assures us that Tucson Amateur Packet Radio remains ready provide a streaming audio
home for Newsline, but that it may be a bit spotty until we get someone to assume the duty on a regular basis. In the meantime, a
downloadable version of each weeks Real Audio file will continue to be available at Hank Armstrongs F-T-P site which can be reached
from a hot-link on our website at www.arnewsline.org.

**

CLOSE

With thanks to the ARRL, the C-G-C Communicator, the F-C-C, the Hudson Loop, the Radio Society of Great Britain, This Week in
Amateur Radio and Australia's Q-News, that's all from the Amateur Radio Newsline. Our web page is at www dot a r newsline dot org
and our e-mail address is newsline at a r newsline dot org. The address for the Newsline support fund is Newsline, Post Office Box
660937 in Arcadia California. The zipcode is 91066.

For now, with Bill Pasternak WA6ITF at our editor's desk, Im Mert Garlick, N6AWE, saying 73 and we thank you for listening.

>Well,I wasn't going to post on this,why aggravate myself,but what the
hell..

I was a novice in 1973,I passed the novice test easily,I borrowed a
friends old footlocker transceiver,and I was going to buy it if I liked
it.I had a bad opinion about CW before I got my liscense,and the
"wonderful" experience of operating CW totally turned me off.I threw my
ticket in the drawer,and forgot about it.I got my No-code in 1991,and I
use my HT occasionally,not a lot.
For years I wanted,my General,and even started to learn CW again to get
it,but after so long,getting up to about 7wpm,I just had enough!A couple
of years later,I started again,same result.After the third time,I
realized I didn't want it anymore.The CW requirement finally killed my
HF dreams,I have HF equipment,but don't really care about talking to old
guys about the Wx or whatever..
This CW requirement nonsense has been going on for over 50 years,if they
want to keep it part of the exam,make it only 20%,so you can pass and
blow the CW part.This maybe will passify the CW'ers,and get people
interested in being a ham.I know several people who heard about the no-
code ticket,and thought it meant the code req.for HF was gone.They were
all excited,and were shot down when they were told the real story,only
one of these people has become a ham,the rest just SWL or do the web..

No, not zero days, and not zero years: some fraction of a day and some fraction of a year old, obviously -- and somewhere within that interval we call year one.

>
> >Not only does that not imply that you're already one year old, it

> see you're retracting that claim!
>
> Jeff KH6O

I didn't make a retraction, Jeff. Counting begins with one, for good reasons. Measurement of sub-year ages, or any exact age, is a different process from counting years.

Your first year of life is still year one -- it isn't year zero. And that's true even if you have just embarked upon that year.

Just as the first second of life is part of year one, if you are counting years; so also is the first inch part of mile one, if you are counting miles.

When _measuring_ an exact quantity, like time or length, "one" is just a point, not an interval. As is 0.0234 or 3.14159 or any other point on the line.

But when _counting_ miles or years, a different concept from defining a point on a time line or physical line, you are counting whole numbers of equal intervals, and both logic and convention lead

us to call the first such interval "one."

With every good wish,

Kevin, WB4AIO.

> Don't you 'sorta' think that it is an invasion of a person's personal
> privacy?

--> Oh, of course, but since when has that stopped any corporation?
I mean, a lot of them are doing drug tests to see what you do in your
spare time, no matter what your on-the-job performance is. A lot of this
is at the prodding of insurance companies, which reward corps. with lower
insurance rates if they invade employee privacy. Just another example
of how more and more of our personal freedoms are being sacrificed to the
almighty dollar.

> Or do you think money rules everything.....including the Constitution
> and a persons personal privacy?

--> Sadly, nowadays it often does. To think otherwise is naive.

This just came in from screen name Llgpt@aol.com/
Thanks for enlightening me and now I shall give all my ham buddies the scoop.
Happy Holidays Mr. Lewis.

Doc,

I've been wanting to tell you this for a long time...KT4TR...aka trashy radio
is a biiiiggggwannabe.......To wit: the MOBILE RADIO is from his house, his
signal never varies when he is supposedly on the road.

How do I know??? I live in Vero Beach..He is maybe, repeat maybe one half step
above white trash. He is the town drunk,, ask anyone who lives
here.........More to come.

Maybe he doesn't even have a mobile radio???? Very possible.

Herbie,
I chose to do it this way instead of by one one e-mail. I want everyone who has me wrong to now take me right. Because of your suave and sophisticated anti-Semitism on 20 meters, I have hit you over the years like a thunderbolt.
For example I wanted:
1. to see you lose your job
2. to see you lose your home
3. to lose your wife
4. to lose your standing in your community
5. to see all your boys in jail
6. to lose your car
7. to lose your ham ticket
8. to lose your savings
9. to lose any credibilty everywhere
10. to lose your friends
11. to gain enemies
12. to see your testicles turn into onions
13. to see you thrown out of your church
14. to see you tossed in jail for 20 years
Since I ran into trouble with Mr. Hollingsworth, a lot of the boys have been flooding me with sarcastic, bombastic and revengeful e-mails and NG postings. But none has come in from KV4FZ. I had you wrong and I want to make a public retraction. I do not want to see your testicles turn into onions.

Why then do people splash their personal information: name, address, phone number, rigs, likes, dislikes, occupation, employer, ect, all over the net? Would you post the same information on a public paper based bulletin board in a Laundromat in downtown Harlem?? And then they complain when someone uses that information against them. They are the same ones who complain when their car is stolen after having left the keys in it...

4730. What's it like on 2m ?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-06 00:00:00 UTC
From: Pete Holden <peholden@home.com>
Message-ID: <zZQ24.2380$t7.234943@news1.rdc2.tx.home.com>
Source record: 125540

I'm wondering if I should get a 2m rig. I like ragchewing on SSB and I like CW. I know these are done on 2m, of course, but will I likely find as many people on the band at any moment as I might on, say, 20m? While I'll bet that those living in high population areas like the Eastern US can reach lots of other hams, how will it be for me in Denver?

Also, now that we're near the top of the sunspot cycle, I'm sure 2m is pretty active. But, what's it like at the bottom of the cycle? Ten meters essentially goes dead at those times so I'm thinking that even more so on 2m. What would be a REASONABLE distance for DX now? How about at the bottom of a cycle?

Thanks for your help, Pete KA0TZK

to
> go.

May I direct your attention to the fact that the physical size and the cost
of purchase are at the opposite ends of the spectrum for the tuning wand and
the wobbulator. How many hams have a wobulator? How many hams could carry
one in their top pocket? How many hams have a scope? Of course a wobbulator
alone is insufficient for good results; a good calibration oscilator is also
required.

However for an If amp where a whole series of tuned transformers are used
the wobulator will not tell you which transformer to tune the tuning wand in
conjunction with the wobbulator will make the job very much easier.

If anyone is paying for the wrecked gear then they are of course entitled to
use absolutely any method that they choose.

Gary7SLL, always one hand in pocket.

Source record: 125550

Thanks, Herb, for alas taking the time to address my monetary loss on your amplifier. In me, you have some one who looks with all his might at the facts and often changes course based thereon.

Your explanation of the the loss I suffered on your SB-220 doesn't wash with me. Here's why: You misrepresented the purpose of the purchase. While you did tell me that the band switch needed repair, you never disclosed the amplifier's otherwise sad shade nor that it had to be nearly rebuilt to be used.

You threw in a line that colors your entire post: The one characterizing my motive in buying the amp. You knew very well that I intended to put it on the air as a backup amplifier in its whole state. At no time did I ever represent otherwise. So the notion that I bought it solely for spare parts is deceptive, unfortunately.

When I brought that amp to my amplifier expert, he just shrugged his shoulders in disbelieve. Another ham, who was here at the time, examined it, shaking his head: "You got taken." Several knowledgable folks in fact who looked at it found the amplifier badly corroded, degraded, and aesthetically messy.

There is truth to your assertion that if I tracked down my amplifier expert and returned the amplifier to you, you would refund that money. He is the same expert that you've used. My position, right or wrong, is that I don't want to be hassled with that boat anchor. We've repeatedly talked, wherein I've maintained for years that I want you to make good on the amp by retrieving it and sending me a refund.

There's where it stands Herb. Hope you can see your way to finally do the right thing. Treat me the way I treated you, as I flew there, spent many days in the law library, reading, researching, writing legal papers, standing by you at that mockery of a trial, and running around Miami afterwards to find witnesses who would prove the jusidisdicitional list of telephone calls was indeed bogus. Put forth a bonafide effort to make me whole, rather than merely the appearance of doing so, and I will feel differently about this matter.

Wow. Is it really worth a job at IBM to forge headers and spew just to impress the trashy likes of AF2Y? I sure hope so, because this is being forwarded to your supervisor in North Carolina. You must be the "DUMBEST" IBM employee in the country. Or should I say "ex-employee?"

Gary,
I was really thinking about the satisfaction I feel when a difficult and
obscure fault has been located and repaired.
Board and bottle swapping - for all of your high-minded hyperbole -
doesn't give an ounce of it, I fear.

Thanks for the good wishes.

Oh. By the way, I have got a (homebrew) wobbulator.

I think we've gotten off subject here, but the above comment begs a
reply.
Drug policy and privacy rights are complicated issues. That's why
there's currently a raging public debate on these topics. It is
"stupid" to oversimplify the issues like JJ has.

4748. Motorola HT-1000 16 channel UHF pakage

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-06 00:00:00 UTC
From: Joe Davoli <jdavoli@erols.com>

alt.ham-radio.marketplace,alt.ham-radio.vhf-uhf,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

Hello all! I have a UHF HT-1000 for sale, is high split (450-512 MHz,) but will program out of band split. I had all amateur frequencies programmed, but the carrier or tone squelch would not open up on one of my favorite repeaters, output 442.000.....too darn close to the edge of it's capability when programmed out of band, I suppose. It would receive just fine if I pressed the manual MONITOR button, though. Works fine and within spec on the rest of the frequencies above that 442, though. I got glowing audio reports wherever I went with this rig, typical Motorola quality at work here, but am buying an amateur HT for amateur work. Radio is a 9.5 out of ten cosmetically, with a few minor scuffs and scratches on the front. Is an intrinsically safe model (for hazardous atmospheres,) factory mutual approved, and so marked on the base (with the green dot and triangle,) a good choice for emergency services / confined space / mine / industrial type work (with the proper batteries.) Package comes with radio, standard rubber whip antenna, THREE batteries (two of which are virtually brand new, but all working HARD!,) and a standard rate charger. Radio model number is H01SDC9AA3DN. I want only $400 for the entire package, which is a fine deal. I will guarantee that the radio is working 100%, with no problems when you receive it. Buyer will pay shipping and insurance by his choice of carrier. E-mail me at:

jdavoli@nospamerols.com

and remember to remove "nospam" from the address.

Thanks for looking!

Joe Davoli, KB3DMF

<<Herbie, for cryin' out loud, why don't you do the right thing regarding Bob. He did sweat bullets for you; broke his tuchus for you; stuck up for you on the air and made a lot of enemies doing it. How the hell can you shaft a guy like that? Have you no conscience. You're just lucky you don't live in this area and pull a screwin' like that. You'd do it ONCE!>>

Thanks, Herb, for alas taking the time to address my monetary loss on your amplifier. In me, you have some one who looks with all his might at the facts and often changes course based thereon.

Your explanation of the the loss I suffered on your SB-220 doesn't wash with me. Here's why: You misrepresented the purpose of the purchase. While you did tell me that the band switch needed repair, you never disclosed the amplifier's otherwise sad shade nor that it had to be nearly rebuilt to be used.

You threw in a line that colors your entire post: The one characterizing my motive in buying the amp. You knew very well that I intended to put it on the air as a backup amplifier in its whole state. At no time did I ever represent otherwise. So the notion that I bought it solely for spare parts is deceptive, unfortunately.

When I brought that amp to my amplifier expert, he just shrugged his shoulders in disbelieve. Another ham, who was here at the time, examined it, shaking his head: "You got taken." Several knowledgable folks in fact who looked at it found the amplifier badly corroded, degraded, and aesthetically messy.

There is truth to your assertion that if I tracked down my amplifier expert and returned the amplifier to you, you would refund that money. He is the same expert that you've used. My position, right or wrong, is that I don't want to be hassled with that boat anchor. We've repeatedly talked, wherein I've maintained for years that I want you to make good on the amp by retrieving it and sending me a refund.

There's where it stands Herb. Hope you can see your way to finally do the right thing. Treat me the way I treated you, as I flew there, spent many days in the law library, reading, researching, writing legal papers, standing by you at that mockery of a trial, and running around Miami afterwards to find witnesses who would prove the jusidisdicitional list of telephone calls was indeed bogus. Put forth a bonafide effort to make me whole, rather than merely the appearance of doing so, and I

will feel differently about this matter.

You misunderstand; British Telescum aren't in the business of offering
decent telephone service. They make that _perfectly_ clear at every
opportunity. They're in the business of gouging great big quivering
gobbets of raw money out of the backs of hapless consumers, while
protesting about how put-upon they are by the telecoms regulator demanding
that they provide services like ADSL that might eat into their lucrative
leased line business.

My entire argument is that Christians celebrate the birth of Christ on
December 25th. They do it every year. Their celebrations have
nothing to do with when any particular millennium begins or
ends. Christmas is not, and has never been, considered the start of a
new year, century, or millennium.

I replied to Ruzzo personally and the mail bounced so I'm replying to all the groups that his message was posted into. Since it was already written and I didn't care to say it all again, I'm attaching the reply to him as a text file.

Russo,

Please don't take this as an attack on you, but smoking does make a difference in a lot of ways. The tar and nicotine case damage (physical and smell) to most any equipment. If it were a car then it would be in the upholstery and carpets as well as the electronics. Most people who smoke think because it hasn't killed them yet it hasn't harmed them. They probably never stopped to think about why they hack and cough all the time, not all do, for a while. If I might give a personal example or two....

My father smoked Camels (highest in tar AND nicotine of all the brands) who's motto was "I'd walk a mile for a Camel". Before he died he wished he could walk two steps to use the bath room! Read the book, NONE OF THESE DISEASES by S.I. McMillian (?) to find out

HOW the tar and nicotine cause the build up of cholesterol. It's in the chapter on "Cancer by the carton". By the way, my father had 5 amputations before he died with one leg cut off half way between the hip and knee and the other just above or below the knee. Died a bit over 60 years old.

My step-father worked at a rock quarry so most of his health problems got blamed on the rock dust, but he used to brag about smoking since he was 12 or so and "it hadn't hurt him". He died using oxygen and one day got the oxygen line pinched in a door while he was in the bath room. He was purple before he was found. Age < 60.

I personally believe that cigarettes, and their stupidity in using them, killed both these men. I know of many others who have all kinds of breathing problems and keep on smoking. One man was in the hospital waiting room the other day and went outside saying, "I'm going to take a few drags if it kills me." (Or something to that effect. It was awfully tempting to say to him, not to worry, it would sooner or later!) The doctor had already told him to give it up.

Personally, I don't even like to go into a room where someone else has been smoking. It really bothers some folks. I'm one of them.

Again, Please don't take this as an attack on you. If you wish to kill yourself it is your right. I just think you could find an easier, less expensive and much faster way to do it -- as well as a much less painful way to go!

As to your last comment....yes, you are right. Smoke is not the only thing that harms rigs. I purchased a vehicle once that had been gone over electrically by the teenage son. I wished a few times that they had it back, but they never knew I noticed.

God bless...

Al

4760. RELM slantface radio info and thanks

Newsgroup: rec.radio.amateur.misc

Hey thanks to all who helped with the keypad deal. FYI is below for all to benefit.

Called relm, they gave me to their parts supplier, 10-4 Communications. number is 800.487.9576 and keypad part number is 2001-6066-706 (they knew it by heart)
Cost is $16 plus shipping. they're on order so it may be a week.
I got my order in!
good luck and thanks to all,
Randy

4765. Re: AF2Y WILL PLAY "JEW" CARD IN LATEST TIFF

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-06 00:00:00 UTC
From: Len Schaier <lschaier@avotec.com>
Message-ID: <384C6FF5.1713257D@avotec.com>
Source record: 125575

I hope those family members get around to reading the poison that flows from your mouth. They will be proud that you are out there protecting the rest of us. The following is representative of your word and character. Remember these posts and the promise to me and my lawyer?

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX blames a fellow Jew for standing up to bigotry. You're downright sickening Lenny. A disgrace to the House of David" AF2Y 11/20/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"the unity I feel for my fellow Jews everywhere in this world is significant and I am happy to say I feel absolutley no comraderie or oneness or unity for Len Schaier,K2IVX...NEVER WOULD I BACKSTAB A FELLOW JEW AS HE DID ME" AF2Y 11/24/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"classified him a "Cattle Car Lenny," meaning a Jewish s.o.b who, in order to save his own life which finally also ended in W.W.II., loaded and unloaded innocent persons headed for extermination. As I said; I'd sooner have a cup of coffee with KV4FZ than K2IVX because Schoenbohm has always been a stauch foe but NOT A GODDAMNED SNEAK. K2IVX is in a class by himself and as far as I'm concerned, I don't know how the Schoenbohm crowd tolerates him. Lastly, K2IVX thinks he can have me taken off the air thanks to stupid doctored tapes. That'll be the day." AF2Y 11/11/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"Listen up Lenny the Shiv...a blithering slobbering insult to ham radio. We Jewish guys are supposed to be on a high plain and you besmirch our reputation." AF2Y 11/24/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX, Lenny Schaier, a turncoat conspirator who defies description except for the fact that his treachery greatly exceeds his common sense and ability to write an intelligent message...This K2IVX is simply not too bright by not knowing he's met his match, BIG TIME." AF2Y 11/17/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"Lenny? A shiv? There is definitely something more wrong with you than just misjudgment-I think you're schizophrenic and need counselling." AF2Y 11/23/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX, whom I could have done without. I mean the louse invited himself and...I lowered my values by sitting at the table with him. My hero WB2OTK has a great nickname for Lenny, 'The Cattle Car Door Opener'" AF2Y 11/8/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX and KE9RY are Laurel and Hardy. The former is the fat know-it-all who flutters his tie in a most innocent way while the latter is his stooge and patsy" AF2Y 11/30/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"His problem is that he's Jewish educated but lacks the spark,zest and love of tradition to fight for his people. He's lackluster, boring and nonchalant and turns away from anti-Semitism, hoping it'll go away. He's unrealistic and far too compromising. He forgets about the Hebrew word,"zohar" meaning REMEMBER." AF2Y 6/12/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"Lenny-if 11 harmless words can set you off as you now are, YOU DO NOT BELONG HERE. And the same goes for 14.313. I'm astonished by your reaction especially after having reviewed the one sentence that set you off. And now you gang up on me with an inferior intellect?" AF2Y 7/2/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"The "skinny" on KT4TR is that he uses K2IVX as "point man." You know what I mean don't you? Out of ignorance and desperation, KT4TR puts his foot in his mouth, gets in trouble litigiously and Lennie his shill makes phone calls begging the offended to lay off."

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"I got news for you buddy-the Lenny in Port Washington is as dangerous as the Lenny in the Caribbean." AF2Y 11/18/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX is leafing through the North Jersey Yellow Pages for more Rabbis to call." 11/28/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"You and K2IVX are two Jews who befriend a man who began all the anti-Semitism on 14.313. You and he like a man who said that Intercon was controlled by Jews in order to steal money from telephone companies. You and he like a man who minimized and trivialized the Holocaust. You and he like a man who supports John Demjanjuk, a Ukranian guard at Treblinka extermination camp. What does that tell me. You and he are CRAP!" AF2Y 11/11/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"The only rat lousy enough to CALL a house of worship and lodge a FORMAL VERBAL complaint against a congregant is Lennie Schaier, K2IVX." AF2Y 8/30/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"K2IVX the Yiddish Shill whom to all Jews is a bitter pill" AF2Y 11/9/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

"This morning I heard this flake tell another flake,K2IVX, that HE corrected my spelling errors in a letter he intercepted." AF2Y 5/31/99

"I made it clear to Lenny that I shall neither post nor support any caustic remarks directed at him." AF2Y 6/14/99

You are absolutely correct. I never said I didn't understand the "JEW" reactions nor that he creates the situations so that he can accuse those who attack him of being antisemites. Thats always been my problem with him. He creates anti semites, and those he doesn't create, he encourages to come out of the closet. He won't let it stop even if others would stop.

A month or so ago a fellow by the name of lloyd who he was exchanging terrible messages with just stopped responding. What did our friend do... he taunted him. He couldn't stand the fact that he was being ignored by lloyd. Eventually he moved on to someone else who he could trade insults with.

I really don't care if someone hates me for being a Jew or anything else. My problem is that when Jews, Christians or anybody else are publically insulted then insulting people becomes legitimitized and makes it ok for the weak of mind to join the crowd.

Maybe I'm asking to much, I don't know.

Anyway thanks for the note and I hope you don't mind the public response.

: > would be tested and administered would be interesting though.

: Yes perhaps it could starting at CB where it currently is at then a series
: of progressive examinations each giving additional privilages.

The biggest problem is *who* would administer it? Probably a FOC from the local club who doesn't understand those new-fangled transistors and would equate technical ability to morse speed (and accuracy?).

: > Being an amateur with some technical ability, it alarms me to see the way
: > that some folk "dive in" with little knowledge. Yes, I have had somebody
: > bring a (domestic) radio in saying "I tightened all the loose screws" :-)

: And all this blue smoke came out of the top and it has had a strange smell
: about it ever since.

No, the blue smoke and strange smell arrived after I gave him the bill!

: > BTW Gary, two things, I think that you have a lot more faith with the
: > designers than I do and what do you use your little brass & ferrite ended
: > gizmo for - other than to find out which way to turn the core? I found it
: a
: > lot easier to look at the display from a wobbulator to tell me which way
: to
: > go.

: May I direct your attention to the fact that the physical size and the cost
: of purchase are at the opposite ends of the spectrum for the tuning wand and
: the wobbulator. How many hams have a wobulator? How many hams could carry
: one in their top pocket? How many hams have a scope? Of course a wobbulator
: alone is insufficient for good results; a good calibration oscilator is also
: required.

I suppose that I have had the luxury of calibrated test equipment since leaving school. I believe that I may have a Cossor wobbulator from my TV repair days still up in the loft. It had a tuneable and a swept (tuneable) oscillator as well as a twin crystal (1/10MHz) marker generator.

Since leaving school in the early '60's, I have worked in the TV (domestic), motor (electronic instrumentation) and communications (PMR) industries before joining the test equipment business, firstly with a well known Munich based German Company, then a large company in Chelmsford before setting up my own Company.

: However for an If amp where a whole series of tuned transformers are used
: the wobulator will not tell you which transformer to tune the tuning wand in
: conjunction with the wobbulator will make the job very much easier.

Yes, quite true. However, given the choice, I would still prefer my wobbulator. Probably a Rohde & Schwarz Polyskop IV without which I would think it "fun" to align a reference TV transmitter (R&S SBTF).

: If anyone is paying for the wrecked gear then they are of course entitled to
: use absolutely any method that they choose.

Yes, but it is a bit like watching one who puts a soda into a single malt!

: Gary7SLL, always one hand in pocket.

Good sense, and before one of the lesser minded think of an inappropriate comment, it is especially good sense with a rubber mat when working with higher voltage equipment.

> Good question, there are many unanswered questions regarding to the activity of the misfits that have caused the real problem on 20 and 75 meters. Yes, it is fitting to ask the question , why didn't Boom Box Jimmy get his due after contributing to the problem after Mr. Hollingsworth had altered his attempt for the individual to retest. If you read the release from mr Hollingsworth you will see for yourself that Mr. Hollingsworth had been assured that his behavior would change and that me would be a model operator. Well, that only lasted for about a week before he was right back to assisting AF2Y in his morning ritual of interfering with stations operating on 14313. A tape of " Boom Box Jimmy " is being compiled and will be sent to the FCC. This tape will demonstrate the lack of intent on the part of "BOOMER" to live up to his stated intent of operating in accordance with the rules and regulations.

The question of the hour will be, who will he blame for his actions this time???

>about newsgroup participation?

Lloyd claims to be a computer science major; show me one computer company that doesn't perform a thorough background investigation on prospective employees. Accessing Usenet writings can expose a great deal of both negative and positive traits regarding a person's ability to get along with others and that person's personality, and can be done quickly (and free).

>>Based on what you write, I certainly wouldn't grant you an interview
>>let alone hire you.

>Amateur radio newsgroup participation is no more
>job related than 99% of all newsgroups.

Hiring a problem employee can cause grief and financial loss to a corporation. Perusing what a person writes on Usenet can provide a fairly reasonable personality profile of him or her.

Don't you 'sorta' think that it is an invasion of a person's personal
privacy?
Does your Orwellian thinking allow for the fact that there are certain
things that are not a perspective employers business?
Or do you think money rules everything.....including the Constitution
and a persons personal privacy?

Can you think of a better time to kick a man than when he is down? Any way you are a low down snake and have never been on a level that didn't require a downward kick! You deserve it for sucking up to me and trying to turn me against a life long friend here in this town. Also making fun of the death of his eight year old daughter and his wifes death. You are a old grave dancer af2y, celebrating loss of peoples loved ones.

You think every one is as low down as you Doc, and will turn on friends like you have. Your treatment of Lenny shows what you are.

So don't cry and moan, it breaks our heart ha ha. Ive been doing a lot of other things, on the golf course and on hunting trips, but I turn on the radio and find you are finally getting back what you deserve. All I can say is -----thatsritepolly!!

I can't remember the number of times I have publicly offered to buy back
that three tubed SB-220. I would love to have it back at the $250 price
it was sold for. The discoloration of the chasis is a common occurence
in the tropics but it does not affect its performance. the amplifier
was a big gun unit with the exception of the Heath designed band switch
which was unable to handle the current. Bob knew all of this but wanted
the amp for "spare parts". It was sold as is where is but I am still
willing to buy it back.

From: Trebb@webtv.net
Message-ID: <15721-384B4BF3-14@storefull-246.iap.bryant.webtv.net>
Source record: 125648

Apropos of contention, I remember sharp, fiery controversy when single side band arrived in the latter 50s. As it crawled up the 75 meter band, AMers were livid. How dare this new fangled mode take over well settled AM frequencies! Even then. hams were arrogating power that the FCC hadn't specifically delegated.

The arguing turned downright nasty. As an early teen, I recall my shock at hearing this hobby I had worked so hard to enter locked in intramural squabbling. Things have changed only in degree; now hams fight over everything, including calling one another names, just like children.

Another striking difference: The FCC carried clout then, when a pink ticket in the mail would send shudders up your spine. We were poised with our logs up to date for that knock on the door, meaning an FCC inspection of the station. We feared the strength of the institution itself then, rather than a Riley Hollingsworth, Esq., who represents it.

A Brief Historical Overview

If there is any one constant in the changing state of the
communications art, it is that "Hams" (Amateur Radio Operators) have
always been on the forefront of it. Rumors abound where the term "Ham"
came from. Some of the more amusing are described in the list of
Frequently Asked Questions for this newsgroup.

Regardless of origin of the name, a "Ham" is universally recognizable
as one who experiments in radio and communications.

Whether it be constructing a low-power CW radio with vacuum tubes, or
designing TCP/IP packet networks, such experimentation has
historically spilled over into the mainstream such as was the case
with Howard Armstrong, who developed the regenerative oscillator and
FM radio, or General Curtis E. LeMay (K0GRL, W6EZV) who was
instrumental in making Single-Sideband the communications standard for
the Strategic Air Command (1946-1992, now reorganized into a joint
command called USSTRATCOM) and eventually the U.S. Air Force. Although
packet-switching techniques originated from DARPA (Defense Advanced
Research Projects Agency) and the ARPANet, no one can deny the

tremendous influence that amateurs, including those within TAPR (Tucson Amateur Packet Radio), have had in demonstrating the viability of TCP/IP and AX.25 communications via radio links. The efforts of AMSAT (the Amateur Satellite Corporation), including the development of many ham satellites and the low-orbiting Microsats (communications satellites no bigger than a breadbox that use store-and-forward packet techniques), have certainly advanced the state-of-the-art in communications, one of the defined purposes of the Amateur Radio Service, as recognized by international treaty.

What is an Elmer?

Since in many cases hams are writing "the book", there is often no "book" or other established reference for a beginner to refer to. Traditionally, information has been passed on from ham to ham via word-of-mouth. Like many of the traditional crafts, a variation of the Master-Apprentice system has emerged, the Elmer-Novice relationship.

The term Elmer has probably been in use since at least the 1950's (I'm told, but haven't yet confirmed, that it appears in British amateur radio publications from that period). The name Elmer was likely chosen because Elmers are usually older and wiser, having the benefit of many years in the hobby, including several failed projects, and an electric shock or two. The first U.S. reference to Elmer in print was from Rod Newkirk, W9BRD, in his "How's DX" column in QST from the early-to-mid-1970's.

Such Elmers have traditionally been the mainstay of amateur radio, and the source of many new hams, particularly those interested in working on emerging technologies. Even more importantly, Elmers provided an outlet for the impatient newcomer who wanted "to know everything, and right away." Faced with such a request, a good Elmer will smile and proceed to lead the novice through some project or operating experience. Several hours, days, or weeks later, the novice would have his answers, but would have earned them. Even better, the sense of accomplishment would boost the novice's confidence and nudge him or her down the road to being a model, experienced ham operator.

Many present hams feel that such an experience is missing today. In today's hustle-bustle world, the response to such natural curiosity and desire to learn is, more often than not, "I'm too busy" or "RTFM." As a result, the quality of new hams declines and the knowledge and operating habits they develop in their first formative months and years leave much to be desired. And the very same hams who claim that they "can't understand the new generation" also, in almost the same breath, lament about the "decline of amateur radio."

What is an Elmer Today?

An Elmer today is of any age, male or female, who has some expertise and is willing to share it with beginners. Elmers don't even need to be licensed amateurs, just people with knowledge in some area of electronics or communications technology.

How do I become an Internet Elmer?

With the ever-widening scope of the Internet, the amateur radio newsgroups on Usenet, and now the World-Wide Web, the potential for Elmers to share their knowledge to a wide audience has never been greater. To that end, I maintain a list of such Elmers. Volunteers may register via my formatted, on-line, World-Wide Web Registration Form:

http://www.novia.net/~pschleck/elmers/register.html

I would prefer that you register using the above form (which not only ensures that nothing is omitted, but also makes adding your entry much easier by automatically converting it to HTML). However, volunteers who are not yet on the Web are also quite welcome, and may register by writing me at elmers-request@novia.net with their name, amateur radio callsign(s) (if any), E-mail address, and area(s) of expertise. URL-format pointers to resources they maintain, such as WWW home pages, FTP archives, mail servers, or mailing lists, would also be quite welcome. The list has gotten large enough that there should be plenty of suitable examples to model your entry after. If you need some further assistance formatting your entry, drop me a line and tell me a bit about yourself. Ironically, sometimes the best Elmers write to me saying, "I'm not an expert, but..."

I have set up an administrivia mailbox for correspondence related to this list (elmers-request@novia.net, the default Reply-To: of this message when posted to Usenet News). I would prefer that all such correspondence be directed to that address. In addition to saving it into a special folder, my incoming E-mail filter will also send you an automated return-receipt.

Also, an unfortunate increase in the amount of unsolicited junk-mail that I receive (often dozens of messages _every day_) has forced me to become much more ruthless about filtering incoming E-mail. While I can guarantee that I will read all mail sent to elmers-request before the next bimonthly posting of the list, mail sent to pschleck may not only not get reviewed for some time, my incoming mail filter (procmail) may even bounce it back to the sender if it can't be automatically categorized as originating from known, friendly senders or have known, welcome keywords in the headers (Elmer is obviously one of those keywords).

How may I obtain the latest copy of the Elmers List?

There are currently 5 ways of obtaining the Elmers List. Any site at least reachable by Internet E-mail can use the Mailing-List or Mail-Server options:

World-Wide Web (WWW):

This is the recommended method for accessing the Elmers list, as it allows this resource to be viewed as hypertext. The home site at www.novia.net features immediate updates each month, hypertext-linked subject and geographic indexes, keyword searching, and registration and feedback forms. The other two sites use automatically-converted versions of the Usenet news articles, but are still usable, particularly if you are outside North America. The site marked with an asterisk also offers Wide-Area Information Service (WAIS) index searching by keyword for all Usenet News FAQ's:

* http://www.novia.net/~pschleck/elmers/
* http://www.lib.ox.ac.uk/internet/news/faq/rec.radio.amateur.misc.html
* http://www.cs.ruu.nl/cgi-bin/faqwais *

(_Note:_ Because of maintenance problems - FAQ documents not being promptly updated in particular - the sites at Ohio State and Smart Pages are no longer recommended for accessing a current copy of the Elmers List and have been removed from the above list.)

see also the newsgroups under comp.infosystems.www.* (I haven't listed URL's for all of the newsgroups under this hierarchy as there are now about a dozen of them (!!!).)

Usenet News:

This was the original distribution medium for the Elmers list. It continues to be supported for users who cannot access the World-Wide Web. Since the document uses URL's throughout, the news article version may also be viewed as hypertext via some mail and news readers. The latest copy of the list can be found in the news articles with Subjects like _"Amateur Radio: Elmers Resource Directory Part */* [*-*]"_ (The * represents a wildcard character, as the need to split the list evenly, as well as keep all parts under the 64K message limit for Usenet, requires that I adjust the split occasionally). Since the list is cross-posted to the following newsgroups:

* news:rec.radio.amateur.misc
* news:rec.radio.info
* news:rec.answers
* news:news.answers

on the first Monday of each even-numbered month, with an expiration date 10 weeks into the future, there should always be a copy available at most news sites. Check your newsreader documentation for information about reading previously-read articles or articles that are "threaded" to this one. Also complain to your local news administrator (E-mail to "news@localhost" or "usenet@localhost") if your local news server is configured to ignore Expires headers (and thus prematurely delete the articles) in worthwhile, mostly moderated, information newsgroups like those listed above.

Anonymous FTP:

If your site is directly connected to the Internet, you may retrieve the latest copy via File Transfer Protocol (FTP) from the following sites:

* ftp://ftp.novia.net/customers/pschleck/elmers/
* ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/ham-radio/elmers/
* ftp://ftp.uu.net/usenet/news.answers/radio/ham-radio/elmers/

Mailing-List:

Since the list is cross-posted to rec.radio.info, the latest copy may be obtained from the mailing-list gateway for that newsgroup (along with many other informational articles about radio) when it is published each even-numbered month. To subscribe, send E-mail to:

listserv@ucsd.edu

and in the BODY (not the Subject) of the message, write:

subscribe radio-info

The server may not be able to determine your return address. In that case write:

subscribe radio-info (your E-mail address)

You should get an acknowledgement very shortly.

Mail-Server:

If you don't want to read through the entire gateway of rec.radio.info, or want a copy of the list right away, send E-mail to:

mail-server@rtfm.mit.edu

and in the BODY (not the Subject) of the message, write:

send usenet/news.answers/radio/ham-radio/elmers/README
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part1
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part2
send usenet/news.answers/radio/ham-radio/elmers/index/geographic
send usenet/news.answers/radio/ham-radio/elmers/list/part1
send usenet/news.answers/radio/ham-radio/elmers/list/part2
send usenet/news.answers/radio/ham-radio/elmers/list/part3
send usenet/news.answers/radio/ham-radio/elmers/list/part4
send usenet/news.answers/radio/ham-radio/elmers/list/part5
send usenet/news.answers/radio/ham-radio/elmers/list/part6
send usenet/news.answers/radio/ham-radio/elmers/diff

and the latest copy of the list should be sent to you E-mail within 24 hours (the mail-server uses batch priority to reduce system demand).

Acknowledgements

By using this resource, you are benefitting the net by obtaining assistance in the fastest and most efficient way possible. By volunteering to appear on this list, you are contributing to the good reputation of the radio-related newsgroups.

Thanks to all the volunteer Elmers, as well as courteous list users, for making this service a success.

Amateur Radio: Elmers Resource Directory

More information about this list can be found in the companion posting
to this file, "Amateur Radio: Elmers List Info and Administrivia."

73, Paul, K3FU

- A -

John Ackermann N8UR

jra@febo.com

http://www.febo.com/

My primary interests are in packet radio network building
(particularly higher speed stuff) and TCP/IP. I've got quite a lot of
info on using the Kantronics D4-10 19.2kB radios, as that's the
hardware we've been struggling with here.

I'm now working heavily with Linux, and help run a TNOS/Linux BBS, and
a Linux native-AX.25 switch. Although I'm not "the world's greatest
authority" on either, I'd be happy to help folks with questions to the
extent I can.

I've developed some experience with full-duplex packet repeaters. I've
built 2 19.2 repeaters, and am working on a 9600 Baud one now.

My World-Wide Web Page above has a reasonable set of resources for
digital networking, including HTML versions of some of my work,
sample configuration files for Linux AX.25, and some Linux software
tools, as well as the Ohio IP address coordination info.

I've just finished writing a book on TCP/IP that TAPR will publish
(hopefully) by the end of the year. It'll be called _Networking
Without Wires_ and is a completely rewritten, and greatly expanded,
version of the old _IntroNOS_ document I wrote several years ago. In
the meantime, I've made the old _IntroNOS_ available in HTML format on

my World-Wide Web Page above.

TAPR (Tucson Amateur Packet Radio) has formed a special interest group to discuss issues of regional packet networking (Net-SIG). As a result, the TAPR net-sig mailing list was born, and is now ready for operation.

This list is <not> intended to replace any of the existing packet-related mailing lists. Its purpose is provide a medium for communications among those interested in packet radio networking, both dealing with technical issues and political/regulatory ones. We'll discuss things like how the potential 219MHz band will fit into the networking picture, how to link areas using different networking schemes, how to set network parameters, etc. The list's charter will be posted there regularly.

The address of the list is net-sig@tapr.org and you can subscribe by sending mail to listserv@tapr.org with the text "join netsig".

Apart from subscribing to the list, you can contact me for further details about the Net-SIG (including upcoming conferences).

TAPR Vice President and Board Member

Joint ampr.org IP Coordinator for Ohio subnet (44.71.xxx.xxx)

Please direct all correspondence regarding the assignment of ampr.org IP numbers in Ohio to:

ipaddr@febo.com

which is a mailing list read by a team of coordinators.

[_Editor's Note:_ All ampr.org coordinators are listed in the document at:

ftp://ftp.ucsd.edu/hamradio/amprnets

* ARRL Assistant Section Manager of Youth Services (Alabama Section)
* Volunteer, North Alabama SKYWARN
* Member, Alabama Emergency Response Team
* National Weather Service (NWS) Registered Storm Spotter

Contesting is my favorite activity. I operate as many contests as possible, mainly on phone. I do operate CW often on the HF bands. Field Day is a big deal for me. I have been Field Day coordinator for two different groups in the past two years, including one in Mississippi that used my callsign this past year. I operate mostly on the HF bands, especially ten meters.

I am experienced with IBM-compatible computer systems, as well as packet radio networking and BBS systems, specifically MSYS. I am also experienced in APRS. I familiar with repeaters and controllers, specifically the CAT-300 (DX). I am also involved in the recruiting and licensing of other youth, and am planning classes for local Cub Scouts/Boy Scouts.

I am into some digital modes such as RTTY, PSK-31, SSTV,
Hellschreiber, CW, and packet. I like to design antenna types and try
to see if they will work, and if they don't work, try to MAKE them
work! I have done sone QRP, but not as much as I like to do other
things like DXing and especially CW. I also have 2 meter SSB and enjoy
working meteor scatter when there is a nice shower. I like to provide
emergency communications and also communications with public events. I
am also trying to get into laser communications. I know a lot about
it, but have never taken the time to get all the stuff that I need for
it. I am quite experienced in the computer field also. I have repaired
many computers for our school, both electronically and with
configuration of software, I am also really good with networks.

425 DX NEWS Weekly Bulletin WWW PAGE (NEW SITE!!!)

- ------->> http://www-dx.deis.unibo.it/htdx/ <<---------

NEWS, INFO, RUMORS, DXPEDITIONS, IOTA ACTIVITIES and more

DX CALENDAR, WABA AWARD (rules & scores) now available

in English Version and Italian Version

Same server of the IK4LZH site for QSL MANAGERS.

I am an IOTA chaser, I work DX and I join contests. Actually I'm in
love with RS sats and DOVE telemetry. I'm the Shortwave Listening
(SWL) coordinator of the Italian Amateur Radio Association and I have
a regular SWL page in their official magazine Radio Rivista. Recently
I joined the 425 gang that produces the 425 DX News bulletin. I
translate it into English and send it to many DXers via E-mail. I also
maintain a WWW page to provide the bulletins graphically with previous
numbers and more to come. I've been an SWL since 1974 when I received
a receiver as gift from my parents. Now I'm 36 and I'm running also a
free BBS devoted to HAM/SWL.

During the school year, I am in Baltimore college ARC at University of Maryland, Baltimore County, which is home of the UMBC Amateur Radio Club and KB3CVD:

http://umbc.edu/~rcarls2/hamradio/

During the winter and summer, I am in New Jersey. I am active in ARES/RACES/NTS and local clubs in both areas, and would be glad to help other young people get into the hobby of Amateur Radio, particularly in the interests of Public Service and Disaster Management.

* Callsign Data
* Mobile/Portable/Field Day (FM, HT's, 10m SSB)

I'm willing to act as a reference for anyone wanting info on getting tapes (especially Callsign tapes) from the Department of Commerce National Technical Information Service (NTIS) or wanting other info on callsign-project related stuff.

One of these days I'll actually be around for the un-net! I promise, really! (Well, maybe not. Is anyone even doing the un-net any more? If so, E-mail me and maybe we'll actually do it!)

My job is currently System Administrator for a large UNIX site so I know a little bit about day-to-day UNIX operations and UNIX installation :-) My laptop currently runs Linux most of the time (over 99% of the time). I also have much experience with constructing E-mail paths that will work rather than bounce. Currently I do software full time (yay!), and am fiddling with some laser experiments - if I could get some 'spare' time.

I also have a fair amount of experience in hardware/software interfacing and machine control.

I am available most days; work from home. I am especially interested in teaching the practical side of ham radio technology. I will help troubleshoot kits, old radios, etc., but will expect the new or prospective ham to pitch in.

Expertise gained from over 45 years of ham radio and almost as many years in broadcast engineering.

David B. Ellenberg WA2KWP

I have been a radio amateur since 1954, first licensed as KN2HYZ in Peekskill, New York at the age of 14. I have been active in periods ever since, never losing the ham spirit.

I would like to be involved in helping young people start in ham radio. Especially those who are already licensed and are "lost" looking for ways to operate or set up a station.

I have a pretty broad "knowledge base" in all the areas indicated, but
if I can't help with something, I probably know someone who can.

Carl Estey WA0CQG

wa0cqg@tapr.org

North American Digital Systems Directory World-Wide Web Page:

(Sponsored by Tucson Amateur Packet Radio, TAPR)

http://www.tapr.org/directory/

The purpose of the Digital Systems Directory is not to manage,
coordinate, or regulate the usage of digital systems, but to provide
the most up to date and accurate listing of digital systems that can
be provided. Neither is it a formal organization, but a mechanism to
allow regional groups to provide and share information regarding
digital systems.

The Digital Systems Directory listing is intended for use by
individuals to further their enjoyment of the hobby and by
organizations to help plan and develop digital networks.

Please direct any submissions, feedback, or administrivia to my E-mail
address above.

I have been a ham since 1956. I have held the positions of SEC, Technical Co-ordinator, Army Mars AAT4TK. I am an avid homebrewer and antenna experimenter. I hold a EE degree and have 30 years experience in computer design, programming, and system analysis. Present station is all home brew except the receiver (75A4) and can be heard on 3973 kHz Friday mornings from 0300 to 0500 ET when I am NCS for the before breakfast club. W4JLE is my original call which I just reclaimed under the vanity call sign program. I am NO LONGER a member of the ARRL and that has hampered my efforts with RACES.

ARRL Laboratory Engineer

* Radio Frequency Interference (RFI) matters
* RF Exposure Safety/Regulations
* Equipment Testing

I have been at ARRL HQ for over 13 years. During that time, I have become ARRL's RFI and RF-exposure guru. If you have questions about RFI or RFI exposure, first go to the ARRL's Technical Information Service World-Wide Web Page:

http://www.arrl.org/tis/

and download the applicable information packages. From there, you can direct questions about RFI or RF exposure directly to me. I will either answer your question directly, or refer you to some of my contacts in industry, in the cable industry, etc. ARRL also publishes the _ARRL RFI Book_ and _RF Exposure and You_.

I have also had experience with testing of transmitters and receivers, mainly in conjunction with ARRL's Product Review testing. A copy of ARRL's Test Procedures Manual can be downloaded from:

http://www.arrl.org/members-only/prodrev/testproc.pdf

Before I came to ARRL, I spent a number of years as a TV and audio service technician, so can often help with troubleshooting questions. I wrote the troubleshooting chapter of the ARRL Handbook.

The ARRL Technical Information Service (TIS) Coordinator is now another member of the ARRL HQ staff. Please direct all TIS queries to tis@arrl.org, _NOT_ my E-mail address above.

See Mary Lau's entry for more information about the ARRL Info Server.

Gene Harlan WB9MMM

atvq@aol.com

Amateur Television Quarterly (ATVQ) Magazine

The magazine's E-mail address and mine are the same: ATVQ. There is also a ham radio section for "manufacturers and dealers" on America On-Line in which we list Amateur Television Quarterly, as expert and manufacturer. That is where most of the Frequently-Asked Questions (FAQ's) come from.

Most FAQ's are answered in one of two books we published. ATV Secrets for Aspiring ATV'ers is a non technical book, and Volume II is a 300-page technical manual with theory and projects for all equipment necessary to operate an ATV station. Prices in US funds are $9.95 and $24.95 plus postage ($3.10). Most of your inquires can be answered by either of these two books.

I am also compiling a set of W6ORG Notes, a regular column in ATVQ, which answers many of the technical FAQ's on various equipment and operations. This will be available for $9.95 also.

Assistant EC for Josephine County (Oregon) ARES/RACES

I am involved in commercial RF and wireless design, and willing to share experience with other amateurs. I have a complete test equipment facility for checking radios, antennas, etc.

Local NEWSLINE outlet: Program airs on the 147.30 repeater right after the Monday night net.

I am active on HF, VHF and UHF, including voice and digital modes, and will help in whatever areas I can for most of Southern Oregon.

ARRL Contest Branch Manager

I have been active in the Hobby for over 28 years, in a wide range of activities from local clubs, special events, public service communications, emergency communications, contesting, DXing, packet, repeaters, traffic handling, and more. I have served as an officer of local radio clubs, newsletter editor, Events Coordinator, Field Day Chairman, Local County Emergency Coordinator and Area District EC, member of several emergency preparedness planning groups, SKYWARN coordinator, and liaison to numerous served agencies in North Carolina. I have taught amateur radio licensing classes (theory and code) and have been active in developing small group "seminars" for training (everthing from "how to build a dipole" or "handle traffic" to "how to work with/at various agencies when dispatched during and emergency." I hold WAS (both novice CW and the "Geratol" award, DXCC, WAC and a wide range of on-the-air operating experiences. I was selected for membership in the A-1 Operating Club, have been award "Ham of the Year" awards for local clubs, and am willing to work with new-comers on most any project.

Civil Air Patrol (CAP)

I was Communications Officer and former unit Landstation Bluebird 284, 1980-87. Statistically, Landstations are relatively rare. A land station in CAP is an HF-capable station operating from both mobile and permanent locations as needed. As a land station, I checked into several regional nets for the Missouri Wing of the CAP. I am familiar with the CAP emergency protocol as well as MARS and ARRL. Also, I have extensive teaching experience for Novice to General levels and currently am a teacher.

I would like to help any new or prospecting hams in any way that I can. My personal experience is limited, but I am net control of a local Elmer Net here in Pittsburgh. This net meets every Saturday evening at 9:00 PM local time on one of the repeaters of the North Hills Amateur Radio Club (146.88- MHz). This net is intended to help all new hams. Many experienced hams also check in and can answer questions and share their wisdom with beginners.

Via TAPR's FTP site

The TAPR Software Library is now available via anonymous FTP. You can
access the library at:

ftp://ftp.tapr.org/

Log in as:

anonymous

with your E-mail address as password.

Via TAPR's Listserv (http://www.tapr.org/tapr/html/internet.html)

TAPR maintains several SIGs in various interest areas. To get the
latest list of SIG groups, send an E-mail message to:

listserv@tapr.org

with the subject line:

Request

and one or more of the following in the BODY of the message:

list

for list of mail groups on TAPR.ORG

information listname

(where listname is the name of the mail group)

to request the information on any mail group

subscribe list your_first_name your_last_name

(where list is the name of the mail list you want to join and
your_first_name and your_last_name are your first and last names,
respectively)

to subscribe

Some of the current SIGs include:

NETSIG Regional Networking SIG
BBSSIG BBS SIG
HFSIG SIG on HF Digital Topics
DSP-93 SIG for those that are building TAPR/AMSAT DSP-93 kits
APRSSIG SIG on APRS
TAPR-TNC SIG on TNC Issues
DSP SIG on general DSP topics
MIC-E SIG on supporting the TAPR APRS MicEncoder kit

TAPR-BB Announcement channel for TAPR bulletins and information

General Information about TAPR:

* Ever heard of a TNC?
* Interested in general packet radio information?
* Interested in Spread Spectrum Communications?
* Interested in high-speed packet operations?
* Interested in other types of digital communications?
* Interested in experimenting or building kits?
* Interested in keeping up-to-date on national digital and packet
issues?

Then you might be interested in TAPR!

Goals:

* Support Research and Development efforts in the area of amateur
digital communications
* Disseminate information on packet and digital communications
* Provide affordable and useful kits for experimenters and hobbyists
* Pursue and help advance the amateur art of communications through
publications, meetings, and standards

History:

If you have used a packet radio TNC, then you are already a part of TAPR history.

The TNC (Terminal Node Controller) project was the first big project that TAPR tackled and completed. Now TAPR covers a wide range of interests including: APRS, Spread Spectrum, networking, Timing, DSP, HF, and much more.

TAPR was founded in 1982 as a national organization with interests in the areas of packet and digital communications. Today, TAPR continues as a membership supported non-profit amateur educational research and development organization. TAPR currently has more than 2500 members, worldwide. TAPR continues to develop kits for the amateur community and is working actively on publications and communications standards.

Membership:

Membership in TAPR includes a subscription to the quarterly published Packet Status Register newsletter. PSR has been published since 1982 and is recognized as an authoritative source for up-to-date user and technical information on packet radio. Much of the material in PSR is timeless. Back issues may be obtained from the TAPR office. Membership in TAPR is $20 US for one year in USA, Canada, and Mexico. Outside North America is $25 US.

Join the amateur digital-revolution -- Join TAPR!

Phil Karn KA9Q

karn@unix.ka9q.ampr.org

http://people.qualcomm.com/karn/

High-Performance Software Modem Project

Recently I've been working on a prototype SQPSK (staggered quadrature phase shift keyed) modem for the amateur satellite channel. This modem is implemented totally in software running on a PC with an ordinary (non-DSP) Soundblaster card. It runs at 1200 bps and fits into a SSB transceiver bandwidth.

I've made good progress and have put some info up on my web page about it, including an audio file to show what it sounds like in noise when the signal is still copyable, available from:

http://people.qualcomm.com/karn/ham.html

Watch that page for an announcement of when I actually release the code, which I plan to integrate into KA9Q NOS.

Spread Spectrum

I've been trying to answer the question of consequences of promoting relatively wide-band digital modes on band occupancy and throughput (i.e., What gets optimized? Are there tradeoffs in quality vs. quantity?) in the context of the spread spectrum rules debate, but I think it needs to be a much wider discussion. See my reply comments to the FCC on this issue:

http://people.qualcomm.com/karn/papers/index.html

(See also Steve Bible for more information on Spread Spectrum)

[_Editor's Note:_ I'm honored by the presence of many advanced-level Elmers in this directory, including Jeffrey Angus, Gary Coffman, and now Phil Karn. Phil has graciously agreed to appear in this directory for the purpose of elmering and technical exchange for the advanced topics listed above. As with all of my Elmers, please respect their time by only seeking assistance from them for the topics under which they are listed. There are many Elmers willing to answer more beginning-level packet radio questions, including basic questions about IBM PC hardware, TCP/IP and NOS. Consult the "IBM PERSONAL COMPUTER (PC) AND CLONES" and "PACKET AND DIGITAL NETWORKING" categories in the Subject Quick-Search Index for a complete list.]

fmaia@cwixmail.com

http://www.w5yi.org/

The W5YI Group, Inc.
P.O. Box 565101
Dallas, Texas 75356
USA
Tel. +1 (817) 461-6443

This firm consists of two separate divisions:

EDUCATION DIVISION:

Develops and distributes amateur radio self-training materials, including the Gordon West/WB6NOA line of audio, video, computer software and printed study materials. Credit card orders and information from (toll free): +1 800 669-W5YI (9594). All materials are guaranteed current and shipped within 24 hours with 2-day priority delivery. They offer a special discount for instructors conducting training classes.

W5YI Amateur Radio written license exam and Morse Code training products are also available from every Radio Shack nationwide. Color photographs of the major training products are available at their Express Order or Radio Shack Unlimited desk.

THE W5YI-VEC:

Coordinates the activities of more than one thousand volunteer examining teams world-wide. The locations of test sites near you can

be determined by calling +1 (817) 461-4663 anytime, including evenings and weekends. Any General, Advanced or Extra Class amateur may form their own VE team by calling +1 (817) 860-3800 during normal business hours.

All examination results are electronically filed with the FCC. Amateur radio licenses and call signs are normally issued within 48 hours of VEC receipt of the examination paperwork. New amateurs may determine their call signs by calling the FCC's toll free consumer assistance line: +1 (800) 322-1117.

Wearable Computing and Personal Imaging:

http://wearcam.org/research.html
http://wearcomp.org/wearpubs.html

[_Editor's Note:_ Steve is a graduate of the Massachusetts Institute of Technology (MIT) and is currently a faculty member at the University of Toronto. He has done a considerable amount of research into, and implementation of, wearable, wireless networked computer systems using amateur radio (via a 56kBaud GRAPES radio modem) as the physical layer. He is a pioneer in "Wearable Computing." You may have also read about his invention in Scientific American, seen it on one of the science-oriented TV shows (such as the October 1996 episode of Scientific American Frontiers on PBS), or read some of his articles,

such as the lead article for Proceedings of the IEEE, Vol. 86, No. 11 or his lead article in CQ-VHF. He also wrote an article in the February 1997 issue of IEEE Computer. He is interested in connecting with other serious amateur hobbyists pursuing like or similar technologies. See his World-Wide Web Pages above for more information.]

Hospital Disaster Support Communications System (HDSCS) Coordinator

HDSCS World-Wide Web Page:

http://members.aol.com/emcom4hosp/

For over 15 years, the 90-plus members of the ARES/RACES-affiliated Hospital Disaster Support Communications System (HDSCS) of Orange County, California have served over 35 hospitals in nearly 50 emergency situations. At the new HDSCS site on the Web, you can find out how volunteer Amateur Radio operators can be an important backup communications resource for hospitals, if the hams are well organized and trained.

There you will find:

* How HDSCS organizes to support hospitals
* What "dedicated communicators" are and why they are important
* Frequently-Asked Questions about hams helping hospitals
* The surprising answer to "How often do hospitals need hams, anyway?"
* Response from hospitals served by HDSCS
* Info given to new HDSCS members
* Recruiting hams for hospital communications
* And lots more...

Joe Moell K0OV

homingin@aol.com

Homing In Column World-Wide Web Page:

http://members.aol.com/homingin/

(Homing In is a column in 73 Magazine featuring information about radio direction finding, hidden transmitter hunting, and jammer tracking.)

This site features:

* Southern California T-hunting, what equipment the winners use
* International-style foxhunts have come to California
* Complete design fixes for the Dick Smith doppler set
* Updates to the Moell/Curlee book (TRANSMITTER HUNTING---Radio Direction Finding Simplified), including board/kit/parts sources and building tips

* Frequently-Asked Questions (FAQ) and answers from the Homing In mailbox
* Index and subject list of all Homing In columns in 73 Magazine through September 1996 (over 90 articles)
* And lots more...

The Homing In site is written and maintained by Joe Moell K0OV. It is not affiliated with 73 Magazine, Wayne Green Enterprises, or any other commercial entity.

I am involved in training for new and upgrading Hams, paying back for Elmering received over the years as I came into Ham Radio. I am a VE for VEC's active in local area. I am most interested in assisting young, old, and handicapped persons to discover Ham Radio. However, I want to help anyone that is committed to getting a Ham license or upgrading. I am most active on Ham satellites, mobile and fixed HF,

Digital modes and construction. I am an avid electronics constructor, repairer and experimenter. I am trying to sample all modes, bands, and interest areas. I am also skilled in Public Relations, demonstrations, and "de-mystifying."

Dakota County, Nebraska ARES Emergency Coordinator (EC)

ARRL Official Bulletin Station (OBS)

I have been involved in Packet since 1984. I currently run a Packet BBS with the F6FBB software, as well as a number of Packet Nodes using TheNet Software. I have coordinated the Volunteer Exam Session in this area for a number of years. I operate 2 meters and HF, both CW and SSB. DX'ing and Contesting are some of my activities, along with collecting prefixes.

I have had NWS spotter training and am part of organizing the spotter network in the Siouxland area. AS the EC of Dakota county, I work with the Woodbury County, Iowa EC in the spotter effort.

During my business activity as a Systems Engineer with IBM, I have developed some expertise in PC's and have worked with the DOS, Windows and Windows 95 Operating Systems along with many Ham-related applications.

I have organized a number of Ham events such as Packet Symposiums and am the current Chairman of a Regional Ham Radio Convention.

I have a large collection technical manuals. Copies are available for the cost of duplication and postage. THIS NOT A BUSINESS. It is done as a courtesy to those needing assistance.

I lecture and conduct workshops on the subject of ElectroMagnetic Interference, primarily related to problems encountered in the Clinical (Hospital) environment. This is a program based on papers of which I am the principal author published in journals related to Biomedical Engineering. Related to this activity, I have and use signature analysis equipment and, depending on area and time, am available to assist in location and identification of sources of severe interference to radio amateur activities.

fmp@febo.com

+1 (937) 256-4355

Dayton, Ohio E-mail Elmers

Sponsored by the Miami Valley (Ohio) FM Association (MVFMA):

http://www.febo.com/

The Dayton E-mail Elmers service allows new or prospective hams in Dayton and Southwestern Ohio, or even experienced amateurs who are venturing into a new aspect of the hobby, to send an E-mail request for assistance. Volunteer on-line Elmers then can provide a response in the "Elmer" tradition of mentoring new or less-experienced hams.

Today, many hams prepare for their license exams through classroom programs, and the individual Elmer's touch isn't as common as it once was. The E-mail Elmer service is an attempt to restore this long tradition. The MVFMA hopes that the initial E-mail exchange will be the start of an ongoing Elmer relationship in the best tradition of Amateur Radio."

Hams may use the E-mail Elmer service simply by sending an E-mail message to:

elmer@febo.com

and posing the ham radio question they'd like to have answered. Users will get a machine-generated confirmation, and within a few days, they

will get a response from one or more of the volunteer Elmers.

For more information, or to volunteer as an E-mail Elmer, contact me
at my phone number or E-mail address above.

I'm a software engineer specializing in Macintosh development, and I've been a ham since 1982. I was first licensed at age 14, and I now hold an Extra class license. My expertise is in antenna-building and theory, CW (Morse Code), DXing, SWLing, and HF operating practices in general. I also operate mobile in a '96 Ford Ranger pickup. I'd be happy to help any new or aspiring amateur radio operators.

Ken Pulfer VE3PU

jkpulfer@rac.ca
jkpulfer@igs.net

Radio Amateurs of Canada (RAC) Treasurer and Webmaster

(RAC is Canada's national amateur radio society.)

RAC World-Wide Web Page:

http://www.rac.ca/

Callsign E-mail Addresses for All Interested Canadian Amateurs

Any licensed Canadian amateur radio operator can now have an E-mail address of the form:

callsign@rac.ca

This means that you will no longer have to advise all your contacts of any new E-mail address if you change your Internet service provider. Canadian amateurs will not have to keep track of dozens or hundreds of E-mail addresses. Just remembering the callsign is all they will need.

RAC is able to offer this free service thanks to the volunteer help and support of Information Gateway Services (IGS) of Kanata, Ontario, Canada, and in particular the work of Rene Kahle, VA3RDK. Rene developed the E-mail aliasing software, and set up the server hardware (IGS also donates server space for the RAC and ARAS World-Wide Web Pages that contain much useful information for Canadian amateurs).

If you wish to obtain a callsign E-mail address, simply send a message to:

alias@rac.ca

with:

callsign = realaddress

in the BODY of the message.

For example, if my callsign was VA4KP and my real (current) E-mail address was:

ham@qsy.ca

I would put the following in the BODY of the message:

VA4KP = ham@qsy.ca

Any subsequent mail addressed to:

VA4KP@rac.ca

would be redirected by the IGS server to:

ham@qsy.ca

Of course, such mail would NOT go anywhere near RAC headquarters, nor be seen by RAC officials, nor placed in a public database that could be exploited for "junk-mail" distribution. Any E-mail addressed directly to:

ham@qsy.ca

will also be delivered as in the past without passing through the IGS server.

The E-mail aliasing service is currently set up on a trial basis. If it works well and amateurs find it useful, it will remain available for all who wish to use it.

I am a consulting engineer, which takes me to various locations. My
home address is shown above and in the call book. I can answer E-mail

(as everyone knows) from anywhere that I may be.

Don't know where you are going to use a old horse like myself. I am part of the old and part of the new displine. I have fabricated all my wire antennas which includes the matching device (transformer) and been building equipment for more than a quarter of a century. I also manage to repair all my equipment - when parts are available. I restore early age broadcast receivers and HF transceivers. I know the old Heathkit HW100 and HW101 very well and built a Heathkit 5400 transceiver with matching Power Supply. I have constructed many amplifiers and own a Swan, Collins (S-Line), Kenwood, Heathkit, and Johnson. I am very active in the two meter band.

In addition, I have restored many an old Coleman Lanterns (which is very enjoyable) and also have some American Gas Machine Lanterns (1930's).

I build the only coaxial antenna I have seen for amateur radio. I experiment with antennas from 80m to 440MHz. I am a retired 2-way radio senior technician with 25 years of service with Motorola C&E repairing, installing, and testing, of commercial 2-way radio equipment including pagers, portables, mobiles, base and control stations, repeaters, CCTV, communications consoles, remote control equipment, microwave and multiplex. I am familiar with the test equipment required to perform these duties. I write technical articles for our club newsletter. I am competent with both tube and transistor circuitry. I hold or have held an Extra Class Amateur Radio License, a First Class Commercial Radiotelephone License, a General Class Commercial Radiotelephone License, a California State Contractors License Class C63 (Communications), and two CET Certificates.

"Buck" Rogers K4ABT

k4abt@packetradio.com
buck4abt@inmind.com

Packet Radio Networking World-Wide Web Page:

http://www.packetradio.com/
http://www.packetradio.org/
http://www.sedan.org/

To open the pages, a Packet Radio Glossary that I began writing in 1988, and updated as new mnemonics and acronyms were added to the Packet jargon, is at:

http://www.packetradio.com/glossary.htm

Next there is the "original" Packet Radio Primer for the Novice or beginning Packet Radio operator at:

http://www.packetradio.com/primer.htm

Since 1996, the TNC to Transceiver diagrams from these pages are the most used and imitated on the WWW. I maintain these drawings directly from the Original Equipment Manufacturers (OEM's) and insure they are of the latest makes and models. These interface diagrams are at:

http://www.packetradio.com/tnc2rad.htm

These interface drawings are taken from over 14 years of the PACKET USERS NOTEBOOK column in CQ Magazine. In addition, I've included many TNC and transceiver 9600 baud modifications at:

http://www.packetradio.com/9600mods.htm

I've included several zip files of the latest X-1J4 Rev C code and Packet Radio terminal programs. This site contains information and instructions that enable the reader and user to build and configure a Packet Radio network. Complete with the TNC changes and MODS plus both user level and backbone node parameter suggestions, at:

http://www.packetradio.com/network.htm

The parameters and mode guidelines are at:

http://www.packetradio.com/x1j4pram.htm

To round out these pages to be the most helpful to all Amateurs, there are pages that describe "How to...":

* Design and build antennas, complete with drawings and formulas
* Build a superb ground system for your QTH, node/repeater, or comm site
* Build a solar powered site where no utility mains are present
* A coaxial cable table for the most used Coax by Amateurs
* WX Watch and SKYWARN links
* A Packet Radio bandplan
* An online callbook lookup link
* Hamfest Calendar
* Network maps of the 11 State SEDAN emergency comm network

and much, much more.

I have been a ham since 15. I have been an Extra class operator since age 17, and a VE since age 18. [_Editor's Note:_ Possibly the youngest Contact VE ever.]

I am an avid HF QRP (low power) and mobile operator. I have spent literally hundreds of hours installing my mobile station (IC-706 and Screwdriver antenna, plus more grounding straps than I can remember) in my 1995 Neon.

Most of the time I operate QRP CW mobile.

Why? It challenges my operating skills as much as possible, plus QRP is safer (RF-wise) than is 100 or 1500 watts. With the effects of RF exposure still unknown, I don't feel like exposing myself to high-power RF fields any more than necessary, and if 3 watts will do the job, so be it, I'll emit it.

In addition, people are generally amazed when you mention that not only are you running just 3 measly watts output power, and on top of that you're doing it from your car as it's zipping down the Interstate at 65 mph. They just can't believe it's possible that less power than a nightlight is bouncing off the ionosphere and ground three times, and is still able to be detected 10,000 miles away.

I'm here to tell them it is.

I enjoy building kits, and consider myself to be a good builder.

I am a fair contest operator, and enjoy 35 WPM CW ragchews as well as hunting for DX.

I moved from Laurel, MD to Eugene, OR in November, 1998. It has been strange to not hear European stations 24 hours a day, although I am getting used to hearing Japanese stations 24 hours a day. I am a member of the Valley Radio Club of Eugene, and give VE exams with the local group. In the past I have been very active with both the Laurel (Maryland) and University of Maryland Amateur Radio Clubs, and operated with both during public service events, contests, special events, and emergency operations (earthquakes, hurricanes, etc.). I have been the chief HF operator at University of Maryland HF-related events (Field Day and Sweepstakes) for the past three years.

As a Volunteer Examiner, I have conducted roughly 150 test sessions, testing at minimum a thousand applicants.

I have given Novice/Technician/General license class instruction, as well as taught a 5 WPM code class. I have been told that I have a knack for describing complex subjects in ways that make them far easier for laypeople to understand. I developed a presentation touting the best points of QRP, and made presentations at four radio clubs in Maryland, and at the QRP forum at the 1998 Dayton Hamvention. I organized the Dayton QRP banquet in 1998, and am doing the same in 1999.

Most of all, I love a good challenge, and proving I can do something I've been told is practically impossible.

For instance, would anyone believe that communicating on 20 meters over a distance of 14,000 miles from your car at 2.5 watts was

possible?

My favorite aspect of amateur radio is contesting. It drives my station improvements and operating proficiency. I have played around with antennas and made various station modifications to improve my contact efficiency. Along the way I have solved some RFI problems, built many of my station accessories, installed and built some HF antennas, put up a small (40') tower, etc.

I volunteer as a RACES operator in no particular capacity. I help with a few VE test sessions a year mostly representing the ARRL VEC with the Burlington ARC team.

I work as a SRAM design/product engineer at IBM Microelectronics in Essex Junction, Vermont. I have been interested in electronics and computers since a young age, but only got my amateur radio license in 1993 as a Technician at the age of 31. I got to know the code and upgraded to Extra in February of 1994.

ARRL Technical Specialist

I am a pilot (N6141F) with more than 10 years as air and ground search and rescue. Active in ARES, RACES, and Civil Air Patrol (CAP West 41).

I also have a home in Alpine, Texas, USA.

I now teach classes four times a year. I do classroom work in 15 hours. I teach the Technician class using the ARRL video course.

I also do an adult class where I give them a study guide and have them get the study materials and home study for six weeks. Then I do a Saturday review, and (if needed) a Sunday review, then set up the test the next weekend.

My vocation and avocation both deal with Radio Frequency transmission and propagation. I have spent considerable time working with RF safety issues as they pertain to broadcast radio, television, and now amateur stations.

Presently I serve as Region 3 Administrative Assistant for Air Force MARS.

Additionally, I serve as Activities Director and Chairman of the Field Day Committee for the Viking Amateur Radio Society (VARS).

* IBM PC's
* Packet and Digital Networking

ampr.org IP Coordinator for Alaska subnet (44.22.xxx.xxx)

I run a JNOS full-service BBS, so if you need help with TCP/IP, I'll be glad to try to get you started. Any other help with packet radio will certainly be provided, too.

I can help with most things regarding PC's, but I'm not a programmer. :-(

[_Editor's Note:_ All ampr.org coordinators are listed in the document at:

Courage Center
HANDI-HAM System
3915 Golden Valley Rd.
Golden Valley, MN 55422
USA

Manager, Courage HANDI-HAM System

I have information pertaining to Amateur Radio and physical disabilities or sensory impairments, such as blindness.

Visit us on the World-Wide Web:

http://www.mtn.org/handiham/

HELP WANTED: READERS NEEDED BY HANDI-HAMS

The Courage HANDI-HAM Center needs volunteer readers to record ham radio books and publications on audio tape. Volunteer readers provide a valuable service to persons with severe physical disabilities and sensory impairments who cannot use regular printed books.

Volunteers should hold an Amateur Radio license and be familiar with hobby terms and expressions. A clear speaking voice and the ability to read the written text of Amateur Radio books and describe the diagrams and pictures are essential.

HANDI-HAMS will provide a tech sheet and a sample tape to new volunteers, as well as a copy of the book to be read and cassette master tapes. Readers will need a good-quality cassette tape recorder and a quiet place to record. Some of the books we would ask readers to tape would be ARRL license manuals, special interest Amateur Radio books, and instruction manuals for radios.

This volunteer work can be done in one's own home, at one's own pace, as long as there is a quiet place to read. It is a wonderful way to share Amateur Radio with others!

* Antique and Older Equipment
* College and University Clubs
* CW
* HF
* QRP

I work QRP CW and enjoy wilderness backpacking. I am happy to meet beginning CW ops on the air and take some time to make QSO's. I love simple wire antennas and simple antenna tuners, and enjoy introducing others to these simple pleasures.

I have some experience troubleshooting the Kenwood TS 520, 830 and 440 radios. I also have experience with the older Ten Tec radios like the Triton IV, Corsairs and sometimes work on my OMNI VI. I am happy to help others troubleshoot the rigs, and am willing to take it slowly with beginners (and to find the answer from others when we can't figure it out!)

I am beginning to get interested in better fidelity SSB, and am learning about IF filter options for Kenwood and Ten Tec rigs. I have experience with the aftermarket Fox Tango, IRCI and now INRAD filters. I am happy to share information on these options, I currently use several.

If you are nearby, or coming through the University, stop in to visit my shack, just for fun. You might force me to clean it up, and that makes my wife, KC6TKO, very happy.

I am currently a mature student at King's College, University of
Aberdeen, studying for the B.Sc. (Hons.) Computing Science. I enter

the third year of this course on 25th September 1997.

I also have my own IBM compatible computer, which has a P166 processor, 32M of RAM and a total of 4.6G of hard drive space, spread between three EIDE hard drives. This computer normally runs under the Linux operating system, and I am gradually moving the above Fidonet BBS system across from MSDOS to Linux. Because of the lack of suitable software under Linux, I am writing one myself, having had 15 years experience as a professional programmer.

I am a regular participant in AuroraMUSH, a MultiUser system, and have authored several patches to the suftware controlling it. It may be visited at:

telnet://amush.cx:4190/

Status Servers:

telnet://status1.amush.cx:4191/
telnet://status2.amush.cx:4191/

I have been involved with Packet radio for over a decade now. Indeed, it was packet radio that got me interested in Amateur Radio in the first place.

I started up a mailing list connected with the Amateur Satellite world, currently using manual subscriptions. The list is:

Space.Repeater@cus.umist.ac.uk

and is for the discussion of the possibility of placing an amateur band repeater or transponder in orbit around a planet other than Earth, or on the surface of one of the other planets.

I will add that, although I can claim to be something of an expert on both Linux and Packet Radio, I am definitely NOT an expert on the two together.

4804. Any crystal "call" frequencies?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-06 00:00:00 UTC
From: rskup@my-deja.com
Message-ID: <82gvmgocm1@nnrp1.deja.com>
Source record: 125664

I'm done! After 25 years, I finished my crystal-controlled Heathkit HW-16 and will be trying it out soon (I know, I'm crazy).

Are there any "typical" frequencies that crystal users gather around? The HW-16 is for 80, 40, and 15m, and I'm currently limited to the Tech+ bands (although I'm planning to take the General exam in 2 or 3 months).

I seem to recall once seeing a web page with frequency suggestions for crystal users, but can't find it now.

Web pages for crystal users, or suggested frequenies in the Tech+ band (and/or General) for crystal users, would be appreciated.

Thanks,
Robert

Thank you to all who have called & emailed Hollingsworth about Charles Cheesecake (aka AF2Y). We have this no good SOB on the run now!!! Here are a few comments I would like to share with you all.

Without the help of KT4TR (#1 out of Vero Beach) & a host of others, AF2Y would still be out there QRM'ing and doing his EVIL deeds.

Of course I, "The Human Pitbull", KC1ZQ must take a lot of the credit also for putting AF2Y in the place he is now. AF2Y is hanging onto the mountain by his long, dirt infested fingernails.......One more small kick & he will be gone forever hohohoho.

Keep on sending those emails to Hollingsworth about 'ole Charles. I tape ALL of AF2Y's QSO's whenever he is on & then send them to Hollingsworth along with the date and time of the QSO.

Here are a few good web pages about the man of many names......AF2Y, 'ole Charles, Clifton Idiot, Dr. Hate, Charles Cheesecake etc.etc.

http://www.angelfire.com/vt/af2y
http://www.homestead.com/kc1zq/kc1zq
http://www.angelfire.com/vt/kc1zq

Len. you act as if Doc never mentioned his religion or used it in a argument or never accused any one of antisemitic behavior for his own pleasure.. Now I ask you, what would you tell any one if you thought they were picking you out for persecution? What would you say? Hebrew, Jew, are what? Or would you use the generic "I know why you are dumping on me" Get real it is all the same, Hebrew, Jewish. Jew, These are just different words for the Hebrew religion. thats all. and I can tell you AF2Y will use religion to pleasure him, dominate people, and get his way under any name. Is it stooping to a low level to use a honest word? I don't think so.. So don't be so hard on getback ...thatsritepolly

It's a matter of perspective. Some Eastern cultures consider a
person to be 1 when born. Another view is that the world begins when
you are born (or conceived) and ends when you die.

Here are a few choice vulgarities from the mouth of Art Visser, W9ART, heard on 3950 KHz this past weekend:

asshole
shit
sperm-burping
dick-less
nigger

Please send a copy of this post, along with a quick note to Riley W. Hollingsworth, and ask why this behavior is being tolerated...almost encourage.....by the FCC.

(Drew)

Now that would be DX!!

Though I don't agree that NASA engineering is hobbled, Dave's suggestion is not so far-fetched. Pushing the (RF) envelope is what this hobby is all about. Building - then landing a package of electronics on Mars (or more likely the Moon) is probably beyond our ability to fund, but it is not beyond our technical capabilities as a group.

That said, parking a satellite in Earth-geostationary or a Lunar orbit is certainly well within our grasp. Sign me up Dave.

Today I sent a e-mail to Peter K3QAM telling him all about AF2Y and why he's not answering Mr.Holingswoth and other things too and Peter sent back a filthy reply using the words you ass-hole and other stuff. There must be something wrong with him. I know exactly what's Doc up to and K3QAM isullted me. Also I sent a few e-mails to LSchaier to tell him how lousy he is and he came back real snotty. I like Doc and Herb and Pete and Jim Dale and just about everbody on that frqency and even OTK too but I told Lenniy I didn't like him because he dont stand up for his own people. Doc is jewish and stands up for his people and hates pregudice and K2IVX hate Doc for hating bigots who he Lenny likes. And KE9Y Tom is a good guy too and so is Doc and I'm glad their friends again. David in Vermont acts like a dope and is going to get in big trouble with mr. Holigswoirth bercause David starts trouble. And the smartest guy on 14.313 is W2YEE because you can't fool him. He said yesterday one of the reasons Doc wont reply. He dont run mobile so how can he get in trouble for it. the FCC got the wrong guy

Herb, Let it be known that you did give me that FRG-7. With all the water that's passed under the bridge, I had forgotton that gratuity, which shows you do indeed have redeeming value as a human being.

However, no need to cover up the truth in this case any more than in the Calls matter, where you surely had a minor mischievous culpablity that you have failed and refused to admit to this day.
In the case of the amp, please note the eye witness, Rich Whiten, weighing in above with what he saw with his own eyes.

Herb, for your own personal growth, it is important for you to see how you tend to shade the truth. In your instant post, another shading was leading readers to believe that my only concern was aesthetic. It wasn't. The bad aesthetics were consistent with the other named degradations.

You know as well as I that I have talked with you by phone several times since that boat anchor arrived, telling you that one cannot consider another a friend with that kind of behavior. If you really want to make good, please do so. No need for another telephone, as that has proved fruitless in the past. Please just do it! Thanks.

Herb, it is high time that you used your immense intelligence and debating skills for good beyond merely yourself.

Bob Sherin, W4ASX
Miami, Florida

Well, I came to work this morning and the guards had my car surrounded at the gate.

I denied eveything, of course, but peeeyes turned me in (if he/she can do it me, then he/she can do it to you!). As a result of his/her crack detective work it was determined that my posting host could have come from a terminal that belonged to a private employer. However, our crack detective did not realize that the NNTP newsserver belonged to, guess who? earthlink. The security guards, upon receiving this information (you really had them going) commuted my original sentence (I was to have been shot by firing squad in the courtyard) and sentenced me instead to 50 lashes with a WET noodle. Please peeface, I am begging you. For the sake of your fellow man, don't do this again to anyone on this ng. I was saving that wet noodle for lunch and now all I have to eat is meatballs mixed with ChefBoyardee spaghetti sauce.
Best Regards and 73 (if you are a ham),
Dan F.

Let's have a contest, Gil: You build a PSK31 station from scratch,
and I'll build a CW station from scratch. Let's see who can get
on the air first, and collect say, 1000 contacts.
Jeff KH6O

P.S. Let's define "from scratch" as using discrete components
from an old TV set. Note that the variable cap from the UHF tuner
works fine in a VFO; I built one for 40m.

QST recently ran construction articles on scalar network analyzers and
tracking generators to be used in conjunction with them. With modern
chips, they aren't that difficult to build if your requirements aren't too
extreme (ie you'll tolerate an 80 dB dynamic range). That's sufficient
for most any alignment task.

Those are fine if you don't mind using and being *completely* dependent
upon someone else's equipment.

On the other hand, ham radio is the *only* communications medium,
outside of shouting, in which any two operators anywhere in the world,
can communicate directly without using government or commercial
communication services. Those same two operators don't even need to
purchase commercially-built radios -- they can build them themselves.

It's no longer true that HF is uninteresting commercially. Urban areas are pretty well built out with cell repeaters, the only growth area is communications away from repeater sites. Iridium has pretty well shown that putting up enough LEO satellites to get LOS coverage everywhere is too expensive, and the transceivers too clumsy. Simultaneously, new technologies like spread spectrum, data compression, and error-check coding is making it possible to get easy-to-use, good quality communications in very limited bandwidth. Presto, HF is interesting again. Especially if you can find a set of world-wide allocations at nicely spaced frequencies, currently occupied only by a financially and organizationally weak service.

Not at all. I can pose the question, but I have no where
near the education and experience in this area to lead such
an effort. As I posted later in this thread, AMSAT surely has
a future team leader looking for a mission.

I've been talking with a couple of people and have concluded
that the first thing needed is for an amateur to build a
station that can hear signals from Mars Global Surveyor,
and I'm looking into that. Even I have a shot at that.
Such an achievement could spark a real look at such a mission.

Kind Regards,
Dave S.

No, let's define "from scratch" to mean "using only common stuff
you can find around most houses". Like, say, a PC and a sound board.
(Hell of a lot easier to find than a TV with nonsynthesized tuning.)

Doesn't this say it all. He really doesn't give a damn if someone insults the Jewish people or that he insult ideas and traditions that are precious to others; whats important is the game, that he has something to do and somebody to call an anti-semite. People being hurt is not important.

G-d, every time he hits a key he reinforces what everybody knows.

Len

Radiosigs wrote:

I am possibly in the market for a desktop mic and wonder if the Heil Goldline
would make a good choice. I would get mine with the HC-5 element, and I guess there is another element or setting which is why they came out with
this new model. My rig is a Yaesu FT-920. Does anyone know if Heil also

makes a desktop base / switch setup. All I see available is there footswitch
and handswitch (and the switch on the mic itself) but I would like something
on the desktop with a momentary and a locking ptt switch.

Any response would be appreciated.

Sure, take crdit, as you might have had much to do with the position in which Doc found himself. Yet it is Doc himself who expresses and is acting on contrition, conduct, we should all praise and emulate.

A small claim's judge once gave advice that has been part of my world. Of Chinese origin, Judge Koo was voted into office by rowing down the Miami River in a sampan with a big sign: "Give a Chinaman a break."

At the end of a heated contest when I had the defendant down for the count, I urged: "Yes your Honor, settlement is fine. But now we're not just talking about fifty seven dollars. I want punitive damages, pain and suffering, consequential and future damages and any other damages allowable to the upper limit of this Court's jurisdiction."

He took has glasses off. Looking down empathetically from the bench, he said: "Are you a lawyer-you sound like one. Let me tell you, once you have a man down, you don't exact that last bit of blood. Vengeance should have no part in this judicial system. Settle for $57 and we can all go home." He died shortly thereafter of Cancer.

I did settle, learning a valuable lesson from a towering man. Vengeance should have no part in life. This is just what Riley Holligsworth, in his own way, is trying to indenture on ham radio. Engage in free speech; cut out those fighting words! Be agape menchen!

Oh, they'll want to buy GTE then.

We have eight 56k analog leased lines. There's some kind of 99% guaranteed uptime (which is pathetic). Every one of them crossed from PacBell (which is OK) to GTE (which sucks donkey dick). Because their accountants don't all belong in prison, the actual accounts are all with PacBell. We had a line go out on the GTE side. GTE wouldn't even talk to us, because the account wasn't with them direct. Fine by me. They were morons anyway. Every time I talked to PacBell, they had elevated it to a higher "Escalation Level." From what I understand, they had to escalate it up to a regional VP to get someone at GTE to actually answer the telephone.

Total downtime: 3 days. Just shy of 1%. Bastards.

You don't HAVE to be a ham to do that. :-)

I just was trying to make a point that the Packet is better than CW is
better than fart signals is a dumb debate. It goes on forever with a
thousand different points of view. Regardless of it all there are always
going to be things on the test that, depending on ones point of view, are
going to be outdated and useless.

The sunspot cycle has basically no effect on two meters. Six meters is
about the limit. As for range....depending on many factors, antenna
gain at both ends. Height above ground, obstructions. etc. Basically
with a good setup...i.e. 100 watts to a 16 element at say 50 feet and
a "reasonable" qth....150 to 250 miles ground wave is normal.

When you get into tropo bending, aurora, meteor scatter, etc. The
situation changes.

On Fri, 3 Dec 1999 07:31:44 -0600, the estimable "Kent Winrich, K9EZ" <kwin@execpc.com> postulated:

>For weak signal contacts and others ie: DX, EME, MS, VHF, Tropo, Ragchewing, >Sat., need I go on? Sorry if you dont take advatage of CW, but a very large >group of us do.

Glad that you enjoy working CW. Why continue making it a license requirement though? If one wants to learn it fine. If one doesn't want to learn it why keep them from working other modes in HF bands?

What is the average age of hams in the USA these days? What is the average age likely to be in five years? Ten? Fifteen?

It seems to me that if something doesn't change to hook in the next generation of hams that amateur radio in this country will be in danger of disappearing.

Without practitioners how long do you think you'll be able to keep your spectrum from out of the clutches of the commercial interests?

Just wondering.

I wonder who is more illiterate, peaeyes1 or Lloyd Davies? It seems that neither of these buffons can spell license or earn one higher than the no-code class.

So you think that hiring managers will now start checking
the 30,000+ newsgroups? Maybe they'd check some of the
more volatile ones, but sooner or later someone would blow
the whistle and I wouldn't want to be the hiring manager
on the recieving end of a discrimination suit because
they didn't hire someone due to taking a political position,
etc. As for the hobby newsgroups, I really doubt they'd even
look...and I'd guess that rec.radio.amateur.X would be
viewed as a pretty apolitical, non-controversial group.

For the second time in as many weeks, the F-C-C has told a ham that he is
transmtting an excessively wide signal. In a November 2 nd letter to Charles
Schwartzbard, A-F-2-Y, of Clifton New Jersey, the F-C-C says its monitoring
information indicates that he has apparently been operating his station in a
manner that causes it to emit an unusually wide signal, one that is over-power, or both.

Specifically, the F-C-C alleges that instances of these violation occurred on
November 17 and 18 th in the frequency range of 14.315 to 14.318 MHz. The
Commission also says that its Information further indicates that Schwartzbard
ignored requests from other licensees operating on adjacent frequencies to
correct his transmitter emissions in accordance with good Amateur practice.

The Commission has directed Schwartzbard to answer--- in detail ---several
technical questions pertaining to the way he operates his Amateur station.
A-F-2-Y was also cautioned that airing personal conflicts with other
licensees on the Amateur bands, or slander or deliberate interference to
other licensees will result in the loss of Schwartzbardï¿½s Amateur license.

The spectrum that the commercial interests are interested in
(UHF) is available to hams with a code-free license, so the
code requirement will not be the cause of any loss of freqs.

A quick search at http://www.rac.ca/callbook/ of call va3gjb nets the following:

" Callsign: VA3GJB
Name: GRAHAM JAMES DYER
Address: 34 RED MILLS DRIVE
HOLLAND LANDING, ON L9N 1B5
Qualifications: BASIC"

According to http://www.rac.ca/faqgovt1.htm:

Q - I hold an amateur radio certificate with only a Basic qualification. May I transmit between 29.5
and 29.7 MHz into a 10 metre FM repeater?

A - No. Amateur radio operators having only the Basic qualification cannot transmit between 29.5
and 29.7 MHz on any mode unless they hold both Basic and 5 or 12 wpm qualifications.

Also, according to the Industry Canada website at http://www.rac.ca/arast.htm:

The holder of a Canadian Basic Qualification (which requires NO MORSE CODE EXAMINATION) receives all amateur radio privileges above 30 MHz, except high power transmitter
operation. These privileges include the very popular 2 metre band. Many Basic Qualification holders
enjoy using small 2 metre hand-held radios to stay in touch with other ham friends in their area. They
may operate FM voice, digital packet (computer communication), television, single-sideband voice,
and several other interesting modes. They can even make international radio contacts via satellites,
using relatively simple equipment. To earn your certificate with Basic Qualification, you'll need to
pass a written exam. These are multiple-choice tests, written with beginners in mind. You'll study
topics such as radio operating practices, basic electrical theory, and government
radiocommunication regulations which apply to amateur radio.

Which is fascinating, when you consider VA3GJB has qrm'ed incessantly on both twenty and seventy-five meters with his busted pals KE4TEW,W4NTI,AF2Y, and ex-WB2OTK for years.

I know all about the illegal operation of VA3GJB. I checked this out long ago. Since graham was such a jerk at the hotmail account, I have cc'ed Industry Canada and the FCC as well. Stick with your HT Graham. And shutup.

Yes it's true, the once MIGHTY AF2Y has been reduced to a blubbering FOOL!!!! As I have stated in my past postings.....I TAKE MOST OF THE CREDIT FOR THIS IDIOT TO BE ON SHAKEY GROUNDS. 'Ole Hollingsworths head must hurt when he gets my "special packets" filled with AF2Y audio recordings & QRMing info 2 times a week hohohoho.

Credit MUST go out to W4LLI, KT4TR, Polly/George/Getback & the many who have made it their business to get Dr. Hate off the air.

My next step is to sink my PITBULL teeth into 'ole fatass KC8JBO.......Just remember one thing, A PITBULL WILL NEVER, EVER LET GO.

Kick it up a notch,

PITBULL

Sounds interesting. I look forward to hearing what progress
you've made on this next fall in Portland. If you think it's
a good idea you're the obvious person to make it happen...

The RF and stuff shouldn't be a problem. Getting a launch may
be tough, as it is proving with current AMSAT projects.

I can make no bones with that, I know exactly what you mean, however to a general news group such as this where many contributors coming fresh to this arcane art it may be a more practical solution for them to get on the air to use the simpler more effective methods until such time that they are old hands and have the freedom of options.

> Thanks for the good wishes.

UR WELL COME

> Oh. By the way, I have got a (homebrew) wobbulator.

With varactor diodes so readily available I expect that there are many more wobulators about than formerly.
Of course many of the microwave enthusiasts will remember using the reflector voltage of a reflex klystron to make a wobbulator for uWave.
The RF board of some TV sets is very easily converted into a spectrum analyser. connecting it to the TV AE can reveal a lot too. :)

Agreed
I think that perhaps we have both been spoilt having such fine test gear around, but considering others in this ng that do not have such resources was to the fore of my mind.

I think from your comments that the group , (which has a number of innovators in it), might consider the design, construction, testing, and a book on how to use it to best effect, A Wobbulator and Calibrator.
Twould be nice if the instrument would also act as a spectrum analyser, not such a big step once you have the swept oscillator to act as LO for the instrument.

Gary7SLL, The co-ordination could happen on Glenn's Mailing list :)

Paul,
I bought this rig about a month ago and love it. Great receiver, (DSP). I set it aside when my TS450 can back from a Kenwood repair in Virginia Beach. The receiver is much better than the 450 which I contribute to the excellent DSP. I will put this unit back in service soon as my main rig. I have not been able to run external audio into the rig. I am now using an audio board with an Electrovoice Microphone, into the packet radio external audio input on the TS-450 and want to do the same with the 570.

Good luck,

Jim K4VVV

In article <19991206222437.05546.00000238@ng-ba1.aol.com>, frnkburnz@aol.com says...

>If you keep violating your AOL TOS agreement by posting off-topic spam and
>using foul language, Lloyd, I guarantee that you won't be on AOL much longer.
>One valid complaint is all it takes for AOL to cancel an account, and I'd be
>more than happy to see you get the boot.

Actually, AOL selectively enforces their TOS. Off-topic posts and profanity on Usenet is something they totally ignore. Read some postings in alt.aol-sucks sometime if you want to find out what will *really* get you tossed off of AOL.

Heck Ham packet is outdated and useless. By todays standards it is one of the slowest around. Toss it out. While were at it toss out the HF stuff too, it is outdates and useless. Use a phone, modem or the internet or satellites. The rest are just outdated and useless.

> I used to be a CW freak but now it is just for fun.

Fun? You make it sound like a hobby or something. If you were still a CW freak it would be ok though?

4919. Escaping the Codeless Trap

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-08 00:00:00 UTC
From: Richard McCollum <rmccoll@radiks.net>
Message-ID: <EgH34.312$8G1.4215@newsfeed.slurp.net>
Source record: 125383

ESCAPING THE CODELESS TRAP
In ten (not twelve) simple steps

1. Download http://pw1.netcom.com/~tlfoster/Morse.html. Send him 20 bucks. If you are truly codeless, use the lessons. If you only want the 5 wpm set the Farnsworth at 13 wpm, else use true spacing. You will need a modern unzip - pkunzip and Stuffit won't do the job.

2. Go to Walmart and buy a set of cheap earphones and a ream of unlined paper. Else those you love will start berating you with stout cudgels about the head and shoulders because of the endless beeping.

3. When you have it figured out, set it at 15 wpm groups and spend the next 15 minutes marking an 'x' whenever you hear a letter, number or punctuation symbol. You are listening to 5 letter groups so it will look pretty symmetric. When the noise and rhythm cease to disturb you it is time. Do yourself a big favor - put your non-writing hand in your pocket; it will prevent a kind of CW dyslexia that comes from trying to copy both left and right-brained at the same time.

Now it is time to do it for real:

4. When you hear A, W, J, or 1. Write them in instead of the 'x'. You will be klutzy at first but will ultimately get it going with 20-30 minutes twice a day. No more, no less. Do it until you are good at it, normally 2-3 days.

5. Cuss, swear, have self-doubts, damn the FCC and all it stands for. Flip Morse and Maxim the bird til it hurts.

6. Add groups in the following order, repeating step 5 at regular intervals.
N, D, B, 6
R, L, P, period, AR
K, C, Y , X, /
I, U, F, 2, ?
At this point, you can fill out the forms for the VEC and bookmark the following:

http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html

M, G, Z, 7, comma, Q
S, V, 3, SK
O, 8, 9, zero
E, T, H, 4

7. Pass the code exam and take the Advanced element 4a for giggles.

8. Drop me an e-mail at rmccoll@radiks.net. Thank me, cuss me, but do try to be original. My 56 year old body just doesn't bend that way anymore.

9. Go to a gathering of those still in the Codeless Trap (along with the others you met at the exam site) and announce your success. If you expect congratulations, you are incredibly naive. You will clear the room faster than an angry skunk (but slower than a visit from the ARRL section rep). As anyone worth anything at anything very well knows, 'if you're planning the crime you plan on the time'. You have just become a man at a meeting of boys. The results will be immediately apparent.

10. Now go do something difficult and useful, ASL, or a foreign language that will make you a buck.

Dick McCollum N0BK - Bionic Klutz

>So you think that hiring managers will now start checking
>the 30,000+ newsgroups?

You're kidding, right? I just pulled up Deja's homepage, entered
your name, and out popped 314 of your most recent posts on every
NG you've posted to, including the the rec.railroading group. It
took about 20 seconds.

>Maybe they'd check some of the
>more volatile ones, but sooner or later someone would blow
>the whistle and I wouldn't want to be the hiring manager
>on the recieving end of a discrimination suit because
>they didn't hire someone due to taking a political position,
>etc.

I never mentioned politics; I said personality and other traits
which would indicate how well he could work with others. After
browsing your 314 posts, a hiring manager would have a fairly
good character sketch of at least your temperment. Would he have
the time? If that company is going to offer you a high-paying
important position, you'd better believe he'd make the time;
afterall, that's his job -- if he hires a bad seed, the ax
might fall on him.

If a person were to come across as hostile and full of rage during the interview, it certainly wouldn't be "discrimination" not to hire him. Seeing those same traits in dozens of public NG articles would give the interviewer, prior to the interview, some particular behavioral characteristics to be aware of during the interview.

>Amateur radio newsgroup participation is no more
>job related than 99% of all newsgroups.

Hiring a problem employee can cause grief and financial loss to a corporation. Perusing what a person writes on Usenet can provide a fairly reasonable personality profile of him or her prior to the interview.

It was probably before your time, but Lockheed, and the Lockheed
Amateur Radio Club, used to be located in Burbank, CA, sharing the
same facilities with the Burbank airport. I turned over that
collection of "73" magazines back in the 70s. I was WA6QIJ back
then. Notice the word "eventually" below in my original statment.

You'll note my PO Box and email address indicate the same locale.
How could you miss that?

"Two dollars per year" -- how could you think that was a recent offer?
73 did that some time around 1966.

You get a D- on your dectective work!

Hawaii's not one of "the states," eh?

If you want a KH6O QSL card, you'll have to re-locate to the southern or western Pacific. You get to choose from a G-rated or R-rated card (I use 10-cent post cards showing a hula dancer on Waikiki Beach). My 30m xmtr is home-built -- 5 watts output, so make sure you have your ears on, little buddy.

Oregon? Isn't John Mackey up there, too? He likes to call me "Jeffy" just like you do.

Same ole Lame posts from "Fatass" Wiseman, KC8JBO. Nothing new, same
ole tired, lame, homo and spelling posts. Every one on the forum is
"POLLY" to Fatass. What a dope and a dupe!! He is so easy, no wonder he
goes to a hobby forum to try and save face with this lame shit. After
being run off by the "Bigboys" he has no other place. POOR "FATASS" He
needs to.......

Gitalife!!

4933. Ignition noise, Dodge Caravan 99

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-08 00:00:00 UTC
From: ddufault_ve2bap <ddufault@dsuper.net>
Message-ID: <82m8s2$ir5$1@nnrp1.deja.com>
Source record: 125442

Ignition noise, Dodge Caravan 99

Here is my English translation of my previous posting "Bruit d'allumage - Ignition noise"• Please excuse my bad English. My interference problem is in the same category that the one of Carl Salomon W5SU, with slight differences.

I've got a problem with a '99 Chrysler Dodge Caravan whereby a bunch of trashy noise gets into the receiver portion of my 2-way HF-VHF-UHF amateur radio transceiver, an Icom IC-706 (receives from 100 KHz to 450 MHz). This problem ranges up to the UHF band, giving a reading of S5 on the S-meter at 440 MHz. Its intensity varies with the RPM of the engine on the S-meter reading. When demodulating in AM (this mode is available on all frequencies covered by the radio), I hear a trashy noise whose frequency changes with the RPM. My vehicle is brand new: 10 000 Km (6000 miles)•

The noise ranges from pulse-type ignition noise, to trashy (computer-generated?) junk. The noise has to be radiated (picked up by an antenna) and I'm not getting it from the power leads...I've eliminated that possibility by temporarily wiring the radio to a marine battery, and the noise is still there when the engine runs. It only goes away when I disconnect the antenna. The magnet-mount VHF-UHF antenna is installed on the roof at the rear of the vehicle.

I tried some other receivers. The original Chrysler radio is also much affected; I hear the RPM-changing noise on AM and I lose reception of weak FM stations with engine running. The cassette portion is NOT affected, confirming a radiated noise. My scanner receiver (connected on a 117 V AC external source) receives noise up to 1200 MHz (S-1 reading)! This trash obliterates any signals weaker than that, on each radio I tried.

I disconnected the alternator; the problem is still present. It seems it's not the fuel pump either; I tried to turn the ignition key to the RUN position, without starting the engine. No noise was generated. I built a small magnetic loop antenna (a coaxial cable looped on itself, the inner conductor connected on the shield, over a 3 inches diameter loop), connected it on the Icom receiver over a long (20') RG-58U coaxial cable, and used it to probe around the car. This revealed that the noise source is obviously the ignition system; I got a radical increase of noise with the loop placed near the cap distributor, the coil, the spark plugs and their cables. I receive a much smaller signal with loop near the computer, and nothing when near the fuel pump or its supply wires.

I visited my Chrysler dealer service center; they made some tests, most of those mentioned above (all of them are discussed on the newsgroups and in the ARRL Interference handbook). They checked the engine with a DRB tester: everything was OK. The vehicle is already factory equipped with resistive spark plugs and cables. The computer is built EMI-protected in factory. Engine, computer, and other critical components are well grounded through heavy braid. After consulting their engineering staff, they found nothing and have no idea of what to do now. My feeling is they are not familiar with the EMI problems, and don't really care about them.

My girlfriend had a cute suggestion: "Why don't you choose another hobby - stamp collection, for example?"&#65533; Hope I won't have to choose this solution&#65533; hi! I've done other mobile installations but haven't run into one as stubborn as this. Is this a unique problem to this vehicle? Any ideas? Thanks for any assistance.

Source record: 125444
Cross-posted to:
alt.ham-radio.marketplace,alt.ham-radio.vhf-uhf,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

Hello all! I have a UHF HT-1000 for sale, is high split (450-512 MHz,) but will program out of band split. I had all amateur frequencies programmed, but the carrier or tone squelch would not open up on one of my favorite repeaters, output 442.000.....too darn close to the edge of it's capability when programmed out of band, I suppose. It would receive just fine if I pressed the manual MONITOR button, though. Works fine and within spec on the rest of the frequencies above that 442, though. I got glowing audio reports wherever I went with this rig, typical Motorola quality at work here, but am buying an amateur HT for amateur work. Radio is a 9.5 out of ten cosmetically, with a few minor scuffs and scratches on the front. Is an intrinsically safe model (for hazardous atmospheres,) factory mutual approved, and so marked on the base (with the green dot and triangle,) a good choice for emergency services / confined space / mine / industrial type work (with the proper batteries.) Package comes with radio, standard rubber whip antenna, THREE batteries (two of which are virtually brand new, but all working HARD!,) and a standard rate charger. Radio model number is H01SDC9AA3DN. I want only $400 for the entire package, which is a fine deal. I will guarantee that the radio is working 100%, with no problems when you receive it. Buyer will pay shipping and insurance by his choice of carrier. E-mail me at:

jdavoli@nospamerols.com

and remember to remove "nospam" from the address.

Thanks for looking!

Joe Davoli, KB3DMF

4936. KT4TR....Ham of the year!!!!

Newsgroup: rec.radio.amateur.misc

We all owe a great deal of thanks to the mighty KT4TR.

He has been searching non-stop for TRUTH, JUSTICE & THE AMERICAN WAY
for many years on ham radio now!!!!!!

And guess what? He has exposed & reported his findings for all of us
see and hear.....THANK YOU BOB!!!!!!

This GIANT of a man should be awarded "Ham of the year" for all of his
great work. When one hears the name, John Wayne, Bo Gritz, Ronald Reagan
& a host of other great Americans, They should also think of KT4TR!!!!!!
FOR HE BELONGS IN THEIR COMPANY.

Bob's signal with the "TR mobile" has won over hearts & minds
EVERYWHERE. And when his little Cub gets up in the air, you can bet
there will be a huge pileup waiting for him on 14.313

Next time you eat an orange.....THINK OF KT4TR
Next time you hear a STRONG mobile signal.....THINK OF KT4TR
Next time you DO NOT hear af2y & wb2otk.....THINK OF KT4TR

Thanks a million, Bob.

Tell you what, Get me Bob Sherin's telephone number and street address
and the matter will be taken care. I want the SB-220 back. I is a
three tube version and with a little work will live again. Those
that said the discoloration in the aluminum inner chasis are an
issue and make the $250 a "rip off" will some day regret what they
said. What I plan to do is give W4ASX his money back, remove the
aluminum oxide, put three good Eimac tubes,replace the band switch, and
make sure it puts out 2KW key down for a least 2 minutes and us it for a
few months (for demonstration purposes). Then I plan to return it to him
gratis.(Since Bob is no longer active he can put it on a pedestal as a
remembrance of my gratitude) I have a small request, it is only fair
that since I paid for shipping before he cover it this time. Tell me
that this is not a equitable and reasonable solution to his "suffering"

>With all good wishes,

The newsgroup I mentioned has plenty of examples. Although I can't verify everything, here's two that happened to me

Some topics of discussion are simply not allowed on AOL discussion groups. When I had an account with them, they shut down a computer security discussion group because they claimed it was a hackers group, and that we were exchanging virus source code. Nothing was further from the truth. I found out later that some crybaby got burned when a DOS-based password protect program locked up his computer, and he made the false assumption that the program was a trojan horse. (I used the same program and didn't have any problems.)

Another time is when an overzealous atheist was harrassing people in every religious group that AOL had. He refused to keep his postings restricted to the atheist/agnostic group, despite numerous complaints. AOL responded by saying they fully supported free speech and the first amendment.(As long as you're not discussing computer security and exchanging information they don't think you should know about)

I hope you scumbags are happy. I heard Af2y and a W7 this afternoon talking and the 7 had read about doc in the web extra., Doc told him he would be his last qso because he weas not going to answer Mr.Holligworth and would be revoked. So why not send in the ticket and he did late this afternoon.You bums forced a great guy out of the hobby. Also doc talked aboot dirty insulting emails he got and lousy stuff in this ng. Damn you

Someone posting from eskimo.com has been canceling the messages of other posters again (take a look on www.deja.com and do a power search for the subject "cancel" under this newsgroup).

Complaints to abuse@eskimo.com have resulted in the cancellation of the account.

Some people never learn. That is the definition of stupidity.

There are still a few IC-756s out there for around $1900. Or, I could wait until spring and get the IC-756 PRO and pay maybe $3000+ for it.

What do you think, is it worth the wait and the money?

Thanks, Pete KA0TZK

4951. Re: AF2Y WILL PLAY "JEW" CARD IN LATEST TIFF

Newsgroup: rec.radio.amateur.misc

From: Len Schaier <lschaier@avotec.com>
Message-ID: <384E60C3.3C4DC915@avotec.com>
Source record: 125460

Bob,

I believe I fully understand the Constitutionally protection of speech. I also understand the difference between free speech, harrasment and defamation.

The fact is that that the constitutional protection of free speech does not insulate him from punishment under statutes or laws associated with defamation and harrasment any more than he would be protected from punishment if he yelled fire in a crowded theatre.

"Not like him". I hate him. I hate him because: he starts fights with anti-semites just so he can take the position that he is our protector; because he harasses and defames me because I take a different approach to dealing with anti-semites; and because he has sided with others who said disgusting things about my wife and mom.

If you take the time to look at the record you will find that I only respond to his attacks. This "jew Card" thing may have been the exception. In that message I wanted to take a stand against what I felt was anti-semitism, and the instigator responded as he did because he thinks that's his job ("I don't need a lawyer..."). I was also trying to point out the obvious; that "getback" was doing exactly what the instigator wanted by giving him something to do and an excuse to protect us once more.

Frankly I don't know, or care, if getback is an anti-semite (unless of course I thought that the person is a friend of mine). What I care about is the needless "jew" and "hook nose" comments just to get back at the instigator and because they mock the memory of my relatives and others that died because they were Jews. I also pray with two older gentlemen that have ID numbers burned into their arms. I certainly don't need the instigator to tell me about the horrors inflicted on Jews nor to comment on how I deal with them.

I hope you understand me a little better and thanks for your comments.

Buyer disappeared! Very good condition. Will need battery, charger cord has
been cut for use with power supply but is all there, just put back together.
no mods done. have manual, schematics.
Looking to trade for MOTOROLA handheld, 5 watts.
Not asking for an HT1000 here.... but an HT50 or similar would be nice. I
could use a P100 if it's the rib program type. Then if all else fails, I'll
go with a Spirit or similar.
Can use following freqs:
151.625
154.570
151.925
462.600
462.575
Prefer something programmable, but we'll see. Must have charger!
I would trade this PLUS other motorola related items for a nice p200 or
ht600.
Just let me know what ya want to do!
thanks,
Randy

You are fully understood and appreciated here.

I'm sure I've committed the same sin in speaking out, seared with pain from the tragic yet proximate past of those ghastly atrocities. Most of us had at least one friend or family member branded--of those who got out alive. I had a friend, one Erica Futernic, who found herself at the bottom of a pile of bodies at Auchwitz. Like the rest, she was expected to be dead. Staying still, she wrestled out under cover of dark. She survived the war only to die prematurely from the trouncing she took to her health.

Sure, such stories are leading with our chins for criticism of those who would like all this pain to end. However, how can you hush up such trauma and expect a healthy citizenry? Maybe the exercise is therapeutic for Doc, as it is for me!

I have an Icom IC-2700H transciver with the HM-90/A wireless microphone that has a problem. Some times durring a transmission, the audio fades away. Carrier stays the same. Another mike fixes the problem. I have tried heating and cooling the mike boards and can't make it fail. Has any one had this problem and found a fix?

Sure would like to get it fixed.

Thanks

Will Humphreys w6nzn@earthlink.net

4960. double voicing in radio?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-08 00:00:00 UTC
From: nospam@nowhere.org
Message-ID: <slrn84tia4.8hs.nospam@unix2.netaxs.com>
Source record: 125469

When I listen to the news on my portable radio, the human voice has a double sound effect (octave). It only happens when I use the AC power. Any idea if this is a common problem? Classical music sounds fine. Only occurs with human voice.

James

Please post comments here. Thanks.

Having owned three Icom products (handhelds) and not being very impressed with their products, I am looking to buy the FT 100.
I have been really screwed when I tried to depend on an ICOM IC H16 VHF handheld. It was on this wildland fire in Oregon and I couldn't get sufficient audio from a fairly close repeater. Lack of power? Really bad audio? Whatever, it really made my day in a bad way. Add a thousand acres of burned timber.
As for the 02AT's, the audio circuits never seemed up to the task.
Anyway, I am just about to buy the FT 100. Not that I am an informed buyer.

Lets face it the facts are clear. Graham Dyer is just a basic amateur radio operator, also he is a past bootlegger VE3NSF remember? He has indulged in a bit of qrming too. He was and is a Porkbutt suckboy, also a Goodfellow spy who reported to his leader in Easley. As for Dan, W4NTI, he is currentley operating under a flag of truce. Hope it lasts, I think it will.

Pathetic. You're really projecting your situation upon others, Lackwit.
Everybody knows what a dump -YOU- live in, but then the O'Brien's
aren't known for originality, for example three generations of the same
name James. Why did your father give you his name, was it because he
stumbled into the maternity ward after a three day bender, and belched
out the only name he could remember. It was remarkable he could
remember his own name, much less ever conceiving a bastard child who
would be a bigger dissapointment to the family than he was.

I know you're mentally handicapped, and so I can ignore the fact that
you have your head up your ass and don't know any better.
I never owned a Pinto, dumbfuck. Although I do wish I had my first car,
a 1968 Barracuda back.
Oh, and it's a good thing Ga doesn't have vehicle inspections, because
your broken out window with the plastic bag taped over it wouldn't pass.

Peabrain got on the air and claimed "I've killed once, and I might kill
again." Whatever that means. Makes you worry, doesn't it? LOL!
The only thing he's killed is the bottle of whiskey or the herpes
infection that runs rampant upon his lips.

Piero:
Let me just say that if you want customer service, go with Larsen. Yes they will cost a little more up front, and they might not look as sleek as some, but you can't beat the warranty. 3 years. One time I called them and said I had a probem with a dual band rubber duck, they sent me a new one and said just destroy the old one, no questions. Another time I had a coil on a 5 year old antenna crack (yes, I told them I did not have a receipt and it was 5 years old), they still replaced it free. Larsen has great customer service.

How close are the intercoms to the mic base unit? Try to
separate the two.

me.

I've suggested that you do something that would not cost you a slight bit of effort (apart from the effort required to uncheck a setting somewhere in your mail program) and that would make a lot of people *very* happy. You decline to adress my suggestion, denying the fact that I have a valid point.

Obviously, your emotional setup is so primal that having something pointed out to you throws you into denial and antagonises you. Your only claim to relevance is to stand in the doorway, so to speak. You're the guy who just gets in the way and holds things up on the pavement, in the line at the counter, etc.

You're going to continue the same shoddy practices and keep on being a pain in the arse just because to change anything in your ways would be too much to take. The irritation of the rest of USENET is totally irrelevant to you because it's far more important to not admit that you *could* change your mail settings.

Either you're the moron I've just described or you're a troll.

Either way, you only deserve contempt.

You're a sad dead weight.

Get in the way of a truck or a bullet.

My hat is off to the wonderful people who send Mr Hollingsworth E mail reports on people like AF2Y and evidently You included, and all your ilk who qrm our beloved amateur bands. Keep up the good work all you people who are trying to clean up our bands by reporting rule breakers and unregistered operators. Let the people who are doing these things call you "Stool pigeons" but do not let it keep you from your duty.

Gidalife

On Tue, 7 Dec 1999 15:29:48 -0000, the estimable "Steve"
<ai7w@NoSpam.com> postulated:

>Gerry,
> How does removing the CW requirement resolve this problem?
>It sure didn't improve things when the VHF CW requirement was
>eliminated.

I don't know for certain that it would have any effect, good or bad.

I do know that a lot of young kids that might otherwise be interested in getting involved in amateur radio don't have ANY interest in learning morse code. And who cares about using VHF to communicate around town when everone has a cell phone? With the relative ease of worldwide communication available via the internet I find it difficult to even get young kids interested in SW radio.

I don't know what the answer is but I do feel that the current/future demographics of ham licensing in this country makes for a rather bleek long term scenario.

If folks want to work CW that's fine. It is a fun and useful mode. I just don't think that the attitude of many that a CW requirement somehow acts a "natural barrier to the riff-raff" has any credibility.

I think a Novice class, no code license with limited HF privileges and a General with a 5 wpm requirement wouldn't be a bad thing. On the other hand even that may not be enough to get folks interested/involved.

Ham radio is more than just a hobby. It is a valuable public service especially in times of disasters. It would be a shame for this service to wither away because the "there's no corps like the old corps" camp wouldn't adapt in order to survive.

Without numbers (of hams) and use of the spectrum it WILL disappear.

The only thing I do feel certain about is that maintaining the status quo will ensure the demise of amateur radio in this country.

Does anybody have stats (or a URL) on licensing in other countries? Is ham radio a hobby in decline in most of the world? I have been able to find some stats for the UK and Japan (and they show a downward trend in the last few years) but not much else.

Gerry

5012. ACS Newsletter for 11/29/1999

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-09 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <82n6oi$3kj$1@news.hawaii.edu>
Source record: 125396
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

Welcome to the Auxiliary Communications Service Newsletter, developed
by the ACS Training Unit of the State of California Governor's Office of
Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency
communications closer together by sharing common ideas, and by introducing
new technology into the emergency services community. All individuals with
an interest in emergency communications, disaster preparedness or helping
the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many
different organizations with the same common goal: emergency response. We
encourage everyone, from whatever organization you represent (or just
yourself!) to bring us your ideas, suggestions, concerns, manuals,
handbooks, or opinions so that we may share them with the group. To those
of you who have just joined us, welcome aboard!
.....

Following bulletin to be released immediately via packet, internet
and any other form of distribution including newsletter, FTP,
OES ACS regional networks to all Operational Areas's, RACES and
similar support units, etc.
Cary.

_____
CA99.01 ACS Y2K RESPONSE
To: Emergency Communications Units - ALLCA Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

CA99.01 (EMCOMBUL.C01 for California)
ACS Y2K RESPONSE #1 For release 12/01/99

This is a special bulletin for all ACS Units in California as to
the upcoming Y2K Event. This bulletin is in addition to the
regularly scheduled Informational Bulletin Series.

As most of us are aware, Emergency Management & Emergency
Services Units will be in some form of activation over the New
Year Holiday period. This is in response to the "Y2K Event".
Most authorities agree that this time frame may be one of event
interpretation or people management more than that of a
technological nature. However, both are considered in agency
preparations.

The State of California Governor's Office of Emergency Services ACS Unit will be activated as of 0700 hrs (PDT) starting on Thursday the 30th of December. The Unit will be in support of the State Operations Center (SOC) in Sacramento as well as the Regional Emergency Operations Centers (REOC) in Coastal, Southern, and Inland Regions. Specific staffing assignments are still to be worked out at this time.

The concept of operations at this time, are to provide gathered intelligence to the Situation Status & Analysis Section of the SOC. One of the vehicles in which to do this will be using Amateur Radio Operators and short-wave listeners who are actively involved in DX and short-wave listening. Those who monitor the HF Radio Broadcasters, HF Amateur Radio Operators, as well as other HF users world-wide will feed the information gathered directly to State OES Headquarters. More information for this event may be forthcoming.

The State OES ACS Y2K Operations Branch Chief is Bill Pennington (WA6SLA), our Inland Region ACS Officer. Further inquires as to the DX operations may be directed to Bill at Email: ACS@oes.ca.gov.

This week's EMCOMM Bulletin:

EMC212 RIMS Forms 3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC212 RIMS Forms 3 For release 11/29/99

Continued from Bulletins 210 and 211: Form Illustration

An Event/Major Incident report FORM for an Operational Area has the following items that are used to communicate the situation in specific detail:

_____
Operational Area: XXXXXXXXXXXX

Region - OES (Fire and Law) in which the OA is located
1a. Overall Event Name (such as Westpoint Fire)
1b. Disaster Number
2. Incident name (where an incident is related to a larger
event)
3. Event/Incident Type: (example: Wildfire)
4. Date/Time of Event/Incident (such as 09/09/99 1630 hours
5. Event/Incident Location: (example:
a. Descriptive: Wildfire in XXXXX County has caused
the evacuation of 138 people and 35 homes in the xxxx
b. street
c. City
d. Zip
e. Map reference
f. Latitude: Longitude: Thomas Bros Page: Grid:
6 Event/Incident Impact: (example, minor)
7. Situation: (example, a fire of 20 acres plus is currently
burning in xx in xx county 138 people, 9 homes
evacuated. No reports of structures lost at this time.
YY of ZZ IS monitoring the situation and working
with jj.

Items 8-18 are in 3 columns in grid format with predetermined
color coding pop-up options.
The 3 columns are titled follows:
Functional Area Impact Status (a) Remarks (b)

8. Fire and Rescue: (Green - normal)
9. Law Enforcement: (Green - normal)
10 Care and Shelter (Yellow - No Mutual Aid required.
Shelter is currently setup in xxxx church. County Social
Services has opened it and will ask Red Cross to take over.)
11 Medical/Health (example: Green - normal)
12 Movement (Green - normal)
13 Constr & Engr: (Green - normal)
14 Utility (Green - normal)
15 EOC Activated? (No)
16 Mutual Aid Received in last 24 hours (No)
17 Mutual Aid needed in Next 24 hours (No)
18 Critical Issues
19 Prognosis (3 choices: No Change, Worsening or Improving)
20 Reported by (name, agency, phone, Fax, Alternate number)
21 Date/time of THIS report
22 Person RECEIVING report (name, agency, phone, Fax, Alternate)
23 Additional Information (text format)
--- ---
Emergency Communicators will recognize that a computer system
that uses forms like those indicated will be subject to loss
of the system should the telephone, electrical and electronic
systems that make the interconnections fail for any reason.

However, so long as those systems work, which has been in all emergencies since its inception with just one short server failure, the Response Information Management System does its assignment extremely well. More importantly, it literally saves countless hours of staff time that former telephone systems had taken.

Where such systems are in active use, it should be apparent that EMCOMM units need to have an ability to pass the SAME data via radio and wireless systems so it can appear in the same FINISHED FORM that the EOC personnel are accustomed to handling. There should be no need to translate the data or figure it out from an unfamiliar layout or form.

Continues, Bulletin 213
EOM
.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

From: jeffreyh@Hawaii.Edu
Message-ID: <82ncja$7rj$1@news.hawaii.edu>
Source record: 125397

>When I listen to the news on my portable radio, the human voice
>has a double sound effect (octave). It only happens when I use
>the AC power. Any idea if this is a common problem? Classical
>music sounds fine. Only occurs with human voice.

My guess is that the AC power supply might be supplying too much voltage, driving the audio stage to distortion on voice peaks. Are you using a "wall wort" power supply? If so, is it the stock supply?

5014. Re: Ignition noise, Dodge Caravan 99

Newsgroup: rec.radio.amateur.misc

Source record: 125398

If you are hearing it others are as well. Suggest you write the Department
of Communication in Ottawa with a copy to Daimler Chrysler.

About 20 years ago (1975-76) Ford produced a number cars which one could
literally hear coming on 20 metres for many city blocks. My wife is still
wondering how I knew to open the garage door. The DOC
got Ford's attention rather dramatically and the problem was fixed posthaste
on the 1977 models and I noticed rather quietly on previous models. Sounds
as if another generation of engineers (more likely accountants) is in need
of some education. Good Luck!!

Your English is better than that of most of the codeless contributors and a
lot better than my French.

5019. Crosstalk between wireless mic and _CB_ intercom?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-09 00:00:00 UTC
From: van@crl.nospam.com
Message-ID: <van-0912990251330001@as54-154.okldca.pacific.verio.net>

Do FM wireless mikes interfere with either cellphones or 49 MHz intercoms?

Probably simple question: our church group stages Christmas-concert-like events where the performers use FM (170MHz?) wireless microphones and the stage crew uses 49.830MHz intercoms. Lately we've been encountering intermittent buzzing interference through the mikes.

(Incidentally, the intercoms also have been getting interference on the "A" (49.830MHz) and "B" (49.845MHz) channels. It sounds digital, so I suspect it could be from neighborhood R/C cars. Switching to channel "C" (49.860MHz) seems to aoivd the problem.)

The sound guy (usually a DJ volunteering his time) says the buzz from the mics are because of the intercoms. Another is saying it's due to cell phones in the congregation. Does either explanation seem reasonable?

It doesn't seem likely to me -- the harmonics don't add up -- but then, what do I know? Thanks in advance.

Lets take a look at your message and decide who is blowing smoke:

"I have been a true gentleman and benevolent even to my enemies on the air and on this NG."

You have stated that I am your enemy-- where is the benevolence?

"I do not deserve the harshness being read on this NG and in my e-mails."

You deserve the comments by me. I respond- I have not initiated this war. You have set yourself up as my judge and jury, not me.

"As I said, I am not replying to Riley Hollingsworth and therefore will mail him my ticket very soon."

I don't believe that for a minute. Unless you have lost your mind or caught the "dumb bug" from you know who, you will not give up the hobby.

"I see no reason to continue on the air when it seems I'm neither wanted nor appreciated."

Poor baby!!

"I have been undermined by lies, doctored tapes and entrapment"

In your mind! I have never doctored a tape, never lied about you or entraped you. The problem is you don't remember anymore what you say or do. Try Ginko, it helps me. While working on my tape collecting hobby, I listened again to some of the tapes I made of you, OTK, and douglass attacking me, your comments on other peoples wives, children who have passed away or been sick.. it goes on and on. You should be ashamed of yourself.

"if you are happy that I am completely discouraged, then gloat."

I am not happy and in fact quite sad that this war continues and that someone who has something to contribute to Ham radio might leave the hobby. However, if the choice is a continuation of the same behavior, or loosing you, then the choice is easy.

Too bad that 'ole Charles Cheesecake (AF2Y) can't take a few pointers
from KT4TR.....#1 out of Vero Beach.

There is one more ham I wish to add to the "Hall of Greats". He would
be NONE OTHER THAN.....PETE K3QAM.

It's great to hear the soothing voice of K3QAM on 14.313 Pete is a
"beacon of sunshine" on the ham bands. If you ever saw a photo of his
little dog, Misty, your heart would just melt!!!!!

When KT4TR & K3QAM get into a QSO together.....LOOKOUT. There is bound
to be a knee slaping good time for all who listen. Most of the time it's
at the expense of AF2Y, W4JYZ & a host of other idiots.

So there you have it. All stand and salute these two great American
Hams.

Answer this quiz with a Y for YES and a N for No.

1. Do you see a difference in the following addresses?

A. kc8jbo@

B. kc8jb0@

Perhaps your ability to interpret visual data in impaired. Which also leads me to conclude your comments are just as corrupted....GIGO.

That is what happens when the standards are lowered and it is made easy
for the cb types with the typical cb mentality to get into ham radio.

I've spent a lot of time on the IC-781 and some time with the IC-756, Both
have similar displays. They have proved very usefull for contesting and
DX'ing. For a casual users they may have less value. Here are some of the
things a display provides.

1) You can check to see if the band is open very quickly.
2) You can watch for new signals to appear on the band your working.
3) Whaen a DX station is operating split, The information about the pileup
will let you find a good callling spot as well as show you the pattern the DX
station is using.
4) When one of the 6KW K6 stations comes up right beside you, You can decide
to slide up/down or just move depending on the band display.
5) shows relative signal strength quickly
6) Sees brand band noise sources and ther bandspread
7) Its a great interface for setting the keyer contents and the general menu
displays make operation easy.

I think the boy just wants to keep the war going.
And David Tolassi, the incredible shrinking brain had better keep his
mouth shut about me..or bear the consequences.
I might have to make a trip to VT.

5034. WONDERFUL! PORKBUTT GONE! AF2Y ON THE ROPES

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-09 00:00:00 UTC
From: gitalife@my-deja.com
Message-ID: <82peao$q87$1@nnrp1.deja.com>
Source record: 125418

What a wonderful Christmas present from Mr Hollingsworth at the FCC .
Porkbutt WB2OTK, is gone! And Dr HATE Af2y, qrmer, is on the ropes
and almost out of ham radio, Dan W4NTI, has a truce going. We don't
hear "BASIC" Graham VA3GJB=VE3NSF Bootleg much anymore. N1GJT is on his
motorcycle to hell most of the time with a death wish because he can't
talk to his master "PORKBUTT".
W2ECA Prime Porkbutt "SUCKBOY", is trying to suck up to all the people
still on 14313. I tell you
folks it is wonderful. It is nice that we don't hear DR Hate with his
"TREADMILL FROM HELL" splattering up and down the twenty meter
band.(Thanks Riley). Lets don't forget "FATASS" Wiseman KC8JBO this
lard loaded internet and ham radio qrming idiot, and porno hermit, was
corralled By Santa Riley because of his nasty qrming activities. Give
thanks boys, Santa Riley has been a very good person and has rid the
frequency of some major qrmers and social misfits. Yes, MERRY CHRISTMAS
AND HAPPY New Year!!!

5037. NEWSLINE - BEGGING AGAIN..!!!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-09 00:00:00 UTC
From: hams@hamnet.com
Message-ID: <384fe9f6.2067925@news.earthlink.net>
Source record: 125421

Be advised....NEWSLINE..Run by Bill Pasternak, WA6ITF, is produced at MINIMAL cost at his work facility, KTTV-TV in Los Angeles.. Most of the input to Newsline is by a few phone calls!!

He works with access to the audio equipment AND PHONES for free at his workplace..!!!!

The various phone numbers for access to NEWSLINE around the Country are PROVIDED AND MAINTAINED BY VOLUNTEER minions of Mr. Pasternak! They are NOT paid..!!!

The almost CONSTANT begging for funds goes little toward any Newsline use. It really pays for Bills toys, computers, Internet access, etc..et al.!!

There is such little overhead, that I find this begging for money disgusting. An insult to the intelligence of the average Ham community! DON'T GET RIPPED OFF BY NEWSLINE..

5038. Recruiting new hams

>I do know that a lot of young kids that might otherwise be interested
>in getting involved in amateur radio don't have ANY interest in
>learning morse code.

I agree with that also, but it is going to take a proactive
effort to bring amateur radio to young kids today so that
they even know what it is.

>And who cares about using VHF to communicate
>around town when everone has a cell phone?

Which would you rather do? Talk to a few friends
via a multistation QSO or pay for cellphone or landline
charges? I meet two other hams for a breakfast
get together every Tuesday. We chat on a 2m simplex
frequency about anything and everything while enroute
for about 1/2 hour. Why would we want to do that
on cell phones?

>With the relative ease of
>worldwide communication available via the internet I find it difficult
>to even get young kids interested in SW radio.

Even as a kid in the 50s, the amount of other
kids interested in SW radio, ham radio, etc. was
relatively small when compared to those that
were into sports, etc.

>I don't know what the answer is but I do feel that the current/future
>demographics of ham licensing in this country makes for a rather bleek
>long term scenario.

The future will be bleak if WE fail to recruit new
blood. Heck, I hear some of the same complaints

from people into model railroading, antique cars, etc.

>If folks want to work CW that's fine. It is a fun and useful mode. I
>just don't think that the attitude of many that a CW requirement
>somehow acts a "natural barrier to the riff-raff" has any credibility.

Agreed. If it served any useful purpose in that regard we'd
have fewer riff-raff on HF than on VHF. I don't see that
at all and I live in a major tri-state suburban area.

>I think a Novice class, no code license with limited HF privileges and
>a General with a 5 wpm requirement wouldn't be a bad thing. On the
>other hand even that may not be enough to get folks
>interested/involved.

Before year's end, I believe
we'll get (IMHO) a Tech (nocode), a 5 wpm General and
either one or two more higher licenses. That is the outlook
until the elimination of S25.5 from the international treaty.
It will be interesting to see if the FCC goes with allowing
nocode techs on HF CW as proposed by the ARRL in
their comments to the NPRM.

>Ham radio is more than just a hobby. It is a valuable public service
>especially in times of disasters. It would be a shame for this service
>to wither away because the "there's no corps like the old corps" camp
>wouldn't adapt in order to survive.

Agreed.

With that kind of poor customer service, and with all the other compitition out there, I think it would be safe to say, DON'T DEAL WITH LAKEVIEW ANTENNA COMPANY! If enough radio enthusiasits take this position, I'm sure it will hurt their business.

Newsline very well deserve your contributions. After all, Bill Pasternack has been putting out a slick production with his group of pros. It is a credit to ham radio, in my opinion.

While it is true that he has many free means to accomplish his task, he puts his own time into every show. How many of us would make such a commitment and keep it for so long?

I have no idea, however, how much money is needed for what. A disclosure by Pasternack as to where the money goes (maybe even an audited financial) would make the fund raising process more assured, if he isn't doing that already. For some fund raisers, this is required as a condition precedent to solicitation.

Personally, I love Bill Pasternack's and Newline's product, and I assume regularity with respect to his integrity.

Pro Am antennas are easier to adjust. You only have to do it once.

This is the distinction between those who don't mind relying on other people's equipment for communication (telephone and computer users), and those who desire to only be dependent upon radio wave propagation.

Wanting to get those whose communication needs can be met with telephones and computers interested in ham radio seems like a silly proposition.

>
>Sent via Deja.com http://www.deja.com/
>Before you buy.

Here is the real scoop..

From the ARRL WEB Extra page:

quote:

"Hollingsworth clarifies "two-letter ID" issue: FCC Special Counsel for Amateur Radio Enforcement has clarified the FCC's position on the common practice of using a call sign suffix to identify on a DX net or in a pileup. "All we said was that if only the last two letters are given, it doesn't meet Part 97," Hollingsworth explained November 15. He pointed out that if a calling station using an abbreviated ID is never acknowledged and given a chance to give a complete call sign, a legal ID would be lacking for that communication. To be strictly legal, stations using a suffix-letter ID always must identify at some point in the communication with a complete call sign. The "two-letter ID" subject arose in a single-paragraph reference in a November 3 letter from Hollingsworth to 14.247 DX Group NCS Alan Strauss, WA4JTK. In his letter, Hollingsworth said "the practice of identifying only by the last two letters of an Amateur call sign is a violation of Part 97 of the Commission's rules." Some ham radio media had construed the statement as an all-out ban on two-letter or suffix-letter IDs and a tightening of FCC station identification enforcement policy. Hollingsworth suggested the news accounts took his comment out of context and went beyond what he'd intended to say."

end quote

If you operate on a net, use your full call at least once during each period the net control is taking "last two" or every 10 minutes.

You've ID and the FCC is happy

This also applies in those long hours spent shouting your last two into DX pileups. I also have heard "last two" being used on some repeaters trying for a break.

The individual station is responsible for ID'ing, not the net control station. The use of last-two came in to use in those hugh DX pile-ups to

reduce the volume of noise. My own preference is full calls, its cuts the exchange down by two transmissions most of the time. The last-two syndrome is even creeping into CW pile-ups.

Here's the latest from Llgpt@aol.com
Judge for yourselves fellow hams and hamesses.

Doc,

KT4TR is a wannabe!!! He never served in the military and sucks up to W1ZZE..disgusting.

He is not mobile today either...just from his home base station, probably half drunk again.

His wife will be leaving him very soon. And taking Harrison with her.

He also does not own that Piper J3 Cub, it belongs to a friend of his. TR is nothing more than a drunk wannabe!!

There will be many,many more reports from here in Vero Beach.

The " KT4TRuth Report "

L. Lewis
Doc,AF2Y,radiosigs@aol.com
A man who'll stand up for nothing will sit
for anything!

5061. Gene Therapy Yields Bigger Hams...

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-10 00:00:00 UTC
From: polparrot <anonymous@cotse.com>
Message-ID: <199912100717.CAA01854@cotse.com>
Source record: 125312

Anonymous post.

Headline: Gene Therapy Yields Bigger Slabs of Ham.
Here come the Super Pigs! Medical researchers using gene therapy have figured out a way to make Hiram Hogs grow 40 percent larger and faster.
Scientists say the technique, which accelerates the hogs' growth hormones is stimulated by ingestion of huge amounts of beer and starchy substances such as fast food hamburgers.
This prospect of biotech hogs could revolutionize the whole industry across the board. The treated pigs eat 25 percent less than normal pigs yet produce twice as much fat. These treated pigs mature 35 percent faster than untreated pigs but show a marked inability to adapt to their surroundings.
Said a leading scientist, "These pigs secret a higher than normal amount of waste products and pose an environmental risk."
Will the populace accept these "improved" pigs as a whole?
This is open to conjecture and the jury is still out on this one said an authority on pig genetics.

I always have trouble with my Callsign especially on the air.
Saying Golf Seven siera Lema Lema on 2m sounds daft but I can garauntee thgat 80% of hams put me down as G7SSL instead of G7SLL.
It is one of those mental block things which I'm quite sure that it passes subliminally and can't be helped in normal peiople.
However when I use the phonetic alphabet on Two I collect some scornful comments.

Which ever way I play it I can't win. :(

Here quite unitnetionally I'm sure we have an example of it happening in TEXT.
This confirms my beleif that it is deep rooted.

What I need is a humourous bon mot that is suitable for broadcast on the air.
Any suggestions for a legal one?
Of course humourous suggestions would be nice to read at this time of good will; but please do not be offended if they don't get selected for the short list. :)

> BTW, thanks Gary, I have left that particular thread as it has taken a
> separate turn.

Well one good turn deserves another, Happy Christmas Trevor.

This repost from Oris@dirtball.com:
My recon vehicle just returned, and the mission was successful.
James O'Brien
3910 Hiram-Sudie Road
Hiram GA 30141
Said dwelling appears to be an old one story farm house with very
faded red paint. The dwelling appears to have been the victim of a
highway widening project several years ago, as it now sits
approximately six feet from a very busy two-lane highway. Residents of
this dwelling apparently enjoy the sounds of heavy traffic, day and
night. Two very long and deep skid marks were observed in front of the
dwelling, as if someone left or arrived in a hurry. There is no
garage, only a rusty carport shelter. Antennas of every description
are on and around the house, verticals, long-wires, etc. At least two
antennas appear to have been pulled up in trees by means of rope, where
they swing in the wind. A DBS dish was in the back yard. The grounds
were very poorly maintained and need of landscaping. Two vehicles
were in the rusty carport, one red Ford T-bird and one black T-bird.
The black T-bird has a busted out passenger window. Both vehicles
appeared to be in poor condition.
Poor Jimmy.

Gitalife

This post had a great effect on "FATASS" Wiseman KC8JBO. We understand
from reports coming from his dawg patch neighborhood, "Crackerbox East,
that he has been seen waddling at least ten feet down the dirt path
from the outward opening door on his trailer. He has been heard moaning
a dirge about the loss of his "Masters" Porkbutt, and AF2Y. He has a
very hurt look on his larded jowls snaggled tooth face. I say he is
taking the fact that Mr Riley Hollingsworth knows he is a long term
qrmer of decent amateurs pretty hard. Don't pat that "Darkie " Figurine
on the head for luck again you bigot, 'Fatass"! We know a hurtful bigot
like you are looking forward to Y2KKK with relish. You need to ..

5070. ARRL Web Extra- "If it Bleeds it Leads"

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-10 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <82rbse$612$1@nnrp1.deja.com>
Source record: 125321

Is the ARRL for real with what they continue to use this site for ? I'm in this hobby to relax from my own trials and tribulations, not to read the life and death struggles of hams.

In the past few weeks, the "coverage" of VP2ML's unfortunate situation at middle age has been downright gross. "Internal bleeding" ? "Ten units of blood ?"

And it doesn't end there. Just when you thought you were safe, they post the even more unfortunate tale of a 16 year old who wrapped his car around a tree in a Connecticut rain storm. What relevance does that have to the ARRL membership in, say, Iowa ?

If they insist on pretending to be a news wire service, at least spare us the tabloid journalism.

Cross-posted to: rec.radio.cb,rec.radio.scanner,rec.radio.swap,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.amateur,rec.radio.amateur.equipment

Yes Doug, I do that now. I was not the one originally with the customer service problem, another person was, I was only replying to their post. I had a bad experience with Lakeview employees (owner?) at the 1998 Dayton Hamfest and I will never deal with them again! He was rude and ignorant. The others working behind the table said he was having a "bad day", but he didn't have to take it out on me.

POOR, POOR KC8JBO.....W1ZZE has been on the air for years but KC8JBO
is too "wet behind the ears" to know any better. But then again,
anything past last year is "ancient radio history" for FATASS KC8JBO.

Guess you got into this ham stuff kinda late in life, Wideman.

Were you around when another FATASS called WB2OTK was on 14.313? Or
were you still trying to learn code then? hohohoho.

'Ole Wideman is trying his best to fit in on the radio & make friends.
It must be hard when your the "new kid on the block" and a KNOWN QRM'er
at the same time!!!!

Why don't you write some more postings showing us what a "RADIO VIRGIN"
you really are, fatboy.

You have REALLY exposed what a IDIOT you are this time.....Don't make
comments on the present IF YOU DON'T KNOW YOUR PAST!!!!

I like your song & will let Dick Clark Productions know about it this
weekend. If we can get a little airplay behind it.....IT'S BOUND TO BE A
#1 HIT!!!! Too bad 'ole "Wolfman Jack" is not with us anymore.

As you may have known, I have had many HIT SONGS written about myself
(WB2OTK). Here's a list of them & the year they went "GOLD".

1. "PORKBUTT SONG" 1997
2. "TALKIN ON THE RADIO ALL DAY LONG" 1998
3. "CALL ME MR. QRM" 1995
4. "I WILL GET A JOB TOMORROW" 1993

As of late, my #1 HIT SONG has been "MR. HOLLINGSWORTH TOOK ME OFF THE
AIR".

I sure wish it were Polly, because I have not heard his melodious voice on 75 for some time and if it were him I would ask where he's been. Unfortunately, "gitalife" is someone else. I understand that it can be confusing because "gitalife" obviously possesses Polly's superior intelligence and wit. I think you're just jealous.

Yeah, I had much more going on than you can ever imagine. Geek.

> Were you around when another FATASS called WB2OTK was on >14.313?

Yeah, I have some QSO's in my log with Rich, thanks for asking, asshole.
Why is it all of your enemies are "fatasses?" You really shouldn't
belittle the same kind of person you married.

Or were you still trying to learn code then? hohohoho.

Yep. And I passed it in a timely manner, too. How many times did you
have to take the code test over?

> 'Ole Wideman is trying his best to fit in on the radio & make friends.

While Tolassi just jams emergency maritime traffic.
At least I HAVE friends, which is more than YOU can say.

>It must be hard when your the "new kid on the block" and a KNOWN
>QRM'er at the same time!!!!

But at LEAST I didn't have to retest like KC1Zipper Queen. Youy
couldn't pass the Advanced, but still have an advanced call sign. Looks
like Riley might have to get on that one.
Known QRMer? Hardly in the leagues with the Stumpjumpers/Barfies
but you sure are concerned wioth me, are you in love with me?
Sorry, rump-ranger, I guess you'll have to get back under Big Al's desk.

> Why don't you write some more postings showing us what a "RADIO
>VIRGIN" you really are, fatboy.

Oh? I've been a swl SINCE 1965, and served in the communications sector
in the Air Force. I'm still waiting for proof that I'm obese. Or don't
you want to prevent this readers from knowing what a liar you are?

> You have REALLY exposed what a IDIOT you are this time..

If what i said was so "idiotic," what does your three spamming
responses to them say about you?

>...Don't make
>comments on the present IF YOU DON'T KNOW YOUR PAST!!!!

I'll make any comments I damn well please.
I know my past, it sounds like you're the one that is mentally
handicapped. For instsnce, don't blame me because you don't know who
your father is, and the fact that you prefer men over women. Is that
why you lost your daughter? After she realized Dave the fag liked
pumping rectums, she committed suicide?

> Long live KT4TR & K3QAM,
>
>
> PITBULL WITH AIDS

I've only been licensed for about 2 years, dumbass. I don't claim to be
a long-time ham.
But let's talk about you. What clueless, computer illiterate spams the
newsgroup with similar messages? Looks like the powers that be at
deja.com need to be made aware of your spamming of this newsgroup.
Replying to -your-posts is a colossal waste of time.

I know next to nothing about radio, so please suffer
this listener level question. There are two FM stations
in my region that transmit identical content. Station
A is 26 miles away with a 85 kW transmitter. Station
B is 6 miles away with a 800W transmitter. Which
station will theoretically register a stronger signal on my cheap
generic transistor radio? Is there a general equation
for this?

Assume their frequencies are fairly close and that
I live in western North Carolina -- the topography is
some parts hilly, some parts mountainous.

Dad, W9EHS, recently passed away and knew Jim. I'd like to talk with
Jim to see what he knew about the keyer Dad used in the 40's. None of the
obvious avenues yielded Jims address or phone.
Only loosely related - anyone familiar with the
Woodruff/Halligan/Ricks story in the 60's. I have some letters and am
simply curious to hear any other angles of the story.

If you have a _solid_ lead for Jim, please email. I'll be glad to
honor Jim's request for privacy if he wishes, but would at least like to
know definitively if he would care to talk.

73, Steve Noskowicz K9DCI@arrl.net

The QRZ email address is stale
QRZ says he lives in Seattle. No phone listing there.
There is no phone listing in Cobden.
The ARRL database doesn't have any info, per the Central ARRL mgr.
The Central ARRL mgr says he saw Jim at last Dayton.
His highshool friend, W9PPH, hase not kept in touch.
Others have said they heard Jim on 7040 up until a few years ago.
I haven't yet tried calling all the Ricks that turn up from a web search
and am hoping to avoid it.

--
I know everything, except how to be humble...a.a..and... how to stop
e-spam. Sorry 'bout the address munge, but it has reduced much now.
Use snoskow1 at server email here in mot in the com domain.

SB DX @ WW $OPDX.439
Ohio/Penn DX Bulletin No. 439

The Ohio/Penn DX PacketCluster
DX Bulletin No. 439
BID: $OPDX.439
December 13, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2WE, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, W4VHF, KH6BZF, N6RT, W7TSQ, K8WK, K8YSE, N0JK, DJ5AV & DX News Letter, ES2NA, I2YSB, LU3FP, LU4FPZ, OH1EH, OH2BR, OH4MFA, ON4ATW, ON4UN and SM0BFJ for the following DX information.

IT IS WITH GREAT SORROW TO REPORT..... The DX Community learned this week that Charles J. Harris, WB2CHO/VP2ML, (known by many as Chod) became a "Silent Key" (SK) on December 8th. In Santa Rosa, California, the 50 year old Chod died of complications from a severe heart attack he had suffered in early November. Many will remember Chod for his active roles in the DX Communty as DX columnist for "CQ Magazine", the orginal editor of the "DX Magazine" and "The DX Bulletin" and an ARRL HQ staffer. He was also an active DXer from exotic places. Mostly, the DX Community will miss Chod's presence at the "Dayton HamVentions" DX social gatherings. OPDX and its readers would like to send out our deepest sympathy to Chod's family. Chod Harris, a DX icon, will be surely missed..... OPDX InterNet Subscribers will receive the special ARRL bulletin about Chod Harris as an additional bulletin.....

OPDX has also learned that Tiit, ES7RE, President of ERAU, became a "Silent Key" (SK) on December 7th in a car accident in Finland. We extend Tiit's wife and the children our deepest sympathy and strength needed to get through the coming days and weeks. Members of ERAU and the Board of Directors state that "Tiit will always stay in our memories as a true gentleman and a great friend!"

PROPAGATION GURU KH6BZF STATES "The ARRL 10-MTR Contest should be better than last year." Lee, KH6BZF, reports that the solar flux index (SFI) should climb to near 200. Expect High Normal (HN) to Above Normal (AN) conditions to exist the 11th and 12th. On Sunday, the band is expected to be better than the day before.

3W, VIETNAM. Steve, K2WE (aka 3W6WE & XU2WE), reports that he will return here in Febuary or March, and he has permission from Hau, 3W6LI, to operate from his farm in Vung Tau, about 55 miles from Saigon right on the South China sea. He will make every attempt to operate on 40, 80 and even 160 meters if he can get the license.

7S, SWEDEN. Rune, SM6COP, has obtained the Swedish contest callsign 7S5Q and Tord, SM3EVR, has received 7S3E (which will probably be used in the ARRL 10 Meter Contest. As reported earlier, the prefixes 8S, SM, SK and SL are being issued with one letter suffixes for the SM operators for contest activity.

8P, BARBADOS. Jon/N0JK and his father (William/W0FN) will be here until December 14th from the 8P9Z station. There will be a special emphasis on 6 meters using 100 watts into a 3 element yagi. They also plan to operate in the ARRL 10 Meter Contest. Callsigns are pending as this bulletin was being written.

9N, NEPAL (Possibly, XW - LAOS). By the time you read this, Charlie, K4VUD, should be in Kathmandu and will be active as 9N7DU for 30 days. He stated this week that he was going to try to be active in the ARRL 10 Meter Contest. The "DX News Letter" reports that Charlie may also make a one week trip to Laos.

9N7, NEPAL. "The 59(9) DXReport" reports that Lawrence, W8NRB, has been active as 9N7RB since mid-September, mainly on 20-10 meters SSB. He will be there for some time. QSL via W8NRB at the W8 Bureau.

9U, BURUNDI. QSL Manager Leif, SM0BFJ, informs OPDX that Gus, 9U5D, will go QRT in the morning of December 11th. He will be on vacation at home in Sweden for a month (signing SM5DIC). He will return to Burundi on the 10th of January for another 3 months assignment.

HI, DOMINICAN REPUBLIC. Steve, K8WK, reports that he will be here from around December 23rd through January 2nd. He plans to operate as HI8/K8WK. Steve was assured a license by the communications authorities and that the license would be in the mail and a copy will be kept there "just in case." He states that it has taken him since June (1999) to obtain this license! Steve will operate mostly CW and mostly on the WARC bands, conditions permitting. He adds, "Please be patient with my poor CW and it will be the first time I've ever been on the other side of a pile....." His equipment will be an ICOM 706MKIIG (running 100 watts) and a Gap Titan all band vertical. Steve will bring enough wire for 160 meters but doesn't know if he will have the support to allow use of the wire. He will try and operate as much as he can outside of his family responsibilities as he is on a vacation. Steve will be staying at a resort in Samana Pens (NE part of DR). He is willing to make skeds for the needy. His E-mail address is: litwins@badsector.com QSL to his home callsign at:
Steve Litwins, 2398 Woodbine Dr., Crestview, FL 32536 USA (USA needs return postage and all others need 1 IRC or Green Stamp.

LT5, ARGENTINA. Look for LT5F to be active in the ARRL 10 Meter Contest as a mix mode (CW/SSB) on High Power. Operators will be Seba/LU4FPZ,

Ariel/LU6FUQ and Bob/LU2FA. QSL contacts for the CQWW CW and the ARRL 10 meters Contests via LU4FPZ, 1 de Mayo 2128, CP 2000, ROSARIO-ARGENTINA.

Look for Tony/LU2FFD and Hernan/LU3FP to be active from LU4FM (Radio Club Rosario) during the ARRL 10 Meter Contest on both modes SSB/CW. QSL LU4FM to: BOX 263, (2000) Rosario Argentina.

MORE YEAR 2000 SPECIAL EVENTS STATIONS......
Members of the Carolina DX and Roswell [NC] DX Associations will be on the air during the month of January using the callsign WY2OOO. This operation will begin at 0000z, January 1st (2000). All bands will be activated from 160-2 meters. QSL Manager for the WY2OOO operation is via K4MQG. SASEs are requested; all cards received through the Bureau will answered.

The Old Barney Amateur Radio Club will be operating special event station W1K from December 19th through January 2nd (2000) to celebrate the "END OF THE MILLENIUM!" Activity will be on all bands CW/SSB. A special QSL will be available via (SASE appreciated): Bob Schenck, N2OO, P.O. Box 345, Tuckerton, NJ 08087, USA. For a special certificate in addition to a QSL card, include a 9x12 SAE with appropriate return postage or IRCs.

OH0, ALAND ISLAND. Ari, OH1EH, reports to look for OH0Z to be on the air during the ARRL 10m Contest as a Multi/Single, CW/SSB. There will also be some activity on 160 meters CW around 1832-1835 kHz between 0400-0700z both on Saturday and Sunday. QSLs via OH1EH: Ari Korhonen, Kreetalank. 9 as 1, FIN29200 Harjavalta, FINLAND.

PACIFIC TOUR (A3, FO, FW, KH6, ZK1). OPDX has been informed that Adriano, IK2GNW, will be leaving for a six week trip in the Pacific in the new year. He will start his operations on January 20, 2000, from French Polynesia. The first week he will be in French Polynesia signing FO0PRE (still unconfirmed). The second week he will be active from Austral Islands signing FO0PRE (also unconfirmed). Adriano will travel to the North Cook Islands during his third week and use the callsign ZK1NW. Look for Adriano to sign A35NW from the Tonga Islands during the fouth week. During the fifth week he will operate from Wallis & Futuna Islands signing FW/IK2GNW. To end his Pacific tour, he will sign KH6/IK2GNW from Hawaii during his last week. The exact dates will depend on the local flights. He will be active on all bands CW/SSB/RTTY. QSL via I2YSB by the bureau or direct to: Silvano Borsa, viale Capettini 1, 27036 MORTARA(PV), ITALY. For more complete details, check out the Web site at: http://digilander.iol.it/i2ysb

PY0, FERNANDO DE NORONHA. Iwao/PY7FT will visit the island again with his friend Nori/JA1WSK beginning December 21st and operate until December 28th as PY0FT. Nori is an expert RTTY operator and he will concentrate his activity on that mode (this includes PSK31). Look for him on 14084, 21084 and 28084 kHz. Iwao will operate SSB as well as SSTV. Look for Iwao on the higher frequencies, but he will try the low frequencies. QSL via JA1ELY.

QSL INFO AND NEWS.......
Jukka, OH4MFA, was operating from Thailand (HS) with the callsign HS0/OH4MFA for several days during his holiday between November 10-26th. He logged 571 QSOs on 40, 20, 15 and 10 meters, mostly on CW. QSL info for this operation is via OH4MFA and bureau cards are preferred. Jukka will be going back home to Finland, he states, probably in January 2000. So QSL cards will not be answered before that time. Jukka states, "Many thanks to R.A.S.T. and especially HS0AC station managers Ray, HS0/G3NOM and Winit/HS1CKC for the possibility to operate from HS0AC clubstation. It was also pleasure to operate in the CQWW CW contest from the HS0AC M/S team!"

Bob, W7TSQ, QSL Manager for Wis, YB0AZ, reports/advises that the best way to get a QSL is via W7TSQ. Bureau cards are all answered by Bob and cards to Wis via the YB bureau just do not make to him, so PLEASE, send any requests for QSLs to W7TSQ. Bob states that he does answer bureau cards, though the quickest way is SAE plus postage! Repeating, Wis requests NO BUREAU cards to YB bureau.

Doug, N6RT, reports that the following new/updated logs are now available at: http://dx.qsl.net/logs
DS5DNO (thru 11/14/99) NH0E (thru 11/28/99)
DU1ODX (thru 11/29/99) T32PO (thru 11/30/99)
GD4UOL (thru 11/30/99) VQ9CV (thru 11/26/99)
HL5FUA (thru 12/5/99) WL7M (thru 12/04/99)
ID8/IK8VRH (IOTA EU-144, 08/99) XX9TDX (thru 12/01/99)
KP4AH (thru 11/28/99) YC0LOW (thru 11/27/99)

JD1BIC and JD1BKR are now members of JARL and QSL is OK via bureau but direct QSL routes are listed below:
JD1BIC - Shiro Hazama, 3-7 Taura, Yokosuka, 237-0075 JAPAN
JD1BKR - Katuya Sawada, 43-1 No.2 UsogIgawamura, Ominato, 035-0096 JAPAN

SPECIAL "OT" PREFIX. The Minister of Telecommunications has allowed the Belgian radio amateurs to replace their normal "ON" prefix with "OT" prefix from 2300z December 3, 1999, until 2300z January 5, 2000. This is to celebrate the wedding of HRH Prince Philip and HRH Princess Matilde. QSL cards can be sent to the only IARU affiliated QSL bureau in Belgium at: UBA QSL Bureau, P.O.Box 900, 9000 Ghent Belgium.
Look for Theo, ON4ATW, to be active in the ARRL 10 Meter Contest as OT4ATW. Theo states that all QSOs will be confirmed via the bureau with a special QSL card.

VP6BR PITCAIRN WEB PAGE ACTIVE. Lech/LA7MFA and Jukka/OH2BR have announced that the VP6BR site is now operating at: http://www.qsl.net/oh2br/
The Web has updates/information on the upcoming Janaury 2000 operation. Jukka will be active as VP6BR to celebrate his 40 year long Amateur Radio career. Activity will be on 160-6 meters CW/SSB/RTTY. QSL via OH2BR.

XX9, MACAO. Moto, JK2PNY, will visit here again from December 15-26th. Moto has the license XX9TSS, but this time he will be using XX9SAR instead of his own callsign. Activity will be on 40-6 meters, SSB/CW. The special

callsign XX9SAR will be used by all Macau stations to celebrate the restoration of Macau. For this reason, it is important to copy who is the operator or QSL manager. Moto will send all QSLs automatically to the bureau until August 2000, but if you need a QSL quickly try direct: Motoi Kawatsu, 17-15-205 Nishisugamo 3, Tokyo, 170-0001 JAPAN

YS, EL SALVADOR. The "DX News Letter" reports that Markus, HB9KNA, plans to be active now through January 12th. His callsign is not certain yet. He will only be active on SSB and on 80-6 meters (also the WARC bands). He will use a 2 element quad for 20-10m and verticals for 80/40m. QSL via HB9KNA.

5100. Problems with the Kenwood DRU-3 and the TS870

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-10 00:00:00 UTC
From: Jim <n5jim@arrl.net>
Message-ID: <3851E17A.F5A97EDE@arrl.net>
Source record: 125351
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

I installed the DRU-3 in my TS870 as per
directions in the manual. After installing it, I
was told that my signal was about 15 khz wide. I
took the DRU-3 out, and my signal was back to
normal at about 6 khz wide.
Has anyone else encountered this problem with the
DRU-3 in the TS870 or any other Kenwood radio that
the DRU-3 will go in ?
Any information will be greatly appreciated.

Jim N5JIM

Source record: 125181

Good morning guys, Just getting last things done for the trip to Long Island. I was on 3.945 last night about 9PM, and TR came in to talk to W4SAL. He said he had the distinction of being the only mobeeeeel ever to receive a warning letter from Riley Hollingsworth. Someone said he sounded proud of the fact, and he said yes he was, very much. He said he was in his truck watering his trees, and then I heard a horn blow. He seems very good at blowing his own horn. He described his mobeeel antennae as being 28 feet tall, that folded up when he was moving. Someone made a comment about TR being a farmer on a tractor, and TR immediately became beligerent and made some derogatory comments about the fellows family. He was obviously intoxicated. He said the tower he just sold for $999 cost him 4 grand, plus shipping, and the telerex beam he still has is unequaled by any antennae ever. The "Biggest and the Best" must be a syndrome among stumpjumpers. He was asked how long he had been in ham radio. The reply was 1993. The gentleman said it was amazing that TR could be such an authority in just 6 years. TR then continued with comments about the gentleman's immediate family, as well as ancesters. TR was very proud, obvious by mentioning several times, that he was "givin em hell on 313" from a mobeeel. Someone questioned not only his sanity, but the veracity of being on 313 in a mobile. That brought another tirade about families and ancestors. As you might surmise, TR is quite a few french fries short of a happy meal, but his demeanor is still amaaaazing, when he thinks he has a brand new audience. The man is a legend in his own mind, and I think will implode before too long. We'll see if Riley appreciates TR being, in his own words, proud of being the only receipient of a warning letter from his mobeeel activity. "73" Happy Holidays, I'll be back in the middle of Jan. 2000 Jim

5104. AF2Y's treadmill and advice

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-11 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991211161358.17849.00000056@ng-fs1.aol.com>
Source record: 125183

If anyone out there ever exercises regularly, it's known that treadmilling is BORING as well as extremely tedious. However I find that treadmilling and QSOing is most advantageous since it gets one's mind off aches and sweat while time passes quickly and might induce someone out there to believe that daily exercise is essential to low cholesterol, a superb ratio between LDL/HDL, low blood lipids and strengthening of the cardiac ventricle whose function is to force blood strongly into the aorta. Now you must realize that longevity is really up the fates, or to Mother Nature, or to Mother Goose or to genes or to God..whatever..but it's our job to do everything we can to help ourselves rather than to leave it up to the Brown and Williamson Tobacco Company, Pizza Hut and makers of Ring Dings, Hostess Cupcakes, Oreo Cookies, Baskin Robbins and the Hershey Chocolate Company. It's unfathomable that some clowns on .313 are running to Riley Hollingsworth to report my Flip Trak treadmill. May your Guthy Renkers turn to onions. I mind my own business, call CQ and when someone comes back, the "Queenie Crowd" goes beserk even though I'm nowhere near .313 if that frequency's in use. If it's unused I use it because if we don't use it we'll lose it so use it. For some strange reason, K3QAM, KT4TR, K2SLOP,W1ZZE(Commander Kook) and AB4PW think they have exclusivity on it. No, I will not contest it since Riley's made it plain that he doesn't appreciate conflicts but on the other hand I refuse to be bullied off it. My license grants me that privilege which I gratefully accept but then again if someone has to be jammed and bullied, let it be me instead of the fine folks who man Intercon. And I predict that net will be on long after the aformentioned five creeps are pushing up daisies.

5112. Is ARRL Selling Information on You?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-11 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <11837-3852C8A9-295@storefull-243.iap.bryant.webtv.net>
Source record: 125191

No one these days is surprised when he learns his name is for sale. But add private information, like your buying habits and social interests, and you'd be outraged.

That's just how I felt. Yesterday, after plucking my mail from the mailbox, I noticed one curious piece. Here was a flyer for a telephone service written entirely in Russian, and I don't read Russian. What would lead the advertiser to target me? Bulk mailings are not unusual, but I've never gotten one in a foreign language without translation, let alone in Russian.

Having been in the mailing list business, I knew discovering the chain of information would be dicey at best. Whoever mailed it likely bought a list of those who either knew Russian or were likely to know Russian. Then I remembered.

In the 1980s, as the Soviet Union was crumbling, ham radio communications suddenly opened to third party traffic. In the euphoria that followed, I became involved in East-West detante via ham radio. Much concerning our intiatives was being reported in the United States and in the USSR.

That's when I learned, translations of Soviet ham news were available in English. After enrolling in this service which has many Russian speaking subscribers, I've received this special information to this day. The superb translations are performed by a professional from the U.S. Department of State.

Though I am grateful to ARRL for providing this free of charge--even during times when I haven't been a paid member--I am offended that the League has apparently turned my humanitarian bend into profit without regard for potential consequences.

Doc, good for you. Thanks for the medical detail.

A decade ago, I had broken down my spine to such a degree from jogging that walking hurt. So I languished for years from disrepair, moving ever closer to death's door until discovering a blockbuster of an exercise that doesn't hurt the back: water jogging. In my case, I do it while jiving to a powerful, six speaker, pool stereo.

The Elf Bowling virus is a hoax!

To verify this, an uninfected copy of the elfbowl.exe file should have a size
of 1,130,496 bytes. You can do this by going into Windows Explorer,
right-clicking the file, and clicking on properties.

For more information on this and other virus hoaxes, go to

75 is cold; ours is heated to 90.

You raise an interesting question: Why not swim when I couldn't run? I had been swimming a mile a day besides running. But when my back went and I could no longer run, I lost my motivation to do any exercising. Without runner's high, swimming back and forth became a colossal bore.

When I discovered water jogging, motivation returned. With buoyancy gear, it is similar to the running experience. Add music you love, and interest is sufficiently gripped to develop the disciplined hour a day.

Thanks for your interest. Brave the cold. Keep swimming.

Hi all, have the following for trade:

Motorola GP68 handheld radio. 20ch. 4watt, UHF 430-470MHz.
includes rapid charger, hi-cap battery and aftermarket antenna. datecode is
6/99 so radio and all is only 6 months old! looks new. program instructions
included.

Polaris PA-II Radio Interface Box. Built-in NiCad holds charge for weeks!
includes rib to computer cable, wall charger, and MAXTRAC, etc. programming
cable, new aftermarket cable. RIB is a few yrs. old, works great!

I'm looking for a repeater in the UHF band. 462MHz to be exact. any
interest? Part trade plus cash? Let me know what you have and maybe we can
make a deal. I've got other items of interest as well. I can pick up in the
KY/WV/TN border areas.

Not interested in splitting up or selling either item just yet.
thanks,
Randy

5125. Re: reception quality vs power & distance

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-11 00:00:00 UTC
From: Richard McCollum <rmccoll@radiks.net>
Message-ID: <DUF44.351$dF3.5327@newsfeed.slurp.net>
Source record: 125204

Signal Strength on a flat billiard-table terrain varies by the square of the distance. So station A being 4.3 times the distance would have to run 18.5 times the power (4.3 times 4.3) to be equal to B. As it seems that the relationship is closer to 100 to 1, A should pump in 5 or six times the signal strength. Believe it or not, this might show up as a fairly minor difference on a strength meter built into the receiver.

You don't live on the world's largest billiard table so some oddities of FM may come into play. First off, the power levels you mention are not watts in the AM sense but ERP (effective radiated power) which is what happens after the station puts up its antenna array. Your 85kw station is likely 10kw into a nine-bay or ten-bay array for example. In the old days, FM was horizontally polarized (like TV) but to make car radios work most and bigger stations particularly went to circular polarization so it is likely that A is 85kw both vertical and horizontal so it makes no difference which way your cheap antenna is turned. Your 800 watter may not be so blessed.

Now comes the hard part. On a TV set you have probably seen a 'ghost', a second picture a bit to the right of the main one. That is caused by a TV signal being reflected off of something else and arriving a tad behind the main one. In FM this is called multi-path distortion and is why your FM car radio seems to cut out now and again particularly when you are in a road cut. Depending on when it arrives and how strong the reflection is, it may cut your net signal strength to zero. Where you live, it sounds like MPD may be the order of the day.

If these stations are close in frequency, there are other things that affect reception, not the least of which is that the stronger station can grab the automatic frequency control (kind of a brainless fine tuning circuit) of the receiver and make tuning the weaker difficult or impossible.

Am I getting toward answering the underlying question???

I like your song & will let Dick Clark Productions know about it this
weekend. If we can get a little airplay behind it.....IT'S BOUND TO BE A
#1 HIT!!!! Too bad 'ole "Wolfman Jack" is not with us anymore.

As you may have known, I have had many HIT SONGS written about myself
(WB2OTK). Here's a list of them & the year they went "GOLD".

1. "PORKBUTT SONG" 1997
2. "TALKIN ON THE RADIO ALL DAY LONG" 1998
3. "CALL ME MR. QRM" 1995
4. "I WILL GET A JOB TOMORROW" 1993

As of late, my #1 HIT SONG has been "MR. HOLLINGSWORTH TOOK ME OFF THE
AIR".

"> Do FM wireless mikes interfere with either cellphones or 49 MHz intercoms?

One intercom was at the back of the audience stationed close to the sound
console, where I assume the base units were, but the intercom was on
push-to-talk, not VOX, and there didn't seem to be a correlation between
Tx'ing and the buzzes. Other other intercoms were scattered in the rafters
manning the spotlights, about 50 feet and more from the base units. The
mikes themselves were at the front of the pews and perhaps 75 feet from
the base units and all intercoms.

John,

I agree with you almost completely. Code should not be a prerequisite
to access to HF bands.

However, the ITU currently requires it. The FCC is not permitted by the
ITU to remove Code restrictions. Each license applicant mut demontrate
a knowledge of code before having access to the HF bands.

What is possible, is that the 5 WPM test becomes the only code test.
I.e., You take 5 WPM code test and all of the theory and you have the
Amateur Extra priveledges.

Until the next ITU conference, where most likely the code requirement
willbe removed entirely, we will have to deal with the facts: no code
test, no HF.

There has been some discussion about "FRED ROLL", NU5M and his repeating the same thing over and over in his transmissions on the amateur bands.

You must remember that Fred is the most intelligent of the "Goodfellows" amateur radio qrming group. This is a group that includes AF2Y the nasty Dr Hate, the bootlegger Graham Dyer, VA3GJB, AKA VE3NSF, a call he bootlegged for years, PORKBUTT, Rich Whiten, WB2OTK, the Easley S.C. gasbag who cancelled his license before being kicked off the air. and a multitude of other social misfits, bullys, bums and prime offenders. OH yes, let us not forget N1GJT, Gerry the wanna be "Hells Angel", who is lost with out his "PORKBUTT. to suck up to.

Which leaves FRED ROLL, sub moron, the brainest of the "GOODFELLOWS". which is not
saying a lot.

They should all

It's not a law you blithering idiot, he's trying to show you that if anyone ever bothered to look into your past during a job interview they would have lot's of good information to judge your character, and no it has nothing to do with discrimination.

I wouldn't be too concerned however, I'm sure your Chief of Communications position at BARF pays well enough that you should never have to consider leaving.

Here's a revision to my song. I like these lyrics a bit better.

SCUMBAG AF2Y (sung to the tune of "Bye Bye Miss American Pie"):

Bye bye scumbag AF2Y

QRMed too many up on 20 and you caught Riley's eye

That Gettysburg goy sent the Jew a reply

Saying "kiss your ham license goodbye"

Good riddance scumbag AF2Y.

#1 - Ellsworth Bunker, Arnie8391 and Whataguy2597 they all AF2Y. He such a newbie he cant cover his tracks worth diddley squat. His new hobby inventing ng persona to praise him and zap his enemies. Next thing he do is start fights with his alternate personalities. Least he aint being too secretive about it.

#2 - Dr. Hate's license aint in jeopardy one bit. He still playing the wounded innocent act. Riley didnt say anything like what AF2Y is trying to put over. Suggest you all read Riley's letter to Dr. Hate. It dont mean nothing more than what it say.

#3 - AF2Y would not send in his license for cancellation if there was a million dollar reward for sending it. He would sooner stuff Daisy in a mayflower packing crate and send her to Gettysburg. Do he think anyone going to believe he will send in his license?

#4 - His big suck-up letters are already written. He is either polishing them or they in the mail. Hope Riley is smart enough to announce when he gets the suck-up letter so we can all laugh at Dr. Hate's lies.

#5 - Whatever else them letters say they will definitely blame KV4FZ for everything. There going to be something in them about antisemites and and something more about the BARF. He might even put in a few words of suck-up praise for Intercon. No matter what he going to say a major conspiracy was out to get him. No doubt the Nazis is plotting against him. Then out come the Jew trump card.

#6 - When he get confronted about all this lying AF2Y going to lie some more and say he intended to do everything he originally said. Then he got so mad at everyone for picking on him that he had to stand up for his rights. He didnt want to write them suck-up letters. We forced him to do it.

#7 - The year 2000 won't start on 14.313 without AF2Y. He be there to bring it in. He going to be there when it left. We ought to call it AF2-Y2K cause that how much his jaw going to be ratcheting in year 2000. Ditto for that tread mill mess he transmits.

#8 - Read the first seven points over again. Have a laugh at AF2Y before he plays the Jew card. When he do all this remind him that he the most transparent idiot in ham radio. Now he using his bogus

identities to harass Lenny during the holy days. What a worm.

My pal, KE4TEW, Jim Dale, one of the finest hams to ever hold a ticket, asked me to post this because a glich with his computer disallows him to post it himself. Since Jimmy is honest, decent and truthful, I take great pride in delivering the goods.

Good morning guys, Just getting last things done for the trip to Long Island. I was on 3.945 last night about 9PM, and TR came in to talk to W4SAL. He said he had the distinction of being the only mobeeeeel ever to receive a warning letter from Riley Hollingsworth. Someone said he sounded proud of the fact, and he said yes he was, very much. He said he was in his truck watering his trees, and then I heard a horn blow. He seems very good at blowing his own horn. He described his mobeeel antennae as being 28 feet tall, that folded up when he was moving. Someone made a comment about TR being a farmer on a tractor, and TR immediately became beligerent and made some derogatory comments about the fellows family. He was obviously intoxicated. He said the tower he just sold for $999 cost him 4 grand, plus shipping, and the telerex beam he still has is unequaled by any antennae ever. The "Biggest and the Best" must be a syndrome among stumpjumpers. He was asked how long he had been in ham radio. The reply was 1993. The gentleman said it was amazing that TR could be such an authority in just 6 years. TR then continued with comments about the gentleman's immediate family, as well as ancesters. TR was very proud, obvious by mentioning several times, that he was "givin em hell on 313" from a mobeeel. Someone questioned not only his sanity, but the veracity of being on 313 in a mobile. That brought another tirade about families and ancestors. As you might surmise, TR is quite a few french fries short of a happy meal, but his demeanor is still amaaaazing, when he thinks he has a brand new audience. The man is a legend in his own mind, and I think will implode before too long. We'll see if Riley appreciates TR being, in his own words, proud of being the only receipient of a warning letter from his mobeeel activity. "73" Happy Holidays, I'll be back in the middle of Jan. 2000 Jim

Reply to post by N7ZZT..(Obviously a minion of Bill Pasternak.)

No..I would not want anything to do with NEWSLINE....

My posts are regarding the outrageous, constant begging for funds by NEWSLINE, which is NEVER DOCUMENTED, NOR EXPLAINED..

For many years, Newsline ran well without Bill's Computer toys!!

As for my position, I also work for a major TV Studio in Hollywood, and have been aware of Mr. Pasternaks bull for a long time..!!!

Again, the costs are MINIMUM, as the Newsline sources are provided for and maintained by VOLUNTEERS around the Country, and the Production of same, with the help of some equipment at KTTV and Mr. Pasternaks home, does not justify the threatening: 'NEWSLINE WILL GO AWAY WITHOUT YOUR HELP'...

BULLSHIT.....NEWSLINE...You will go away, before a cent of my money goes to paying for your ISP and toys..!!!

Yes, a few local phones and answering machines are maintained by Pasternak....but damn..,many of us have a few answering machines and phone lines....It doesn't take us to the poorhouse.....

For all those Hams that wish to 'DONATE' to NEWSLINE....more power to you...(If you fall for that crap.!!!)

I'm not surprised if people get confused if you say 'lema'. I thought
that the correct phonetic was 'lima' (as in Lima, capital of Peru). As
they say in the NE of England, "Yuh hev tuh laarn hoo tuh taak propper"!

Source record: 125211

FYI, the need for the 3950 Opinion page, I believe is over. I think for the most part the hatchet has been buried by both sides, at least for the majority of players (amateurs) that were involved (both groups). There are still a few nusance problems that remain but they don't involve anyone from either group I believe. With possibly one exception The 3950 Opinion page and Page 2 will be removed in just a few days. If anyone is wanting any of the info on there - get it now. To my knowledge the page(s) will stay down. I'm looking forward to 3950 being enjoyable for "everyone". Jammers Beware
Hopefully some of the others (with web pages) will reciprocate.

The page(s) are still coming down but boy is the frequency a damn mess this evening.
A foreigner jamming out west here, doofus in the midwest i think, and two others who knows where. None identified.....YET.
What a shame. Also It's obvious that it's not anyone in either group.

Undecidable from the facts given. Naturally the closer one has that advantage but, since we are dealing with ground wave, terrain can mitigate against proximity. Other hams can give you a treatise on this subject.

yus, now I feel a pratt, (for an old man that's rare), Ta.

Perhaps I should have used the double 'e' < Lee'ma >

The phonetic spelling in the Dictionary is actually Le'ma
(the 'e' has a bar over the top, as in bar BQ)

NEWSLINE 1165

Newsline report number 1165 for release on Friday, December 10th, 1999 to follow in

5-4-3-2-1.

The following is a Q-S-T. The FCC says no to five petitions to change the face of ham radio and Kids Day is on its
way. These stories and more on Newsline report number 1165 coming your way right now!

(Billboard Cart Here)

*****

FCC TO HAM PETITIONS: NO!

The FCC has turned away five petitions for rules changes including the very controversial request by the Central
States VHF Society that would have mandated protection for weak signal spectrum from users of wideband modes
like FM. Rick Lindquist , N1RL, of the ARRL Audio News has the details on this latest FCC action:

Lindquist: "The FCC has turned down five more Amateur Radio-related petitions, including three filed by the ARRL.
The FCC consolidated the dismissals into a single Order, released November 29. Among the five was a petition filed
last spring by the Central States VHF Society. That petition, designated RM-9673, generally sought more restrictive regulation of the modes used by amateurs
in the 6 meter, 2 meter, 1.25 meter and 70 cm bands.

The three ARRL petitions dismissed were RM-9259, filed April 3, 1998, asking for an FCC declaratory ruling to equate observance of voluntary band plans with "good amateur practice"; RM-9115, filed March 12, 1997, seeking to permit RACES participants and others to intercommunicate during emergencies, drills and tests and to expand the time allowed for RACES drills; and RM-9106, filed March 12, 1997, asking the FCC to permit stations in the Territory of American Samoa to transmit on 7.1 to 7.3 MHz as a domestic exception to the International Table of Frequency Allocations.

The FCC also dismissed a petition filed March 19, 1997, by James Cardillo-Lee, KE6VGV, asking for a rule change to permit hams who also are emergency personnel engaged in disaster relief to use the Amateur Service bands while on paid-duty status.

The Central States VHF Society petition, filed May 3, had expressed concern about increasing encroachment into the so-called weak-signal portions of the

bands above 50 MHz by wider-bandwidth modes, such as voice FM and packet. CSVHFS said voluntary band plans had not been successful in limiting the activity.

In turning down the petition, the FCC said that amateurs, including weak-signal adherents, already have been provided segments in the bands at issue that are off-limits to certain types of stations. The FCC reiterated language from another Report and Order that declared it was "unreasonable" to expect to operate in a totally interference-free environment. The Commission also expressed concern that "subdividing amateur service bands on the basis of operating interests would result in a loss of flexibility to accommodate changes in operating trends and emergence of new technologies." The FCC said it agreed with the ARRL's position on the CSVHFS petition that education and the application of existing rules should suffice to minimize interference among various modes.

In dismissing as "unnecessary" the League's request for a declaratory ruling to equate band plan adherence with "good amateur practice," the FCC noted that a basic amateur principle is that "all frequencies are shared, and no frequency will be assigned for the exclusive use any station." The Commission suggested it was reluctant to expand its regulatory role beyond the existing limits on the emission types that may be transmitted in different subbands. The Commission, however, did reiterate existing prohibitions against willful and malicious interference.

The FCC said the requested changes "would have the effect of transforming voluntary band plans into de facto required mandates," something inconsistent with current FCC policy.

In denying the ARRL's petition for changes in the RACES rules, the FCC said the League failed to demonstrate a separate rulemaking was warranted. The FCC noted that it's currently considering "the necessity of separate licenses for RACES stations" in another proceeding.

>I'm Rick Lindquist, N1RL.

With these matters now out of the way, there is a good chance that the F-C-C may turn its efforts to finalizing
the order to restructure the overall Amateur Radio service. A few weeks ago the ARRL reported that there could
be a release on this before years end. (FCC, ARRL)

*****

FCC TO POWER COMPANY: FIX THE PROBLEM

The FCC has told the to Pacific Gas and Electric power company that it has an obligation to fix equipment problems
that cause harmful radio interference, even if the interference is only to ham radio operators.

The case involved long-standing complaints by several northern California amateurs to Pacific Gas and Electric
Company regarding severe power line noise on the ham bands. On November 22, the FCC's Consumer Center wrote
company Vice President James K. Randolph, requesting the company act to correct the problem within what the F
C-C termed as a reasonable time.

Under Part 15 of the F-C-C's rules, utility companies and others that fall under its provisions are obliged to not
cause harmful interference to licensed services . They must also cease operating a device that's causing harmful
interference upon notification from the F-C-C.

The FCC said that its letter was intended as a reminder that the unresolved interference problem may be a
violation of its rules. Also that it has the power to levee a fine each time a rule is broken or ignored. (FCC, ARRL)

*****

FCC EXPLAINS WARNING ISSUED TO AF2Y

A follow-up to last weeks story concerning an FCC warning letter issued to Charles Schwartzbard, AF2Y, of Clifton
New Jersey. As reported, in it's November 2 nd letter to Schwartzbard, the FCC alleged that AF2Y had apparently
been operating his station in a manner that causes it to emit an unusually wide signal, one that is over-power, or
both. The letter also cautioned Schwartzbard that airing personal conflicts with other licensees on the Amateur
bands, or slander or deliberate interference to other licensees would result in the loss of his Amateur license.

To our knowledge, telling a ham that he could not air a grievance or transmit language that could potentially get
him sued for slander was a first. The reasoning became quite clear when the FCC's Riley Hollingsworth, K4ZDH,
explained on the RAIN Enforcement Log that this particular situation required some direct intervention by his office:

Riley Hollingsworth: "The letter also contained a warning concerning airing personal disputes or slander or
arguments with amateurs on the Amateur bands.

This was an extreme case. We had allegations on it for quite a while and we had been watching it.

You can have disputes on Amateur Radio, but in extreme cases where you may be instigating or slandering other
Amateurs, of coarse we do not tolerate it."

By the way, for the latest on ham radio enforcement action, direct from Riley Hollingsworth K4ZDH, take your
RealAudio equipped Internet browser over to www dot rainreport dot com. Click on the FCC Enforcement Log and
sit back and listen. (FCC, RAIN)

UK HAMS SAY YES TO INTERNET REPEATER LINKING

Hams in the United Kingdom are quickly saying yes to a British telecommunications agency idea to permit Amateur
service repeaters to be linked via the Internet. Jeramy Boot, G4NJH in Nottingham in the U-K has been following
the story and has the latest:

Boot: "Further to the report of the 7th of November concerning experimental linking of Amateur Radio to the
Internet.

The Committee of the U.K. F.M. Group - Western held a meeting on the 8th of November at which they agreed to
cooperate with such a project. The group operates eighteen repeaters in the North-West of England. It is
prepared to make its 433 MHz GB3MT voice and data repeater on Winter Hill available for such experiments subject
to Radiocommunications Authority and RSGB agreement.

>Jeramy Boot, G4NJH.

The Radio Society of Great Britain's Repeater Management Committee has also been following the recent proposal.
It says that it supports and encourages the open-minded attitude of the Radiocommunications Agency provided
that it does not introduce elements of abuse to any aspect of Amateur Radio. The committee also says that this
kind of linking could be a way of increasing activity and making amateur radio accessible to many people who might
not otherwise consider taking up the hobby. (G4NJH, RSGB)

*****

KIDS DAY

Closer to home, the first of two of the most important ham radio operating events of the new millennium takes
place on Saturday January 1, 2000. This will be the first Kids Day of the new century and it is important because
it could easily be the key that assure a crop of new and vibrant young hams will be a part of the hobby for
decades to come. Jean Wolfgang, WB3IOS, is the Educational Activities Coordinator for the American Radio Relay
League:

Wolfgang: "Even if they don't go into radio immediately, you do not know what is going to happen in five ot ten
years. And that is why I think it is so important."

It is easy to take part in Kids Day. All you have to do is open your home and station to one or more of the
children in your area. Invite them in, let them talk on the radio and exchange a Kids Day greeting.

Wolfing: "The suggested exchange is the child's name, age, location and what their favorite color is."

According to reports of past Kids Day operating events, a significant number of youngsters have become
interested in ham radio and some have even gone on to get licensed. And that's really what Kids Day is all about.

So from 1800 to 2400 U-T-C on January 1st of 2000, invite a local kid to share ham radio with you. You will both
be glad that you did.

For more information on Kids Day 2000 please see page 48 of the December 1999 issue of Q-S-T magazine. (ARRL)

*****

90th BIRTHDAY FOR FAMOUS RADIO CLUB

An institution in the world of wireless celebrated a monumental event on Monday, November, 29th. That's when
the Radio Club of America, an organization for professionals in the radio communications industry celebrated its
90th birthday.

Back in 1909, when it was founded, radio communications was very much in its infancy. The league of pioneers of
radio technology who belonged to the club over the years set many milestones in broadcasting, mobile radio and
other industry sectors.

The Radio Club of America has seen the huge explosion in radio broadcasting, then television, through to today's
enormous worldwide use of the mobile telephone. While not an Amateur Radio club per-se, many well known hams
can be found listed in its prestigious roster of members. (RCA, Q-News)

*****

FCC CREATES NEWS MEDICAL IMPLANT SERVICE

From the FCC comes word that it has established a new Medical Implant Communications Service or M-I-C-S
operating in the 402 to 405 MHz band. In rendering its decision, the FCC noted that operation of today's medical
implant devices requires that they be magnetically coupled to external programmers or readers. This requires very
close spacing between the implanted device in the patient and external control equipment, often requiring body
contact and very slow data rates that can take up to fifteen minutes for a single data transfer.

The Commission says that by creating the new Medical Implant Communications Service will permit the use of
ultra-low power radio-controlled devices such as cardiac pacemakers and defibrillators. This says the FCC will
save countless lives.

For more information go to the web at
http://www.fcc.gov/Daily_Releases/Daily_Business/1999/db991130/fcc99363.txt (CGC Communicator, FCC)

*****

SHERYL SEGAL DEPARTS AS FCC WEBMASTER

Still with FCC news, word that Sheryl Segal has left her post as FCC Webmaster, but will continue to work on
document management for the Commission. Under Segal's guidance the FCC web program has grown into a vibrant
and essential government resource that directly serves the citizens of the United States. (CGC Communicator)

DX'ER CHOD HARRIS VP2ML - SK

I'm Bill Pasternak , WA6ITF with word that the changing of the guard in ham radio continues as a name synonimous
with the world of D-Xing has fallen silent. This as the worlwide ham radio community mourns the loss of CQ
magazine DX columnist Charles J. Harris, WB2CHO.

An active contester and DXer, Harris had operated from a number of
exotic locations. It was during that time he obtained his distinctive second call of VP2ML. C-Q Editor Rich
Moseson, W2VU, had these thoughts to share about Harris' passing:

"All of us at CQ will miss Chod. He was our DX Editor for ten years. On one level, he lived a life that many hams
only dream about -- operating from exotic places like Christmas Island, the Galapagos, and of course, Monserrat,
where he lived part-time and got his VP2ML callsign. Chod devoted much of his life to ham radio, but it was a life
that was all too short. He was only 50 years old when he died this week.

Chod packed a lot of life into those 50 years, though. He started out as a schoolteacher, then went to work for
the ARRL when his doctor told him he needed a job with regular hours and less stress. At least he got the regular
hours. When he left the League in the late 1970s, Chod did a lot of operating from different places and got
involved with a variety of publishing enterprises, including a woodworking magazine, the weekly "DX Bulletin," and
"DX" magazine, which he started in 1989, then sold a few years ago.

Chod's dedication to DXing was obvious in the location of his home on a California hilltop with a good takeoff angle
over the Pacific, and even in the name of his dog -- which is Dog X-Ray."

-----.

Harris passed away on December 8th of complications resulting from a severe heart attack he'd suffered in
November. In lieu of flowers, the family has asked that donations be made to the American Heart Association or to
the Northern California DX Foundation.

I', Bill Pasternak, WA6ITF, in Los Angeles for Newsline. Tony. (CQ Magazine, ARRL, others)

*****

ANTARCTICA SATELLITE HAM RADIO EXPEDITION

Ron Ross, KE6JAB, is again on a trip to a mountain area in Dronning Maud Land, Antarctica that was scheduled to
begin this past week. Spacenews reports that this will across-country skiing and camping trip, pulling sledges from
mountain to mountain.

Similar to his last trip, Ron has with him an Amateur Satellite Radio Station. He will use it to transmit text messages and images from Antarctica back to a website in San Francisco, California. The messages will be distributed through a mailing list, and images will be posted on his website.

Ron will try to send a travel report and a new image each day. He expects his mini ham radio satellite expedition to last the entire month of December. More information about the trip is available at www.thistle.org.
(Spacenews)

*****

SA 40 METER INTRUDER WATCH

South African hams are on the lookout for pirate broadcasters and other stations that violate the Amateur Radio bands. Newsline's Mert Garlick, N6AWE, explains Intruder Four Zero:

The South African Radio League in conjunction with the International Amateur Radio Union Monitoring System is embarking on a new forty meter band monitoring program called Intruder Four Zero. Listeners are asked to log non amateur stations that are intruding between 7000 and 7100 Khz and note any information that they can.

Project Intruder Four Zero runs through the end of the year. Although the section 7 point 000 to 7 point 050 MHz is a shared band in some nations, the South African Radio League would appreciate reports of non-amateur operation. Please send your reports to Glen Duffy ZR5GD by e-mail to iarums@futurenet.co.za

-----

Again, Intruder Four Zero reports go to Glen Duffy ZR5GD by e-mail to iarums@futurenet.co.za. (SARL)

**

CANADIAN ARES MANUALS NOW IN FRENCH

Radio Amateurs of Canada has announced that two publications relating to the Canadian Amateur Radio Emergency Service are now available in French on the R-A-C web site. Both may be downloaded and read or printed at no charge and viewed using Adobe Acrobat Reader. (RAC)

*****

NEWS FROM 4X

The Israel Amateur Radio Club will remain the Israel Amateur Radio Club. Last year, some Israeli hams began a

campaign to find what they considered to be a new name that they felt was more fitting as we approach the 21St.
century. Some hams wanted the name of the club to change to Operators of Radio and Communication. The
matter was brought to a vote at the I-A-R-C executive council, where it was summarily defeated.

Also from Israel comes word that the Jewish National Fund in charge of forestation and other land improvement has
agreed to sponsor the clubs special operation for the year 2000. Their contribution will be the printing of Q-S-L
cards and certificates for the event. (Hagal International)

*****

DX

In D-X, word that Paul Blumhardt, K5RT, has been appointed CQ Worked All Zones Award Manager, effective
immediately, by Dick Ross, K2MGA. Ross is President of CQ Communications, Inc. and Publisher of CQ magazine.
Blumhardt succeeds Jim Dionne, K1MEM, who passed away in October. (CQ)

On the air, news that the 9M6AAC Hillview Gardens Resort station in Borneo is now active. For current updates
and photos, check the web page at www.qsl.net /n-2-o-o slash borneo. (DX Digest)

Also PA3GIO, reports from the Isle of Jersey that he has to use an M-J prefix instead of the G-J as first reported.
Look for him to be active as MJ/PA3GIO from December 11th to the 16th. (OPDX)

And several new D-X beacon stations make the news this week. Again Jeramy Boot, G4NJH:

Boot: "From Martin Harrison, the Region 1 High Frequency Coordinator, comes the following beacon news.

The latest beacon in the worldwide HF beacon network, RR9O, has been heard in the UK with good signals. This
beacon is located at Novosibirsk in Siberia and, like the other beacons in the network, transmits for ten seconds in
sequence on 14.10, 18.11, 21.15, 24.93 and 28.20MHz with four levels of power - 100 watts down to 100
milliwatts. The final station to complete the 18-station network, is expected on air from Hong Kong shortly.

There's also another new 10- beacon, A41RB, now in operation from Oman. It is run by the Royal Omani Amateur
Radio Society, transmits on 28.194 MHz with 10 watts to a Cushcraft AR-10 antenna, and is sited at locator
LL93FO. The power will subsequently be increased to 100 watts" (G4NJH)

More D-X news, next week.

*****

TRW SWAPMEET - ON THE MOVE CHRISTMAS DAY

And finally, guess whats happening in Southern California on Christmas Day? Yes, the kids will all be up early to
open the gifts that Santa left under the tree, but one member of the household may be missing. That's because a
very popular event will be taking place on that morning. We are talking about the famed TRW Ham Radio Swap
Meet. It takes place the last Saturday of every month and according to the T-R-W Radio Clubs' Wendell K. Young,
KE6ASC, even a change of venue and Santa Claus himself can't close down this event:

Young: "Actually the property we hold the swapmeet on changed hands in November. We did get some leeway
from the City of Manhattan Beach to hold the swapmeet there in November, but we are moving to our new location
in December.

The [swapmeet happens the last Saturday of the month and the] last Saturday of the moth happens to be
Christmas morning. we are [however] going ahead. Come rain or shine -- or holidays -- we hold it in the last
Saturday of the month."

If you are one of the tens of thousands who will be in the Los Angeles area on Christmas Day, and want to do
something completely different, then the TRW Amateur Radio Club has an invitation for you. Wendell Young,
KE6ASC, says to drop by. Its in the suburb of Redondo Beach only a short drive South from Los Angeles
International Airport:

Young: "Head south on the 405 Freeway, get off on the Rosecrans offramp heading West. Continue westbound
until you get to Aviation which is the stoplight with the train-bridge overpass. So left which is southbound to
Spacepark Drive which is one traffic light south of Marine."

The monthly TRW Swap-Meet began in 1974 hand has become one of the nations best known monthly ham radio
bargain finding events. And if you do decide to show up on Christmas Day, you can still make it home in time for
turkey and all the fixings. Wendell says that the meet starts at about 7 AM and is over around 11:30 AM Pacific
Standard Time. (Newsline)

With thanks to the A-R-R-L, the F-C-C, the Hudson Loop, Spacenews, the Radio Society of Great Britain, the T-R
W Amateur Radio Club and Australia's Q-News, thats all from the Amateur Radio Newsline. Our web page is at www
dot a r newsline dot org and our e-mail address is newsline at a r newsline dot org.

Before we go, we have an update on Newslines financial condition. According to Andy Jarema, N-6-T-C-Q, who is
our Support Fund Administer, Newsline has only received enough financial support to keep the service going though
the end of December. In other words, the bills from November have finally been paid, but now money has to be
raised to keep from loosing the phones and e-mail service in as we pass into the new millennium.

The address is the Newsline Support Fund, Post Office Box 660937, Aracdia California. The Zipcode is 9-1-0-6-6.

For now, with Bill Pasternak W-A-6-I-T-F at our editors desk, I'm _____ saying 73 and we thank you for
listening. Newsline is copyright 1999 and 2000 -- and all rights are reserved.

Name here is Sean

I am looking for software and the RIB (Radio Interface Box) or cable for the Kenwood TK-230 VHF HT Xcvr

It is a land-mobile type radio but it does fine on the 2-meter band with the optional 138-150 MHz rubber duck antenna.

Please contact me if you happen to come across these components.

Any Radio Shop Technician who may be reading this ==Please let me know if you have any of the software or the RIB / Interface cable for the TK230.

Tnx
Sean , Kd4Adv

5175. Supreme Court's opinion on What is obscene speech?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-12 00:00:00 UTC
From: KC8JBO <kc8jbo@my-deja.com>
Message-ID: <830j0t$iq9$1@nnrp1.deja.com>
Source record: 125227

There's been a lot of discussion on 20 meters on what constitutes Obscene speech. The three prong test was established in Miller vs. California (1973) by the U.S. Supreme Court.
Miller v. California, 413 U. S. 15 (1973): in Miller, this Court reviewed a criminal conviction against a commercial vendor who mailed brochures containing pictures of sexually explicit activities to individuals who had not requested such materials. Id., at 18. Having struggled for some time to establish a definition of obscenity, we set forth in Miller the test for obscenity that controls to this day:
"(a) whether the average person, applying contemporary community standards would find that the work, taken as a whole, appeals to the prurient interest; (b) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law; and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value."

This is the basis the FCC uses for that clasification, i.m.h.o.

Source record: 125228

KC8JBO, Great legal coverage on the principle of obscenity as defined by the U.S. Supreme Court. However for us hams, there is another thorny legal question that intervenes.

In a 1980s Washington Interview, I did on tape, Robert Mcnamara, Chief of the Private Radio Bureau, FCC, and Tom Fitzbibbon, Counsel, suggested that Part 97 might imbue the FCC with a greater legal power to regulate speech on ham radio. As Riley Hollingsworth has raised recently, they suggested Scope and Purpose might proscribe the First Amendment beyond the obscenity test In MILLER that you have so eloquently laid down.

Are these respected officials arrogating more power than the Constitution entitles them, or is there some merit that ham radio is to be considered inter alia (that is, as among other things, distinct and apart from purely the First Amendment)?

Source record: 125231

Good point of contention, "Mr. Gates." A number of the subscribers on this list of Russian to English translation do indeed have some knowledge of Russian because of the nature of the material mailed. For example, one of Russian decent is a ham who works for the U.N and speaks Russian. The State Department translator, of course, is fluent in Russian; and other State Department subscribers speak Russian. Naturally, Russian emigrees on the list speak their own language. The actual list of subscribers has been included at times in the mailings, and there is no question that it is heavily loaded with those you would expect to speak Russian.

Why would they subscribe? Heavily footnoted, the translations carried an intimate understanding of what was going on over there, some of which was not generally known. So, even if folks know the language, they wouldn't necessarily know all the intracate information the translator imparts.

Please understand, this is no ordinary list but a list primarily of those who were in some way active with detante.

I would not have made this post nor the allegations therein without good cause. There is simply no reason I can think of, other than being a part of that special list, which would cause an advertiser to spend money advertising to me in pure Russian. When was the last time you got a solicitation in pure Russian?

I assure you, News Readers, that if my allegations are denied or any other information surfaces, I will be the first to bring it to you. You see, companies are increasingly selling their data bases with the result that your privacy is arguably violated (the public debate over privacy has yet to gain steam in earnest).

I'll try to translate, nohambull heard someone say something about using the last two letters of your call sign during a pileup or a net check in being illegal so instead of reading about what it really is he decided that licenses would be popped if it were done.

What he failed to recognize was that using the last two letters of your call is perfectly legal as long as you identify with your complete call within 10 minutes, this of course is not the responsibility of the net control but the indidividual stations calling in. Nets of course could take check ins by using the first two letters of you last name, first name, your dogs name or any thing else.

If stations began identifying within 10 minutes, if not recognized by the net after calling in with a two letter ID this practice would end soon. :)

eloquently laid down.

Yeah, Bob, I've read the same thing. I don't see how the FCC could have
the position on speech that they do, but I suppose the government feels
that it can do what's best for the general public. Either way, they
should have to conform to the same ruling that the Supreme Court ruled.
I don't particularly agree with the FCC's position, but hey, I want to
keep my license like everybody else.

>Are these respected officials arrogating more power than the
>Constitution entitles them, or is there some merit that ham radio is to

I think, and this is my opinion, that they are arrogating their power
on this matter, and their "good amateur practice" portion of part 97 is
on the vague side. If they would clarify the speech issue and the good
amateur practice issue, maybe people would know exactly what they can
and cannot say over ham radio. Otherwise, it is a subjective opinion on
what is good amateur practice.

Of all of these, the most likely is the receiver. I suspect that if you get a digitally tuned receiver -- one that puts the frequency on an LED or LCD display rather than a dial-pointer arrangement -- you will have no problem whatsoever. The tuning methods are so different that you don't get the competition for the AFC from strong and neighboring signals.

For not a lot more, it will have short wave as well. If you have a neighbor with one, check it out. Give yourself a Christmas present!

The "unidentified" jammer who conversed with "Doofus" about the various things one can do with male genitalia was none other than W9ART. He tried to disguise his voice, but he didn't try hard enough. I think he was playing the "goofy" music, too. So, chalk one up for the anti-Liberty Net group.

I have heard the "scumbag" and "MFer" jammer up on 14.313, and have no clue as to who he is.

KC8GBO, wow, first time I've had a legal enthusiast weigh in on the subject. Sometimes when you're the only one pounding a legal drum, you think that maybe you're seeing something legally that may not be there, ha, ha.

What, then, is happening is, FCC officials are posturing legitimately with their agency discretion, just waiting to see if the position is challenged by a substantially affected party, i.e. a ham. Most hams are unaware that much of this Constitutional stuff is uncharted, instead believing as law what officials pronounce in ham radio. .

Fellow hams, let's not lose rights through defaulting. Tell the govenment how you interpret your Constitutional rights.

I'm not familiar with that case. Some of the people were wondering on the air what the definition of obscenity was, and some read this newsgroup, so I supplied the info, that's all.

> That's how a radio station in the Pacifica case lost its license -

D.E. Day, I have a GE Master II mobile that has been put in an E case
and has the duplexers, tone board, and Voice Controller all built
inside the case. You can carry it around if you need to. It is
operating on 444.00/449.700 at this time in Little Rock, AR. It puts
out 45 watts or you can turn t down to 5 watts. It has 4 voice message
capability in duplex or can be used as a Simplex Repeater. It has
cellwave duplexers and an NHRC-3/M2 Repeater controller.
It is supposed to be sold but if I do not receive the Money Order for
it this week, they you could buy it if it meets your specifications.
$ 695.00 Plus Shipping. Plug and Play , Ready to go.

Is that so, WIDEASS?

Do you know this is ONLY the SECOND time I have replyed to one of your postings? YOU HAVE REPLYED TO DOZENS OF MINE!!!!

You better get used to the fact that, I OWN YOU BOY. YOU WILL keep on replying to my postings 'cuz I have you UNDER MY THUMB hohohoho.

WHEN I SAY, JUMP.......
YOU SAY "HOW HIGH, MASTER".....

I play you like a fiddle, FATBOY. YOU WILL reply to this posting just like you WILL reply to ALL my postings!!!!!! At least AF2Y & WB2OTK think on their own. YOU ARE MY LITTLE PUPPET.

From now on I WILL tell you when you can:

1. Turn on your computer....
2. QRM on the radio....
3. Try to pay your bills....
4. Feed your FAT face....
5. Watch TV
6. Sleep with your sister....

So fire up the 'ole keyboard, LARDO......SIMON SAYS, "REPLY"!!!!

Barry...you misguided soul..if you transmit on 10m you better have a license that has a code requirement. You "might" be thinking of using a 2m or 440 link to get you on 10m FM. Then the control operator is the owner of the cross over link..not the no-coder keying the 2m ht. In that case you will be legal, but the repeater owner is taking a risk if its a open cross over link. Learn code and run with the big boys.

5209. Patchboard Polly W4FQF kills caged squirrel to "make his day"

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-13 00:00:00 UTC
From: KC8JBO <kc8jbo@my-deja.com>
Message-ID: <833p8j$qt6$1@nnrp1.deja.com>
Source record: 125140

Pathogenic Polly, W4FQF, was on 14.313 today, bragging how he killed a caged squirrel with a ?.25? pistol. I've never heard of a .25, maybe he meant .22.
Then he went on to warn "trespassers" on his delapidated rat-trap in Fisherville, about his so-called "firepower."
The senile old shit is a regular Dirty Harry. I wonder how he would do under return fire. Especially if its' a higher caliber.

Poor pitbull, he hides out under herbie's scroat, in between getting
kicked off of servers.
Now all he can do is post under an alias, because he lacks any scroat
to poist with his call. Kind of like either Tolassi or O'Brien.

The pitbull with aids will be off the air soon, for his activities on
14.313 have caught some official attention.

Update: Beretta does make a couple of .25 calibers, the 950 Jetfire and
the 21 Bobcat. They look awfully small, but I suppose that's all the
peabrained Polly can handle.

I'd rather use a M-16A1.......

Hello All:

I still have some items to go:

ALINCO DX-70TH, HF/6M, Transceiver, near new condition. Comes with EDS-4 (remote cable kit). Radio does have the MARS/CAP modification due to MARS affiliation.
Also have the MFJ-1272BYH TNC adapter for it. $600.00.

ICOM IC-2710H *SOLD*

DENTRON DTR-1200L, HF amplifier, very good condition. Amplifier covers 80, 40, 20 , 15, and 10 meters. Unit has two very new Svetlana 572B tubes (one year old, little use). Full output on all bands (~700W). $400.00.

JPS ANC-4 *SOLD*

KENWOOD AT-230 *SOLD*

If you are interested in any or all items, please, e-mail me directly:
n3yyp@arrl.net

Cheers,

Cliff Owen

You are misinformed Barry, to use the repeaters on 10 meters at 29-29.7,
you must have a general class or above license, unless the repeater is a
crossband repeater with the input coming from a vhf or uhf band.
dont do it, drop the chalupa!

I'm a newbie, and my father-in-law gave me my first 2M Mobile rig (ICOM 255). I've got a 1/4 wave mag. mount for my jeep but it doesn't perform well indoors... so over the holidays I'd like to build my first 2M (probably a vertical dipole type) antenna, so that I can mount it on my roof... to get better reception. It would be nice if I had a program

which would aide in my design of this anettena. Ideally IF I had alot of money, I'd just buy a Ringo Ranger Dual Bander and be done with it...

but I'd like to get the experience of building my own, and save my pennies for a better radio in the future.

> actual radio.

Oh, yes, this is a good idea, in my humble opinion. Something like
a libradio for Unix and a radio.dll for windows. Ideally something
open source, maybe even BSD-licensed, so that Radio manufacturers
could take this code, make a few changes and ship a driver with their radios.

Me, I'd prefer as thin a wrapper as possible, and as simple as
an interface as is possible, probably with caps bits. In the API, though
I think the issues such as what you call in what order, and how things
exactly work need to be defined super tightly, obviously -- you know.

Bill Turner <dialcover@webtv.net> wrote:
>DON'T BELONG. DON'T WANT TO AND HAVE NOT SINCE "INCENTIVE LICENSING".

Incentive licensing has been around almost as long as ham radio itself. The idea of an IL structure was created in 1923. Back then the government developed the Extra First Class amateur license; to be awarded the ticket one had to be licensed for at least two years, take a test similar to the First Class exam of that period, copy 20 wpm, and have a clean record. Extras were then permitted to operate on a band that those with lessor grade licenses were forbidden to use. That band (200-220 meters) had originally been open to all hams.

Moreover, in 1959, the FCC asked hams, via a Notice of Inquiry, what incentives could be tacked on to the Extra Class license.

It was the FCC which first suggested incentive licensing, not the ARRL.

There are some of you who still do not know that I was voted by an independent research organization as having the most effective wire antenna is North America-the homebrewed CLOUDWARMER. I work more stations than most hear! I need nothing commercially manufactured including a tower and due to the overwhelming number of requests for info on it by those working and just hearing me, for the first time I have composed detailed instructions which can be copied and pasted instantly worldwide on the Internet. All you need to do is to request it by e-mail and I'll oblige. Hams no longer have to depend on commercial stuff to compete; I'll put this CLOUDWARMER against anything. I personally beat out ND8V, the late great Mike Guernsey(may he rest in peace) into Europe. I sure miss that guy-anyone know where he's buried? I'd like to put roses on the grave and I get choked up thinking of how he met his end-trampled by an elephant at a circus as they went for the same thrown peanuts. I'd like to continue but the tears in my eyes are making the CRT fogged up which is coincidental since most of you are all fogged up anyway. I'll continue later when I'm more composed.

Which isn't relevant to radio - including ham radio; the Supreme Court held
in Pacifica that the FCC may also ban speech that is merely "indecent" but not
"obscene" from the airwaves.
That's how a radio station in the Pacifica case lost its license - assorted
cusswords.

Hi Rich here,

I have an FT757 GX that is stuck in transmit. The service manual makes little mention of the ptt circuit and I figured I would toss this out here to see if anyone has run into this problem and how it was remedied... Tnx Richy

5234. WTB: UHF repeater, duplexer: 443/448

Hi! Looking for a good used UHF repeater
and duplexer for amateur band: 448MHz out,
443Mhz in. Need about 25W continuous, would
like both ac and dc operation. Looking for model
designed for repeater use--not a kludge.

Please email Dave W1DAY: d-day@ultra.net

Actually "Barbecue" doesn't have a bar over the top,
but every Ham Shack should.

The convention of putting a Bar over the BQ is an evolution of the practice
of branding irons used on the cattle ranches of America.

Snippet from Bookshelf (c) MS
1853, Texas cattleman Samuel A. Maverick, 50, receives an anonymous note
telling him to look after his strays on the Matagorda Peninsula or risk
losing them. Maverick accepted 400 head of cattle in payment of a debt in
1845 and has never bothered to brand the animals on his 385,000-acre ranch,
but he sends down a party of cowhands who round up about the same number
that were turned loose on the peninsula 6 years ago, sells the cattle to
Toutant Beauregard of New Orleans, and retires from ranching. The word
"maverick" will become a generic name for unbranded cattle and for political
or intellectual independents who do not go along with their associates.

Everything is hooked up, computer to Kentronics TNC 1200, TNC to 2 meter Yaesu, it's keying up and sending a signal. But it cannot receive and decode the audio--Once, during a particularly busy period of monitoring a packet BBS, I found some random letters on the terminal when I came back in 1/2 hour. It's very frustrating, what is wrong? Hams, please help me. N1GKB, thanks.

I applaud your decision, Tender Timmy. But I just can't figure out what has prompted this extreme turn around. I noticed Vic was trying to call you on the Liberty Net Sat. evening. Has some kind of a "cease fire" taken place? Or have most of you now figured out that your opposing opinions have ALWAYS been welcome on the Liberty Net, and that the only opinion NOT welcome are those of David Castle and Arthur Viser because of their past behavior on and towards the net??

This thread really bothers me, and shows how bass-ackwards we've become as a society. That we now expect a LIFETIME of warranty and service on a little $17.50 product. Yet, on our high-priced major appliances, computers and cars, we EXPECT those to break down. So we shell-out hundreds of dollars on extended warranty contracts!!

Unbelievable. If this was me, I would have simply informed the customer that the warranty had expired, but I would gladly pay for the shipping if he'd like to order another.

If you then want to go to Larson, fine. But you'll also pay a lot more than $17.50!!

(Drew)

5243. Powerline Communication Interference

Source record: 125275

Hello.

A new technology in transmitting data to and from the Internet provider
is emerging. This is called PowerLine Communication - PLC.

The underground power line cables and and indoor wiring is used to
transmit about 1 Mbit/sec of data. This method uses wideband modulation
in the HF spectrum.

Companies like Ascom, Siemens and Norweb are involved. Probably more.

I think a PLC system is operating in Germeny and Sweden.

Does thiscause interference on the HF bands?

How much?

Has this been measured and verified?

Is this method approved by the telecom authorities?

Regards

Agust

Thanks to several who found my goof:

The S 303 was a solid state rcvr. This LMO is tube type. It will work in the SB 401 and possibly in the SB 300 or 301 which were tube type rcvrs. It will definitely work in the SB 401 transmitter.

> But, if I'm following the conversation, than I don't want to read what
>was just said. I've already read it.

Assuming that previous article you read is the article responded to.
What if the situation is that an article, let's call it A, has two
responses, A1 and A2. A1 have further given rise to a 30 article
subthread. In a threaded newsreader you will read A, then A1, then
the 30 article subthread, which may drift into something completely
different, and first then do you get back to A2. What are the odds
that you remember exactly what A was about? You need some qoutes
to return you to the context.

In any newsgroup with a bit of discussion, the above is quite
common.

> So, my argument is that quoted material should be placed at the bottom
>of a message (unless you are commenting on pieces of a long message,
>such as this one).

It seems odd to have to different qouting styles, depending on the
length of the article. Why not have one, consistent style?

And if you're only responding to one part of the posting, but not
the whole, then you have to either write a summary of what you're
responding, or put your response beneath the qouted material.

> The only person this puts out is the person who
>joins a conversation in somewhere in the middle and perhaps did not read
>the previous message. However, in that case, he can just scroll down to
>read the quoted material.

And read the qouted material - backwards.

When I look at an article, I start from the top, as I do with any
written material. My first action isn't to scroll down to see if
there's anything down there that I should read. It would be like
having a serial in a magazine, where the "the story so far" bit is
placed at the end of chapter.

> In fact, I have said in previous messages that I agree that quotes
>should be short. Perhaps you would be better off complaining about
>large quotes to someone that disagrees with you.

I can't remember any cases where a end-of-article qouter have
bothered to edit his qoutes. I'm sure that they're out there,

they are just very very rare. The standard is to just include
everything, eventually leading to enormous blocks of material,
that nobody reads.

Going back to the subject line, I offer the following Outlook
setup screen (8940 bytes) http://home1.stofanet.dk/rorschak/outloot.gif
Notice the small icons on the right, describing how the
choosen style looks (the blue text is original material, the
grey qouted). It's quite clear what style they expect you to
use.

When closing that window, I got the following warning (3971 bytes):
http://home1.stofanet.dk/rorschak/outloot2.gif
How is a newbie supposed to get a proper start on Usenet,
when Microsoft, the market leader, tries its best to point
him in the wrong direction?

Well Jeff,

You must admit the .223 has a bit more grains of powder behind it.
It's no Elephant gun, but it's a human stopper.

(Personally, I prefer my .17 caliber.)

Oh, yeah....everyone really cares about "Paul Carr, N4PC", and if you posted his phone number, people would be calling him day and night!!!! I'm sure that "Paul Carr, N4PC", appreciates the fact that you're watching out for him!

My God, I think the constant postings about PorkButt are more intelligent....

Boy is that unfair. You may not agree with Mr. Pasternack's funding strategy, may not give to him yourself but don't throw those who fuel the engine of Newsline into the category of "suckers."

I do not know Mr. Pasternack personally. But I spent my early life in radio broadcasting and know, Newsline is top flight news, a show I'm proud to hear as a ham. Pasternack has first rate people, like Roy Neal, K6DUE, who used to be an award-winning NBC reporter. Pasternack's credentials are impeccable: he is a news producer at a top rated broadcast station. How can you knock this kind of expertise when it is devoted to ham radio?

As one who has been a ham almost 50 years and has toyed with public service over ham radio, I can tell you that one of the problems with using the hobby to do societal work is the lack of funding. Thus, to my thinking Mr. Pasternack's fund raising is appropriate, though I personally have yet to give. However, with such defamatory language surrounding this winner, I'm changing my mind fast: He will have my contribution.

The .25 is a piece of junk, most of the cheap ones are notorious for having expended shells jam in the ejection port.

I guess it takes a "real" man like Polly the squirrel slayer to handle a gun made for a woman. I wonder what big adventure Polly will conquer next, how about a roach raid in the kitchen....

><<Polly nauseates me. I like squirrels even though they chew on the guy ropes holding up my Cloudwarmer. I have a large oak tree in the front of the home and get a kick out of watching the critters as they scurry around and hide their nuts and play tag with each other
on the street and up and down the trees. I especially get a kick out of watching them on a cold winter day stuffing themselves in the crotch of large limbs and lay their tails on top of their bodies to preserve heat. How can anyone shoot one but then again W4FQF is certainly vicious enough to do it. He has the scruples of one of those squirrel's nuts and I'd be all too happy if a few settled into his crotch and collected a few right there. And there's something else that now bothers me about the palooka. He built a Cloudwarmer! That's right-here we have a guy who for years mocked out the antenna I've been using very very successfully on 20 and the turncoat copies me. I realize that mimickry is
flattering but in Polly's case it's more like flatulence. And speaking of flatuence, where is that skinny fart Billy Jack Moron, W4LLI? I'd miss his wisdom and wit if he had either or both but such is not the case. So then why do I miss him? I guess everyone likes to get a laugh on 14.313 what with the big crackdown but seemingly it hasn't affected either Polly or half wit Queenie who have been stirring the proverbial pot just about every day in VIOLATION of Riley's wishes. Give a listen to Polly playing dumb and coy..like an angel. Also concentrate on Queenie's demeanor which is half literate and half ignorant with an admixture of hyenic howling and jackass braying. I get a kick out of

K3QAM 'WARNING" everybody to stay clear of him because if not, "I'M WRITING RILEY AN E-MAIL." Can you imagine an FCC lawyer paying attention to the nincompoop? Oh well, Christmas is coming and pretty soon we'll be hearing Father Herbert read the story of Jesus's birth on 20 meters or maybe I put 20 meters in the wrong place? He was born in a manger, Jesus, not Herbie and the reason why he was born in a manger was because some anti-Semitic Roman hotel owner wouldn't let a Jew in. In came pregnant Miriam and her husband Joseph, the desk clerk took one look and said, " RESTRICTED CLIENTELE ONLY." And so she had the baby in a manger and the whole world changed because of it. And here's something you won't believe but it's the gospel-I was born in Christ Hospital in Jersey City, N.J. which should shut up a few intolerant persons! Amen!

Source record: 125160

I have the strongest signal on 20 meters using a wire antenna called a
CLOUDWARMER. It's easy to construct and will take the place of a commercial
beam because actually it is a wire beam whose RF hits the clouds(Ionosphere)
and scatters all over the world. I have been using one for years and to believe
what it can do is to BUILD IT. For free info, e-mail me at radiosigs@aol.com
and ask for the instructions. I can turn your puny signal into a powerhouse.
You'll never do better than to write me that letter.

Hi There,
Here is somethin' u wanna read:
THE MAN WHO SOLD THE WORLD

We passed upon the stair
He spoke in was and when
Although I wasn't there
He said I was his friend
Which came as surprise
I spoke into his eyes
"I thought you died alone
A long long time ago"

"Oh no, not me
We never lost control
You're face to face
With the man who sold the world"

I laughed and shook his hand
And made my way back home
I searched a foreign land
For years and years I roamed
I gazed a gazeless stare
At all the millions there
I must have died alone
A long long time ago

Who knows, not me
I never lost control
You're face to face
With the man who sold the world

Who knows, not me
We never lost control
You're face to face
With the man who sold the world

Now I wanna ask , who is the man who sold the world ? Was Kurt refering
to himself ,or someone else?
Please give me answers.

Cor! that'd make you spit.

Most men think a device for roasting meat is an XYL

Should that be "a XYL" OR "an XYL"?

Hi "Snipe" (as in the sailboat?),
Try this: Take the mag mount and place is on a metal trash-can lid
(no kidding!). The 1/4 wave vertical is begging for a ground-plane
counterpoise to work against -- placing it on the lid will work
wonders (and make the radio happy, too).

I use a half-wave vertical dipole for 2m in my apartment -- it's
made from the end of the coax cable feedline. Remove 19 inches of
the outer insulation, then separate the inner conductor from the
outer copper braid; spread them apart so they're running in opposite
directions and at right angles to the remaining coax feedline:

```
|
| inner conductor
|
|
============= to radio
|
|
| outer braid
|
```

The entire affair is taped to a window. Works great.
Thus, the end of your feedline splits to become your antenna!

BTW, both WWV and WWVH use *vertical* dipole antennas for their
HF transmissions.

Hello,

I recently added a PREFIX look-up form on the QSL page. If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

You are invited to http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

73!

Only if his prey is caged up, like that squirrel. Polly's like that. The only small caliber I've ever shot is a .22. Usually, most don't fool with a woman's gun. I'm not that much into guns, so I've never heard of the .25 caliber. My friends and I usually used .44 and .357's, not a .25.....
I guess that's all Polly's feeble hands can handle.

You might look at a little program called Socketwatch at:

http://www.locutuscodeware.com/

It synchronizes your computer to the correct time via atomic clocks on
the wwweb, and then you can just bring up the clockface on your
computer, and set your other clocks.

I am studying for the Ham test and I have not determined how to find the safe distance from an antenna at some power level to avoid exceeding RF exposure limits. I also found two questions in the Novice pool that seem to have the wrong answers.
I was a Military CW radio operator from 1958 - 1965, but I don't remember much. A little help would be appreciated.
This is my first posting to a chat/forum so I also have a lot to learn about this operation.
Thanks,
Oddd Jobbb

Barry, in the States, you must have passed 13 wpm code exam or gotten a physician signed waiver to transmit 29-29.7 MHz. PLease don't assume that rules for hams are the same around the world, they vary from country to country. US Technician plus and Novice hams do have some 10 M privileges, but they end at 28.5 MHz, and Technician class licensees who have not passed a code exam can't transmit below 50 MHz in these United States. I realize that you're in Australia and that your rules are different from those in the states, so please be careful about giving such advice.

The superior old timer is obviosly a troll and not worth comment.

He is most likely a new ham with 100watts and a dummy load who couldn't hold his own on 75meters. Now he's pissed and wants to make "old timers" (who ignored him) look bad.

Trolling is a big pastime on usenet, and we should wise up to it.

You are right, Brewhead. I miss the reports about the latest felon
activity by the "Boombox" clan. Why is "Boombox" Jimmy mobiling up
north, he told Riley his wife needed him on ham radio because she is
gravely ill. What gives Brewbudhead?

From: ToddCory <toddcory@hotmail.com>
Message-ID: <nMN54.14252$Mg.229703@c01read03-admin.service.talkway.com>
Source record: 125057

Hello,

I am trying to find out some information about how to modify a Yaesu FT470 handheld 2M / 440 radio so that it will transmit on all the requescies it recieves, rather than just the legal ones. I'm sure there is a way to do this, but don't care to go throught the circutry to re-invent the wheel, when surely someone has already figured this out.

Thanks in advance for any leads or information about this.

14313 is such a nice frequency now. We have intellectual snobs hob nobbing with truck driving ,c b reject morons who are speeding down the interstate in eighteen wheelers repeating the same thing over and over..
We have very nasty tempered meanies throwing out the welcome mat to dead zombies returning to the frequency. We have frustrated qrmers because of the bliss on frequency. We have pompous old farts mobiling up and down the road. It is just one big love feast now.
Thanks to Riley, they all love each other now. Wonderful, wonderful.

OK fatboy, now that I have you trained NOT to reply to my posts......It's time for you to learn how to fetch my newspaper for me in the morning, hohohoho.

Here is a list of other things I want to train you in:

1. Use the toilet, NOT THE CARPET, when you must pee.
2. DON'T scratch up the front door when you want to go outside.
3. Stop trying to "cozy" up to K3QAM's dog, Misty.
4. Finish your Kibbles & Bits before you ask for more.

Also in the next few weeks you must go to the Vet.....He has to "fix" you so you can't have any 'lil KC8JBO's.

Now roll over & play dead,

PITBULL

I would like to AGAIN say a BIG THANK YOU to the mighty KT4TR.

He "broke" the ND8V story a few days ago, showing us all what a LIAR K4RUB really is. (train crash, huh Rub)? hohohoho

With Bob's stock tips.....I JUST KEEP ON MAKING MONEY!!!! His info about the company "At Home" has made me OVER $12,000 now......THANKS BOB.

I know KT4TR will keep his "ear to the ground" & expose these FOOLS for who they really are. Here is a small list of what Bob has done on 14.313

Exposed a "Medal of Honor" winner.
Took 'ole GASBAG WB2OTK off the air.
Told us of PORKYS bounced checks.
Let us know about the "Boom-Box".

KT4TR has done MORE for ham radio than MOST WILL DO IN THEIR LIFETIME!!!

KT4TR & K3QAM are like fine wine......THEY GET BETTER & BETTER WITH AGE.

PITBULL

I agree with all you said, KT4TR has done more to clean up the ham bands than the FCC has, The list seems to be growing every day of the screwballs who have been zapped by Bob. .

God bless KT4TR and I hope his work to clean up the Ham bands continue.

God Bless KT4TR for his work cleaning up the amateur bands, 14313 for instance, he is really been responsible for a lot of the "problem" amateurs leaving the air or curtailing their qrming operations, one example is AF2Y, the CRAZY from Clifton. You don't hear DR Hate with his "TREADMILL FROM HELL", you don't hear him kabitz the frequency all the time as he has in the past, sans callsign.. You can thank BOB for all these blessings. Lets hear it for KT4TR!!!!!!!

It's gratifying seeing how many are responding to my free offer to supply on the Internet info on how to build the world's best wire antenna, THE CLOUDWARMER,the one that made me a big gun and the idol of DXers from Point Barrow to Terra del Fuego and from New Jersey to Singapore. All that's required is to drop me an e-mail at radiosigs@aol.com, request info and bingo...N23...you'll win the jackpot. Remember..you'll never do better than to write me that letter.

5322. Christian holidays.

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-15 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991215164616.26752.00000924@ng-fd1.aol.com>
Source record: 125074

If you'll remember fellow hams and hamesses, I had posted a complaint about a syndrome called, "Christian flopitis" in which the Gentiles CONVENIENTLY flop their holidays right on the Jews in order to diminish the significance of them. As proof we all know that Jesus was born in April, not December, but some anti-Semities way back when envied the celebration of Chanukah and decided to diminish it by flopping down Jesus's birth on the 25th. And the Last Supper was supposedly the second night of Passover and even if not, placing the Easter right on top of it likewise diminishes our story of the Exodus which tells of Moishe leading the children of Israel out of bondage in Egypt to freedom only after walking around the desert for 40 years eating matzohs and drinking seltzer and belching non-stop. If you believe that story I'll tell you about a guy who built a big boat for two of all the animals in the world and sailed around feeding them and cleaning up their dung and using up 10,000 bottles of Lysol. Phew, what a stink. Anyway I did write to the Pope about this "flopitis" shtick and here's his reply just received this afternoon.

"Dear Doc,

I readily understand your annoyance over our flopitis as you call it. I figured after I exonerated you guys from killing Jesus, that would have been enough but now you want more. I talked it over with my pals, the College of Cardinals, and the oldest one, Stan Musial, came up with this idea. We can't move the dates except for Easter which is moveable anyway but to satisfy you, starting in 2000, we can rename our holiday to satify you since it flops on yours. We're going to call it, 'Christakah." Hoping that will be satisfactory, I remain,

The Main Gentile with the White Yarmulka,

Johnny"

Anonymously posted.

Well here it is...The best antenna to QRM with

> A 20 METER "CLOUDWARMER"
>I thank you for showing interest in my antenna which was voted the number one
>wire antenna is North America by an independent research organization: AF2Y
>Enterprises! I did NOT invent it; the idea was given to me by WB2OTK in
>South Carolina. He didn't invent it either. Who then did? I don't know; I
>don't care; all I know is that it works like a BOMB! Furthermore the U.S.
>military is using it under the name N.V.I.S.(Near Vertical Incidence
>Skywave). In 30 years on the air, it is the best wire antenna I've ever used
>and can easily challege commercial beams for effectiveness.
>
>A few basic concepts to begin with. A "Cloudwarmer" is a MONOBAND 2 element
>wire beam. I stress MONOBAND and it can be erected for ANY BAND. Secondly it
>is based entirely on mathematics and is uncomplicated. Thirdly, all that's
>required is standard wire, 52 ohm coax of any length and five insulators.
>Also I do not recommend using a tuner because if the construction is correct
>and adjustments,if necessary are made, a tuner will be unnecessary and
>furthermore it may mess up the mathematical relationships which govern this
>antenna. Lastly, any ham who can set up a standard dipole can EASILY
>construct a Cloudwarmer. And if any ham cannot construct a standard dipole,
>then he or she has no business being on the air therefore delete this
>information and take up basket weaving!
>
>Keep this in mind because it applies to any Cloudwarmer for any band. The

>"Warmer" consists of a driven element called a dipole with
a parasitic called
>a reflector the latter of which is 6% longer and placed
between .15 and .2
>wavelengths below and parallel to the driven element or as
NEARLY parallel as
>possible. THAT'S IT. It is also known as a "SCATTERBEAM"
because the RF hits
>the ionosphere at high angles and then scatters all over
the world. It is a
>COMPLETELY NON-DIRECTIONAL ANTENNA on the order of a
vertical but better than
>one for INTENSIFIED OMNIDIRECTIVITY.
>
>Now for the mathematics. Let's talk about the numerical
figures regarding
>wavelengths. Let's say a 20 meter HALF WAVE dipole is to
be constructed to
>resonate with a very low SWR at 14.300. Using the formula
468/frequency , we
>see that such a dipole must be 32.7 feet which equates to
32'8". Let's now
>convert that to inches. 32' x 12 =384 inches +8=392
inches. That's a HALF
>WAVE. Double it and we get 784 inches therefore we now
know there are 784
>inches in a FULL WAVE dipole FOR 14.300. The reflector we
discussed which
>ALWAYS GOES BENEATH the dipole i.e. driven element can be
between .15 to .2
>wavelengths in distance. What then has to be the length
it we place it, for
>example .15 wavelengths below? Simply multiply 784 x .15
and we come out with
>117.6 inches and divide by twelve to convert to feet and
we get 9.8 which is
>9 feet,10 inches. That is the minimum distance the
reflector must be placed
>underneath the dipole. The maximum is .2 wavelengths and
to change that to
>feet multiply 784 x .2=156.8 inches, divide by 12 and we
come up with 13
>feet. We now know that the reflector can be placed from 9
feet, 10 inches to 1
>3 feet below. MIne is at 10 feet; supposedly increasing
the distance will
>give more gain but I do just fine right where it is.
>
>The reflector must be 6% LONGER than the dipole. We
already know the length

>of that dipole for 14.300 is 392 inches. Multiply by .06
and we get 23.5
>inches which is 23'6" and that's the length of my
reflector.
>
>So now with the math done, we proceed to erect that
Cloudwarmer. Put up a
>dipole 16'4" from either side of the center insulator and
feed it with any
>length of, for example, RG8U. Take an SWR reading and
WRITE IT DOWN..it's
>VERY IMPORTANT.
>Next, string out a relector wire about 10 feet below and
about 2 feet LONGER
>as parallel as possible. Each end should terminate in
insulators. There is NO
>ELECTRICAL CONNECTION between it and the driven element
dipole nor is there
>any electrical connection between it and the coax feed. It
just hangs there
>minding its own business but is nevertheless the secret to
success!
>
>Now take an SWR reading with everything in place. If you
see ANY change
>whatsoever, good or bad, LEAVE THE INSTALLATION ALONE!
It's working! If
>there's no change then either LOWER the reflector 6" at a
time or LENGTHEN it
>by a few inches. What we MUST see is a change in that SWR.
Once it happens,
>go work the world and YOU WILL.
>
>We know that a dipole less than a full wavelength high has
a multilobular
>pattern with appreciable ground loss. Now when we use a
vertical at ground
>level, we must add radials. Why? Because we must minimize
ground loss. The
>radials are RF collectors meaning that the emitted RF
instantaneously is
>picked up by them and RETURNED to the base of the vertical
to be RERADIATED
>at about 15 degrees to the horizon. That reflector acts
just about the same
>way. It MINIMIZES ground losses by reradiating the RF into
the "clouds" at
>much higher intensity than will a standard dipole and your
signal will be
>heard in places you never knew existed. The Cloudwarmer

has APPRECIABLE gain
>on receive versus a standard dipole and vertical-
REMARKABLE GAIN. And on
>transmit, try switching back and forth between it and
another antenna and see
>what happens. The person on the other end will be STUNNED!
>
>Best of luck and great DX.
>73,

Polly's wife is so fat, one time she wore a black dress and everybody called her "Shamu."
O'Brainless is so stupid, he poured water on his pillow to get a wet dream.

When Polly was born, the doctor looked at his ass and his face and said, "My God, Siamese twins."

O'Brien's breath is so bad, it smells like he's got a little man in his mouth with shit on his shoes.
During the winter, Polly W4FQF's house is so cold, the roaches ride around on ice skates.

5327. A BETTER 14.313 says AF2Y

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-15 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991215170808.26752.00000933@ng-fd1.aol.com>
Source record: 125079

What a pleasure that orgiastic and confrontational frequency is turning out to be. This morning I was able to hold QSOs with Dick, VE9ZL; Dick,W2CSQ; Rube,K4RUB; Paul,WB9HEU; a mobile from the midwest; a mobile from Florida; Donald Anderson.W4JYZ; Tom,KE9RY and others whom I consider EXALTED. Unfortunately for AB4PW, K2IVX, W1ZZE, KT4TR, K3QAM, WA4KBX and a few others who don't appreciate the wit and wisdom of AF2Y, they had to sit back and chew their cud while I milked that frequency for all it was worth. Thank God Riley showed us the way; one of his personal e-mails to me stated that I should just enjoy ham radio and he was right. Hell, I'm even thinking of sending KV4FZ a Christmas greeting thanks to Blue Mountain Cards on the Internet. Thanks partly due to my intelligence but mainly because I don't want to lose my ticket and I'm afraid of Mr. Hollingsworth, I have become a Mary Poppins on .313 and intend staying that way. I refuse to become embroiled in any more arguments partly because I'm too smart for that but mainly because I don't want to lose my ticket and I'm afraid of Mr. Hollingsworth. If I were on good terms with him, I'd call him Riley but I have to wait a while since I don't want to lose my ticket and I'm afraid of Mr.Hollingsworth. To all of you who have become astounded by my sweet, loveable and friendly demeanor should know it's not put on. It's not phony because I don't want to lose my ticket and I'm afraid of Mr.Hollingsworth. And I sincerely recommend to anyone on that frequency who is prone to arguing, slandering and jamming from a mobile that doesn't exist, watch out now. A letter might be coming and you too will not want to lose your tickets and will also become afraid of Mr.Hollingsworth.

Poor "FATASS" Wiseman, KC8JBO, of lame homo and spelling posts,
snitches on everyone, but he is the lard ass who gets thrown off his
ISP servers!!!!! Many times, ho ho. Couldn't happen to a more deserving
person. I am on his mind twentyfour hours a day, every day, ho ho

5336. Kenwood Control program that runs on Liunx AND Windows!!!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-15 00:00:00 UTC
From: Jeff Pierce <piercej@preferred.com>
Message-ID: <38586F13.7DC40DC6@preferred.com>
Source record: 125088
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.digital.misc,rec.radio.amateur.digital

I have developed a graphical control program for the Kenwood
TS-140/440/940 radios that runs under Windows, Linux and several other
Unices with virtually no code changes.

It runs under Tcl/Tk 8.2.2. For those not familiar with Tcl/Tk it is a
scripting language (like Perl, Javacript, etc.). It's main feature is
it's great GUI tool kit, the Tk part. It's really great feature is the
same code can be run on Linux, Windows and several other Unix systems
WITHOUT changing the any code. The screen shots on my web page are from
both Linux and Windows95 with NO code changes. The only code that may
need to be changed is to specify which serial port to use.

If you do not have Tcl/Tk it is available for FREE from
http://www.scriptics.com/products/tcltk/8.2.html

It is a cinch to install on Windows and Linux. On Windows you just
execute the .exe from the above source to run the install wizard. Then
download kentcl.zip from my site, un-zip it and double click on it. For
Linux, just follow the compile/installation instructions.

> >Tell the govenment how you interpret your Constitutional rights.

There is always a risk in challenging the interpretation of a right in the courts. The courts might interpret those rights more narrowly than in the past. In other words you can lose some rights you sought to protect by the challenge.

> standard formats (mp3, GSM, wav, mpeg, etc.).

Okay, but me, I'd be happier, in the short term, just to have a
simple api to set/read the freqency and the volume, agc or
whatever. And try to keep this code as simple as possible --
with a c interface. That is single user -- controlling a single radio.

I think it's best to encapsulate as much as possible of simple
radio control, that is what's typically possible over the serial
ports of most radios in an api. This is to make the creation
of new drivers easy and bug free. And to take configuration of
the radio control out of the applications and into the OS where
it belongs, imo.

Then, like advanced features like java bindings could be
built with applications that run on top of this api. So, if you
want to make radio servers or decompress mp3, that'd be
another layer on top of this.

Like maybe we'd have a 'libradio' that would just control the
radio through the serial port. And, on top of that we'd create
an 'radiod' or something that would provide a server
to the radios on that system.

5339. Poor, poor Jimmy, w4AMP what a LID!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-16 00:00:00 UTC
From: KC8JBO <kc8jbo@msn.com>
Message-ID: <83bfjcdsu1@nnrp1.deja.com>
Source record: 124981

Poor, poor, neurotic W4AMP. He suffers from severe mental problems as evidenced by his latest posting and on-air episodes. I suppose he's off his medication, and back on the "street medicines." You have to feel sorry for the guy, having been a loser for his whole life. And usually, Dimwitted Jimmy brings problems upon himself. His latest substandard English postings mark a new low for the boy. If he didn't leave any doubts about his mental condition, he shined a spotlight on his many flaws with each and every post from his malocculated mouth. Of course, this is the same guy who yelled crap at Oris Grimm from a safe distance at a hamfest. His posts are ripe with malapropisms, and reflect his education or lack thereof. His preponderance for prevarication is quite known. O' Brainless never lets the facts get in the way of his lies. His continual spamming of this newsgroup will be the cause of his own downfall. His operating procedures on amateur radio will result in the loss of his license. His use of profanity and qrming are legendary on 14.313 and 75 meters. Jimmy is beyond redemption.

Oh, Jimmy.....<PLONK!>

Date: 1999-12-16 00:00:00 UTC
From: Dan/W4NTI <w4nti@my-deja.com>
Message-ID: <83bn9i$im8$1@nnrp1.deja.com>
Source record: 124986

Its amazing how simply transporting a old antenna design from New Jersey to the wild west of New Mexico can create a TWELVE DB gain.

I simply do not understand it. I guess all my antenna larnin is for naught.....I guess I need to sue the ARRL. Because I have NEVER managed 12 db of gain by adding a reflector.

Perhaps this gain is being measured by using a dummy load as the test antenna???? Help me......I just don't understand.

But then again....this comes from the baby robin, the broomstick specialist from NM....I now know why he is called the "baby robin".... Beak in the ground and body full of crap.

I just made a scientific test of the 12 DB gain theory. I am using my single element dipole.

I was talking with KA2ECA, he was exactly 12 db over my noise floor.

I switched to the DUMMY LOAD....and he read S0.

I apologize to the baby robin. You can get 12 db out of a wire after all.

Hello Ed,

No real comparison between the real time IC-781 CRT and the IC-756 display.
The 781 is the best display I have had a chance to use. Clarity, speed etc. Is
it worth $3000 more? Not really.

John N0ISL/4ID

I am trying to setup a Motorola Flexar UHF to operate on a repeater channel as well as direct talk-around. The radio is setup to switch both the TX and RX channels and I need to lock in the RX so I only need one receive crystal. Can anybody advise me on where to put the jumper to lock the RX? Thanks and 73's Don KB6GQA

Sure, Dave, we can lose rights through narrow judicial interpretations, but that wasn't my point. I wasn't refering to enforcement or court challenge of asserted rights. I was talking in pragmatic terms about perception of rights and exercise thereof. Judicial determination is another matter with its own equities.

The axiom by which I'm guided is: He who sits on his rights waives them for all time. The point again: The biggest threat to all of us is waiver of rights through failure to assert them.

Thanks for weighing in and bringing this point out.

5364. OEM "T" and powerpole connectors

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-16 00:00:00 UTC
From: Ken Mirabella <kjm@flo-bin.com>
Message-ID: <cGk64.1552$ae4.79057@typhoon-la.pbi.net>
Source record: 125006

Subject: OEM "T" power connectors and Anderson Powerpoles

I have started a new web site to sell the hard to find and "elusive"
Anderson Powerpole connectors that have become (or are becoming) the most
popular power connector for interchangeability in the emergency community
and Yaesu, Kenwood and Icom mobile OEM "T" power connectors.

www.powerwerx.com was started with the hearing the concerns of hams across
the country in newsgroups of where to purchase these connectors and other
"hard to find" products at reasonable prices.

PowerWerx.com encourages groups to pool their purchases to obtain a very low
price on power connectors.

I apologize for the commercial promotion, but I feel that an on-line secure
source for these products has not been available for quite some time.

We accept MasterCard/Visa.

The philosophy of "hams helping hams" is now extended from my web site to
you.

Ken, KM6YH
owner of www.powerwerx.com

*******I NEVER GAVE YOU PERMISSION TO GIVE OUT MY PRIVATE INFO ON THIS NEWSGROUP, YOU COWARDLY ANONYMOUS BASTARD.*****
Anonymously posted.

Well here it is...The best antenna to QRM with

> A 20 METER "CLOUDWARMER"
>I thank you for showing interest in my antenna which was voted the number one
>wire antenna is North America by an independent research organization: AF2Y
>Enterprises! I did NOT invent it; the idea was given to me by WB2OTK in
>South Carolina. He didn't invent it either. Who then did? I don't know; I
>don't care; all I know is that it works like a BOMB! Furthermore the U.S.
>military is using it under the name N.V.I.S.(Near Vertical Incidence
>Skywave). In 30 years on the air, it is the best wire antenna I've ever used
>and can easily challege commercial beams for effectiveness.
>
>A few basic concepts to begin with. A "Cloudwarmer" is a MONOBAND 2 element
>wire beam. I stress MONOBAND and it can be erected for ANY BAND. Secondly it
>is based entirely on mathematics and is uncomplicated. Thirdly, all that's
>required is standard wire, 52 ohm coax of any length and five insulators.
>Also I do not recommend using a tuner because if the construction is correct
>and adjustments,if necessary are made, a tuner will be unnecessary and
>furthermore it may mess up the mathematical relationships which govern this
>antenna. Lastly, any ham who can set up a standard dipole can EASILY
>construct a Cloudwarmer. And if any ham cannot construct a standard dipole,

>then he or she has no business being on the air therefore
delete this
>information and take up basket weaving!
>
>Keep this in mind because it applies to any Cloudwarmer
for any band. The
>"Warmer" consists of a driven element called a dipole with
a parasitic called
>a reflector the latter of which is 6% longer and placed
between .15 and .2
>wavelengths below and parallel to the driven element or as
NEARLY parallel as
>possible. THAT'S IT. It is also known as a "SCATTERBEAM"
because the RF hits
>the ionosphere at high angles and then scatters all over
the world. It is a
>COMPLETELY NON-DIRECTIONAL ANTENNA on the order of a
vertical but better than
>one for INTENSIFIED OMNIDIRECTIVITY.
>
>Now for the mathematics. Let's talk about the numerical
figures regarding
>wavelengths. Let's say a 20 meter HALF WAVE dipole is to
be constructed to
>resonate with a very low SWR at 14.300. Using the formula
468/frequency , we
>see that such a dipole must be 32.7 feet which equates to
32'8". Let's now
>convert that to inches. 32' x 12 =384 inches +8=392
inches. That's a HALF
>WAVE. Double it and we get 784 inches therefore we now
know there are 784
>inches in a FULL WAVE dipole FOR 14.300. The reflector we
discussed which
>ALWAYS GOES BENEATH the dipole i.e. driven element can be
between .15 to .2
>wavelengths in distance. What then has to be the length
it we place it, for
>example .15 wavelengths below? Simply multiply 784 x .15
and we come out with
>117.6 inches and divide by twelve to convert to feet and
we get 9.8 which is
>9 feet,10 inches. That is the minimum distance the
reflector must be placed
>underneath the dipole. The maximum is .2 wavelengths and
to change that to
>feet multiply 784 x .2=156.8 inches, divide by 12 and we
come up with 13
>feet. We now know that the reflector can be placed from 9
feet, 10 inches to 1

>3 feet below. MIne is at 10 feet; supposedly increasing
the distance will
>give more gain but I do just fine right where it is.
>
>The reflector must be 6% LONGER than the dipole. We
already know the length
>of that dipole for 14.300 is 392 inches. Multiply by .06
and we get 23.5
>inches which is 23'6" and that's the length of my
reflector.
>
>So now with the math done, we proceed to erect that
Cloudwarmer. Put up a
>dipole 16'4" from either side of the center insulator and
feed it with any
>length of, for example, RG8U. Take an SWR reading and
WRITE IT DOWN..it's
>VERY IMPORTANT.
>Next, string out a relector wire about 10 feet below and
about 2 feet LONGER
>as parallel as possible. Each end should terminate in
insulators. There is NO
>ELECTRICAL CONNECTION between it and the driven element
dipole nor is there
>any electrical connection between it and the coax feed. It
just hangs there
>minding its own business but is nevertheless the secret to
success!
>
>Now take an SWR reading with everything in place. If you
see ANY change
>whatsoever, good or bad, LEAVE THE INSTALLATION ALONE!
It's working! If
>there's no change then either LOWER the reflector 6" at a
time or LENGTHEN it
>by a few inches. What we MUST see is a change in that SWR.
Once it happens,
>go work the world and YOU WILL.
>
>We know that a dipole less than a full wavelength high has
a multilobular
>pattern with appreciable ground loss. Now when we use a
vertical at ground
>level, we must add radials. Why? Because we must minimize
ground loss. The
>radials are RF collectors meaning that the emitted RF
instantaneously is
>picked up by them and RETURNED to the base of the vertical
to be RERADIATED
>at about 15 degrees to the horizon. That reflector acts

just about the same
>way. It MINIMIZES ground losses by reradiating the RF into
the "clouds" at
>much higher intensity than will a standard dipole and your
signal will be
>heard in places you never knew existed. The Cloudwarmer
has APPRECIABLE gain
>on receive versus a standard dipole and vertical-
REMARKABLE GAIN. And on
>transmit, try switching back and forth between it and
another antenna and see
>what happens. The person on the other end will be STUNNED!
>
>Best of luck and great DX.

The "CLOUD WARMER" (rhymes with ORMER}, is the antenna of choice for world class qrmers such as AF2Y, Charles Swartzbard, of Clifton N.J. U.S.A. and KC8JBO, "FATASS" WISEMAN of Dawg Patch W VA. U.S.A. Reason. you can burn the old car parts in your yard and get the free wire to use in them, and hang saplings to support them on your neighbors fence posts! nuff said. Oh Yes, Charlie the grope, did not invent the cloud warmer as he has said in the past. The cloud warmer was the first antenna rejected by Marconi as being too simple.

5377. Capacitor checker

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-16 00:00:00 UTC
From: Mike Burch <libertybell7@home.com>
Message-ID: <38583FF3.64523D1E@home.com>
Source record: 125103

Hi Fella's,

I know that this is really improbable but would any of you know of
a capacitor (smc) checker that would tell me the value of a smc cap
while in circuit? I am fairly sure that it is impossible to do that
but.... there are some really smart people out there on the internet so
maybe it can be done. I don't know. Here is the problem... I own
two Realistic pro 2006 scanners and both have computer control upgrade
boards installed that were produced by optoelectronics. The original
board has all the bells and whistles and performs great, the second
board is a "lite" version that uses the original board just missing a
lot of parts and is just marginally useful. I want to upgrade the
"lite" version to the full one by adding the missing parts. I want to
find out the missing part values. The cap values are unknown and
unreadable. Do any of you have any suggestions? Thank you all in
advance for reading this... Best wishes as usual.. Mike Burch K8MB.
If you could please email me directly as well as posting it here.
thanks again.

Hi Bob,

Trolling is the act of intentionally making someone or a group angry for no reason at all by making derogatory or annoying statements just for the pure enjoyment of doing so. The best counter for a "troll" in my opinion is to just ignore them. That makes them angry and not you. If you show any anger they love it. After you shoot some emails back and forth you will be able to spot them easily. Some of them are clever and will bait you for awhile then start the B.S. just for fun. If their opinions are obtuse from your angle ignore them. Just my point of view of course. Best wishes.. Mike Burch K8MB

Here we have Polly Wetback on one hand blasting my Cloudwarmer and on the next, using one. The FISHERSVILLE FINK! It's like this: when I make contacts and the signal reports are 20/9 all over the woild, that's enough to drive Dumbo crazy. Those hearing me are astounded to know that I am NOT using a commercial beam but one made of wire with the parasitic reflector BELOW the driven element dipole instead on in back of it. The Germans yell, "Was hast du gesagt?" The Spanish yell, "Que diciste?" The Israelis yell, "You vanna buy a tie?" The Hungarians yell, Yishtanem, Yishtanem." The Poles yell, "Ig dadamu srotch." In France they say, "Oui oui" in France they say "Si Si." That Cloudwarmer has made AF2Y a household callsign. I have received SWL reports from Pakistan, from Omar the Goat Tender in the mountains of Afghanistan and Gretchen the Chechin from Grozny. And you wonder why Polly is irate? The only decent signal report he ever got was from Billy Jack about ten miles away and then it was a 5/7. By the way that "Billy Jack" was a swell movie about a big tough guy taking on the bullies. What right then does a skinny fool like W4LLI have in adopting that name? He should have been named after that dumb albino in "Deliverance" who strummed "Dueling Banjos." The fact remains that the Cloudwarmer is absolutely super and I urge everyone to erect one unless of course he suffers from erectile dysfunction. All one needs is for twenty meters is about seventy feet of wire, five insulators, a spool of nylon Seine Twine , any length of RG8U or its equivalent and a place to erect it. If you doubt what I'm saying, listen for me on or about 14.313 for proof. Every day there's someone who breaks in from northern Idaho who yells, "You're 20/9 in the high country." Do you realize the distance between Clifton,NJ and north Idaho? And I constantly get 20/9s there. What more do you want? Blood? If that's what you want, tune to "E.R." instead of hanging around the ham bands. Do NOT listen to Getback Polly, W4FQF-he's a General and I'm an Extra which says that I know everything about ham radio but my main weakness is electronics. For further info about the marvelous Cloudwarmer wire beam, e-mail radiosigs@aol.com and I'll copy and paste everything.

YOU got em all on 14313, the resident KOOK, AF2Y, babbling CLOUDWARMER,CLOUDWARMER, over and over, making ghost ham radio contacts to pump up his oversized ego. When he is not qrming, or talking out of his head that is, notice qrming rhymes with cloudwarming. You got that zombie that"SMOKING CADAVER" Rube, K4RUB lied about his death, he is back from the dead, a real ham radio zombie, walking the frequency again. A dead soul in a corrupt body. you got various nutcases, physcopaths, and deviats, I tell you it is a circus all day and into the night. The only time it stops is when the band dies. That is not counting the unregistered idiots who put sixty cycle hum and tape recordings on the frequency constantly. You have the dim wit from Dawg Patch W VA, KC8JBO pulling the SWL bit and doing a bit of qrming also. It will surprise me if it ever gets cleaned up, but I believe Mr Riley H is the man who can do it, it will take a LOOOOOOOOOOONG time. Tune in for the idiot hour when K2JW gets in his mobile for a little pompous, stuck up priggishness, looking down at what he describes as "The little people". All hams should take it on themselfs to check this frequency out and see for their self what uncontrolled breeding of defective human stock will cause.!!!.

5384. Search for OLD callsigns?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-16 00:00:00 UTC
From: Rob <lilindn@prodigy.net>
Message-ID: <83a0ke$2hu2$1@newssvr03-int.news.prodigy.com>
Source record: 125110

Hello,
I am thinking of using the vanity callsign provisions to change my advanced class 2X2 callsign (KD8++) to a more "classic" 1x3 callsign (I have one in mind - it fits the scheme K8+++).
My current call has letters that sound like other letters, causing a lot of confusion on phone, on CW, its even worse - as many ops are asking me for the third letter of my suffix, when there isn't any. I've even had hams suddenly leave the freq., assuming I've made up a callsign. This could only get worse when new hams start getting 2X3 calls starting with KD8+++.
So here's my problem, I know that nobody currently has the K8+++ call I have in mind, but, if K8+++ was a section director who wrote 100 articles for QST, and elmered hundreds of other hams, I don't want his callsign. If K8+++ was a guy who got bored and put his Galaxy 300 in the closet after a season, then it's no problem. It could be possible that their was never a K8+++ (if KN8+++ never upgraded, than K8+++ was never issued) .
Is there any way to search discontinued callsigns, or callbooks from the early-mid 1960s??
Rob

5385. How do I get my ham ticket ?

5386. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <83a47e$74s$1@news.hawaii.edu>
Source record: 125112
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the

group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Can get a Tech license, which does not require a code test. Head on over
to www.arrl.org to check out where your local VE testing facility is :)
After you pass that exam, you can decide whether or not to beef up on the
code, and get your Tech+ license. If you decide to get you Novice license
first, you'll need to pass a simple written examination and a 5 wpm code
test.

> if so what am I allowed to do ? Is there a way that I can learn code

Tech = Can operate all amateur bands found above 30 mhz.

All other licenses grant some for of HF access, which requires passing
a code test of increasing difficulty

> thru my pc ?? Any help is appreciated , thanks in advance , .. Tom R

Gladly, I use Morse Academy. Yet you can find Code tutors at your local
Ham Radio dealer, or on the Internet.

Nice to see that someone develops a program that way. I don't have
those radios so this particular program is not useful for me, but I find it
deceptive to see how radio manufactures that offer some form of PC support
blindly assume you are using Windows95. Especially when it does not have
to be that way, when they had selected a somewhat more portable tool to
develop their applications.

Message-ID: <q1564.696$%z3.29260@news.rdc1.va.home.com>
Source record: 125116

Does anyone know of ANY nods that can be made to the new HTX-10 10 mtr mobile? I've been told that there are no mods and I've also been told there are a few that can be made. The audio is weak from this rig....anyway to tweak this?? Or use a better hand mic?? If so, what kind?

Any and all suggestions are greatly apprevciated.

Thanks,

Buddy - N4SPQ

FOR SALE

Henry 2KD Classic 1KW RF Power Amp. Uses pair of 3-500's, 110v

or 220v. Desktop model. Very clean with small scratches on top, works
great,
but too much for me. With photo copy manual.

$ 550.00 Dollars....may negotiate a little. You pick up in Escondido,
Ca 92025 or
pay for shipping 90lbs prox.

Hi Tom -- great hobby -- you'll enjoy it. For licensing info -- see URL:
http://www.arrl.org/iands.html#license
the ARRL pages -- includes radio clubs near you that will help you get a
license.

Good Luck

HAMFEST/COMPUTERFEST CALENDAR 2000 - ILLINOIS |
last updated December 16, 1999 |

o Please report additions or changes to Bob Parnass,
AJ9S, office phone: (630)979-5414, electronic mail:
parnass@bell-labs.com. Thanks to Dennis Dale, Rick D.
Wilson, Tom Harker, and ARRL for providing some of the
information.

JANUARY 2000 |

Jan 23 (Sun): Cicero, IL - Wheaton Community Radio Amateurs |
Mid Winter Hamfest - 2000 at the Chicago Motor Speedway. |
3301 S. Laramie, Cicero. Located between Central and |
Cicero, between the Ike and the Stevenson. Tickets $5.00 in |
advance with 4 stubs. Free parking. Info: www.w9ccu.org or |
send email to hamfest2k@hotmail.com.

MARCH 2000 |

March 19 (Sun): Sterling, IL - Sterling-Rock Falls ARS. |
info: Lloyd Sherman, KB9APW, PO Box 521, Sterling, IL
61081-0521. tel. 815-336-2434, E-mail: lsherman@essex1.com

March 26 (Sun): Grayslake, IL - Lake County Fairgrounds. |
North Shore Radio Club. http://www.ns9rc.org. ALL INDOOR, |
Radio, Electronic and Computer Swapfest V.E. Testing 9AM to |
Noon, Door Prize Drawing Every Hour, Admission $6 at the |
gate / $5 in Advance. Door Open at 8 AM. Set-up at 6AM. |
Free Parking. Cafeteria Open. Talk-in Simplex 146.52 & |
NS9RC Repeater 147.345 +.600. For NS9RCfest Information |
Call (847) 291-4160 until 10 PM. Info: Jacob Fishman, |
KF9ZF, PO Box 1066, Highland Park, IL 60035. Phone: 847- |
291-4160, Email: kf9zf@lightwriters.com

APRIL 2000 |

Apr 29 (Sat): Stickney, IL - DuPage ARC. |
http://www.w9dup.org, Info: Ed Weinstein, WD9AYR, 7511 Wal- |
nut Avenue, Woodridge, IL 60517. Phone: 630-985-9256. |
Email: DARCHamfest@aol.com

Waubonsee Community College. |
http://www.frrl.org/hamfest.html Info: Maurice Schietecatte, |
W9CEO, 813 Cindy Lane, Sandwich, IL 60548. Tel: 815-786- |
2860. Email: w9ceo@arrl.net (good, small to midsized ham-
fest. Easy parking. Modern restroom facilities. - AJ9S)

AUGUST 2000 |

Aug 12 (Sat): Quincy, IL - Western Illinois ARC. |
http://www.qsl.net/w9awe. Info: Jim Funk, N9JF, PO Box |
3132, Quincy, IL 62305-3132. Tel: 217-336-4191 . Email: |
jfunk@adams.net

Aug 27 (Sun): Danville, IL - Vermilion County ARA. Info: |
Gary Denison, KA9SKS, 14704 East 2750 North Road, Danville, |
IL 61834-5610. Tel: 217-759-7389 . Email: |
gdenison@danville.net

SEPTEMBER 2000 |

Sep 16 & 17 (Sat & Sun): Peoria, IL - Peoria Area ARC. |
http://www.w9uvi.org. Info: Jim Williams, N9HHU, PO Box |
3508, Peoria, IL 61612-3508. Tel: 309-692-3378. Email: |
jimn9hhu@juno.com

Sep 23 & 24 (Sat & Sun): Grayslake, IL - Chicago FM Club |
Radio Expo. Lake County Fairgrounds. |

http://www.chicagofmclub.org. Info: Mike Brost, WA9FTS, |
5127 North Monterey Avenue, Norridge, IL 60706. Tel: 708- |
457-0966, Email: mbrost@cin.net (the biggest and best ham- |
fest in northern IL - AJ9S)

OCTOBER 2000 |

NOVEMBER 2000 |

DECEMBER 2000 |

COMPUTER SHOW NOTES *

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Orland Park Civic Center, 147th St. & LaGrange Rd., Orland Park, IL or at the DuPage County Fairgrounds, County Farm & Manchester Rds., Wheaton, IL. Admission is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer expo. The event is held on designated Saturdays from 9:30 AM to 3:00 PM. This show features computers, supplies, games, parts, software, accessories, CD-ROM, monitors, diskettes, printers, keyboards, modems, disk drives, cables, expansion boards, services, etc. Lake County Fairgrounds, Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall Building #1=9720,000 sq. feet. For a show map, exhibitor info, and discount coupon, visit the web site at http://www.ccxpo.com.

KKKevin's teeth are so green, he has to go to a lawn doctor instead of
a dentist.
KKKevin had to get rid of the mirrors in his roach filled apartment
because he kept getting glass in his eyes.

I agree, I much prefer Linux to Windows. There is nothing "hidden" from
you and it is really stable. (My Linux system at work ran over 9 months
without a reboot until I had to power it down to move it).

However, at this point in time Windows is the most widely used os,
hopefully not for long :-). So, that is the os of choice for development
dollars for control programs. One good thing is that outfits like Red
Hat, Caldera, etc. are making Linux for easy to confgure and run.

I personaly hope for more ham development in languages like Tcl/Tk for
more transportability. However, most of the industry is blinded by the
glitter and size of Microsoft. Which is great for stifling outside
competition and making the computer world dependant on Microsoft.

I also am thinking about with the winter time coming to devise a
proposal for a common radio command protocol. This could be used by the
control program which talks to a server which translates to and from the
actual radio.

It looks like we have a real "Private Dick" here.

'Ole FATASS found out how to track down an ISP Server.....Maybe KC1ZQ is posting from Minnesota.....MAYBE NOT. The trick here WIDEMAN, is to find out where the posts ORIGINATE FROM hohohoho. YOU LACKADAISICAL SLOB!!!!!!

W4FQF (George) is doing a GREAT job kickin' around KC8JBO.....When I get tired of playing WIDEASS like a fiddle, I will send him down your way, George.

There are a few more things I must train you in WIDEMAN, before you are let out into the real world.

1. Stop barking at the mailman.
2. NO MORE table food for you.
3. For once & all.....STOP PISSING ON THE CARPET.
4. Stop sniffing the ass of other dogs!!!!

I believe my 'lil PUPPY...SLAVE..."BOY"...PUPPET...is making REAL PROGRESS NOW. I might stop smacking you with the rolled up newspaper soon, PUPPY.

The only other trick I must teach you to do is:

"GO CHASE THAT TRUCK"!!!!!

PITBULL

>
Possibly because your vertical is equivilant to a vertically polarized
dummy load.

Dean is not saying apparant, Dean is saying for a FACT that he gets 12
db vrom his "cloudwarmer". This is crap and everyone knows it. I can
get all sort of different results out of a vertical and a horizontal,
switching back and forth simply shows the angle that particular wave is
arriving at. It DOES NOT SHOW GAIN. Assuming of course that both
antenna really are working properly.

There will be times when the vertical outperforms that antenna. And
visa versa. Any REAL HAM knows that. Dean is obviously in need of a
education on antenna's.

Hi Jeff,

Thanks for info on TCL/TK.

Why did you choose to use TCl/TK over JAVA which seems to be more popular
and provide the same functionality (i.e. code that is portable over many
platforms)?

Rob

Yes it is. In fact I encourage porting to other rigs, for non-commercial purposes ofcourse. Just let me know and send me a copy. I would like to start a web site just for this. In the mean time I will set up my web site to cover these topics with an area for non-commercial programs and control programs for download.

The pgrogram I have there for Linux in C/Xforms is source code.

Tcl/Tk is a SCRIPTING language. Like Perl, Javascript and a non-complied basic. Sort of like the DOS batch files, ya know *.bat files, but several orders of magnitude more powerful.
And it is FREE!!!!!! It is also extendable, with a number of FREE packages for graphing, panel controls, etc. Just go to http://www.scriptics.com and follow the TCL Resource links. It is available for Windows95/NT/98 and a number of Unix's include Linux, FreeBSD, Solaris, etc. Even Macintosh..... Also links to tutorial pages. Several good books are on the market and they are listed to.

And it's greatest virtue, source running on all of these platforms with no code changes....

I may be blowing the trumpet, but this is so far the best I have found for what I consider a very important problem in personal computing, like for hams. Software for that runs on ALL platforms, OS and hardware. Where everbody doesn'thave to run one proprietary OS, like Microsoft.

Exactly right Rich...

Plus the amount of resources needed to run Java are much more. Java was
not written for the web. It was produced by Sun, but had no market. The
web actually gave Java a home as a stop gap for multiple machine
running. In fact Java byte code is not a "new" idea. UCSD P-system
Pascal from the 70's was one of the, if not the, first to compile to
byte code. CPM, Apple, and TI Home, to name a few, computers all ran it.
Java just took that idea to a object oriented language. Which ofcourse
really bloats it.

In fact, Tcl/Tk is making great in-roads into cgi on the web. I think
there is even a Tk kit for perl. Remember Tcl is Tool Command Language
and is line oriented. It does all of the data handling, math, etc. Tk is
Tool Kit and is the tools for the Graphical User Interface, buttons and
such.

Actually I don't think it is neccessary to convince people that they
should run Linux. That is something they have to decide themselves.
My system has been running Linux since 1992.

But, manufacturers should not try to convince me to run Windows95 either.
(by supporting only that system)

>I also am thinking about with the winter time coming to devise a
>proposal for a common radio command protocol. This could be used by the
>control program which talks to a server which translates to and from the
>actual radio.

That sounds like a good idea. Make sure you define your interface in
such a way that it can be run over a network. This is often forgotten
by API designers, making it necessary to add cumbersome redirector tricks
lateron... Just access it via a socket, and it can be used both locally
and over the network. A small set of functions packages the requests
in the application and ships them to the server that translates them
to the radio command. Does not matter if that shipping is locally in
the system (to another process) or via a network.
(of course you could use an existing RPC mechanism, but watch out for
portability problems)

That way, you can control the radio from another system in the house.
Developers of packet radio and other hamdradio applications should do
the same thing: my radio or modem isn't necessarily connected to the
same system I am sitting at. I might want to run an application in the
living room, controlling and accessing the radios in the shack.

Hi Jeff,

Many thanks for the info.

I am thinking of writing a terminal program for the SCS PTC II controller
(using its host mode). There are very few that use the host mode.

Perhaps, I should learn and use tcl/tk. That way I can provide the program
for both Linux and Windows. In the near future, I think a lot more Hams
will be using Linux.

I understand that JAVA is not completely portable (vis-a-vis the way JAVA
handles serial ports). Perhaps Tk/TCl is the same.

Do you know of anyone who has written any kind of terminal communications
program using tk/tcl?

Rob

>a general-purpose UI framework could be built, which configures
>itself after enumerating radio features. Actual details of radio
>control are handled at the server, perhaps through the use of
>Java servlets.

It is also important to have a usable multiplexing mechanism.

Yeasu (and I believe Kenwood as well) radios need a separate serial
port per controlled device, so it would be practical to load a separate
server process per serial port = per radio, and do the multiplexing at
the interface to the server, e.g. using a separate port per server.

But Icom radios can be put on a single bus controlled from a single
serial port. So, you will have a single server process controlling
all your Icom radios, and possibly talking to several different user
programs that each want to control a single radio.
(of course the single server could listen on multiple ports to serve
multiple radios)

The above may seem theoretical, but in practice I have encountered this
situation when setting up an automated amateur satellite station. Then
you sually have at least two transceivers to control.

Another important aspect: the server should be able to talk to multiple
user programs at the same time. Each user program may be controlling
a different subsystem in the radio, or they may even be trying to
control the same parameters and pass on the "advice" or "results" of
this control between eachother.

Examples: a satellite tracking program may be passing information
to the radio to compensate for doppler shift, while a user interface
program controlling all functions of the transceiver is running to
assist the operator.

Or: some digital-signal-processing application may generate tuning
info that needs to be passed to the transceiver, while another program
is used for general control.

The server process should multiplex these different sources of control
information onto the single serial interface, and be able to report
back results.

Having a usable mechanism for this in the server avoids the situation
that anything written to control a radio needs to be a do-it-all program,
as is so common with existing software. It should be possible to
write a dsp modem that automatically tunes the receiver, without having
to write a fullblown graphical transceiver control program in case the
user wanted to have that (and cannot run it concurrently with your dsp
modem)

The only thing about serial ports is having to specify them as the os
requires. The following snippet from my program shows how:

```
switch $tcl_platform(os) {
{Linux} {set comPort /dev/cua1}
{SunOS} {set comPort /dev/cua/a}
{Windows 95} {set comPort COM2:}
default {error "Must configure comPort"}
}
set chan [open $comPort RDWR]
fconfigure $chan -mode 4800,n,8,1
fconfigure $chan -blocking 0 -buffering none
fileevent $chan readable {Reader $chan}
```

After this all reading and writing to the port is identical for all
OS's.

I wrote a quick tcl prog to talk to my PK232 using two text widgets. One
widget for seeing what is coming from the 232 and one for entering data
to the 232. Ala the original PK232 program from AEA. Unfortunatly I
deleted it by accident.

"The Dying Man"

A fellow went to a doctor who told him that he had a bad illness and only a year to live. So he decided to talk to his pastor. After the man explained his situation, he asked his pastor if there was anything he could do.

"What you should do is go out and buy a late '70s or early '80s model Dodge Pickup," said the pastor. "Then go get married to the ugliest woman you can find, and buy yourselves an old trailer house in the panhandle of Oklahoma, go on to a traffic net, call CQ DX,
cheat with another hams wife. ."

The fellow asked, "Will this help me live longer?"

"No," said the pastor, "but it will make what time you do have seem like forever."
Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Too bad you deleted your little program.

Is there a FTP site where people place tcl programs?

Maybe I can find something there to work with. It is sometimes easier to
work with already developed code than start from scratch

How is that causing trouble on ham radio? By letting a obvious
technical error to be propagated to all those SWL's that listen to 313??

I had no intent on causing trouble. As for AF2Y, I didn't hear that
claim. If he said it, then he is a fool too. Fair enough for ya?

The "CLOUD WARMER" (rhymes with ORMER}, is the antenna of choice for
world class qrmers such as AF2Y, Charles Swartzbard, of Clifton N.J.
U.S.A. and KC8JBO, "FATASS" WISEMAN of Dawg Patch W VA. U.S.A. Reason.
you can burn the old car parts in your yard and get the free wire to
use in them, and hang saplings to support them on your neighbors fence
posts! nuff said. Oh Yes, Charlie the grope, did not invent the cloud
warmer as he has said in the past. The cloud warmer was the first
antenna rejected by Marconi as being too simple.

<<Watch out now Dan'l. If I'm on the Cloudwarmer and get a 20/9 report and
switch to a vertcial with the same loading characteristics and get a 5/7,
that's not a drop of about 32 dB? Rectally, oops, sorry I mean theoretically it
can't happen-it's impossible but I see it regularly. However I doubt Dean can
approach a relative 12 dB because the refelctor is not MATHEMATICALLY designed
as mine is. I think he uses his roof as a reflector which is relatively
useless. The next time we QSO, let me run a test between the "Warmer" and a
standard antenna and you'll see a major difference. The impossible is indeed
possible. This afternoon I worked a Czech who was a 4/5 on the Warmer. When I
switched to a vertical, he was GONE. How come?

God Bless KT4TR for his work cleaning up the amateur bands, 14313 for instance, he is really been responsible for a lot of the "problem" amateurs leaving the air or curtailing their qrming operations, one example is AF2Y, the CRAZY from Clifton. You don't hear DR Hate with his "TREADMILL FROM HELL", you don't hear him kabitz the frequency all the time as he has in the past, sans callsign.. You can thank BOB for all these blessings. Lets hear it for KT4TR!!!!!!!

Anonymously posted.

So tell me Doc..did you ever id when you were jamming all
those years ?? Did you give your call during all those key
downs and music playing sessions ?? For years and years you
have made ham radio your own little septic pool of hate and
jamming. Now you just can't stand it when you get paid
back. I know you and your family well. I feel sorry for
them to have to put up with a basterd like you. I also feel
sorry for everyone who has to listen to all your bullshit.
You try to make people think you're a changed man...but a
fucking basterd is always a fucking basterd. Go away, 11
meters misses ya.

#1 - Ellsworth Bunker, Arnie8391 and Whataguy2597 they all AF2Y. He such a newbie he cant cover his tracks worth diddley squat. His new hobby inventing ng persona to praise him and zap his enemies. Next thing he do is start fights with his alternate personalities. Least he aint being too secretive about it.

#2 - Dr. Hate's license aint in jeopardy one bit. He still playing the wounded innocent act. Riley didnt say anything like what AF2Y is trying to put over. Suggest you all read Riley's letter to Dr. Hate. It dont mean nothing more than what it say.

#3 - AF2Y would not send in his license for cancellation if there was a million dollar reward for sending it. He would sooner stuff Daisy in a mayflower packing crate and send her to Gettysburg. Do he think anyone going to believe he will send in his license?

#4 - His big suck-up letters are already written. He is either polishing them or they in the mail. Hope Riley is smart enough to announce when he gets the suck-up letter so we can all laugh at Dr. Hate's lies.

#5 - Whatever else them letters say they will definitely blame KV4FZ for everything. There going to be something in them about antisemites and and something more about the BARF. He might even put in a few words of suck-up praise for Intercon. No matter what he going to say a major conspiracy was out to get him. No doubt the Nazis is plotting against him. Then out come the Jew trump card.

#6 - When he get confronted about all this lying AF2Y going to lie some more and say he intended to do everything he originally said. Then he got so mad at everyone for picking on him that he had to stand up for his rights. He didnt want to write them suck-up letters. We forced him to do it.

#7 - The year 2000 won't start on 14.313 without AF2Y. He be there to bring it in. He going to be there when it left. We ought to call it AF2-Y2K cause that how much his jaw going to be ratcheting in year 2000. Ditto for that tread mill mess he transmits.

#8 - Read the first seven points over again. Have a laugh at AF2Y before he plays the Jew card. When he do all this remind him that he the most transparent idiot in ham radio. Now he using his bogus

identities to harass Lenny during the holy days. What a worm.

Message-ID: <19991216215130.02250.00001378@ng-cp1.aol.com>
Source record: 125020

In the past few days I've gotten 22 responses for Cloudwarmer info STATESIDE as well as 3 from England, one from Spain; one from Belgium; 2 from Germany; one from France; one from Nicaragua; four from Puerto Rico and one from the Azores. Much to the chagrin of Polly and his fools, AF2Y's ham radio excellence in amateur radio, in all fields, is becoming known and appreciated worldwide. I worked a gent in England today and was told that my signal was 20/9 on a dead band! I was invited to speak at the Mugwump Amateur Radio Club spring get together in Washkash Falls Idaho but I probably will be vacationing in Puerto Rico. An article however will be appearing in QST in the "How To Happenings Kinks" section. I'm sorry if success is rubbing certain know nothings the wrong way but they'll have to live with it. Keep in mind that the US MILITARY is using CLOUDWARMERS because of its ability to overcome QSB. It is impervious to fading which is the nemesis of ham radio. And when strong winds blow up here, unlike KV4FZ, I don't have to go hunting for MY antenna in the Caribbean Sea. "Doc," AF2Y (Always Friendly 2 You)

I like the idea of open source so HAMS can make changes to the code for
their own particular rigs.

Jeff, are you making the source code available to allow anyone to modify for
YAESU, etc rigs?

Where is Porkbutt? It looks like the South Carolina blow hard has had no success in getting his troops to mount a canpaign to get him out of the ham radio reject bin.

What is the deal? It seems Dr Hate AF2Y with all his letter writing ability and charm can not get his old buddy off the hook.

I have a idea that all his old qrming buddys are not going to stick their neck out for their fallen master. In fact there is a rush to save their own necks. It seems all of them including AF2Y, have received letters from Mr R to knock off their qrming activities.

So, it looks like 14313 will be a peaceful frequency into year 2000. It is sure nice !!!

I believe there's a difference between a protocol specification (which
is what was proposed) and an API (which is what you're apparently
describing). A properly designed protocol is both designed and
specified in platform-neutral terms, and describes the exchange of
messages between agents. In the case of a remotely-controlled
radio, the server and the client may be on different systems,
in the case of a locally-controlled system, the server and the
client may be on the same host. Either way, the same functionality
could be available.

Once a protocol is defined, client libraries which provide APIs
would follow, as well as servers.

> Me, I'd prefer as thin a wrapper as possible, and as simple as
> an interface as is possible, probably with caps bits. In the API, though
> I think the issues such as what you call in what order, and how things
> exactly work need to be defined super tightly, obviously -- you know.

The real challenge to defining a general radio control protocol
(or API) is developing a syntax which adequately enumerates and
provides control and status for radio features. If done properly,
a general-purpose UI framework could be built, which configures
itself after enumerating radio features. Actual details of radio
control are handled at the server, perhaps through the use of
Java servlets.

Agreed, the protocol needs to address any sequence/state
issues, but I do not believe it is practical to expect all
clients to behave properly. So, it is important to understand
all major states of a radio and associated features and
provide an adequate set of exceptions to cope with ill-behaved
clients.

Keep in mind, a good remote radio control protocol probably allows for the encapsulation of audio/video streams using standard formats (mp3, GSM, wav, mpeg, etc.).

Can I suggest /dev/ttyS0? The cuaX devices are obselete and may not
be supported by the linux kernel for much longer. (I'm not even sure they
are supported in 2.2.)

Siegfried Rambaum <siram@lightlink.com> wrote:
>You still have to wait 383 days for that. As no Year 0 (zero) existed,
>the 20th Century only will be completed on 31 Dec 2000, 24.00 hours.
>01 Jan 2001, 00.00 hours will mark the beginning of the 21st century.

It's said that Christ was born 1 BCE (not 1 AD). The *beginning* of 1 AD marked one year after His birth. The *beginning* of 100 AD was 100 years after His birth. The *beginning* of 2000 AD will be two thousand years after His was birth. The year 1 BCE is taking the place of the absent Year Zero:

```
//-----+------+------+------+------+----//
1BCE 1AD 2AD 3AD 4AD
```

>01 Jan 2000 marks the beginning of the last year of the 20th Century, and
>of the last year in the second millenium.

Only if Christ was born at the beginning of 1 AD, but it's claimed He was born a year prior to that, which means at the beginning of 1 AD, He was already one year old. At the *beginning* of 2000 AD, He will be 2000 years old: 1 BCE to 1 AD is one year, 1 BCE to 2 AD is two years, 1 BCE to 3 AD is three years, ..., 1 BCE to 2000 AD is 2000 years.

>It is just like taking a loan of 2000 dollars. This loan will be deemed to
>be repaid only after you paid the last cent of the 2000th dollars, not
>after the 1999th dollar....

And if you continue paying, the first penny you pay after that, $2000.01, will be equivalent to the first day of the Year 2000, i.e., 2000/1/1.

Again, for counting purposes, 1 BCE is playing the role of the non-existant Year Zero, from where our count would have begun.

Emotions aside, study the above number line.

Merry Christ-Mass,
Jeff KH6O

5457. Re: "LENNY HAS SALT WATER" BOO HOO WHINES AF2Y

This is no surprise to me Sir. That antenna Dr Hate uses is just a economy type antenna to try and get "something for nothing" doesn't that sound like the cheap person AF2Y is? He is still running a old Drake tube rig. He has been operating on the "cheap" since he got his license. It almost killed him to buy the little one tube amp he uses. He had to sneak it past the Chinese Wife. She shouted at him when he was coming into the little house he exists in , "What you bring in house, you sneaky riddle Amelican, don't you rie to me! He said "nothing dear", then under his breath he remarked, "This gook is going to get me". To make a long story short, Lenny just beat the amp, the "Cloud Warmer". The old Drake antique, and the schmuck. Ain't life wonderful!! Juicelikaf2ysux.

Nah, Ol Burp just can't help it you see. He has nothing of substance to say, yet he says it repeatedly. He grouses, but makes no positive contribution. So of course he is the "typical" ham he always talks about. But he tries to project it on to others so it will give him a sort of "just pumped the neighbor's cat feeling".

And the fact that he can't help this action is what really ticks him off. He used to make informative contributions way back on the RIME network but then some of his Cap Code buddies had enough of his attitude and turned a cold shoulder to him. And what you read today is the product of it all. But that's life on the Code. Right Burp?

73 & Gud DX (any way you like it, but Burp's)

5474. QST issues (Sept/Oct 99)

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-18 00:00:00 UTC
From: Jatin Pandya <jatin.pandya@usa.net>
Message-ID: <385BDEE0.3E3B7C13@usa.net>
Source record: 124900

I am looking for QST issues of September and October 1999. Actually I need the article by Bob Larkin (The DSP-10: An All-Mode 2-Meter Transceiver Using a DSP IF and PC-Controlled Front Panel) Part-1 and Part-2.

The pages are: September 1999 - pp 33-41
October 1999 - pp 34-40

If someone can copy them for me and mail to me, I will appreciate it. I will pay for the postage. Even scanning them and sending as email attachment will do.

Thanks,

Jatin Pandya

OF ALL THE NOIVE! This morning I heard snobbish W7CPA, after returning from Sarasota FL on a business trip, say that it's a nice place to visit but declines living there. WHAT? Sarasota is one my favorite cities; I've been there about a dozen times. I've also been to southern Arizona with the emphasis on Tucson as well as Randy's area in Phoenix and also Scottsdale, Sedona, Tempe and Carefree. PHOOEY ON PHOENIX. No one in his right mind lives there in June, July and August-NOBODY! At the end of June '98, my wife and I spent three days in Tucson attending a wedding and although it was 103 deg. with a 4% humidity, it was beautiful and far from oppressive. Then we made a BAD MISTAKE by spending five days at the Princess hotel in Scottsdale,next door to Phoenix. HELLS BELLS! Average temps. were 112 with about 12% humidity. SHEER MISERY even while lounging at the pool drinking more than a dozen 8 oz. glasses of water and a few hard drinks too. And this to Randy is preferable to Sarasota? He's nuts. I've been to Sarasota also in June, July and August and yes it's hot and humid but breezes off the Gulf of Mexico ameliorate the situation. And I found that from Aug.15th to the 31st, it's cooler there than in North Jersey. I call Sarasota the San Diego of the south east because when one flies into it one gets the same picture out the plane window as one flying into S.D. and I know since I've been there too. What kind of beaches has Randy in Phoenix? IMAGINARY ONES. On the other hand, Sarasota offers Lido Beach on St.Armand's Key; Siesta Key Beach on Siesta Key and beaches on Longboat Key. Also there's a small one on Bird Key which I call, "a son of a beach." Ever hear of St.Armand's Circle? Talk about swanky, something Phoenix ISN'T! Top drawer stores, boutiques and RESTAURANTS. The cream of the crop, folks. There are two such restaurants we frequent on every visit; Hemingway's and Charlie's Crab. Prices are high but you never tasted such outstanding food. What's in Phoenix? Who cares-it's too damn hot to go out anyway! While we were in Scottsdale, the only decent restaurant we visited was Don and Charlie's on Scottsdale Road. Excellent but the rest couldn't hold a candle to places like the two I mentioned plus Marina Jack's as well as several in the Quay Mall, both right on Sarasota Bay. Night life in Sarasota jumps; night life in Phoenix creeps. God is it dull when compared to night life in another place in the southwest called Las Vegas. W7CPA doesn't know what the hell he's talking about and that cowboy ought to confine his stupid comments to his dull pals instead of insulting my beautiful Sarasota over worldwide heard shortwave radio. He owes everyone living in Sarasota as well as a person liie I who loves it, an apology. The best part of Phoenix is Skyway Airport because it gets one the hell out of there, FAST!

Siegfried Rambaum <siram@lightlink.com> wrote:
>You still have to wait 383 days for that. As no Year 0 (zero) existed,
>the 20th Century only will be completed on 31 Dec 2000, 24.00 hours.
>01 Jan 2001, 00.00 hours will mark the beginning of the 21st century.

It's said that Christ was born 1 BCE (not 1 AD). The *beginning* of 1 AD
marked one year after His birth. The *beginning* of 100 AD was 100 years
after His birth. The *beginning* of 2000 AD will be two thousand years
after His was birth. The year 1 BCE is taking the place of the absent
Year Zero:

//-----+------+------+------+------+----//
1BCE 1AD 2AD 3AD 4AD

>01 Jan 2000 marks the beginning of the last year of the 20th Century, and
>of the last year in the second millenium.

Only if Christ was born at the beginning of 1 AD, but it's claimed He was
born a year prior to that, which means at the beginning of 1 AD, He was
already one year old. At the *beginning* of 2000 AD, He will be 2000 years
old: 1 BCE to 1 AD is one year, 1 BCE to 2 AD is two years, 1 BCE to 3 AD
is three years, ..., 1 BCE to 2000 AD is 2000 years.

>It is just like taking a loan of 2000 dollars. This loan will be deemed to
>be repaid only after you paid the last cent of the 2000th dollars, not
>after the 1999th dollar....

And if you continue paying, the first penny you pay after that, $2000.01,
will be equivalent to the first day of the Year 2000, i.e., 2000/1/1.

Again, for counting purposes, 1 BCE is playing the role of the non-
existant Year Zero, from where our count would have begun.

Emotions aside, study the above number line.

Merry Christ-Mass,
Jeff KH6O

<<Wrong! Christ was born either four years before he was born or four years
after he was born. You say he was born one year before he was born which
doesn't correspond with expert borners who have studied it. How can one be born
before he was born or after he was born? Isn't everyone born on the exact day
he was born unless one is born again while never having died previously which

in itself is an outrageous concept? I am totally confused by the entire situation and am so disgusted I'll have a cup of Maxwell House instead of Chase and Sanborn. And what does this born stuff have to do with Guglielmo Macaroni? He is the subject of the piece, isn't he? Thank God he was not raised under the rule of Benito Mussolini but instead born free to conduct his experiments on the conductivity of linguini. Also we can thank God he was not stillborn or else we'd we be communicating by seminole which is marked by one guy waving flags to another or is it flashing lights? And in case you're interested, 1/1/00 is the beginning of the 3rd Millennium. not the 2nd. From 0-1000 was millennium one; from 1000-2000 will be millenium two and from 1/1/00-3000 will be millennium three. And something else to ponder. Last night on DISCOVERY there was a paleontologic program delving into the EVOLUTION of man. I said EVOLUTION! How can we, going into the third millennium still believe that God created man..poof..here comes ADAM and out of his rib cage came EVE and a trillion people came forth out of that onion? Man developed by millions of years of evolution and there is just one reason why man is at the top of the vertebral totem pole-to pay homage to the all encompassing force that set everything in motion. Saint Thomas Aquinas in the 1200s put forth excellent reasons to substantiate the existence of God and there's one which to me is irrefutable. If anyone denies it, I'd like to hear his rationale. Tommy called postulate one: THE IMMOVABLE MOVER. What does this mean? It's absolutely elementary and brilliant and goes like this. Let's accept the dogma of the atheist who says that everything we know as real was always here. Nothing in the material word should be considered as an attribute of God's. Okay now I'd like you to form in your mind a photo of our solar system i.e the sun and planets ; the same kind of picture you'd see in textbooks or on the Internet. Now what's missing from that picture aside from three dimensions? The one thing which Aquinas used to PROVE the existence of God. MOVEMENT! No planet is stationary. Let's take Earth for example. Our orb not only ROTATES around the sun once every 365 days but ROTATES on it's own axis once every 24 hours. Every planet has its own period of time for those two accomplishments. We might assume that those planets were here forever BUT what created the necessary rotation to keep them forever existent and intact? Some force had to "SPIN THE TOP" and that force had to be God. Do we think of God as a moving entity? Hardly and so we have the IMMOVABLE MOVER.
So simple but so brilliant, isn't it? >>

"The Dying Man"

A fellow went to a doctor who told him that he had a bad illness and only a year to live. So he decided to talk to his pastor. After the man explained his situation, he asked his pastor if there was anything he could do.

"What you should do is go out and buy a late '70s or early '80s model Dodge Pickup," said the pastor. "Then go get married to the ugliest woman you can find, and buy yourselves an old trailer house in the panhandle of Oklahoma, go on to a traffic net, call CQ DX,
cheat with another hams wife. ."

The fellow asked, "Will this help me live longer?"

"No," said the pastor, "but it will make what time you do have seem like forever."
Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

That piece of shit scumbag asshole WA9KJI was on 14.313 crying about being excluded from the Liberty Net that he hates so much. What a moron. David Castle spends years upon years jamming, QRMing, and lying about the Liberty Net, and then he expects to be welcomed into the Liberty Net with open arms???
What an asshole!

LOL LOL LOL !!!!

It's bad enough that the people on 3950 have to put up with WA9KJI's bitching and moaning about "poor widdle innocent me ... everyone is unjustly persecuting and discriminating against me", but now we have to hear this crap on 14.313.

David Castle, if you're reading this, I hope the hell that the Liberty Net NEVER allows you to check in. I don't blame them ONE BIT for excluding a piece of shit like you. YOU made your bed, and now YOU have to lie in it. Serves you right,
you little bastard!

Well, if you thought "again" would it be the second time you did it today?

5485. Diehard DXer - Funny Story

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-18 00:00:00 UTC
From: "S.M.A.R.C." <N7RCM@POBOX.COM>
Message-ID: <83hf7l011rr@enews3.newsguy.com>
Source record: 124911
Cross-posted to:
rec.radio.amateur.dx,alt.ham-radio.marketplace,rec.radio.swap,rec.radio.amateur.misc,rec.radio.amateur.equipment

THE DIEHARD DXER

5:00am - Fellow DXers arrive. Crawl out of nice warm bed.
5:30am - Toss all gear into truck
5:45am - Get gear out of neighbor's truck, and put it in yours.
6:00am - Get speeding ticket while hurrying to get to the mountain.
7:15am - Get to "the site," near top of mountain.
7:16am - Start unloading gear.
7:20am - Get poked in eye with 20M vertical by fellow DXer.
7:50am - Arrive at hospital to get eye patched up.
8:30am - Get another speeding ticket while heading up to site.
8:45am - Arrive back at site. Unload antennas yourself this time.
9:45am - Hike up to mountaintop. Pass out from exhaustion.
9:50am - Wake up to smelling salt, and laughter from fellow DXers.
10:00am - Put up antennas, and set up rigs.
10:15am - Fire up rig, call CQ for half an hour; no replies.
10:46am - Hook up coax to rig...
10:48am - Realize that finals are wasted in main rig.
10:50am - Hook up back up rig, this time with coax.
11:00am - Yell CQ, rare VP8 comes back; antenna falls down...
11:15am - Wake up to smelling salt, fellow DXers shaking heads.
11:30am - Guy Antennas.
12:05pm - See long list of QSOs made by fellow DXers.
12:06pm - Notice rare VP8 in fellow DXers logbook.
12:07pm - Beat fellow DXer over head with logbook.
12:09pm - Restrained by rest of DXpedition team...
12:30pm - Back to rig for another attempt.
12:35pm - Nearby lightining strike kills receiver. Notice wet pants...
12:36pm - Look for shelter
12:38pm - Find Cave!
12:41pm - Watch antenna get struck by lightning while hiding in cave.
12;42pm - Wish it was fellow DXer's antenna, or him that was struck...
12:45pm - Realize you're not alone in cave...
12:46pm - Pick up rally big rock...
12:47pm - Mauled by large angry bear.
12:50pm - Get pulled out of cave by fellow DXers.
1:05pm - Finally get talked into receiving medical treatment.
1:30pm - Arrive back at hospital.
1:55pm - Receive series of painful rabies shots, and multiple stitches.
2:30pm - Get out of hospital and return home.
2:35pm - "Explain" stitches and eyepatch to wife.
3:00pm - Realize gear is still up on mountain, with bear.
3:01pm - Wish fellow DXers were still up on mountain, with bear...

3:03pm - Consider taking up drinking.
7:00pm - Get phone call from DXer buddies.
7:05pm - Agree to go on DXpedition again tomorrow...

This is not my original. I saw it in a Feb '98 issue of World Radio and thought it would be neat for it to be sent around again.

Much easier to do native code access in TCL/TK. You can write native
libraries and access them from TCL easily. Personally I would much
prefer a TK app to a Java app for running on linux.

Open source for all types of ham software would be a good idea.
So if the author loses interest, their work doesn't die with them.
Let someone else work on it. Maybe someone else will learn something
from it. Lots of ham radio spirit in there.

I was listening today when LENNY , K2IVX was chatting with a nice gentleman from 9 land and was given a great signal report. The conversation concluded and then AF2Y called the same station and told the gentleman that he had the so-called best antenna in the world. The gentleman basically told him that he must be taking some of Jimmy Dales Xanax to make a statement like that. The man tried to explain to AF2STUPID that the signal that Lenny was putting out was not only three s units stronger, but Lenny had super audio and AF2STUPID was distorted and wide. So much for that cloudwarmer!!! Doc not home !!!!!

Have a Jolly Polly Christmas by KC8JBO

Have a jolly, Polly Christmas;
He's the asshole of the year
I don't know but he's a misanthrope,
and has two dumbo elephant ears.
Have a jolly, Polly Christmas;
And when you check in on the freq
Say crap about people you don't know
to everyone you meet.

Ho, ho, the misanthrope
rock-stupid as can be;
Polly just waits for you;
QRM 'em once for me.
Have a jolly Polly Christmas,
and in case you didn't hear,
Oh by golly, have a jolly,
Polly Christmas this year.

Can you believe it? After the barefoot transciever and G5RV antenna
of Lennys, K2IVX, beat AF2Y whith his 800 watts and his chintzy "CLOUD
WARMER". antenna, A cheap thrown up scrap wire contraption in his
little back
yard, in a fair and square signal comparision, Dr Hate whines "NOT
FAIR, LENNY HAS SALT WATER AROUND HIM", 'HE LIVES ON A ISLAND". It is a
shame that this SALT WATER TAFFY CANDY ASS , AF2Y can't take a beating
like a REAL man, but you know forum, he is not a man , he is a whiney
little kid who makes up a alibi every time he gets the shit kicked out
of him! And guess what ,Lenny with his G5RV and 100 watts did just
that!! AF2Y Charles "WHINEY" Swartzbard, needs to..

It was really funny on twenty meters today. Lenny, K2IVX who runs a G5RV antenna, and lives a few neighborhoods away from te infamous DR Hate, AF2Y, who is always on this forum bragging about a cheap wire beam he calls "The Cloudwarmer". Well, Lenny was talking to this Gzero call amateur who was giving him a signal report. AF2Y a confirmed Butinsky, broke the frequency for a report compared to Lenny.. YOU KNOW WHAT? The G5RV beat the "CLOUDWARMER" that the Clifton fool braggs about on this forum and to any onyone else who will listen to him. So much for the "CLOUDWARMER" it got beat by another antenna, with the guy running 100 watts in the same neighborhood, instead of the 800 watts the Clifton idiot, AF2Y runs. The fool should hang his head in shame and SHUT UP!. (But he won't) He is crazy don't you know... Thats why.... Rileygotcha

Gentlemen and I use that term cautiously; AOL has a very interesting article about an 18 year old guy from Cape Coral,FL who was using SOUP81 as his screen name and was tracked down as the fool who had sent a threatening instant message to a female student at Columbine H.S. which resulted in the school closing for a few days. Obviously a kook from FL isn't about to attack the Colorado high school but the FBI came down on him with a vengeance. The "joker, if convicted, could get up to 5 years in the pokey and a $250,000 fine. I would have copied and pasted it here for all not on AOL but the article is copyrighted and I'm not in the mood for the consequences of ignoring it. But all take heed..keep any or all threats off the I-net. You may be joking but the Feds take it VERY VERY seriously. It's interesting to point out that a server pledges to keep your personal info CONFIDENTIAL but as soon as the FEDS contact one, it will acquiesce and FAST. Please..this board can be used to joke and poke and slap and mock but let's realize its limits. KEEP THREATS OFF IT.

I was listening today when LENNY , K2IVX was chatting with a nice gentleman from 9 land and was given a great signal report. The conversation concluded and then AF2Y called the same station and told the gentleman that he had the so-called best antenna in the world. The gentleman basically told him that he must be taking some of Jimmy Dales Xanax to make a statement like that. The man tried to explain to AF2STUPID that the signal that Lenny was putting out was not only three s units stronger, but Lenny had super audio and AF2STUPID was distorted and wide. So much for that cloudwarmer!!! Doc not home !!!!!

I recall his name is Larry and I know him from the 3.950 nightly "hate-a-thons." I can't remember his old call since I haven't been on that frequency for a year but I think he was from the New York metro area who relocated to Roanoke because there were less Jews there. Lo and behold-call it Riley magic! He spoke to me like a gentleman today on 14.300. I can't believe it and being the gentleman I am, I reciprocated. Did he come to realize that Jews aren't subhuman as was and is the prevailing thought on 3.950 or was it Riley who made him realize that discussing it might be dangerous to one's ticket? 14.313 is becoming so refined it'll get to the point whereby one will not be able to transmit on it without a tux.

HELLO every one !

I have one good question.....
I search for the modification for unblock cellular band,(for FT-8000
yeasu)
but i never found the answer for that!
please someone know that ?

thank dal

Have a Jolly Polly Christmas by KC8JBO

Have a jolly, Polly Christmas;
He's the asshole of the year
I don't know but he's a misanthrope,
and has two dumbo elephant ears.
Have a jolly, Polly Christmas;
And when you check in on the freq
Say crap about people you don't know
to everyone you meet.

Ho, ho, the misanthrope
rock-stupid as can be;
Polly just waits for you;
QRM 'em once for me.
Have a jolly Polly Christmas,
and in case you didn't hear,
Oh by golly, have a jolly,
Polly Christmas this year.

<<Gee, what a beautiful poem. Congrats. I mean can you imagine that slob walking around in vestments in church on the 25th? He's an elder you know. An honorary position indeed. And he thinks he's saved and Jesus loves him! Good Golly Mr. Polly, how wrong he is. And they teach from the pulpits about the hypocrisy of the Pharisees and Saducees; apparently men of the cloth never saw W4FQF in action for the past decade but then again, would it make any difference?

Doc speaks the truth. The Feds and Local or State Police all take threats seriously. Even much of the foolishness and name calling on this group can constitute harassment. As such, it is a class 3 misdemeanor CRIMINAL offense, here in PA. Those with motivation could easily swear out a complaint which could compel a preliminary hearing if it occurs within the state. Out of state, it becomes a FEDERAL crime! AOL, and in fact, most ISP's will roll over on you in a heartbeat rather than ignore a subpoena.
Please reply direct by removing nospam from my address...

Thanks,

Brian

Hi,

I'm looking for a preferably unfinished (UDI) thumbhole stock for a Mauser
98 action. I am not too concerned about the barrel channel because I plan
to use glass bedding. Is there any used thumbhole stocks out there ?
Please respond to :
Jim at nj3t@surfshop.net

Thanks in advance,

Bob, if you desire credibility, you have to provide factual statements
that can be confirmed by other parties. Above you claim you did not
get the truth -- in regards to what? What was asked? What were you
told? Who told it to you? You're not just smearing the League --
you're smearing a fellow ham (who happens to work for the League).
Details, please.

Chjeck the baud rate as Tom mentioned. I made a mistake when setting up my Kantronics; in the setup you are prompted for a baud rate and I input 1200 baud - however the rate they are referring to is the transfer rate of pc to tnc, which in my case should have been 9600, not the overall rate sent tnc to radio. Also verify you have sufficient volume to the tnc; I set my radio to 'comfortable listening' volume and it works fine.

If all else fails, call Kantronics. Got so frustrated when setting mine up that I called and they were fantastic! It was around their closing time (oops, forgot about time differences) and the receptionist found somebody still there and put him on the line and he walked me through the whole setup. Must've stayed beyond quitting time too! Nope, you just don't find enough customer service like that anymore, they earned my gratitude, respect and future business.

Good luck getting things working.

73,
Howard

That is very true. Tcl/Tk offers C standard interface calls, that begin
with Tcl_ or Tk_. You can write your own C-code extentions to create a
special widget, compile it to a loadable library (libxxxx under Linux,
.DLL under Windows) and then include it, "load" command under Tcl, in
your source. That makes the language very extendable. That is the main
power of Tcl/Tk. There are a ton of packages for many diferent widgets,
metering, dial, graphing, etc available on the web.

RT is apparently using "destructive copy protection" where a sector of the original disk is unformatted and the software searches for that condition before accepting as original. This will rule out the image file being used to install from the laptop's hard drive.... The sharing across the network of the floppy sounds like the best deal going, unless RT systems put a block on accepting a redirected source.

If the ADMS-x software functioned as well as the copy protection, it would be nice.....

My best guess is that they use a check for a specific block. I have
used total disk copy programs like the old game hack programs with
reasonable success to archive the floppy. What is a real PITA is if
you defrag the hard disk you can disable the program.

Not withstanding what some west coast wags say the "E" version does
have some signifigant warts. I agree if RT spent as much effort on the

core code as they spend on copy protection it would be a truly great
piece of software.

Does anyone have any experience converting Commercial Radio microphones over to amateur use?

I have both a G.E. mobile mic and a G.E. (made by Shure) desk mic, that both have unshielded wire (strange) and the mobile G.E. has some sort of single stage pre-amp.... Or maybe it is the power supply for a condenser mic? Not sure.

Can anyone advise?

It's getting old driving around talking with a Shure 444 on my HF rig! He he!

Thanks chums

Well, you are almost correct.

You must use the ULS and dial in on the FCC number and be using Netscape to do anything on the Internet. Second, the 610 is still valid till Feb. 2000, but you must put your TIN number on it somewhere. And the 605 is easy to get anyhow, so why not use one.

I was monitoring 14.313 this morning and heard Polly from Fisherville whine and cry for 15 minutes about the "quarmers" and one of them "sounded like AF2Y" and how the FCC won't do anything unless the "quarmer" identifies, what a joke. I guess K4OKA identified everytime he played the "Pork Butt Song" and the FCC notice he has that keeps him off of the air dosen't exist. Poor Polly is also a liar, he was in QSO with a weak station and was boasting about how he has "almost three acres", what a load. When in the hell does 1.598 acres equal three.

Well Mr. Getback, ole Jimmy Dale was arrested for trafficing in drugs and his son was identified by the Tampa sherriffs office as the "Suspect". Hope ole Jamming Dale put some iron bars over the windows to keep his son JR. out of his house during his vacation. He must have a great job with the labor force of america . No wonder the stupid fool broke into his fathers home. Can you imagine your own son breaking into your home while you were on vacation.

I am thinking about buying a new ht in the next few months. I have looked on the net and in the HRO and AES catalogs for ht's and I really like what I have read about the ADI AT600 radio. I'm just wondering if anyone has one and what their likes/dislikes are on it (before I lay out the cash) I live in the middle of nowhere and can't just walk into a ham shop to get a hands on look at one. Thanks in advance!!!

Good question, very good question. I did not call the League and ask because of past experience. The last time I tried that, I did not get the truth--though it concerned another matter.

Thus, to this day I do carry a bias inside that asking them is not a way to reach truth. Actually, I was hoping Dave Sumner would see fit to make a denial, admission, or explain. Failing such, I assume there is merit to the allegation.

So let's hope ARRL weighs in with some enlightenment to replace an allegation with facts.

No, you DUMBASS. It clearly states that a "stable" was built later,
which would be an improvement on his Ma & Pa Kettle domicile.

>Also, 1.6 acres is a very nice sized lot. It sounds like he has a nice
>spread over there.

The only spread Polly has is the line of bullshit he continually spews
both on the air and in this newsgroup.

So's your wife. In fact, your wife's so skank, when she goes swimming,
schools of fish follow her around.

Hey Youngblood, didn't you have to pay a fine of $2,500 for reading financial disclosures, police reports and mortgage foreclosures on ham radio? I could swear it was you. In the March QST I believe there was mention of a Vero Beach ham who was CITED for such actions. Then the April, QST mentioned that a Florida ham had been hit for 2.5K. Although your name and call were not mentioned as a result of getting up on your hind legs before the FCC and going woof, woof when told to speak as well as rolling over to play "dead dog" and fetching a stick too, I do believe you were the subject of both blurbs. Care to deny it, hypocrite?

I generally don't respond to drivel from the noted stupid people in this newsgroup, but as a friend of Polly's, I have to ask..... Do you have a photo? If so, please post it or e-mail it to me.

130 grand buys a pretty nice place in rural Tennessee, and I, along with many of his multitude of fans, would like to see Polly's new place. It appears to be a combination house and stables, which sounds really interesting.

By the way, this may come as a complete shock to the very disturbed posters, but 1600 square feet is certainly plenty for two retired individuals who don't want to maintain a large residence. Again, Polly shows that he is intelligent and has good judgement. All the while, a few disturbed people use the same information to amuse themselves as if they have somehow dug up "dirt". Who else but an extremely bitter, disturbed individual posts as many as twenty hateful messages each day?

As for this thread, if it's fun for you, please keep this flattering information about Polly coming. As you may eventually come to learn, nobody cares about any of it but fans of Polly, like me, who cannot hear enough good things about this fine gentleman who is a great friend to many people.

pussy belly, what did you say? Please try english and use a spell checker. Oh I forgot, the turd does not know how to read so how can he use a spell checker.

wood (would)?
dint (didn't) ?
licents (license)?
bored (board)?
Many more but what the hell, don't want to wast bandwidth on the turd.

Geeze, I wonder why the Drunk Overfelt (what kind of a name is overfelt, anyway? It sounds like he was molested by his parents.) and every other station I've ever heard from WV speaks with a certain dialect. This idiot's assertion is that I attended all of my schooling in WV. Now why is it that I don't use that same dialect. Hell, KBX, Polly, and others sound like they came straight from the set of the movie "Deliverance." These undereducated illiterates would not comprehend why. Yes, I indeed acheived a Bachelor of Artrs in 1987. I am currently working towards a SECOND degree in Electronics. These idiots were lucky to get out of the primary school.

Mr PorkButt Gone Herbie Still Here:

I agree , I would like to hear more about this "POLLY" person. I have heard him on the radio and love to hear him get after the gasbags. Now I find he is a person who owns property, stables and farms.

I can under stand the jealousy among these renters, note payers, and just plain losers.

I guess the fact that someone else has property and money gets to them.

Like you, I would like to hear more about the holdings, real and personal, of this wonderful person "Polly"!!

It just seems that the Public can't not get enough information about
that "Star OF Stars" "POLLY"!! THE MR, Wonderful, George Ashley, W4FQF!!

"FATASS" Wisman is a loser, no one cares, Porkbutt is out of it, and
was a blow hard with no property, holdings, etc. (HE RENTED)

So lets hear more about the wonderful "POLLY" , who is retired on
acreage in West
Tennessee, living the life of Riley!! "The American Dream" "POLLY"!!

Dear "Gotcha"

I am sure we'll be hearing more. Polly's success and popularity, for some reason, has them all on the defensive. I don't understand why, if it bothers them so much, they just don't work hard themselves and get their own piece of the American Dream.

I finally have the radio mods archive back up on my web site. It contains several thousands mod files, for all types of scanners, ham radios, and even some cbs.

http://www.qsl.net/w8mmq/ and click on the Radio Mods Archive link.

If you have any new mods, email them to me and I will include them in the list. Thanks.

5580. Limited Space Antennas

Newsgroup: rec.radio.amateur.misc

Hello everyone,
I have a dilemma. I will soon be moving into a dorm at my college. I want to have some of my equipment with me (2m, 440, 10m, scanner). I have an idea as to hot I will set up my vhf and uhf station, but I am stumped as to 10 meters.
Is there a 10m antenna that I can use indoors that will "get out" reasonably well and not kill all of the tv's in nearby dorm rooms? I will not be running more than 20 watts (no room for the amp). Any suggestions are welcomed, and needed!

Newsline 1166

Newsline report number 1166 with a release date of Friday, December 17th 1999 to follow in

5-4-3-2-1.

The following is a Q-S-T. Six meters opens with the best winter D-X conditions in forty years, the A-R-R-L says it
will appeal further to expand P-R-B one and will cellular phones soon replace ham radio as the best way to get
help? All this and more on Newsline report number 1166 coming your way right now!

(Billboard Cart Here)

**

It was 1959 all over again in 1999 as six meters gave hams world-wide a pre-Christmas opening reminiscent of one
that occurred forty years ago. For hams in the United States, Saturday, December 11th brought a coast to coast
opening that was armchair copy. Take a listen:

Daves DX audio Here

That was Newslines neighbor Dave Booth, KC6WFS making a contact with K3UM in Williamsport Pennsylvania while
running only about one watt out of an M-F-J six meter SSB transceiver. In simpler terms, that QSO amounts to
about 2450 miles per watt! And that was not the only DX that Dave Booth heard or worked. Take a listen:

Daves DX Audio Here

But KC6WFS was not the only stateside ham to report amazing 6 meter DX conditions. Dave Bernhardt, N7DB, in
Boring Oregon tells over the VHF Reflector of his unexpected mid-winter DX. Dave says that he began working
stations at about 17:40 UTC. The first station that Dave contacted was Bruce Sternstein., K2RTH in Miami
followed by Austin Regal N4WW in Apopka Florida. He then began hearing stations further North and worked Dennis
Lansa AA3ID in Frisco North Carolina, Mario Rotundo K2MUB in Swan Lake New York and Elbert Gross, K2SPO in

Rochester.

For stations in the Mountain states to the East Coast an opening on Sunday December 12th provided an almost
repeater quality path up to Alaska. Brian Allen, N0VSB in Elizabeth Colorado was one of the first to hear about a
half a dozen Alaskan stations including KL7NO. He says KL7NO was 59 plus 20 DB for almost an hour.

Moving East, Dave Calvert,KB0PE, in Saint Louis Missouri reports working Alaskan stations KL7NO, KL7FZ and NL7Z
before -- as he puts it -- somebody stole the whole 6 meter band. Dave's contacts took place between 21:40
and 21:57 U-T-C just before 6 meters went to sleep.

But KB0PE was not alone. Even further to the east in Pasadena Maryland, Fred Heath, N3XBG says that he was
able to work NL7Z on 50.135 on only his second try. Fred also reports hearing KL7FZ but says that he was
generating a huge pile-up on 50.125 MHz.

The openings continued into Monday December 13th with reports that Ron Jay, WH6O at Ewa Beach Hawaii was
heard working stations in California, Mexico, New Mexico and Alabama. Reports from overseas like that of New
Zealand's Mike Foubister, ZL3TIC who worked numerous Western United States and Mexico satations also says a
lot. It says that this is one of the best surprise six meter winter DX seasons ever recorded. (Newsline)

ARRL SEEKS PARTIAL RECONSIDERATION OF PRB-1 PETITION DENIAL

The A-Double-R-L will continue its battle to minimize or eliminate restrictive laws that keep hams from putting up
antennas. This as it decides to file for reconsideration on a recently denied request to have the FCC expand the
scope of PRB1, Rick Lindquist, N1RL, of the ARRL Audio News has more:

The ARRL will ask the FCC to partially reconsider its dismissal of RM-8763,
the League's 1996 petition that sought to strengthen and clarify the limited
federal preemption policy governing Amateur Radio antennas known as PRB-1.
The League also agreed to fund a Florida antenna case with PRB-1implications.

In its petition, the ARRL wanted the FCC to prevent states and localities from enacting provisions that frustrate
the intent of PRB-1 or make it costly to apply for permission to erect an amateur antenna. The FCCdismissed the
petition in its entirety November 19 and indicated it was unwilling to go beyond what is already spelled out in PRB

1. "We continue to believe that the standards the Commission set, that is 'reasonable accommodation' and
'minimum practicable regulation', have worked relatively well," the FCC said.

The League will ask the FCC to reconsider two important aspects of the original petition. Meeting December 4 in
Texas, the ARRL Executive Committee voted to instruct the League's General Counsel to seek reconsideration of
the FCC Order regarding the application of PRB-1 to restrictive covenants and to excessive costs that localities
might levy or require in order to
install an antenna structure.

In its dismissal, the FCC pointed out that PRB-1 excludes restrictive covenants in private contracts as "outside the
reach of our limited preemption." The Commission added, however, that it "strongly encourages associations of
homeowners and private contracting parties to follow the principle of reasonable accommodation" with respect to
Amateur Radio.

In addressing zoning laws and application costs, the FCC dismissal Order asserted that the PRB-1 principles of
"reasonable accommodation" and "minimum practicable regulation" already provide sufficient guidance to
communities. Local zoning ordinances should be written so as to "not impinge on the needs of amateur operators to
engage in amateur communications," the
FCC said.

In a related action, the Executive Committee agreed to have the League fund an appeal in a Florida Amateur Radio
tower case. Lenard Persin, WB4HZQ, had applied to Seminole County for a special exception to a 35-foot tower
height limit to build an 80-foot tower on his nearly one-acre lot. Initially granted, his application was later denied
after a neighbor appealed. Persin
appealed in federal court, and the ARRL filed a "friend of the court" brief in the case. On November 2, a US District
Court in Florida ruled for the County, saying it had "properly balanced Mr. Persin's interests with the needs of the
community."

In its November later dismissing RM-8763, however, the FCC declared that, given the express language of PRB-1,
"it is clear that a 'balancing of interests' approach is not appropriate."

In addition to filing the reconsideration request, the ARRL 's President Rod Stafford, W6ROD, has appointed a
committee to study how the League provides support for antenna cases. (ARRL)

**

FCC INVESTIGATING SOUTH CAROLINA EXAM SESSION

Acting on information aparently supplied by the ham radio community, the FCC has begun an audit of a South
Carolina ham radio test session. Speaking on Hap Holly's RAIN Report Enforcement Log, the FCC's Riley
Hollingsworth K4ZDH, that there have been claims of some major problems with this particular exam gathering:

Hollingsworth Here

So far the FCC has sent letters to the VEC's that conducted the session asking them to verify the authenticity and
accuracy of the paperwork. They have also directed for hams who attended a W5YI session to retake their tests
at an ARRL sponsored VE test. (FCC, RAIN)

**

FCC COMMERCIAL RADIO FORFEITURE WATCH

Hams are not the only ones feeling the FCC's sting. A $4,000 fine has been levied against WPBZ FM of
Indiantown, Florida. The FCC alleges that WPBZ broadcast a telephone conversation without first informing the
party to the conversation of its intention to do so.

Meantime, Entergy Security Corporation has had its FCC invoked fine reduced from $12,000 to $9,000. Entergy
had been charged with acquiring control of two microwave stations without prior Commission approval. (CGC
Communicator)

Break 1

This is Newsline, heard on bulletin stations around the world, including the Ashland Amateur Radio Club repeater
serving Lincoln and Omaha Nebraska.

**

NEWSLINE TEMPORARY SCHEDULE CHANGE

I'm Bill Pasternak, WA6ITF, with word of a temporary schedule change for the release of Newsline. Beginning with
next weeks report number 1167 and continuing until at least after the FCC releases its Report and Order on
restructuring the United States Amateur Radio Service, Newsline will release its latest newscast at the close of
government business each Friday. That is 3 P.M. Eastern and noon Pacific. Doing this will

give us the ability to
bring you any news regarding restructuring should it occur at the end of the government business week.

Once again, effective with Newscast 1167, the release of Newsline will be moved back to Friday at 3 P.M. Eastern.
Please adjust your recording and playback schedules accordingly. This revised release schedule will remain in
effect until the Report and Order on restructuring is announced. Now back to Mert Garlick, N6AWE.

**

ARRL TO OREGON SCIENTIFIC: 433 MHZ IS A HAM BAND

The ARRL's Lab Supervisor Ed Hare, W1RFI, has written to the Oregon Scientific supply company over concerns
about a product that the company advertises as operating in the 433 Mhz ham band. In his letter to Oregon
Scientific's Josh Cress, Hare informs the company about the anxiety on the part of the ham community over a
remote-reading thermometer, that uses 433 Mhz to transfer data to the base unit.

Hare explains to Cress that devices such as this thermometer are regulated as unlicensed transmitters by Part 15
of the FCC's rules. Hare says that Part 15 does permit some higher-powered unlicensed operation on nearly any
frequency above 70 Mhz. But he adds that this high-power operation is limited to very brief transmissions, for
remote-control purposes, with requirements that the device turn itself off after 5 seconds and that it not transmit
at regular intervals.

Hare says that Part 15 does permit much lower power on virtually any frequency, but at 433 MHz, such low power
would be useful for only a few feet at best. He also reminds Oregon Scientific that Part 15 requires that most
intentional radiator devices be "Certificated" by the FCC prior to their being offered for sale. He tells them that
certification is issued by the FCC based on the test data supplied by the manufacturer as part of the application.
Hare says that this test data will very much help to determine on what basis this device operates on a frequency
allocated to the Amateur Radio Service.

Hare has requested that Oregon Scientific provide the League with the thermometers FCC ID number and any other
technical data . Hare isays that he hopes to help resolve the matter without FCC assistance if Oregon Scientific
can answer the questions about the device and its operation. (VHF Reflector)

**

FCC TO WOKIE: NO BROADCASTING IN THE HAM BANDS

An Oklahoma ham who had sought a rules change to permit broadcasting in the UHF ham bands has had his
request deniewd by the FCC. Mile Reynolds, W0KIE, had asked the FCC to permit hams to make one way
transmissions to the general public in the 70 centimeter bands and those above it. The FCC dismissed his petition
without ever assigning it a rule making number.

Reynolds who operates the W0KIE Satellite Network has until recently been the provider of satellite distribution of
the Houston AMSAT Net, This Week in Amateur Radio and several other ham radio special interest programs. At
airtime it is unknown if W0KIE plans to file an appeal. (Listener reports)

**

UNYREPCO TO COORDINATE DUTCHESS COUNTY NEW YORK REPEATERS

Is repeater coordination about to reappear near the New York City area? Possibly, as members of the Mount
Beacon Amateur Radio Club vote toadopt the Upper New York Repeater Coordination Councilas the repeater
coordinating agency to serve Dutchess County, New York.

Dutchess County lies to the North of New York City proper. According to Lloyd Frink, KC2AGL, writing in the
Hudson Loop electronic newsletter, the Mt. Beacon club took this action at their December 2nd meeting. This,
following a discussion on the present status of amateur repeater coordination activities, or lack thereof, in the
Dutchess County area.

As reported, almost four years ago the Tri-State Amateur Repeater Council that previously had served the area
slipped into inactivity and disappeared. All attempts to revive it or to form a new coordination council have met
with strong opposition from New York City and Northern New Jesey repeater system operators. Connecticut finally
broke ranks last year and formed its own statewide coordination group. Now, the Uppper New York Repeater
Coordination Council has expressed a willingness to serve some of the area previous served by Tri-State and the
Mount Beacon club has accepted the offer for the area that their repeaters serve.

The Upper New York Repeater Coordination Council is one of the nations oldest and most successfull volunteer
coordination bodies. It has has been active in amateur repeater coordination since 1973 and already has
agreements in place for cross-coordination reviews with neighboring repeater councils.

KC2AGL says that the Mt. Beacon club hopes that in choosing the Upper New York Repeater Coordination Council
as the representative of its repeaters that the group is setting a positive example. One for other neighboring

counties in need of repeater coordination to follow. (Hudson Loop)

**

NEW LAW MAKES EVERY CELLPHONE ABLE TO CALL 911

Will cellular telephones now be challanging ham radio in the area of public service communications? Thats the
question on the minds of hams involved in public service and emergency communications have been asking since
President Clinton signed legislation making 911 the official emergency telephone number nationwide. This, for both
wired and cellular phones. The measure also calls for development of technology that can track mobile callers.
The White House says that this will allow average citizens with wireless phones to speed responses to highway
accidents, crime scenes and natural disasters.

What all this means to ham radio is hard to predict. It wll probably reduce the need for radio amateurs to report
traffic accidents. This as cellular and P-C-S monthly charges continue to plumet making mobile phones available to
more and more members of the general public. (Adapted from published news reports)

****

HANDI-HAMS NEEDS VOLUNTEERS

The Handi Hams say that they need more volunteer readers to record rig manuals onto cassette tape for the blind.
The service group is also looking for hams who have the equipment and time to scan manuals and books into text
file format. If you can help, please contact Nancy Meydell for a Handi Ham volunteer application at 612-520-0512
or by e-mail to nmeydell@courage.org. (Handi Hams)

FCC COMMISSIONER WILL NOT RUN FOR CONGRESS

Federal Communications Commissioner Gloria Tristani says she plans to stay in her current job and not seek
election to congress.

According to Tristani, she had given some serious thought to a congressional bid from her home district in
Albuquerque, New Mexico. But the Clinton administration has urged her to stay at the FCC and she has decided to
do so.

Tristani is one of three Democrats on the five-member commission. (Published news reports)

**

AUSTRAILIAN ATV CHANGE OF HEART

In ATV news, the Australian Broadcasting Authority has had a change of heart concerning the future of an
Amateur Television repeater operating in the Brisbane area. The ABA had originally told the repeaters sponsor that
the machine would have to leave the air to make way for testing of a new commercial digital television system.
Brisbane area hams mounted an offensive of their own They said that there was no reason to take the ATV
repeater off the air, arguing that the two should be able to co-exist. Peter Jones, VK4YAC, was one of those who
helped the Australian Broadcasting Authority change its mind:

Jones Here

In-Q: The ABA has had...
Out-Q: ...late next year.

The idea to keep the Brisbane ATV repeater on the air as digital television broadcasting tests begin is a good one.
It will provide some interesting data on the compatibility or non-compatibility of digital and analog services
attempting to share the same or closely adjacent spectrum. (Q-News)

**

SOUTH AFRICA

The Board of Trustees of the independent South African Amateur Radio Development Trust have bestowed the
Zed-S Radio Amateur of the Year Award on Chris Turner ZS6GM. It has also named Henro Ritchie ZR6RIT as its
Young Radio Amateur of the Year. (SARL)

AMSAT UK COLOQUOUM 2000

AMSAT U-K has put out its first call for papers to be presented at next summers ham radio space colloquium.
Jeramy Boot, G4NJH has the details:

The 15th AMSAT-UK Colloquium, "Amsat Space 2000", will be held at Surrey
University, Guildford, Surrey, U.K., from Thursday 27 July to Sunday 30
July 2000.

Amsat-UK invite authors to submit papers, about amateur radio space and associated activities, for this event and for the "Proceedings" document which will be published at the same time. We normally prefer authors to present the papers themselves rather than having someone else read them in the authors' absence, but we also welcome "unpresented" papers for the document.

Offers of Papers should be submitted as soon as possible; the final date for full documents to be received is mid-June 2000 in order that the "Proceedings" document be available to participants.

Submissions should be sent to G3RWL by e-mail to g3rwl@amsat.org

Jerany Boot, G4NJH

Again, those dates are next July 27th to the 30th at the University of Surrey in the U-K. (G4NJH, AMSAT-UK)

**

AMSAT-OSCAR-16 SILENT

AMSAT OSCAR 16 appears to be temporarily QRT. LW1DMO reports that the satellite went silent while in range of
his ground station in Buenos Aires at 02:35 UTC on December 12th. The satellite was also monitored on 00:45 UTC
on December 13th at KD2BD in NewJersey, and was found to be silent. AO-16 had been operating for over 1800
days without a software reload or an interruption in service before this problem occurred. (AMSAT BBS,
Spacenews)

**

DX AND CONTESTS

In D-X, members of the Carolina DX and Roswell DX Associations will be on the air during the month of January
exchanging the call WY2OOO with other operators around the World. This operation will begin at 0000 UTC,
January 1st, 2000 on all bands from 160 through 2 Meters. QSL the WY2OOO operation with an S-A-S-E to
K4MQG. (K4MQG)

The 5-9-9 DX-Report says that that Lawrence De Milner, W8NRB, has been active as from Nepal as 9-N-7-R-B
since mid-September. Listen for Lawrence mainly on 20, 15 and 10 meters S-S-B. He willbe there for some time.
Q-S-L via W8NRB at the W-8 Bureau. (59(9) DX Report)

**

NOTE TO WEB TV USERS

And finally, this note for those of you who listen to Newsline in Real Audio over the Internet. Tucson Amateur
Packet Radio has upgraded its audio server to the latest Real Media G 2 software which supplies far better audio
quality than ever before.

But there is a problem for users of Web T-V users. Simply said, Web T-V is not a real computer system and it
does not currently support Real Media G 2 technology. According to Tony Gardner, N4DFM, who is one of our
regular listeners, Web-TV users petitioned Web-TV for Real Audio G2 a while back. About a month ago, Web-TV
users received an upgrade, but it did not include Real Audio G 2. Also, a Real Audio G2 arrangement that was
posted on the Web-TV web site is gone.

While we cannot help with most Web T-V problems, for Newsline listeners there is a solution. Mark Bohnhoff,
WB9U0M, in Chicago maintains a Web TV compatible Real Audio site for several services including Hap Holly's Radio
Amateur Information Network and Newsline. To get to Mark's site go to www.arnewsline.org and scroll down until
you see the link to Bohnhoff Mediacasting. Click on it and then click on the box marked Real Audio 2 at 14.4.

Our thanks to Tony Gardner, N4DFM, for bringing the matter to our attention and to Mark Bohnhoff, WB9UOM, for
providing Web T-V listeners with a solution. (Newsline)

**

CLOSE

With thanks to the ARRL, the CGC Communicator, the FCC, the Hudson Loop, Spacenews,RAIN and Australia's Q-
News, that's all from the Amateur Radio Newsline. Our webpage can be found at www.arnewsline.org, and out e
mail address is newsline@arnewsline.org. Also, the address for the Newsline Support fund is Post Office Box
660937 in Arcadia California. The zipcode is 91066.

For now, with Bill Pasternak at the editors desk, I'm _____ wishing you the happiest of holidays from all of
us in the Newsline family. And less we forget to say it, we sincerely do thank you for listening.

5588. CLOUDWARMER DETAILS by AF2Y

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-20 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991220151309.25154.00000512@ng-fs1.aol.com>
Source record: 124808

Hams, hamesses, hampsters and hamlets-I'm a bit tired out sending info on the miraculous Cloudwarmer which has turned me into a big gun from a little pisher, therefore here it is. Print it out and build. It's great!
A 20 METER "CLOUDWARMER"
I thank you for showing interest in my antenna which was voted the number one wire antenna is North America by an independent research organization: AF2Y Enterprises! I did NOT invent it; the idea was given to me by WB2OTK in South Carolina. He didn't invent it either. Who then did? I don't know; I don't care; all I know is that it works like a BOMB! Furthermore the U.S. military is using it under the name N.V.I.S.(Near Vertical Incidence Skywave). In 30 years on the air, it is the best wire antenna I've ever used and can easily challege commercial beams for effectiveness.

A few basic concepts to begin with. A "Cloudwarmer" is a MONOBAND 2 element wire beam. I stress MONOBAND and it can be erected for ANY BAND. Secondly it is based entirely on mathematics and is uncomplicated. Thirdly, all that's required is standard wire, 52 ohm coax of any length and five insulators. Also I do not recommend using a tuner because if the construction is correct and adjustments,if necessary are made, a tuner will be unnecessary and furthermore it may mess up the mathematical relationships which govern this antenna. Lastly, any ham who can set up a standard dipole can EASILY construct a Cloudwarmer. And if any ham cannot construct a standard dipole, then he or she has no business being on the air therefore delete this information and take up basket weaving!

Keep this in mind because it applies to any Cloudwarmer for any band. The "Warmer" consists of a driven element called a dipole with a parasitic called a reflector the latter of which is 6% longer and placed between .15 and .2 wavelengths below and parallel to the driven element or as NEARLY parallel as possible. THAT'S IT. It is also known as a "SCATTERBEAM" because the RF hits the ionosphere at high angles and then scatters all over the world. It is a COMPLETELY NON-DIRECTIONAL ANTENNA on the order of a vertical but better than one for INTENSIFIED OMNIDIRECTIVITY.

Now for the mathematics. Let's talk about the numerical figures regarding wavelengths. Let's say a 20 meter HALF WAVE dipole is to be constructed to resonate with a very low SWR at 14.300. Using the formula 468/frequency , we see that such a dipole must be 32.7 feet which equates to 32'8". Let's now convert that to inches. 32' x 12 =384 inches +8=392 inches. That's a HALF WAVE. Double it and we get 784 inches therefore we now know there are 784 inches in a FULL WAVE dipole FOR 14.300. The reflector we discussed which ALWAYS GOES BENEATH the dipole i.e. driven element can be between .15 to .2 wavelengths in distance. What then has to be the length it we place it, for example .15 wavelengths below? Simply multiply 784 x .15 and we come out with 117.6 inches and divide by twelve to convert to feet and we get 9.8 which is 9 feet,10

inches. That is the minimum distance the reflector must be placed underneath the dipole. The maximum is .2 wavelengths and to change that to feet multiply 784 x .2=156.8 inches, divide by 12 and we come up with 13 feet. We now know that the reflector can be placed from 9 feet, 10 inches to 13 feet below. MIne is at 10 feet; supposedly increasing the distance will give more gain but I do just fine right where it is.

The reflector must be 6% LONGER than the dipole. We already know the length of that dipole for 14.300 is 392 inches. Multiply by .06 and we get 23.5 inches which is 23'6" and that's the length of my reflector.

So now with the math done, we proceed to erect that Cloudwarmer. Put up a dipole 16'4" from either side of the center insulator and feed it with any length of, for example, RG8U. Take an SWR reading and WRITE IT DOWN..it's VERY IMPORTANT.
Next, string out a relector wire about 10 feet below and about 2 feet LONGER as parallel as possible. Each end should terminate in insulators. There is NO ELECTRICAL CONNECTION between it and the driven element dipole nor is there any electrical connection between it and the coax feed. It just hangs there minding its own business but is nevertheless the secret to success!

Now take an SWR reading with everything in place. If you see ANY change whatsoever, good or bad, LEAVE THE INSTALLATION ALONE! It's working! If there's no change then either LOWER the reflector 6" at a time or LENGTHEN it by a few inches. What we MUST see is a change in that SWR. Once it happens, go work the world and YOU WILL.

We know that a dipole less than a full wavelength high has a multilobular pattern with appreciable ground loss. Now when we use a vertical at ground level, we must add radials. Why? Because we must minimize ground loss. The radials are RF collectors meaning that the emitted RF instantaneously is picked up by them and RETURNED to the base of the vertical to be RERADIATED at about 15 degrees to the horizon. That reflector acts just about the same way. It MINIMIZES ground losses by reradiating the RF into the "clouds" at much higher intensity than will a standard dipole and your signal will be heard in places you never knew existed. The Cloudwarmer has APPRECIABLE gain on receive versus a standard dipole and vertical-REMARKABLE GAIN. And on transmit, try switching back and forth between it and another antenna and see what happens. The person on the other end will be STUNNED!

Best of luck and great DX.
73,
Doc, A F 2 Y

So FATBOY has a "College degree".....Here are the FACTS he DID NOT
tell you about.

The degree is from NCOS University. It's a small college in the "back
woods" of West Virginia. NCOS stands for:

****** National Canine Obedience School ******

It is at NCOS that KC8JBO learned how to eat from a bowl & bark at the
mailman.

I STILL DON'T understand why FATASS keeps on saying "BOLA, BOLA, BOLA"
over & over again on 14.313.....As I have said before, this STRANGE
SAYING seems to be some sort of "in heat" call KC8JBO uses to call
female DOGS with.

Maybe that is the reason why W4NTI & AF2Y are so quick to respond to
the CQing of WIDEMAN, hohohoho.

KICK IT UP A NOTCH,

PITBULL

I once used a dipole cut for 11m with a tuner and made lotsa contacts
and didn't hear from the neighbors . The radio I used was a RCI 2950 .

You could build a j-pole or 1/4 wave for 2m/70cm or get one of those
suction cup window mounts that you could attach your duck to .

A couple ideas ... Good Luck , have fun ! 73 de kb2tke

Now I know who that N2BUB is-the guy who now makes nicey nicey to me on 20 meters after having harassed hell out of me on 75 meters. I perused my old logs and tapes and here's the scoop. On the night of 6/21/96, N2BUB, ex-KR4LY, a Larry Bouchard, Route 1-Box 108, Gladys, VA 24554 in concert with N3GVA, Michael DeWoody Woodpecker; KE2LO,the thankfully late Gene Adolf Metzger; WB3AGG, fatso Mean Gene Breech; KN4CF, Bob Turner and KO4FE, Bill Scott, the refugee from Sarasota jumped me on 3.950 and hurled every anti-Jewish epithet possible and then insulted my family as well. Don't believe me? I have a tape to prove it. It's just $9.95 + $1 P&H to Box 1347, Clifton,NJ 07015. I can't get over the fact that this same Larry, now masquerading as N2BUB (I wonder if it's short for the Yiddish term of endearment "bubbele) is trying to play footsies with me. What nerve! You want to talk to me Bouchard? MAKE AN APPOINTMENT or better than that-keep off 14.313-I live there and your kind ain't wanted Restricted clientele, you hear? Or if you're really hard up, I might nod my head to give you a thrill. You see N2BUB, I don't forget an enemy. NEVER! And I believe in the "eye for an eye" demand by Jehovah in the Old Testament. Now it's my turn to rub your nose in the dirt old boy because you don't have those anti-Semitic clowns backing you up. You're in for it and a few of my Black and Puerto Rican friends have been looking for you too.

5594. help programming Vertex VX-10

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-20 00:00:00 UTC
From: Mustang <bite@me.com>
Message-ID: <385EEA58.A13792A5@me.com>
Source record: 124814

I have a Yaesu FT50, and the software (1.0D) to program it.
Works fine. I have a deputy who has a Vertex VX-10 HT which looks
exactly like it. Pulling the battery it says it's made by Yaesu, so I
would
"assume" (no jokes please) that the internals should allow cloning or
reprogramming
with the cable, if you have software to program it with. Problem is,
this deputy
bought the radio WITHOUT any manual. Just the radio, charger and case.
Anyone know if it's possible to program this via the software and cable?

I can get it into clone mode, and it says "sending" but the FT-50
software
dosen't see it. It works on the FT50 no problem. I found a site which
has
a piece of software called EVE but the data file is in Hex and I don't
read it.
What I'm looking to do is reprogram this radio with the frequencies that

our Dept uses. The display dosen't show the freq readout, just the
ALPHA
readout. I can get into the programming mode, but this radio dosen't
have
the touchpad, just two buttons where it goes saying A and B
If the software can't program it, does anyone have any documentation on
how
to program this sucker??

thanks in advanced

Rusty

Hi! Looking for a good used UHF repeater
and duplexer for amateur band: 448MHz out,
443Mhz in. Need about 25W continuous, would
like both ac and dc operation. Looking for model
designed for repeater use--not a kludge.

Please email Dave W1DAY: d-day@ultra.net

You might try starting here :

http://members.aol.com/aeimn/ft50/articles.txt

I haven't read thru all the articles, but looks like the firmware inside is probably
different so you wouldn't be able to clone between a VX10 and an FT50, but
between two VX10s it'll probably work.

what I'm trying to do is dump what's programmed in the VX-10 and reprogram
it with 2 new freqs. I also seriously doubt that the VX10 and the FT50 can
be cloned, because when I attempt to download the software from the VX10
to the ADMS software, I get an error, but when I use my FT50, it works
fine. With what I've been reading lately, I'm lucky to get it to program my
FT50<G>

The year 2000 is rapidly approaching. No one knows the complete ramifications of this computer problem except possibly the perpetrat-ors of the New World Order.

A woman who works for FEMA in Waco, Texas, told her doctor in confidence that FEMA and the Federal Government believed Y2K would be ten times worse than anyone has yet imagined.

Those working for world government, who hope to TRANSFORM the world into a Socialist form of government, have long thought the time would arrive at the year 2000. One method to facilitate the process was to get the world of economics on speculation. Get the economies of the world off the gold standard and onto paper money with NO precious metals backing the currency.

Through issuing more and more paper money, it would debauch the value of it - that's called inflation. At the right time in history, after getting the world entangled in speculation in the stockmarket, they would PULL THE PLUG and plunge the whole world into economic upheaval and disaster.

What better way would there be to create worldwide chaos than the Y2K computer crisis? It will certainly affect the financial institutions of the whole world; especially, the noncompliant systems corrupting the compliant systems through interfacing with each other. Even if the banks in the United States are ready for Y2K, they will still interface with foreign banks. Reports on progress for the world at large are very bleak when it comes to Europe and the Third and Fourth world countries.

Statements on television say that the entire United States power grid is compliant with the exception of possibly one percent, and that one percent will be ready. Certainly, we hope that is the case. However, when we KNOW of the thousands of lies released to the public by our Socialist controlled Federal Government, their statements are totally unreliable. To an unsuspecting, gullible public, their statements sound good; but to those who have discovered their plans for
a one-world-government without WE, the peoples' consent, it becomes obvious they are lying to us.

To show the apathy of Texas State legislators, one representative was asked about the possible United Nations occupation of America and Texas in part-icular. His reply: It's a federal matter, don't bother me.

The Y2K crisis is to be the catalyst that allows President Bill Clinton to call a "national emergency" with the result- ant calling of Martial Law. With Military Law in force, ALL Constitutional guaran-tees and the Bill of Rights will be swept away. This crisis is exactly what has been planned

since 1887 by the Socialists.

The 33rd degree Freemasons who have been hand picked to understand the "mysteries" of world government have a motto as to how they will achieve world government - out of chaos will come order. They are the ones - the Illuminati/High Freemasons - that have laid down long-range plans to fulfill their "master's" will - Satan the devil.

Anyone would have to be deft, dumb and blind OR an agenda working for world government that would deny there is a CONSPIRACY at work to overthrow every nation on earth. IT IS CALLED COMMUNISM! It is an historical fact that Communism has gobbled up 40% of the land territory on earth. NOT ONE COUNTRY HAS COME OUT FROM THE IRON GRIP OF COMMUNISM, even though the mass news media has led millions to believe those people are now free and Communism is dead.

V. I. Lenin, first butcher of Communism said: "First, we will take Eastern Europe, then the masses of Asia, then we will surround the United States, and it will fall like a ripe fruit into our hands." Has the United States been surrounded, even infiltrated from within, to help prepare for the fall?

All evidence says YES! The United States is the targeted nation - that's why we make treaties and KEEP them in spite of the Communist world's violation of them. The COUNT DOWN IS NEAR ZERO AMERIKA!!!

Sincerely,

David J. Smith

Know what you mean. I picked up the ADMS software for my VX-5a. It works,
but I had to get an update from the author before it did. Out of the box it was
a dud.

You might also try a Google search for VX-10. That's where I started and
I skipped alot of the sites listed. There were lots of hits. There's undoubtably
some software out there, the trick is finding it. Look hard enough and you'll
probably find a lead to it.

Good Luck
John

Why would you have to post a special message to this effect? Polly is a great guy who is loved by millions of hams worldwide. Just because there are a few vocal misfits on this newsgroup doesn't mean that, essentially, W4FQF is not universally loved and respected.

Saying "I like Polly" is like saying "Dog Bites Man"...it's not really news, although it shows you're normal. If you want a news item (i.e. "Man Bites Dog"), post a message that you are one of PorkButt's "followers". There are very few of those (I count about 3 or 4 on this group), and each time you find a new one it's big news.

Cloudwarmer is dead and Charles isn't feeling so well himself. Yes, there seems to be a big problem with the signal reports given to the Clifton idiot lately. Every since Riley Hollingsworth zapped ole af2y with a stern warning from the FCC he has had a noticable drop in signal strength. What could be the problem ??? The neighbors are delighted, now they can watch their daily television favorites with no interferrence from Chuckies dirty ham station.

I did read in the warning letter to Charles Schwartzbard of Clifton, N.J., that he had been previously warned about his activity on the ham bands and that this activity would no longer be tolerated. How many warnings has this psycho had ????? I have been reading all of the information included in the NAL that he had received prior. Sounds like the Boys at the FCC have proof that ole Chuckie is not a well behaved little boy.

Those days of past when Porkbutt and Druggie Jimmy Dale would assist in AF2Y's activities are gone and so is PORKBUTT. I can only imagine that Porkbutt is taking time off, and preparing for the upcoming NASCAR year with his friends street car, or could he be preparing for the next house to house fighting in the Dominican ???? He possibly could be at NASA headquarters directing the shuttle toward the Hubbell, but he better be careful when he comes to Florida, because the criminal felony warrant is still outstanding and his sorry butt will go directly to jail.

So Chuckie, you keep behaving yourself and be sure to watch who you make friends with. I have good information that your problems with the FCC have not concluded. HAMMER

I was monitoring 14.313 this morning and heard Polly from Fisherville whine and cry for 15 minutes about the "quarmers" and one of them "sounded like AF2Y" and how the FCC won't do anything unless the "quarmer" identifies, what a joke. I guess K4OKA identified everytime he played the "Pork Butt Song" and the FCC notice he has that keeps him off of the air dosen't exist. Poor Polly is also a liar, he was in QSO with a weak station and was boasting about how he has "almost three acres", what a load. When in the hell does 1.598 acres equal three.

My oh my, is that Larry fella sensitive! Now he's knocking me on the air for having posted the fact that he was nice to me on the air the other day because maybe he stopped hating Jews. And now he gets on 75 telling everyone he never disliked Jews, Blacks, Hispanics, immigrants and gays. I say BULLSNOT. When he and his beloved nightly 3.950 groupies were in their heyday B.R. (before Riley) and also that Liberty Net Dysfunctional Hate Society, that's all Larry and his pals did-RAG ON THE AFOREMENTIONED! Now he's Shirley Temple tap dancing with black Bojangles Robinson! BULLSNOT AGAIN! Because I'm afraid of Riley and YOU ARE TOO, I won't take issue with K2BUB on the air but for heaven's sakes; does he expect me to buy his sanctimonious bullsnot as more than bullsnot? I myself was a target of his viciousness along with that of Mean Gene Crotch, Mike,N2GVA, the late thank God Gene Metzger,KE2LO and a few other misfits. Right on 3.950 they called me every filthy derogatory name in the book; insulted me and my family, religion and the memory of the millions of my people murdered in the Holocaust. But wait a minute, K2BUB and his fellow Brownshirts called it the "Holohoax." Sure, now I remember vividly. And now he's up in arms over what he considers to be jamming by WA9KJI and W9ART. If I weren't so scared of Riley, I'd put up a 75 meter dipole and have it out with saintly K2BUB and his pals, but I'm scared of Riley. I'll be damned if I'll argue and make an uncomfortable situation unbearable which is exactly what Larry and his gang want! So I'll close with this,Larry: I know you for what you are and for what you said. You're playing nicey nicey just to please someone in Gettysburg. How do I know? Because tonight you praised Kevin Strom as being angelic while Mr. Strom is listed in Ray Franklin's Internet Hate Directory as a dangerous person. And furthermore that book, not your opinion, is in the library of every law enforcement agency in the U.S.A. What does that say about your credibility, K2BUB?

A message for my fellow hams, hampsters and hamesses: do yourselves a favor by going to see THE GREEN MILE, a sure Oscar contender. It's unlike any motion picture you've ever seen- filled with every human emotion. And see it now during the Christmas season because of it's relevance to the holiday which is supposed to translate into "good will to all men." This film will stun you and greatly impact the way you think and judge. It's based on a Stephen King novel of the same name and is brilliantly acted by Tom Hanks and a Nubian giant named John Coffey in the film while his real name is Michael Duncan who POSITIVELY will win the Oscar for BEST SUPPORTING ACTOR.
"Doc," AF2Y The FCC didn't assign me

ROFLMAO! Looks like Polly lives in a "Dogpatch." This is good detective work. It also appears his prevarications about having a "horse farm" are erroneous. He keeps a couple of old nags there, and that doesn't incluse Ruthie.
I would say the "improvements" listed above included indoor plumbing.

Jeff, Criticism well taken; let me respond fully.

You can see the previously referenced item for yourself, as the entire story was posted in this group on 11/30/98 under the title: Re: Fisher's Festering Fetish. You can put W4ASX in the DeJa search engine under the subject of ARRL. It is a story of international intrigue at the end of the Cold War in which ARRL found itself involved. The story is complex and Gorbachev is connected.

As far as the instant post is concerned about the selling of information, you are right, it is only an allegation at this stage. I wrote it expressly as an allegation, not fact, to tickle interest at the League to respond.

I'd be pleased to telephone Headquarters and ask if I could be sure the call would be welcomed. I just don't want to be labelled as harassing or annoying. Who should I call? Dave Sumner has always treated me politely--would he welcome a call about this subject?

Promise to post whatever the findings are honestly. Please help guide me.

73, Merry Xmas, Happy Holidays,

Bob Sherin, W4ASX
Miami, Florida

For the hopelessly uninitiated: An "improvement" generally means a house. This information means that Polly has a house on his property.

Also, 1.6 acres is a very nice sized lot. It sounds like he has a nice spread over there.

I'm sure he appreciates all this information being posted, given that the great majority of his detractors don't have what he does. They either have a tiny little place or they rent.

What other great things can you tell us about Polly?

So FATBOY has a "College degree".....Here are the FACTS he DID NOT tell you about.

The degree is from NCOS University. It's a small college in the "back woods" of West Virginia. NCOS stands for:

****** National Canine Obedience School ******

It is at NCOS that KC8JBO learned how to eat from a bowl & bark at the mailman.

I STILL DON'T understand why FATASS keeps on saying "BOLA, BOLA, BOLA" over & over again on 14.313.....As I have said before, this STRANGE SAYING seems to be some sort of "in heat" call KC8JBO uses to call female DOGS with.

Maybe that is the reason why W4NTI & AF2Y are so quick to respond to the CQing of WIDEMAN, hohohoho.

KICK IT UP A NOTCH,

Adam,

If you have the horizontal space use a half wave wire dipole even if you have to droop the ends a bit. For vertical you could use a mobile whip with a suitable number of radial wires taped to the floor. In both cases use a low pass filter and a proper atu and be prepared to reduce power / adjust operating times to work around TVI problems. You may have to be selective with your choice of TX frequencies and keep an eye on the affected TV channels while operating. Keep your signal clean, turn the mike gain down a bit and don't use speech compressors.

Many years ago (25+) I used this setup to work from a high-rise housing estate in Holland to Stateside stations on a slightly lower frequency. Had lots of fun trying to keep my signals out of the CATV system but managed to get some great contacts on just 4 watts AM!. The things you do when you're young. :-)

Well what you flamed in return is a good job of trying to be supportive of your
friend. I also commend your effort in an attempt to change the original
subject, but it still dosen't answer the question.

Why does your "friend" get on twenty meters and tell lies to other amateurs in
an attempt to project himself as someone he's not, maybe its your "friend" who
feels inadequate when compared to other individuals. Why bother to lie ?

Well Doc, not that I'm partial but N2BUB (Larry) is one of the few on the net that say exactly what's on his mind. Him and I have spoke several times and he doesn't always go in for the "conspiracy" crap.
I have heard Larry make personal attacks, we all have (made them), but I cannot say that I've heard him slam races or religions. Like I said he's one of the few that will say what he thinks and not "follow the line".
I didn't hear what he had to say about you but maybe it was peer presure. LOL

Well, I must freely confess that I'm "deft" and that I deny any such
conspiracy.

The following statement, I'm sure, is far beyond the intellectual
powers of comprehension for Lloyd Davies and those of his ilk:

YLE Radio Finland was comin' in real well just after 03:00 UTC
on 11665 kHz.

Joe: A "kludge" is something that's been put
together to do a job it wasn't intended for--
usually with duct tape! In this case, I meant
I don't want a simplex transceiver modified to
act as a repeater. I want a unit that the
manufacturer designed to be a full-duplex
100% duty-cycle repeater. Got anything?

Thanks, Dave

Chuckie, I will be directing a letter to you from a noted communications attorney that is in reference to the legality of the reading of public documents. I strongly suggest that you read very carefully the detailed opinion. Chuckie, if you have trouble understanding the content then let me know and I will arrange for you to have a consultation with the attorney via telephone , and of course at my expense. Then after listening and asking the gentleman questions please post what he tells you about such activity.

A mind is a terrible thing to waste, Chuckie, do something constructive and be a kinder and more gentle human. From what I have heard and the reading of your post I must tell you that you are showing signs of extreme frustrations.

Q. What does the loading characteristic of the antenna have to do with the current state of the ionosphere and it's refecting characteristics to different parts of the world?

> Rectally, oops, sorry I mean theoretically it
> can't happen-it's impossible

It is absolutly possible, I see the same happen when switching between a dipole and a vertical. What "theory" makes this impossible?

> but I see it regularly. However I doubt Dean can
> approach a relative 12 dB because the refelctor is not MATHEMATICALLY designed
> as mine is.

No, you acheive a relative 12 dB thanks to the current state of the ionoshere.

> I think he uses his roof as a reflector which is relatively
> useless. The next time we QSO, let me run a test between the "Warmer" and a
> standard antenna and you'll see a major difference. The impossible is indeed
> possible.

What is a "standard" antenna?

> This afternoon I worked a Czech who was a 4/5 on the Warmer. When I
> switched to a vertical, he was GONE. How come?

Because the ionosphere was in a position to reflect signals with a high angle of radiation from your location to Europe at that specific time. Anyone who has switched between a dipole and a vertical during signal checks would experience exactly the same thing. Propagation from my location in Michigan to Kentucky changes such that at times a vertical on 40m is as much as 4 S-units stronger than a dipole, and in a few hours exactly the opposite with respect to the dipole. So is the dipole or the vertical the better antenna?

While your Cloudwarming antenna is no doubt working, you seem to be using propagation at a specific time and specific band to somehow demonstrate it's effectiveness over other antennas which makes no sense whatsoever. Depending on the band and time of day there will, without a doubt, be times when a vertical will perform better than your cloudwarmer and visa versa. Of course the other, more believable scenario is that someone whom you have endeared yourself to has pinned

your coax to the vertical antenna. = : o

Mr Hammer:

You are really putting the hurt on Chuckie. Remember, he has to live with the fact that his chintzy "cloudwarmer" had its ass kicked by Lenny K2IVX. He is hurting from that ass kicking by a lower power amateur station.

Telling the truths as you are . you will only drive him into a deeper depression.

But, keep it up Mr Hammer, he earned it.

Gitalife, AF2Y that is!!

Can anyone assist with a copy of FT757GX Schematic - especially the RX FM detector. Fine on AM/SSB & CW but FM noise floor is very quiet and barely audible. Anyone experienced this and have an idea what may be the problem?

Would appreciatte scanned copy of detector area or suggestion for cure.

73's
Roy

I guess the 100's of GE Mastr II mobiles that have been converted into
repeaters and run day in and day out at 75-100 watts are Kludges??
I bet all the owners of these repeaters would differ with you!
I know of 3 of these KLUDGES as you call them that have been running nonstop
for 10 years. and have had little or no down time unlike a purebred repeater
seems to always have.
But hey what the heck! If you dont want to use them thats great!! Leaves
more for me and the other KLUDGE users..
IMHO of course

Dan/N0FPE 444.450, 224.02, 146.685 KLUDGE repeaters

Hey dumb shit PorkButtGoneHerbieStillHere. The reason for the thread was that the infamous 'polly' said that he had 3, count them 3, acres.

Tell me how do you get 3 acres out of 1.6 acres. Also I bet polly doesn't have a dime, his wife has all the money.

So! This is what 20 WPM does for you. Hmmmmm, I might just go back to a nice,
friendly, radio service for gentlemen, CB.
<<Negative. Mr.Tayger. The Extra Class does not reflect on one's over
exhuberance on ham radio in light of being attacked, slandered, maligned and
targeted by bigots. Reactions to these obscentities can come from any grade of
licensee. Keep in mind that the licenses we have are based on PROFICIENCY not
acquiesence to intolerance. Furthermore you should understand that the one
gloating over my receipt of said letter has the intelligence of a flea and has
proven himself, based on his ultra biased postings, to be slightly right of
Adolf Hitler. However the letter did awaken me to the importance of keeping the
lid on the proverbial pot even though one might feel COMPELLLED to respond to
on-the-air obscenities in less than a gentlemany manner. My signal was indeed
wide but to be told so by a group of unidentified screamers, did not wash. That
problem was identified as a bad 680K resistor coming off pin 3 of my ALC/AGC
12AX7 tube. Of course that would make no sense whatsoever to N0VFP since that
no-code tech fool thinks ALC is an abbrevaition for alcohol. Regarding the
mention of slander and jamming, even though it's fact that never have I been
cited for either, what's more important is FCC recognition and displeasure at
the fact that my less than friendly demeanor toward on-the-air savages
is exacerbating rather than alleviating the situation. If I therefore have to
fold instead of waving my fist screaming, "Foul, foul,"then that's life. A true
sign of maturity is understanding that authority demands respect more than
defiance. And I certainly obide by that principle.

The year 2000 is rapidly approaching. No one knows the complete ramifications of this computer problem except possibly the perpetrat-ors of the New World Order.

A woman who works for FEMA in Waco, Texas, told her doctor in confidence that FEMA and the Federal Government believed Y2K would be ten times worse than anyone has yet imagined.

Those working for world government, who hope to TRANSFORM the world into a Socialist form of government, have long thought the time would arrive at the year 2000. One method to facilitate the process was to get the world of economics on speculation. Get the economies of the world off the gold standard and onto paper money with NO precious metals backing the currency.

Through issuing more and more paper money, it would debauch the value of it - that's called inflation. At the right time in history, after getting the world entangled in speculation in the stockmarket, they would PULL THE PLUG and plunge the whole world into economic upheaval and disaster.

What better way would there be to create worldwide chaos than the Y2K computer crisis? It will certainly affect the financial institutions of the whole world; especially, the noncompliant systems corrupting the compliant systems through interfacing with each other. Even if the banks in the United States are ready for Y2K, they will still interface with foreign banks. Reports on progress for the world at large are very bleak when it comes to Europe and the Third and Fourth world countries.

Statements on television say that the entire United States power grid is compliant with the exception of possibly one percent, and that one percent will be ready. Certainly, we hope that is the case. However, when we KNOW of the thousands of lies released to the public by our Socialist controlled Federal Government, their statements are totally unreliable. To an unsuspecting, gullible public, their statements sound good; but to those who have discovered their plans for
a one-world-government without WE, the peoples' consent, it becomes obvious they are lying to us.

To show the apathy of Texas State legislators, one representative was asked about the possible United Nations occupation of America and Texas in part-icular. His reply: It's a federal matter, don't bother me.

The Y2K crisis is to be the catalyst that allows President Bill Clinton to call a "national emergency" with the result- ant calling of Martial Law. With Military Law in force, ALL Constitutional guaran-tees and the Bill of Rights will be swept away. This crisis is exactly what has been planned since 1887 by the Socialists.

The 33rd degree Freemasons who have been hand picked to understand the "mysteries" of world government have a motto as to how they will achieve world government - out of chaos will come order. They are the ones - the Illuminati/High Freemasons - that have laid down long-range plans to fulfill their "master's" will - Satan the devil.

Anyone would have to be deft, dumb and blind OR an agenda working for world government that would deny there is a CONSPIRACY at work to overthrow every nation on earth. IT IS CALLED COMMUNISM! It is an historical fact that Communism has gobbled up 40% of the land territory on earth. NOT ONE COUNTRY HAS COME OUT FROM THE IRON GRIP OF COMMUNISM, even though the mass news media has led millions to believe those people are now free and Communism is dead.

V. I. Lenin, first butcher of Communism said: "First, we will take Eastern Europe, then the masses of Asia, then we will surround the United States, and it will fall like a ripe fruit into our hands." Has the United States been surrounded, even infiltrated from within, to help prepare for the fall?

All evidence says YES! The United States is the targeted nation - that's why we make treaties and KEEP them in spite of the Communist world's violation of them. The COUNT DOWN IS NEAR ZERO AMERIKA!!!

Sincerely,

David J. Smith

Who wants a cloudwarmer, you moron. You took a licking from Lenny
K2IVX, who lives in your neighborhood. Lenny was running barefoot,
using a G5RV, and it was kickass time for you.

So take your cloudwarmer, turn it sideways and stick it where the sun
don't shine, for a dumb ass like you, and I know you won't comprehend,
up your anus!!. You and it, are losers!!

gotchagoat 2000

Well Doc, not that I'm partial but N2BUB (Larry) is one of the few on the net
that say exactly what's on his mind. Him and I have spoke several times and he
doesn't always go in for the "conspiracy" crap.
I have heard Larry make personal attacks, we all have (made them), but I
cannot say that I've heard him slam races or religions. Like I said he's one of
the few that will say what he thinks and not "follow the line".
I didn't hear what he had to say about you but maybe it was peer presure. LOL

Well, they sure made alot of changes that make manifest the League's inability to advance beyond 1987.

It's still one of the most expensive 95 percent black and white publications other than medical and law journals.

They added ads up front in a couple of "cute" places like the Signal One ad in the editorial area. They changed a font or two. Added bars to the top of the article areas.

They added a worthless QRP column (good if you're on so many meds your blood pressure won't soar as you try to work anyone... of course this doesn't apply to those with good antennas).

They hid their novice column under the guise of some advanced sounding name (Like calling the entry license a "technician" when they're often the most clueless hams).

Maybe they added a few more ads in the back, I didn't even bther looking.

Like the poll http://www.arrl.org says, "What new QST ?"

They're deluding themselves.

ARRL has on their website a statement such as that one.

I'm not attacking their claim; I'm attacking the hams who make it a untruth.

It took a decade for these old poops to drop the analog back up dials and trust their digital dials.

It took the same 1983-1993 period for most of the tube final rigs to head into the closet where they belong, with the Polaroid cameras.

Now, I purchased a DSP radio... after listening to al the bitching over the past 4 years or more. I think it's great... oh no, it'd be much better to listen to all the garbage my neighbor's computer collection generates. It'd be better to isten to white noise than have to caerefully adjust the dsp to eliminate that noise and it's associated fatigue.

Of course, if you're a fart who doesn't read the instructions, you'll adjust the audio on a dsp rig into oblivion... but the almost universal bitching I'm hearing takes me back a decade to the frequency obsession and the "transistors can't take the SWR, I don't trust the fold-back circuitry" obsession.

One day it's, "the FBI believes there will be 15 terrorist attacks worldwide". They arrest an Algerian with said intentions and lose another suspect into the night.

Literally the next day, the AP Wire reports that there's no such problem.

One day the ARRL says the Coast Guard and FEMA are asking for ham's assistance. If they were so sure there was nothing wrong, they wouldn't be asking for that. If you're sure, you just don't bother.

The next day Clinton says there is 98 percent computer readiness. Then you sit back and say "that two percent can screw up the other 98 percent that are fixed."

"It's a network, stupid."

The sky is not falling (maybe just the Space Needle), but there will be problems. It's inevitable. They may be funny. Maybe not.

Yes, they are kludges, Daniel.

But don't take offense; it's partly politics. My repeater will be owned by the town emergency management / ARES. They're expecting something that "looks" the part, as well as does the job. They'd even prefer something that's familiar to the local commercial radio shop for them to repair if necessary.

I've heard great thing about the 'ol Mastr II's. 73 Dave W1DAY

"We" need the name of the woman so she can have her security clearance
revoked and tried for violation of same.

"We" need the name of the doctor so s/he/it can be barred from the practice
of medicine for breaking the confidential doctor-patient relationship.

And "we", of course already have your name and your admission of spreading
classified information.

Me thinks that makes you a traitor, BoyLloyd.

You're obviously a pawn of the New World Order working as a change agent for
your masters at the United Nations.

Was it that same doctor who claimed that the irreversible damage to what is
left of your brain is ten times worse than anyone has yet imagined?

Is it also true that you - instead of being labeled a "rumor monger" have
claimed the title of "ru-whore monger"?

Ah, yes, Lloyd the Bottomfeeder, feeding off scum and trying to pass it on.

Gray

Calvin: These are interesting times.

>or as NEARLY parallel as possible.

That second element, the reflector, is really not needed -- the ground can take it's place. The traditional NVIS antenna is just a low-mounted dipole. It's greatest benefit is that it provides local and regional comms at HF, areas which would normally be in the "skip zone" if a higher-mounted dipole was used. State and county civil defense agencies in Hawaii utilize it on 80 and 40 meters for state- and county-wide comms. The late Stan Harter of California OES wrote an informative 3-4 page article on it's use for intra-state RACES comms.

Merry Christ-Mass,
Jeff KH6O, Oahu County Civil Defense RACES

The only reason why the Long Island loser got a better signal than I the other day was because my Cloudwarmer reflector was ON THE GROUND. I discovered it today and it must have been that way for at least a week. Everything's back in place and anytime anyone using a wire antenna wants to compete, let me know. If I could have beaten out the Great Guernsey , with his monstrous signal, into Europe, I'll do a number on anyone. My CLOUDWARMER wasn't voted the best wire antenna in North America by an independent reserach organization for nothing. IT EARNED IT and you're jealous as all hell!

That W3KE maggot is a disgrace to this country. Last night on 3.950 I heard him blowing his guts out on the topic of how undesirable is integration, especially in the military. How lousy it was when he served in 1954 and how even TODAY there should be no Black officers but rather just Black troops serving UNDER WHITE OFFICERS. That lousy fat slob! How fast he would take a transfusion from a black man if his life depended on it! Dammit, I hate white extremists and Gene Breech is a prime example. Imagine...he would deny military advancement to a higher rank if a man were of color! And this is almost 2000? This is the goodness and mercy and compassion Christ talked about? This type of talk a few days before Christmas represents peace on earth, good will to ALL men? And this W3KE maggot feels his WHITE CHRISTIANITY has it over other religions and other races? On several occasions the fool has told me, in a most bigoted way, that I must convert and become what he is. To that, Gene Breech, I say UP YOURS. You are nothing but a disgrace to the ideals set forth in Christian theology and you are a disgrace to what America is all about. To think of all the blood shed by non-white Americans in battle to save your fat ass is staggering. Under the earth all over the earth lie the remains of men of color, whom you hate, who died so that you can have a platform to preach racial superiority? Gene, why the hell do you continue to give ham radio and this country a bad name? Why don't you just shut your stupid, arrogant ignorant mouth or simply keel over and die? No wonder Riley is aggravated over 3.950 and I hope he comes to realize that any frequency manned by you or your fanged cohorts is antagonisitc to good amateur procedure and should be CLOSED DOWN. You hate Blacks and Jews and gays and immigrants? Shut up on ham radio and stick your two cents in on the Internet but then again, why show everyone just how damn dumb you are by grasping for the vocabulary of a third grader? You post nothing here because you are too stupid and know it; you'd rather become a mini Hitler on ham radio which doesn't really require intelligence, only a big mouth. I'm sick of you W3KE and I probabaly speak for many many others. Why don't you just pack up and get the hell out of the United States? We can get along beautifully WITHOUT you! Punk!

I must inform the users of this group that Lloyd Davies is right about this he is speaking the truth, I know becuase I work for the government and its all true. Lloyd you finally got it right except one thing. Ground ZERO is Athens, Alabama, yes its true Lloyd you are living right smack in the middle of what has been designated as the primary target. First our plan is will take the flying purple elephants, thats right Lloyd its the FLYING PURPLE ELEPHANTS and were going to load them with peanuts and a large amount of green vegetables followed by a cocktail of milk of magnesia and metamucil. We will fly at dawn and bomb Athens non-stop. The next stage is a massive ground force of 6,000 40 foot orange gorillas. Their primary goal will be to locate all of the racist white male anti-government types like you and to crush them with their large orange genitals...so beware Lloyd beware......

I must inform the users of this group that Lloyd Davies is right about this he is speaking the truth, I know becuase I work for the government and its all true. Lloyd you finally got it right except one thing. Ground ZERO is Athens, Alabama, yes its true Lloyd you are living right smack in the middle of what has been designated as the primary target. First our plan is will take the flying purple elephants, thats right Lloyd its the FLYING PURPLE ELEPHANTS and were going to load them with peanuts and a large amount of green vegetables followed by a cocktail of milk of magnesia and metamucil. We will fly at dawn and bomb Athens non-stop. The next stage is a massive ground force of 6,000 40 foot orange gorillas. Their primary goal will be to locate all of the racist white male anti-government types like you and to crush them with their large orange genitals...so beware Lloyd beware......

Gentlemen,

I propose a question....What IF Lloyd is right and you are wrong? I'm reminded of another era when thousands, perhaps millions, thought an "old fool" named Noah was off his rocker yet the Bible tells us in Matthew 24:39, "And KNEW NOT until the flood came, and took them all away; so shall also the coming of the Son of man be." (emphasis mine)

Just food for thought. Has the government ever lied to us before?

He might be and even if I'm wrong, I'm skeptical about his stability. While minding my won business this afternoon during a QSO on 14.310 with WB8FIH, "Tarzan" broke in to tell me I was splattering onto .313. I finished talking to Paul and went on .313 to see if my adjustments had made a difference but upon asking the pharamceutical plumber for a reading, he came back with, "I'm not on good terms with you." And to top it off, some intelligent well meaning guys came in with, "You were not wide." I don't get it-the fool measured me as being 3.4 kHz wide on one side but didn't have the time to measure after I tried to improve? THIS IS BLATANT HARASSMENT AND EXPLAINS WHY I PAID NO HEED TO THE PERSONS COMPLAINING I WAS WIDE RIGHT BEFORE I GOT THE LETTER FROM RILEY. W9XV is symbolic of the duds who pose as hams, and Extras yet! And to boot he comes out with the fact that Tom, KE9RY, is no friend of mine but only tolerates me. Who the hell is this guy to speak for another ham? Tom and I ironed everything out and I am positive he knows without a doubt that I never said anything to disparage his late daughter and that he had taken a remark out of context which then was embellished by Polly and company in order to create a gigantic problem. The truth is that Tom and I are indeed friends and a more sincere person I'll never find on ham radio or the Internet. I apologized to him for posting embarrassing stuff about him on wreck.radio and CASE CLOSED. Now Jack Tarzan of the Apes wants to drive a wedge. My advice for you Jack is to go munch on some of Lloyd Montcalm's bananas and go cheetah yourself.

i'd appreciate it if you'd take it back out ;-)
i own a maggiore, the r-1 uhf sans controller.
i use an ff-800 controller.
the maggiore sounds better than anything i've used.
the rx is coolio too although one of my users did buy
an arr preamp to go on it.

300mw anywhere in town.

the local club bought a modified ge mastr 2 and when it worked it
was ok, but nowhere near imho what their new 2m r-1 sounds like =]

just my thoughts, i like it all....

What exactly do you mean by "as you try to work anyone"? I worked all states (less Hawaii) with a NorCal 40a into a dipole in about 6 months of casual operating. I ran it mobile on a trip from Detroit to Chicago and filled a page in the logbook. Thats 2 watts on 40m into a fiberglass whip. QRP is probably the fastest growing interest in the hobby today. What about that is worthless? Unless I'm mistaken you've had a few other negative comments about QRP in the past, for the life of me I can't figure out why would you prefer everyone run the legal limit?

Tim

Surplus sales of Nebraska had them, do a search on the web for their URL. I'd send it but I dumped it a while back. They have a nice on-line parts page. Go to the waffer switch section. There is one place there that says Heathkit bandswitches. I only needed the Tank circuit switch. If they are out, you may check with Harbach in Fla.

No Charlie, the individual that you were referring to was not me, I suggest that you call the FCC and ask Mr. Hollingsworth for the name of the individual. You stated that I was reading credit reports and I must say that you once again are incorrect. For one to obtain credit information on another, one must first give consent for the receiving party to have such information. Failure to have consent and to obtain ones credit information illegally would be a serious problem. Actually it would be a violation of , The Fair Credit Reporting Act, and would be punishable. The fine for obtaining illegal credit reports is somewhere in the 50,000 dollar per offense.

I did read a police report where Jimmy Dale, KE4TEW was arrested for trafficing drugs, and I did read the police report where his son was named in the police report as the individual that robbed his fathers home. I also read the police reports on WB2OTK where he was arrested for shoplifting at K-MART in Greenville, and I also read the report where he had action of foreclosure brought against him and I did read the report where he had passed those bad checks to Albertsons food store and the report where he shafted the individual in Jacksonville and Mr. Keener went to the state attorney and had charges filed that resulted in a criminal felony warrant for his arrest, which by the way is still in effect today.

I can assure you that there is nothing illegal about reading these or any other public document over ham radio. You can read anything that you like as long as you are in communications with another station and that you follow proper operating skills and procedures in doing so.

Charles, one of the lessons that you should have learned long ago is to be more careful about the friends that you associate with. Oh, and by the way, I heard you tell everyone the truth about your education today, you should have never lied about that long ago and you should have never made up that lie about WB9BCC being awarded the MEDAL OF HONOR. Had you been more truthful the FBI would not have asked you those questions about that bogus claim.

Convince your friends to join the ARRL. Take a stand and let your voice be heard.
If you think just because you have a license, your voice is any louder, get a grip. It's like having a drivers license and thinking just because you do, you can change the driving laws. Only through numbers will things happen. If you don't like league policy, then change the policy through the system.

Sitting on your ass, griping and moaning is typical of those who don't do, but simply whine about those who are doing.

Join the ARRL and start speaking with a united voice for change, whatever that change may be. Vote for things, send your letters. But get involved.

Thank you PBGHSH!!

I talked to my good friend POLLY today. He said to pass on his regards to you.

As far as the "Morons", AB4D, KC4JBO, AF2Y, etc, (POLLYS WORDS), he is content to throw out a "bone" to the cretins to watch them "feed".

As the president of his large fan club, I talk to "The great one" every day. I can assure you that he gets a great pleasure tweaking the noses of the simple minds who are displeasured about the demise of their "MASTER", WB2OTK, Richard "PORKBUTT" Whiten.

He told me to pass along his best wishes to you and wish you a good holiday season,and a very happy new year.

As far as his detracters are concerned, he wishes them the regulation bag of ashes. To be delivered by Santa and dumped on their stupid heads!!

>and trust their digital dials.

I just got my ham ticket a few months ago, but I got started in radio 33 years ago as an SWL. Back then I used a receiver with an analog dial, of course. I'm particularly fond of listening to HF utility stations, especially military. I was never particularly fond of trying to tune an analog dial to the exact frequency of a utility station that was not actually transmitting at the time I was parking the receiver there in the hopes of catching the station I was after when it did finally begin transmitting.

The digital dial, to me, was a godsend. If I want to monitor the USCG's primary daytime safety of flight channel, I park the rig on 8983.0 Khz. When someone starts transmitting there, I hear it, period. *Trust* the digital dial? I'd hate to have to be *without* a digital dial again!

>It took the same 1983-1993 period for most of the tube final rigs to
>head into the closet where they belong, with the Polaroid cameras.

I managed to catch two hamfests this summer, and saw a lot of tube radios for sale, many of them Heathkits. A lot of them were sold. I myself almost bought a Heathkit 6m AM/SSM rig. It would have gotten me on 6m for a lot less money than I'd have to spend to get there with available alternatives - the guy only wanted $150 for it. If I get another chance at such a rig at another ham fest and happen to have an extra $150 on me, that radio is coming home with me. It's a huge boat anchor and I'll have to rearrange half my shack to fit it in here, but it's coming home with me and will become the centerpiece of my shack. Rest assured I will not place asterisks in my logbook next to the QSOs that are made with it rather than a solid state rig. :-)

>Now, I purchased a DSP radio... after listening to al the bitching over
>the past 4 years or more. I think it's great... oh no, it'd be much
>better to listen to all the garbage my neighbor's computer collection
>generates. It'd be better to isten to white noise than have to
>caerefully adjust the dsp to eliminate that noise and it's associated

>fatigue.

I bought an add-on DPS unit this past summer for one of my SWL receivers. The noise reduction definitely results in my leaving the radio on a quiet frequency for a lot longer than I used to do without noise reduction. However, the thing I like most about the DSP box that I have is that I do a lot of listening to SSB signals in the maritime bands, where there is also a lot of RTTY present. There's nothing quite like having a pair of manually tunable notch filters at your fingertips so that when there is RTTY in your SSB signal, you notch the mark and space tones and go ahead and copy your SSB stations. The DSP cost me as much as the receiver did, but worth every penny.

>Of course, if you're a fart who doesn't read the instructions, you'll
>adjust the audio on a dsp rig into oblivion... but the almost universal
>bitching I'm hearing takes me back a decade to the frequency obsession
>and the "transistors can't take the SWR, I don't trust the fold-back
>circuitry" obsession.

Well, I don't know where this bitching is coming from, I'm only subscribed to one of the three NGs you posted your message to and I haven't heard much complaining in rrap about technological advances in the ARS and in fact most people in this newsgroup seem to support such advances. However....

I've never read the entire manual to my DSP box. I read enough of it to make sure I'd connect a proper power source without blowing the thing up in my face, and I read the part on how to save the settings to one of the memories so that the settings could be recalled easily. I didn't need a manual for the rest, my ears are sufficient to tell me when I've gone too far with the noise reduction and lost so much audio that I can't copy the station I'm listening to anymore, and my ears also were sufficient to tell me that the dual notch filters can also be adjusted so that they act as either: adjustable high reject/low reject filter, band-stop filter, band-pass filter, or even two frequency-independent variable band-pass filters in parallel.

Now naturally I had some idea of what the DSP controls were supposed to accomplish before I started playing with the unit - that's why I bought it in the first place. However, I would expect that anyone complaining about DSP would at least read enough of the manuals for their radios to learn which button to push to turn the DSP off if they are that irritated by it. No law says that just because you have it means that you must use it. There's a button on my DSP unit that bypasses DSP, usually mine's bypassed. Until, that is, there is RTTY in my SSB signal, or a het on an AM signal I want to listen to, or buzzing sounds caused my by neighbor's computer (or my own!), or something else that would increase my enjoyment of the hobby by going away. Then I'll punch that DSP button and remove the unwanted noise.

Anybody who'd rather try to dig an SSB signal out of QRM from a RTTY station a few KHz up is welcome to go right ahead and do so. Me, I'll

notch the RTTY tones, put my feet up, and enjoy the hassle-free copy, because I do radio for enjoyment. If I want something to bitch about, I'll read a newspaper, or remove Dick Carroll from my kill file. :-)

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help
curb the growing problem of online stalking, a U.S. Justice Department
report recommends. Internet service providers, which link users to
e-mail and the World Wide Web, report a growing number of complaints
about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

Merry Christ-Mass,
Jeff KH6O

<<Excuse me Jeff but "llgpt" is stalking no one either on or off line. He is a
private investigator; a resident of Vero Beach, the home of snivelling KT4TR
who has become the worst of the worst on ham radio, and is offering specific
info which illustrates the phoniness of the fruit grower. He has never
threatened Youngblood on or off line and will not. Lowell Bergman, formerly of
CBS, gathered enough info to allow Jeffrey Wigant to go on 60 Minutes and
eventually blow the cigarette industry away,costing them $245,000,000 in
settlements to the families of cigarette related fatalities. "Llgpt" is a ham
radio Bergman.>>

A well reasoned reply. How refreshing.

The only thing I might say is that as you spent most of the past 3 decades listening, you are different. 75 percent of hams, you know, are more concerned with endlessly flapping their gums.

Thus, they never learn how to use the tools their radios give them properly, such as DSP.

We are a distinct minority.

You can't work them if you don't hear them.

5731. Wanted:Scan delay "fix" for Pro-29

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-22 00:00:00 UTC
From: rainbee <rainbee@home.com>
Message-ID: <01bf4c99$57095580$a2118d18@aptiva.hala1.on.wave.home.com>
Source record: 124643

Its billed as automatic scan delay with no button to turn it off or on. The 2 second delay makes monitoring trunked freq's pretty tiring. Any suggestions for a permanent fix(other than discarding) would be greatly appreciated!

'Ole FATASS KC8JBO is still up to his QRMing tricks.

Last night, (12/21/99) LARDO was saying something about the yard size of W4FQF for 30 minutes non stop. HEY KC8JBO, use a 'lil differen't QRMing "voice" next time!!!!!

I sent a tape of this to Holingsworth this morning. Lets all work together to get WIDEASS off the air, FOR GOOD.

Looks like KC8JBO has not learned how to stop JAMMING....Even after being found GUILTY by the FCC, he is still QRMing. How much longer will I have to smack you around with my rolled up newspaper, FATBOY?

Here are a few sites about KC8JBO's QRMing pal, AF2Y.

http://www.angelfire.com/vt/kc1zq/
http://www.homestead.com/kc1zq/kc1zq.html
http://www.angelfire.com/vt/af2y/

Kickin' KC8JBO up a few notches,

PITBULL

I do not have web access for the next two weeks. I'm sitting in a one-horse town in Nevada with an email-only shell account, telnetting to my Hawaii shell account. So whatever references you gave me are useless until my return to the 50th state in January. Why not just repost the alleged "untruth" here?

Jeff KH6O/7 in Minden, NV, where it's 24 degrees outside.

P.S. Yes, the county library here is supposed to have web access, but for the last three days I've been told "We're sorry, but the internet is down right now due to too many on-line Christmas shoppers."

Small-town dorks.

Well my biggest beef with QST is with its product reviews. QST is very careful not to offend its advertisers by publishing a very bad review.

When is the last time you saw a REALLY BAD review of a new Rig made by Yaesu, Kenwood or Icom?? Yes, they sometimes point out some weaknesses but after you buy the rig you really find out that it is a piece of junk.

There is also a lot of equipment made by smaller companies for QRP, SSTV etc. But how often do you see a review for equipment made by these smaller companies (who generally do NOT advertise in QST)?

QST appears to give preferential treatment to its advertisers.

This problem is not unique to QST. ANYTIME you publish articles and reviews on equipment that is advertised in the same magazine, you will have this type of conflict!

THAT IS WHY I LIKE CONSUMER REPORTS -- no advertising conflicts. Too bad Consumer Reports don't review Ham radio equipment!

I would gladly pay a little more for my ARRL membership to have an AD FREE QST with truly informative and critical product reviews.

I have not seen a Yaesu, Kenwood or Icom that I would characterize as "a piece of junk," Rob. IMHO, QST Product Reviews should not say "this rig is a piece of junk," but should honestly characterize the rigs performance across a wide range of its operation and let you decide from that characterization whether it suits your needs. I personally know of the viewpoint of manufacturers who are not always pleased with what is said about their radios. The largest adverstiser in QST is probably MJF -- the criticisms of their products have been, IMHO, presented fairly. If you feel otherwise, perhaps you could offer a few examples of reviews that you do not feel were impartial. What was said that was not correct? What was not said that should have been said? What should have been said differently? I will forward any such comments to Joe Bottiglieri, AA1GW, the Product Review editor.

> There is also a lot of equipment made by smaller companies for QRP, SSTV
> etc. But how often do you see a review for equipment made by these smaller
> companies (who generally do NOT advertise in QST)?

Could you share some examples of such products that you would like to see reviewed? I look through the list of Product Reviews at http://www.arrl.org/tis/info/prodrev.html and see plenty of equipment that is not heavily advertised. Most of the rigs of interest to hams are advertised in one or more of the ham magazines. Product Review does have a goal that every major piece of equipment should be featured in the column. A fair number of QRP rigs have made it too, and more yet in a QST article published in a "Review" sort of way -- "Low-Power Transceiver Kits You Can Build", June, 1996. Units that are not of interest to most hams probably will not be reviewed. Would you be surprised that units that are not advertised widely are not of interest to most hams?

> QST appears to give preferential treatment to its advertisers.

Not in my experience, as I see the Product Review staff working hard to write a balanced presentation. They should, IMHO, be fair to manufacturers -- Amateur Radio does not benefit if a manufacturer is

harmed without cause, but I see no preference given here as we discuss
how to address a problem found in print.

> This problem is not unique to QST. ANYTIME you publish articles and reviews
> on equipment that is advertised in the same magazine, you will have this
> type of conflict!

> THAT IS WHY I LIKE CONSUMER REPORTS -- no advertising conflicts. Too bad
> Consumer Reports don't review Ham radio equipment!

I like Consumer Reports, too.

> I would gladly pay a little more for my ARRL membership to have an AD FREE
> QST with truly informative and critical product reviews.

I subscribe to a number of magazines as much for the ads as the
content. I think most hams appreciate seeing ads. And, without
advertising, it would NOT be "a little more," QST membership would
probably cost about $50 a year, for a while, then go up as the number of
members dropped due to the high cost of membership.

If you truly believe that Product Reviews are biased, ask the ARRL
Advertising Manager, John Bee, n1gnv@arrl.org, if the thinks Product
Reviews give preferential treatment to QST advertisers. Ask a QST
advertiser; the answer will surprise you. :-)

I have forsale the following. All are like new or are new. I keep all my equipment in top condition which is the way I want to purchase used gear. All will be in the boxes with all manuals, etc. These items, if unsold will be at the Richmond Virginia Frostfest on January 16th in Richmond, VA. Hope to see you there.

ALS-600 Amplifier 800.00 plus shipping (Will consider a trade toward an TS-870S/AT if you have one.)
Kenwood TM-261A 150.00 plus shipping
Diawa CN-460 SWR/PWR meter 80.00 plus shipping
Cushcraft R7000 with the 80 meter kit. 225.00 (will not ship, must be bought locally)
MFJ-418 Code tutor 60.00 plus shipping

I recently changed my call back to my old K4OW, so please respond to that address if you have me listed otherwise.

If you can still find some, use some glyptol. It is like a red high voltage varnish. Clean off the area where it is arcing. Hopefully there is no carbon track built up. Put on several layers. Let it dry between layers.

First I will say that I find the reviews one of the most useful parts of
QST. I cannot think of a major item of commercial equipment that I have
purchased without first looking at the QST review. There were instances
where I also looked at a review in other magazines of the same item.
There was no question that the QST review was more thorough and provided
more real lab data.
That said, I can remember over the years seeing some reviews where the
text did not live up to the lab measurements. While nothing was hidden
I think it is a diservice to the reader to include a measurement such as
only 20DB down from peak for transmitted third order products and then
make no mention that this is simply nowhere near the standards of
performance for a typical rig. If I could find the specific I would but
there are probably 30 years worth of QST in the house.
73
John
BTW I hate magazine layouts with colored text on colored backgrounds.
The loss in contrast makes for significantly lower readability.

Hi Ed,

I see you responded to my previous posting that I later corrected. It was posted accidentally. I never meant to be that overly critical of the ARRL. You will see another posting that more accurately reflects my views.

I agree that most gear from ICOM, YAESU, KENWOOD is NOT junk. But I have had lemons. But lemons are just that - lemons. The majority of the same equipment made by the manufacturer actually works as designed.

The ARRL Labs does a great job testing various pieces of hardware. I don't ever question whether ARRL labs actually obtained the performance numbers that are published in QST. But I wonder whether a typical HAM who buys the same piece of equipment off the shelf will obtain the same performance numbers.

It is my understanding that various manufacturers send to ARRL rig's and other pieces of equipment to be tested and reviewed by the ARRL. Sometimes if the rig etc doesn't work as specified, it is my understanding that the ARRL may get another improved rig or piece of hardware DIRECTLY from the manufacturer. The manufacturer will obviously try to send to ARRL the best tuned rig, or other piece of equipment. Consequently, I tend to get a little sceptical of the performance figures (e.g. intercept points etc) obtained by the ARRL labs. They may not reflect the performance of the same piece of equipment bought off the shelf.

I suggest that you use the same technique that CONSUMER REPORTS uses -- ARRL should go out to one of the retailers and buy the rig (or other piece of equipment) off the shelf! (Perhaps ARRL now does this. I apologise if I am misinformed)

Yes, I did read the 1996 article comparing various QRP rigs. The article was excellent! But that article is fairly old now. After doing some research, there are a lot more small companies that make interesting QRP rigs (either in kit form or ready built). I would encourage ARRL to update this article and perhaps include some more manufacturers (who make kits or ready built gear).

I especially liked that 1996 QRP article since it COMPARED the various rigs in the SAME article. I would strongly encourage ARRL to write more articles (eg similar articles comparing HF (100 and 200 watts) rigs currently being sold even if the ARRL did a separate review on one of the rigs and the design of the rig is fairly old now. If the rig is still being sold its fair game).

Yes, I can point out some items of GENERAL interest that are not very often reviewed in QST. There are various software programs and hardware interfaces for SSTV, and some of the new digital modes like PSK31. Some of these are excellent! (E.g. Logger FREEWARE program for PSK31). For many of these programs, all you need is a computer with a sound card. You don't need any special hardware.

There are also lots of excellent LOGGING and contesting programs. Many are FREEWARE. In my view, a lot of this software is of GENERAL INTEREST to Hams. A lot of Hams use logging programs and contesting programs. I am also sure that many Hams would also love to try SSTV, PSK31 etc after reading how easy (and inexpensive) it is.

Most people find out about these SSTV, PSK31, LOGGING, CONTESTING, SATELLITE etc programs by talking to other Hams. QST is usually not that informative.

A lot of these programs are FREEWARE. I have seen some reviews on FREEWARE programs inside a column but I can't recall ever seeing a separate review (like the one QST recently did for the MSCAN SSTV SHAREWARE software). A lot of the FREEWARE programs are professionally done and feature rich and deserving of a separate and complete review. In my view, some of the FREEWARE programs for SSTV, PSK31, Logging etc are even better than the SHAREWARE and other commercial programs available.

Better yet, ARRL should consider publishing articles comparing the various SSTV programs available (either shareware or freeware), the various PSK31 programs, the various LOGGING programs, the various contesting programs etc. ARRL would provide a great service in publishing such articles. Many Hams do not have the time to try out all the various SSTV, PSK31, LOGGING and contesting programs.

It would appear that the ARRL lab is not that involved with software reviews. It is my understanding that QST typically waits for Hams to write such articles on software. If that is the case, perhaps I should be quiet and write one of these articles myself!

Ed,

You cannot take things so literally. Evidently Rob has a problem, not QST. I personally like the reviews and don't particularly care if they are scathing. I want the facts and then I will try the radio myself and make a decision based on personal feeling.

The ARRL and QST aren't everything to all people and lord knows I have had my go rounds with them in the past. But that didn't stop me from becoming an ARRL VE, lifetime member last year and I'm 55, and helping with nets and other things.

The ARRL isn't everything, but it's better than letting the government run free over us hams.

Thanks for listening.

I don't know...I have never known him to lie.

There are times, however, that he says things just to "tweak" people. You can't blame him because there are so many loonies on this group who take this stuff seriously that sometimes it's hard to resist making everyone go crazy just so you can sit back and watch and have fun.

I can't imagine mature adults hearing something on the radio and then wasting otherwise productive time just trying to disprove it, and then acting like anyone but their own group of mental midgets gives a damn...but this group is full of those types and it can be fun to watch them, as I and others are doing, along with throwing a little stone at the crazy dogs every once in a while just to watch them strain at the end of their leashes. That's probably what Polly is doing and having a pretty good laugh....I know I am!

FYI, like many others in this group, I only use a "screen name" because it would be very embarassing for anyone who knows me to know that I actually participate in this. There is one moron in here that posted an IP lookup on me, and probably believes that it is really expository. Actually, he is so dumb that he needed help from someone else just to do something that I could train a chimp to do in five minutes. These people don't have the mental, physical, or financial wherewithal to mess with me or many others on this group, but if an acquaintance for which I had an ounce of respect knew I was on here, I would feel quite bad. That's the reason for the PBGone name, aside from its obvious potential to make some of the more unbalanced particpants "pull on the ol' leash".

It's a BLAST!!!!!

73 and Happy Holidays de PBGone!

That second element, the reflector, is really not needed -- the ground
can take it's place. The traditional NVIS antenna is just a low-mounted
dipole. It's greatest benefit is that it provides local and regional
comms at HF, areas which would normally be in the "skip zone" if a
higher-mounted dipole was used. State and county civil defense agencies
in Hawaii utilize it on 80 and 40 meters for state- and county-wide
comms. The late Stan Harter of California OES wrote an informative
3-4 page article on it's use for intra-state RACES comms.

Merry Christ-Mass,
Jeff KH6O, Oahu County Civil Defense RACES

<<Although I have not seen literature on the CLOUDWARMER, from a pragmatic
standpoint I have seen how excellent it is for both nationwide as well as DX
contacts and the reflector makes all the difference in the world. And I was
told by an ex-gyrene who read my post that it's being used by the USMC EXACTLY
as I use it. If you use a low dipole and your soil is less than moist, you'll
lose most of your RF and hear zilch in return. Test it out.>>

I forgot to point out an interesting series of graphs in the ARRL's
Antenna Book (10th edition). The Book shows a series of radiation
patterns for an half-wave dipole at various elevations (measured
in wavelengths). A dipole becomes a perfect NVIS "cloud warmer"
when it's mounted 1/4 wavelength above the ground. Again, no need
for a second element; just use the ground as your reflector!

<<That's as silly as telling a vertical user to use the ground as a reflector.
The ground ABSORBS RF, doesn't reflect it. If your theory were true, then
radials would never be needed on a vertical. And if the vert. is raised to a

ground plane, the four standard 1/4 wave radials wouldn't be necessary. In order for any antenna to work properly, it must MINIMIZE GROUND LOSS, not enhance it. If you put up a dipole and place a reflector beneath it, RF that would ordinarily seek ground is RERADIATED in FORCE AT HIGH ANGLES UPWARD! Try putting up any dipole at 1/4 wave versus one at 1/2 wave. Are you telling me the 1/4 waver will work better for even close up stations than the 1/2 waver? Impossible because of GROUND LOSS. Jeff, if you do NOT use a beam, put up a Cloudwarmer and see what happens. You are surrounded by the Pacific Ocean and will therefore produce a BLAST OF RF all over the world. Believe me, it's a stupendous antenna.

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help curb the growing problem of online stalking, a U.S. Justice Department report recommends. Internet service providers, which link users to e-mail and the World Wide Web, report a growing number of complaints about harassing and threatening behavior online, the report said.

Ground loses only affect the low angle lobes; with the dipole at
1/4 wavelength above ground, there are NO low angle lobes, only
one large lobe orientated straight up. If you want to argue, do
so with the editors of the ARRL Antenna Book, 10th edition.

With a vertical, ground radials could be replaced by driving a
copper rod into the earth and attaching the rod to the antenna
in place of the radials.

I just came across this today, from Harlow's "Old Wires and New Waves"
(a history of landline and wireless telegraphy): "...Morse about
this time (April 1844) reports finding that he could use the earth for
a return circuit, and that the ground and one wire worked better than
two wires." And thus, Doc, the nation-wide telegraph line that ran
from the East Coast to the West Coast was *one* single wire; the
second conductor was earth ground. Amazing, eh? (Yes, yes, this
is DC and above we're discussing AC at RF.)

Now be a good Doc and go read your antenna books. That second element
is *not* necessary! =:o

Doc, the radials are themselves radiating elements, not "reflectors."
To see this, visualize the following: Let's suppose we have a 1/4 wave
ground plane antenna; now, mentally, fold/bend the radials down until
their tips meet -- what do you have? A half wave dipole; the radials
have now become the other half of a dipole. In their normal configur-
ation, the antenna has an impedance of around 50 ohms; folded/bent
down, the antenna now has an impedance of about 75 ohms. Again, the
radials are not reflectors but radiators.

I wish you'd fix your news-reader so that text you quote will be
preceded by the usual indentation marks: ">". Your reader is suppose
to automatically append those marks (just as my reader did to your
comments above). Maybe another AOL user can assist you with
reconfiguring your reader.

I see you don't like my comment on colored text. You are entitled to
your opinion as I am to mine. I judge boring by content - not
typography. Color has its place as an aid to communication such as
photographs and drawings. It is an excellent means to make construction
details clearer. If color is used simply for color it is too easy to
overdo it and distract - not aid - from readability. Good graphics
design standards usually say to limit the number of colors used on ona
page (or WEB page).

Administrative, OK.

As long as Herb's testimony before the FCC remains less than candid, I don't believe he'll get anywhere. It was surely less than candid in the criminal trial, and he ran with that same testimony from there.

Had he taken a deep breath, confessed to his de minimus sin of fooling around with Calls and played it straight with the FCC, he wouldn't be in this mess with his ham license.

Sure, he can argue a lack of equal protection and other legal niceties but that isn't gonna get him very far. Truth is, the FCC has broad discretion to regulate which won't be upset by a judicial court.

Remember, fellow hams, I championed Herb's rights vis-a-vie an out-of-control government during the criminal process. Nonetheless, the government's misconduct doesn't excuse Herb from his culpability nor the requirement of candor he continues to circumvent.

The FCC is correct to insist on honesty in its processes!!!!!!!!!!

Not as long as I prefer to remain cancer-free.

The legal limit should be 100 watts. With large antennas, more sensitive gear than the 1970's and 1980's, DSP, and the like, 1500 watts is, among other things, probably a health hazard.

Even with wires, if the damned amplifier "arms race" the contesters at ARRL started was ended by regulation, everyone would be able to have an equal crack at the contact.

Are you going to believe the ARRL, who went bonkers when FCC decided everyone running (I think 50 watts) had to do a station check ? I think ARRL might be a little biased on the side of "no, it's not dangerous", don't you ?

Face it, folks, the government never wants to admit to anything that will harm you, if it affects commerce. If they admit to a need for a radiation survey, and issue guidelines, you know it's ten times worse.

So no, Tim, I think the legal limit is a lot of BS for those who need to JS their stations with as much electronic crap as they can in order to feel like men.

5788. DOES ANYONE CARE ANYMORE? >>>>>>>>>>>>>>>>>>>>

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-23 00:00:00 UTC
From: rich7@my-deja.com
Message-ID: <83rqgf$g10$1@nnrp1.deja.com>
Source record: 124586

Can you imagine working at the following Company? It has a little over
500 employees with the following statistics:

29 have been accused of spousal abuse
7 have been arrested for fraud
19 have been accused of writing bad checks
117 have bankrupted at least two business
3 have been arrested for assault
71 cannot get a credit card due to bad credit
14 have been arrested on drug-related charges
8 have been arrested for shoplifting
21 are current defendants in lawsuits
84 were stopped for drunk driving
CAN YOU GUESS WHICH ORGANIZATION THIS IS? GIVE UP?

It's the 535 members of your United States Congress. The same group
that perpetually cranks out hundreds upon hundreds of new laws designed
to keep the rest of us in line. CAN YOU SAY FCC!

You are quite accurate here, they're reviews are spineless, carbon
copies of each other.

Not to mention geared toward the 2 meter CBer.

>
> I have not seen a Yaesu, Kenwood or Icom that I would characterize as "a

Hams don't appreciate seeing ads. Everyone I hear on 75 complains.
You're doing it again. A ham near you up there once told me told me to
be sure to puut my hip waders on when you guys reply.

The ARRL is out of touch. If you want ads, you go to the company
website. That's how I saw the Icom IC-756 PRO 3 months before any of
your advertisers ran one (has Icom even BOTHERED with QST yet ?).

All of the links ARRL puts in QST are yesterday's news... even the ones
on the Members' site aren't anything to new.

Further, you guys are bashing Kenwood at the behest of your Yaesu loving contesting superiors. They have had a bug up their ass since Kenwood dared to try to expand the world's knowledge of ham radio by selling them in retail stores, not the little illegal monopoly ARRL created over the past 40 years.

The contesting drips warped it into a truck stop free-for-all.

Show me why you can't send HF audio over 2 if it's controlled on 440.

Aren't you guys the same bunch of ham radio liberals who say that if a tech transmits on 2 and comes down on 10 or goes out on 29.6 it's legal ?

Why, because it'll sell more Yaesus ?

Or maybe because K5FUV will need to write new rules to stop remote stations from being used by their own contest peers...

I will answer this in four parts, I am compelled not to bother, but because your mentality amuses me I will entertain the group

1. I don't currently own an Drake L4-B, the last one I had was sold at Manassas in 1998. So your post about this is a LIE.

2 I don't know or have ever talked to WB2OTK although I did read about him in QST. So again another LIE.

3. I have never transmitted on 14.313, prove otherwise.
Another LIE

3. Your just pissed because I did prove that your MASTER, W4FQF is a liar and lied on the air to other amateurs, for what reason who knows, maybe to bolister his self esteem, I can see why you worship your master, a liar that worships a liar, how nice.

When you can actually prove that I did something illegal come back and talk to me like a man, don't be scared and hide behind some anonymous screen name.

I may not agree with him, but I do have some level of respect for N0vfp because at least he has enough credibility to post his real call to the group.

It seems that you change your name quit often, maybe your next name should be chickenshit@deja.com.

Have a great holiday season.73

Hi I wanted to know if there is a way to modify my old
vacuum tube volt meter to measure RF voltages.
I have concidered using a probe and an op-amp in a linear fashion
such as 100X and so on. I'd prefer not to reinvent the wheel.

--
My meter's low range is 5 V
Did I see an article somewhere on this ? thankyou guynice9@aol.com

Sure can. But it will be relative, unless you have a accurate RF
output source to calibrate the meter movement.

I assume your refering to using it as a test instrument. Simply get a
old probe and put a diode in it. As I recollect you also need a
resistor of some sort. Which will change the reading and can be used
to set the calibration. Put the meter in the DC voltage position and
probe away. Check in the handbook, it may have a "real" circuit.

<< > And, You are a ham radio rectum, who supports "STALKERS". I hope Mr Youngblood files a complaint with the FBI against you, "MORON" JEFF is telling it like it is and warning your stupid ass.
gotchagoat 2000 >>
<<Excuse me Polly, but it simply tit for tat. You thought it was perfectly okay for Youngblood to sit there day after day and read all sorts of confidential reports and memos and such because THEY SERVED YOUR PURPOSE. It works two ways. HE is now under SCRUTINY, under a microscope so to speak. KT4TR has made a LOT of enemies, me included. There is no harassment, no stalking and no libel. What's written here cannot be disseminated on ham radio because of Riley Hollingsworth and had Riley been given the job sooner, he would have nipped KT4TR's ham radio blasphemy in the bud at the outset. Furthermore Polly I have a Christmas surprise coming YOUR way. Keep your eye on rec.radio and I'm sure you'll like what's coming up. You ain't seen nuthin' yet and be sure to have a Merry Christmas and give my best to your woof..oops, I mean wife.

Is it possible that Bob Youngblood,KT4TR, is operating a bogus coffee import company? I'm jusy asking, not accusing and whom, pray tell is Yvonne Devlin? Why did Mr. Youngblood list his address as Orlando with a Vero Beach address? Hmmmmm? Did he file documents with the State of Florida fraudulently or was it just a slip of the pen or a typo? I ask because KT4TR always demanded THE TRUTH,THE TRUTH AND NOTHING BUT THE TRUTH! This just came in from another agent in the Vero Beach area who simply wants to be known as "Inspector Clouseau," a man who performed superbly in a few Pink Panther cases.
Jacques would have posted this himself but couldn't seem to entice his computer to access this live forum.

Is that so, LARDO?

If replying to my posts is such a "colossal waste of time", why do you do it then? I will tell you the answer: It's because I own you, BOY!!!!! Like I have told you in the past.....

When I say "JUMP"
You say "HOW HIGH, MASTER"?

I like when you "break down" my postings line by line....That must take up a lot of your time, hohohoho.

I KNOW that was you QRMing W4FQF 2 nights ago. Hollingsworth should be getting the audio tapes I sent him about your JAMMING in the next few days. KC8JBO will then be off the air FOR GOOD!!!!!!

There is still hope for you.......

You can start a new hobby, such as stamp & coin collecting. I don't know if there is anywhere in your "one horse town" (pop. 1600) to show off your new collection, though. hohohoho

I have started to look into your past about being in the USAF......It's FUNNY why you left there so fast!!!! More about this when I receive the rest of your service info from my USAF source.

So have your QRMing fun while you still can. Hollingsworth will have you off the air IN NO TIME NOW.

KC8JBO ..Soon to join WB2OTK in the HALL OF SHAME.

Kick it up 500 notches,

PITBULL

'Ole Charles is STARTING TO CRACK now......Just one more little push &
he will be IN THE PSYCH WARD, hohohoho. Get the "rubber room" ready,
here comes AF2Y!!!!!

DOC NOT HOME
DOC NOT HOME

Of course not..... He is in the NUT HOUSE.

Maybe WB2OTK can sneak AF2Y a file so 'ole Charles can saw away the
bars in the RUBBER ROOM.....Put the file in a jug of your Amway carpet
cleaner, PORKBUT hohohoho.

Best of 2000 to W4FQF, KT4TR, K3QAM (& Misty)
